

**As MassDOT prepares South Station for expansion, we invite you to consider other landmark railway stations from around the world. The images here show the many ways in which trains stations can be recreated to become destinations in their own right as well as vital transportation hubs.**

# Enjoy the Ride!

**Many of these stations were built at the end of the 19th century, just as South Station was. In addition to continuing to play vital transportation functions, many of these stations now include shopping centers, hotels, connections to other transportation services, gardens, public amenities, and opportunities for entertainment.**
