DEPARTMENT OF ENERGY RESOURCES

*Helping Massachusetts
Cities and Towns Create
a Clean, Affordable and
Resilient Energy Future*

Benefits of Being a Green Community

- CUT MUNICIPAL ENERGY COSTS
- ACCESS GRANTS FOR CLEAN, AFFORDABLE AND RESILIENT ENERGY PROJECTS
- REDUCE GREENHOUSE GAS EMISSIONS
- PROMOTE ENERGY-EFFICIENT BUILDING CONSTRUCTION
- FOSTER RENEWABLE ENERGY AND CLEAN ENERGY TECHNOLOGIES
- BECOME A CLEAN ENERGY LEADER AND A BETTER PLACE TO LIVE, WORK AND PLAY

The Green Communities Division provides...

- **Local support** from Regional Coordinators
- **Education** on benefits of energy efficiency and renewable energy
- **Guidance and technical assistance** for all of your energy questions and projects
- **Funding opportunities** for clean energy projects

DOER's Green Communities Division

The Green Communities Division offers a full range of energy initiatives and services to cities and towns. Contact your Regional Coordinator for more information.

Regional Coordinators — Four Green Community Regional Coordinators throughout the state offer technical assistance and support to public officials and local energy committees.

Green Communities Designation and Grant Program — In accordance with the Green Communities Act, up to \$20 million per year is available for qualifying communities to implement energy-efficiency measures, construct renewable energy projects, or pursue other avenues to reduce their fossil fuel energy consumption. The Division has awarded over \$145 million to designated Green Communities since 2010.

Municipal Energy Technical Assistance (META) Grants — Grants are offered once a year by the Green Communities Division. All municipalities, regional school districts, and water/wastewater districts, were invited to apply for funds to support clean energy projects at public facilities. These include feasibility studies for zero-net energy construction, engineering studies, and assistance with solar PV development.

Municipal Energy Efficiency — DOER collaborates with electric and gas utilities to administer energy efficiency services to local and regional government entities. We also provide educational materials to help plan and implement all types of municipal energy efficiency projects, including streetlights, vehicles, water/sewer facilities, and buildings.

MassEnergyInsight — Offered at no cost to all cities and towns, MassEnergyInsight (MEI) is an easy-to-use, web-based tool that benchmarks the energy performance of all municipally owned and operated buildings, as well as streetlights and vehicles.

Energy Management Services Technical Assistance — Energy management services (EMS) can be an effective tool for cities and towns looking to implement significant energy savings measures without upfront capital. EMS is a type of performance contracting through which guaranteed energy savings pay for the cost of installing the energy efficiency measures.
