Observations and Recommendations

1. The inmate population was 113 at the time of inspection.
2. Hot water temperature range for handwash sinks is 110⁰F to 130⁰F.
3. During the COVID-19 pandemic there have been several changes made to the conduct of inspections for the CSP, one of those changes made include reducing the amount of time CSP inspectors spend at one facility during an inspection. During the most recent inspection of your facility the CSP conducted an abbreviated inspection of your facility focusing on those areas that have historically shown up on past reports as well as areas of high concern for health and safety. The focused inspection was conducted in an effort to reduce COVID-19 exposure to facility staff, inmates and CSP inspectors, because of this, the inspection report is significantly shortened. We hope to return to standard inspectional procedures soon.

This facility does not comply with the Department's Regulations cited above. In accordance with 105 CMR 451.404, please submit a plan of correction within 10 working days of receipt of this notice, indicating the specific corrective steps to be taken, a timetable for such steps, and the date by which correction will be achieved. The plan should be signed by the Superintendent or Administrator and submitted to my attention, at the address listed above.
