

# PFC Ralph T. Basiliere Bridge Replacement

## What is happening?

The Private First Class (PFC) Ralph T. Basiliere Bridge, though safe for all users, has reached the end of its useful lifespan and must be replaced. MassDOT will hold a public information meeting to introduce the replacement project to the Haverhill community, providing attendees with an opportunity to become fully acquainted with the scope of the project, the means by which MassDOT intends to replace the bridge, and ways in which interested community members can participate in the public process.

## How will this affect you?

Over the next six months, MassDOT's design team will work with the Haverhill community to determine the type of bridge to replace the existing Basiliere, how the new bridge should look, and other major structural elements such as bicycle and pedestrian connections and lane configuration.
