Sumner Tunnel

3

Sumner Tunnel Restoration Project reached substantially complete status on October 7th.

The schedule allowed for an additional five weekend closures that would have continued into mid-November but are no longer required.

Remaining work will be finished under normal off-peak operations and will wrap up in the next few weeks.

By the Numbers-

- **13,516** square yards of concrete roadway was rehabilitated
- **4,307** tons of asphalt paving was laid
- **420** linear feet of granite curbing was replaced
- **69** new drainage inlets were installed
- **16,5000** square feet of fireboard was installed
- **735** precast arch segments and **146** precast ceiling slabs were installed
- **502** new light fixtures installed
- **42,800** linear feet of conductor installed
- **24,000** linear feet of fiber optic cable installed
