Request for an Amendment to a §1915(c) Home and Community-Based Services Waiver

	I. Request Information							
A.	The State of Massachuse	requests approval for an amendment to the following						
	Medicaid home and commu Social Security Act.	nity-based services waiver approved under authority of §1915(c) of the						
В.	Waiver Title (optional):	Community Living Waiver						
C.	CMS Waiver Number: MA.0826							
D.	Amendment Number (Assi	gned by CMS):						
E.1	Proposed Effective Date:	9/1/24						
E.2	Approved Effective Date (CMS Use):						
	II	Purpose(s) of Amendment						

Purpose(s) of the Amendment. Describe the purpose(s) of the amendment:

We are proposing to increase the current spending limit of \$70,000 to \$100,000 to accommodate existing and future waiver service rate increases.

III. Nature of the Amendment

A. Component(s) of the Approved Waiver Affected by the Amendment. This amendment affects the following component(s) of the approved waiver. Revisions to the affected subsection(s) of these component(s) are being submitted concurrently (check each that applies):

	Component of the Approved Waiver	Subsection(s)
Χ	Waiver Application	Brief Waiver Description
	Appendix A – Waiver Administration and Operation	
	Appendix B – Participant Access and Eligibility	
Χ	Appendix C – Participant Services	C-4
	Appendix D – Participant Centered Service Planning and Delivery	
	Appendix E – Participant Direction of Services	
	Appendix F – Participant Rights	
	Appendix G – Participant Safeguards	
	Appendix I – Financial Accountability	
	Appendix J – Cost-Neutrality Demonstration	

	Modi	fy target group(s)							
	Modi	fy Medicaid eligibility							
	Add/c	lelete services							
	Revis	e service specifications							
	Revis	e provider qualifications							
	Increa	ase/decrease number of participants							
	Revise cost neutrality demonstration								
	Add participant-direction of services								
Х	Other (specify):								
	Increa	ase waiver service spending limits							
ervic	es to i	Care. This waiver is requested in order to provide home and community-based waive individuals who, but for the provision of such services, would require the following level(secosts of which would be reimbursed under the approved Medicaid state plan (check each that							
X	Ho	spital (select applicable level of care)							
	X	Hospital as defined in 42 CFR §440.10							
		If applicable, specify whether the state additionally limits the waiver to subcategories of the hospital level of care:							
		Chronic and Rehabilitation Hospital Level of Care.							
	0	Inpatient psychiatric facility for individuals under age 21 as provided in 42 CFR \S 440.160							
X	Nu	rsing Facility (select applicable level of care)							
	X	Nursing Facility as defined in 42 CFR §440.40 and 42 CFR §440.155							
		If applicable, specify whether the state additionally limits the waiver to subcategories of the nursing facility level of care:							
	0	Institution for Mental Disease for persons with mental illnesses aged 65 and older as provided in 42 CFR §440.140							
		ermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) (as ined in 42 CFR §440.150)							
	If a	pplicable, specify whether the state additionally limits the waiver to subcategories of the I/IID facility level of care:							
		·							

B. Nature of the Amendment. Indicate the nature of the changes to the waiver that are proposed in the

amendment (check each that applies):

G. Concurrent Operation with Other Programs. This waiver operates concurrently with another program (or programs) approved under the following authorities **Select one:** X Not applicable O **Applicable** Check the applicable authority or authorities: Services furnished under the provisions of §1915(a)(1)(a) of the Act and described in Appendix I Waiver(s) authorized under §1915(b) of the Act. Specify the $\S1915(b)$ waiver program and indicate whether a $\S1915(b)$ waiver application has been submitted or previously approved: Specify the §1915(b) authorities under which this program operates (check each that applies): §1915(b)(1) (mandated enrollment to §1915(b)(3) (employ cost savings to furnish additional services) managed care) §1915(b)(2) (central broker) §1915(b)(4) (selective contracting/limit number of providers) A program operated under §1932(a) of the Act. Specify the nature of the state plan benefit and indicate whether the state plan amendment has been submitted or previously approved: A program authorized under §1915(i) of the Act.

H. Dual Eligibility for Medicaid and Medicare.

Specify the program:

Check if applicable:

X	This waiver provides services for individuals who are eligible for both Medicare and
	Medicaid.

A program authorized under §1915(j) of the Act.

A program authorized under §1115 of the Act.

2. Brief Waiver Description

Brief Waiver Description. *In one page or less*, briefly describe the purpose of the waiver, including its goals, objectives, organizational structure (e.g., the roles of state, local and other entities), and service delivery methods.

The purpose of the Community Living Waiver is to provide services to adults with an intellectual disability age 22 and over who receive a moderate level of assistance and either live on their own in a home or in their family home and who meet the level of care for an ICF-ID. These individuals require less than 24 hours a day of support. These individuals may have challenging behavior, or they have returned home from a placement, or the family/caregiver may need significant help to provide direct physical assistance to assure the health and safety of the individual, or the individual has moderate level of functional limitations resulting in the need for more regular support and supervision, or the individual may have medical issues requiring close monitoring and/or treatment. Without the Community Living waiver services individuals would be at a moderate risk for residential habilitation or institutionalization in an Intermediate Care Facility for the Intellectually Disabled. For individuals who live outside of the family home, these services are necessary due to a lack of adequate natural supports or a sufficient array of community services to support their health and welfare in the community. For individuals who reside with their families the waiver will provide for a level of support to assist the individual to acquire the skills necessary to work and access the community or to provide substantial assistance to the family/caregiver to allow the individual to remain at home. Through the coordination of natural supports, Medicaid services, generic community resources and the services available in this Waiver, waiver participants are able to live successfully in the community. The Community Living Waiver has a prospective budget limit of \$100,000.

Goal:

The goal of this Waiver is to provide support to participants in their communities to obviate the need for restrictive institutional care.

Organizational Structure:

The Department of Developmental Services (DDS, or "the Department"), the state agency within the Executive Office of Health and Human Services responsible for providing supports to adults with intellectual disabilities, is the lead agency tasked with the day-to-day operation of this waiver. The Executive Office of Health and Human Services, the single State Medicaid Agency, through MassHealth, oversees the Department's operation of the waiver. The Department is organized into four geographical Regional Offices with 23 Area Offices assigned to the regions. Intake and Eligibility into the system occurs at the regional level through a dedicated group of Waiver Eligibility Teams. These teams collect information and conduct assessments to determine if the individual meets DDS eligibility criteria. If determined eligible, individuals are assigned to the Area Office nearest the city or town where they live. The Area Office builds on the information and assessments collected during the eligibility process to determine prioritization for services, service needs and funding level.

Service Delivery:

DDS operates as an Organized Health Care Delivery System, directly providing some of the services available through this waiver and contracting with other qualified providers for the provision of other services. Services may be participant directed, or purchased through either a Fiscal Employer Agent/Fiscal Management Service or through an Agency with Choice Model.

Services may also be delivered through the traditional provider based system. Participants may choose both the model of service delivery and the provider. The Department of Developmental Services makes payments to providers through the Meditech claims processing system. DDS's payments are validated through the state's approved MMIS system through which units of service, approved rates and member eligibility are processed and verified.

Based on language approved in the Appendix K amendment associated with this waiver, due to the COVID pandemic, a quality review report has not been finalized for the previous waiver cycle. Additionally, 372 reports due during the emergency have not been submitted. Upon expiration of the Appendix K amendment, Massachusetts will gather and submit any outstanding 372 reports as quickly as the required information can be gathered and analyzed. If necessary, the state will submit waiver amendments based on identified deficiencies in the quality review report and/or 372 report(s) within a timeframe between 90 days and up to 6-months (to be negotiated with the state) of receiving the final quality review report and 372 report acceptance decision.

3. Components of the Waiver Request

The waiver application consists of the following components. Note: <u>Item 3-E must be completed.</u>

- **A.** Waiver Administration and Operation. Appendix A specifies the administrative and operational structure of this waiver.
- **B.** Participant Access and Eligibility. Appendix B specifies the target group(s) of individuals who are served in this waiver, the number of participants that the state expects to serve during each year that the waiver is in effect, applicable Medicaid eligibility and post-eligibility (if applicable) requirements, and procedures for the evaluation and reevaluation of level of care.
- **C. Participant Services. Appendix C** specifies the home and community-based waiver services that are furnished through the waiver, including applicable limitations on such services.
- **D.** Participant-Centered Service Planning and Delivery. Appendix D specifies the procedures and methods that the state uses to develop, implement and monitor the participant-centered service plan (of care).
- **E.** Participant-Direction of Services. When the state provides for participant direction of services, **Appendix E** specifies the participant direction opportunities that are offered in the waiver and the supports that are available to participants who direct their services. (Select one):

	þ	Yes. This waiver provides participant direction opportunities. Appendix E is required.									
ſ	0	No.	This	waiver	does	not	provide	participant	direction	opportunities.	
ı		Appe	ndix E i	s not requi	red.						

- **F.** Participant Rights. Appendix **F** specifies how the state informs participants of their Medicaid Fair Hearing rights and other procedures to address participant grievances and complaints.
- **G.** Participant Safeguards. Appendix G describes the safeguards that the state has established to assure the health and welfare of waiver participants in specified areas.
- H. Quality Improvement Strategy. Appendix H contains the Quality Improvement Strategy for this waiver.
- I. Financial Accountability. Appendix I describes the methods by which the state makes payments for waiver services, ensures the integrity of these payments, and complies with applicable federal requirements concerning payments and federal financial participation.
- J. Cost-Neutrality Demonstration. Appendix J contains the state's demonstration that the waiver is cost-neutral.

4. Waiver(s) Requested

- **A.** Comparability. The state requests a waiver of the requirements contained in §1902(a)(10)(B) of the Act in order to provide the services specified in **Appendix** C that are not otherwise available under the approved Medicaid state plan to individuals who: (a) require the level(s) of care specified in Item 1.F and (b) meet the target group criteria specified in **Appendix B**.
- **B.** Income and Resources for the Medically Needy. Indicate whether the state requests a waiver of \$1902(a)(10)(C)(i)(III) of the Act in order to use institutional income and resource rules for the medically needy (select one):

0	Not Applicable
0	No
þ	Yes

C. Statewideness. Indicate whether the state requests a waiver of the statewideness requirements in §1902(a)(1) of the Act (select one):

þ	No
0	Yes

If yes, specify the waiver of statewideness that is requested (check each that applies):

L	under this waiver only to individuals who reside in the following geographic areas or political subdivisions of the state. Specify the areas to which this waiver applies and, as applicable, the phase-in schedule of the waiver by geographic area:
[Limited Implementation of Participant-Direction . A waiver of statewideness is requested in order to make <i>participant direction of services</i> as specified in Appendix E available only to individuals who reside in the following geographic areas or political subdivisions of the state. Participants who reside in these areas may elect to direct their services as provided by the state or receive comparable services through the service delivery methods that are in effect elsewhere in the state. Specify the areas of the state affected by this waiver and, as applicable, the phase-in schedule of the waiver by geographic area:

5. Assurances

In accordance with 42 CFR §441.302, the state provides the following assurances to CMS:

- **A. Health & Welfare:** The state assures that necessary safeguards have been taken to protect the health and welfare of persons receiving services under this waiver. These safeguards include:
 - 1. As specified in **Appendix C**, adequate standards for all types of providers that provide services under this waiver;
 - 2. Assurance that the standards of any state licensure or certification requirements specified in **Appendix** C are met for services or for individuals furnishing services that are provided under the waiver. The state assures that these requirements are met on the date that the services are furnished; and.
 - 3. Assurance that all facilities subject to §1616(e) of the Act where home and community-based waiver services are provided comply with the applicable state standards for board and care facilities as specified in **Appendix C**.
- **B.** Financial Accountability. The state assures financial accountability for funds expended for home and community-based services and maintains and makes available to the Department of Health and Human Services (including the Office of the Inspector General), the Comptroller General, or other designees, appropriate financial records documenting the cost of services provided under the waiver. Methods of financial accountability are specified in **Appendix I**.
- C. Evaluation of Need: The state assures that it provides for an initial evaluation (and periodic reevaluations, at least annually) of the need for a level of care specified for this waiver, when there is a reasonable indication that an individual might need such services in the near future (one month or less) but for the receipt of home and community-based services under this waiver. The procedures for evaluation and reevaluation of level of care are specified in Appendix B.
- **D.** Choice of Alternatives: The state assures that when an individual is determined to be likely to require the level of care specified for this waiver and is in a target group specified in **Appendix B**, the individual (or, legal representative, if applicable) is:
 - 1. Informed of any feasible alternatives under the waiver; and,
 - 2. Given the choice of either institutional or home and community-based waiver services.

Appendix B specifies the procedures that the state employs to ensure that individuals are informed of feasible alternatives under the waiver and given the choice of institutional or home and community-based waiver services.

- **E.** Average Per Capita Expenditures: The state assures that, for any year that the waiver is in effect, the average per capita expenditures under the waiver will not exceed 100 percent of the average per capita expenditures that would have been made under the Medicaid state plan for the level(s) of care specified for this waiver had the waiver not been granted. Cost-neutrality is demonstrated in **Appendix J**.
- **F.** Actual Total Expenditures: The state assures that the actual total expenditures for home and community-based waiver and other Medicaid services and its claim for FFP in expenditures for the services provided to individuals under the waiver will not, in any year of the waiver period, exceed 100 percent of the amount that would be incurred in the absence of the waiver by the state's Medicaid program for these individuals in the institutional setting(s) specified for this waiver.
- **G. Institutionalization Absent Waiver:** The state assures that, absent the waiver, individuals served in the waiver would receive the appropriate type of Medicaid-funded institutional care for the level of care specified for this waiver.
- **H. Reporting:** The state assures that annually it will provide CMS with information concerning the impact of the waiver on the type, amount and cost of services provided under the Medicaid state plan and on the health and welfare of waiver participants. This information will be consistent with a data collection plan designed by CMS.

- I. Habilitation Services. The state assures that prevocational, educational, or supported employment services, or a combination of these services, if provided as habilitation services under the waiver are: (1) not otherwise available to the individual through a local educational agency under the Individuals with Disabilities Education Improvement Act of 2004 (IDEA) or the Rehabilitation Act of 1973; and, (2) furnished as part of expanded habilitation services.
- Services for Individuals with Chronic Mental Illness. The state assures that federal financial participation (FFP) will not be claimed in expenditures for waiver services including, but not limited to, day treatment or partial hospitalization, psychosocial rehabilitation services, and clinic services provided as home and community-based services to individuals with chronic mental illnesses if these individuals, in the absence of a waiver, would be placed in an IMD and are: (1) age 22 to 64; (2) age 65 and older and the state has not included the optional Medicaid benefit cited in 42 CFR §440.140; or (3) age 21 under and the state has not included the optional Medicaid benefit cited in 42 CFR §440.160.

6. Additional Requirements

Note: Item 6-I must be completed.

- **A.** Service Plan. In accordance with 42 CFR §441.301(b)(1)(i), a participant-centered service plan (of care) is developed for each participant employing the procedures specified in **Appendix D**. All waiver services are furnished pursuant to the service plan. The service plan describes: (a) the waiver services that are furnished to the participant, their projected frequency and the type of provider that furnishes each service and (b) the other services (regardless of funding source, including state plan services) and informal supports that complement waiver services in meeting the needs of the participant. The service plan is subject to the approval of the Medicaid agency. Federal financial participation (FFP) is not claimed for waiver services furnished prior to the development of the service plan or for services that are not included in the service plan.
- **B.** Inpatients. In accordance with 42 CFR §441.301(b)(1)(ii), waiver services are not furnished to individuals who are in-patients of a hospital, nursing facility or ICF/IID.
- C. Room and Board. In accordance with 42 CFR §441.310(a)(2), FFP is not claimed for the cost of room and board except when: (a) provided as part of respite services in a facility approved by the state that is not a private residence or (b) claimed as a portion of the rent and food that may be reasonably attributed to an unrelated caregiver who resides in the same household as the participant, as provided in **Appendix I**.
- **D.** Access to Services. The state does not limit or restrict participant access to waiver services except as provided in Appendix C.
- E. Free Choice of Provider. In accordance with 42 CFR §431.151, a participant may select any willing and qualified provider to furnish waiver services included in the service plan unless the state has received approval to limit the number of providers under the provisions of §1915(b) or another provision of the Act.
- **F. FFP Limitation**. In accordance with 42 CFR §433 Subpart D, FFP is not claimed for services when another third-party (e.g., another third party health insurer or other federal or state program) is legally liable and responsible for the provision and payment of the service. FFP also may not be claimed for services that are available without charge, or as free care to the community. Services will not be considered to be without charge, or free care, when (1) the provider establishes a fee schedule for each service available and (2) collects insurance information from all those served (Medicaid, and non-Medicaid), and bills other legally liable third party insurers. Alternatively, if a provider certifies that a particular legally liable third party insurer does not pay for the service(s), the provider may not generate further bills for that insurer for that annual period.
- **G. Fair Hearing:** The state provides the opportunity to request a Fair Hearing under 42 CFR §431 Subpart E, to individuals: (a) who are not given the choice of home and community-based waiver services as an alternative to institutional level of care specified for this waiver; (b) who are denied the service(s) of their choice or the provider(s) of their choice; or (c) whose services are denied, suspended, reduced or terminated. **Appendix F** specifies the state's procedures to provide individuals the opportunity to request a Fair Hearing, including providing notice of action as required in 42 CFR §431.210.
- **H.** Quality Improvement. The state operates a formal, comprehensive system to ensure that the waiver meets the assurances and other requirements contained in this application. Through an ongoing process of discovery, remediation and improvement, the state assures the health and welfare of participants by monitoring: (a) level of care determinations; (b) individual plans and services delivery; (c) provider qualifications; (d) participant health and welfare; (e) financial oversight and (f) administrative oversight of the waiver. The state further assures that all problems identified through its discovery processes are addressed in an appropriate and timely manner, consistent with the severity and nature of the problem. During the period that the waiver is in effect, the state will implement the Quality Improvement Strategy specified throughout the application and in **Appendix H**.

- I. Public Input. Describe how the state secures public input into the development of the waiver:
- J. Notice to Tribal Governments. The state assures that it has notified in writing all federally-recognized Tribal Governments that maintain a primary office and/or majority population within the State of the State's intent to submit a Medicaid waiver request or renewal request to CMS at least 60 days before the anticipated submission date as provided by Presidential Executive Order 13175 of November 6, 2000. Evidence of the applicable notice is available through the Medicaid Agency.
- K. Limited English Proficient Persons. The state assures that it provides meaningful access to waiver services by Limited English Proficient persons in accordance with: (a) Presidential Executive Order 13166 of August 11, 2000 (65 FR 50121) and (b) Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons" (68 FR 47311 August 8, 2003). Appendix B describes how the state assures meaningful access to waiver services by Limited English Proficient persons.

7. Contact Person(s)

A. The Medicaid agency representative with whom CMS should communicate regarding the waiver is:

Last Name:	Bernstein						
First Name:	Amy						
Title:	Director of HCBS Wai	ver Ad	ministrati	on			
Agency:	MassHealth						
Address:	One Ashburton Place						
Address 2:	5 th Floor						
City:	Boston						
State:	Massachusetts						
Zip:	02108						
Phone:	617-573-1751 Ext: \Box TTY						
Fax:	617-573-1894						
E-mail:	Amy.Bernstein@mass.gov						

B. If applicable, the state operating agency representative with whom CMS should communicate regarding the waiver is:

Last Name:	Alavarez						
First Name:	Melissa						
Title:	Director, Waiver Man	agemei	nt Unit				
Agency:	Department of Develo	pmenta	al Service	s			
Address:	1000 Washington Street

Phone:	781-577-8849 Ext: □ TTY						
Fax:	ax:						
E-mail:	Melissa.Alvarez@mass.gov						

8. Authorizing Signature

This document, together with Appendices A through J, constitutes the state's request for a waiver under §1915(c) of the Social Security Act. The state assures that all materials referenced in this waiver application (including standards, licensure and certification requirements) are *readily* available in print or electronic form upon request to CMS through the Medicaid agency or, if applicable, from the operating agency specified in Appendix A. Any proposed changes to the waiver will be submitted by the Medicaid agency to CMS in the form of waiver amendments.

Upon approval by CMS, the waiver application serves as the state's authority to provide home and community-based waiver services to the specified target groups. The state attests that it will abide by all provisions of the approved waiver and will continuously operate the waiver in accordance with the assurances specified in Section 5 and the additional requirements specified in Section 6 of the request.

Attachment #1: Transition Plan

Check the box next to any of the following changes from the current approved waiver. Check all boxes that apply.
Replacing an approved waiver with this waiver.
Combining waivers.
Splitting one waiver into two waivers.
Eliminating a service.
Adding or decreasing an individual cost limit pertaining to eligibility.
Adding or decreasing limits to a service or a set of services, as specified in Appendix C.
Reducing the unduplicated count of participants (Factor C).
Adding new, or decreasing, a limitation on the number of participants served at any point in time.
Making any changes that could result in some participants losing eligibility or being transferred to another waiver under 1915(c) or another Medicaid authority.
Making any changes that could result in reduced services to participants.
Specify the transition plan for the waiver:

State:	
Effective Date	

Attachment #2: Home and Community-Based Settings Waiver Transition Plan

Specify the state's process to bring this waiver into compliance with federal home and community-based (HCB) settings requirements at 42 CFR 441.301(c)(4)-(5), and associated CMS guidance.

Consult with CMS for instructions before completing this item. This field describes the status of a transition process at the point in time of submission. Relevant information in the planning phase will differ from information required to describe attainment of milestones.

To the extent that the state has submitted a statewide HCB settings transition plan to CMS, the description in this field may reference that statewide plan. The narrative in this field must include enough information to demonstrate that this waiver complies with federal HCB settings requirements, including the compliance and transition requirements at 42 CFR 441.301(c)(6), and that this submission is consistent with the portions of the statewide HCB settings transition plan that are germane to this waiver. Quote or summarize germane portions of the statewide HCB settings transition plan as required.

Note that Appendix C-5 <u>HCB Settings</u> describes settings that do not require transition; the settings listed there meet federal HCB setting requirements as of the date of submission. Do not duplicate that information here.

Update this field and Appendix C-5 when submitting a renewal or amendment to this waiver for other purposes. It is not necessary for the state to amend the waiver solely for the purpose of updating this field and Appendix C-5. At the end of the state's HCB settings transition process for this waiver, when all waiver settings meet federal HCB setting requirements, enter "Completed" in this field, and include in Section C-5 the information on all HCB settings in the waiver.

On March 16, 2023, CMS granted Massachusetts final approval of its Statewide Transition Plan to bring settings into compliance with the Community Rule. Massachusetts completed Heightened Scrutiny packages for 25 residential sites operated by two providers that serve HCBS Waiver participants.

Below is the state's response to the Waiver Amendment Informal Request for Additional Information questions received on 1/14/22.

- 1. Please list all waiver services that may be provided via telehealth.
- •Family Training
- •Peer Support
- •Individual Supported Employment

Language has been added to each of the service definitions of the 3 services above: This service may be provided remotely via telehealth based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment as outlined in Appendix D-2-a. This service may be delivered remotely via telehealth 100% of the time. The methods and minimum frequency with which participants will receive face-to-face contact to ensure health and welfare are described in Appendix D-2-a.

- •Individualized Day Supports
- •Individualized Home Supports
- •Group Supported Employment
- •Behavioral Supports and Consultation

Language has been added to each of the service definitions of the 4 services above: This service is primarily delivered in person; telehealth may be used to supplement the scheduled in-person service based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment as outlined in Appendix D-2-a.

State:	
Effective Date	

Assistive Technology

Language has been added to the service definition of the service above: The evaluation and training component of this service may be provided remotely via telehealth based on the professional judgement of the evaluator and the needs, preferences, and goals of the participant as determined during the personcentered planning process and reviewed by the Service Coordinator during each scheduled reassessment as outlined in Appendix D-2-a.

•Home Modifications and Adaptations

Language has been added to the service definition of the service above: The assessment and evaluation component of the home and adaptations service may be provided remotely via telehealth based on the professional judgement of the evaluator and the needs, preferences, and goals of the participant as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment as outlined in Appendix D-2-a.

- 2.Please provide answers to the following questions regarding the waiver services that may be provided via telehealth/remotely.
- a. What is the role of the SMA in ensuring the health and safety of waiver participants in instances when their services are delivered via telehealth/remotely?

DDS and MassHealth have well established processes to ensure the health and safety of waiver participants. The assessment and person-centered planning processes continue to be the mechanisms by which the health and safety of waiver participants are reviewed. This review will ensure that appropriate considerations for waiver participants' health and safety were part of the person-centered planning process and confirm whether the telehealth delivery of service model can meet their needs and ensure health and safety. The review will also ensure that waiver participants' services were delivered in the same amount, frequency, and duration that was identified in the Individual Support Plan (ISP), regardless of the method of service delivery. Appendix D and Appendix G describe the safeguards that the state has established to assure the health and welfare of waiver participants regardless of the service delivery method.

b. What is the percentage of time telehealth/remote will be the delivery method for the service?

Will any in-person visits be required? The participant's ISP will outline which activities or components of services may be provided via telehealth, depending on the service and the needs and preferences of the waiver participant to support inclusion, community integration, and independence. If the participant chooses telehealth service delivery for some combination of services, the person-centered planning team will ensure that the services are appropriate in amount, frequency, and duration as identified in the participant's ISP and that the services adequately meet the participant's needs and goals for independence and community integration. Certain services may be provided in a remote capacity for certain participants whereas other services may be delivered either as a hybrid approach of some remote and some in-person, or fully in-person. Frequency of face-to-face contact with the participant is based on the participant's individual needs and preferences. While this service may be provided via telehealth, it is within the context of regular contact with the Service Coordinator including at least an annual inperson visit. Service Coordinators review progress notes from providers and maintain regular contact with providers of waiver services, which also serve to inform the frequency of direct in-person contact.

State:	
Effective Date	

c. How does the telehealth/remote service help the individual to fully integrate in the community and participate in community activities?

The person-centered planning process helps participants fully integrate in the community and identifies which components of integrated services can best be enhanced through the telehealth means of support, as well as those to be provided in person. In person community activities will continue to be a priority for the participant based on the person-centered planning process. A telehealth service will complement and promote community integration. The ISP team members will identify safeguards that are in place to ensure telehealth modalities do not isolate participants from the community, as well as how team members will ensure community integration. This will also be monitored through service coordination contacts/visits. The participant may also have opportunities for integration in the community via other services which the participant receives which are provided in the community.

Frequency of face-to-face contact with the participant is based on the participant's individual needs and preferences. While this service may be provided via telehealth, it is within the context of regular contact with the Service Coordinator including at least an annual in-person visit. Service Coordinators review progress notes from providers and maintain regular contact with providers of waiver services, which also serve to inform the frequency of direct in-person contact.

d.How will the telehealth/remote service be delivered in a way that respects privacy of the individual especially in instances of toileting, dressing, etc. Are video cameras/monitors permitted in bedrooms and bathrooms? If the state will permit these to be placed in bedrooms and bathrooms, how will the state ensure that this is determined to be necessary on an individual basis and justified in the person-centered service plan?

The video cameras used for telehealth services would not be installed in bedrooms and bathrooms. Provider will not install any video cameras for the provision of any telehealth service. Participants are in control of their own devices and may choose to use that device from any place in their home. They are in control of starting and stopping the video feed on their devices. Telehealth delivery is not utilized for ADL supports. The telehealth supports ensure the participant's rights of privacy, dignity, and respect. The provider must develop, maintain, and enforce written policies, which address how the provider will ensure the participant's rights of privacy, dignity, and respect; how the provider will ensure the telehealth supports used meet applicable information security standards; and how the provider will ensure its provision of telehealth complies with applicable laws governing individuals' right to privacy. Education on cyber safety is available for participants and the need for such training is identified by the person-centered planning team. Participation in such training is not mandatory for participants, but based on assessed need.

e.Does the telehealth/remote service meet HIPAA requirements and is the methodology accepted by the state's HIPAA compliance officer?

Telehealth providers must comply with the requirements of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), as amended by the Health Information Technology for Economic and Clinical Health (HITECH) Act, and their applicable regulations, as well applicable state law, M.G.L. Ch. 66A and M.G.L. Ch. 123B, Section 17, to protect the privacy and security of the participant's protected health information. DDS/EOHHS relies on the providers' independent legal obligation as covered entities and contractual obligations to comply with these requirements. There is not a single state HIPAA compliance officer. This methodology is accepted by DDS and EOHHS officials.

State:	
Effective Date	

Below is the state's response to the Appendix I-2-a questions from the Waiver Renewal Informal RAI Follow-up received on 6/5/18:

In accordance with Massachusetts General Laws (MGL) Chapter 118E, Section 13D Duties of ratemaking authority; criteria for establishing rates, the rates are reviewed every two years. The cost adjustment factor used is from the Massachusetts Consumer Price Index optimistic forecast provided by Global Insight, based on an average for the prospective two-year period during which the rate will apply.

Below is the state's 5/24/18 response to the Appendix I-2-a questions from the Waiver Renewal Informal RAI received on 5/3/18.

Appendix I-2-a: Rate Determination Methods

- 11. The State failed to document or insufficiently documented the rate setting methods for each waiver service. The State references multiple State regulations in this Appendix as the basis for a service rate. For each referenced code, the State must provide a summary of what that code entails with regards to rate setting methodology. For instance, the State uses 101 CMR
- 414.00 as the basis for the "Behavioral Supports and Consultation, Family Training, Peer Support, and Respite Services. The State should provide a brief summary of the rate setting methodology outlined in that State regulation, and each service to which it applies. The State should then do the same for the other 101 CMR references on page 197-198 (including the self-directed services).
- a. Provide the rate model for each service paid using a fee-for-service methodology.

All waiver services in this waiver, including those that reference rates established by state regulation, are paid using a fee-for- service methodology. See descriptions below for additional information.

b. For each service using a rate methodology established by State regulation (101 CMR), the State should provide a brief summary of the rate methodology outlined in the regulation along with the associated services.

For waiver services for which there is a comparable EOHHS Purchase of Service (POS) rate, the waiver service rate was established in POS regulation after public hearing pursuant to state statutory requirements for the development and promulgation of health care services rate regulations that apply to rates for health care services paid for by state agencies. See Massachusetts General Laws (MGL) Chapter 118E, Sections 13C Establishment of rates of payment for health care services and 13D Duties of ratemaking authority; criteria for establishing rates.

- The POS rate used for Behavioral Supports and Consultation (see 101 CMR 414.00: Rates for Family Stabilization Services) was developed by using data from the most recent available UFR and averaging each line item across providers of the service. Specifically, the line items incorporated into this rate analysis are: the salary based on degree level (bachelor, master, and doctorate levels), tax and fringe, other direct costs, and administrative allocation. A cost adjustment factor (CAF) of 2.72% was applied. This analysis also applies to the self-directed service rate maximum for this service.
- The POS rates used for Family Training, Peer Support, and Respite (in the participant's home) (see 101 CMR 414.00: Rates for Family Stabilization Services) were developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care workers and an allocation of director/manager salaries, tax and fringe, other direct costs, and administrative allocation. A cost

State:	
Effective Date	

adjustment factor (CAF) of 2.72% was applied. This analysis also applies to the self-directed service rate maximum for these services.

- The POS rate used for Respite (in the caregiver's home) (see 101 CMR 414.00: Rates for Family Stabilization Services) was developed by using data from the most recent available UFR and averaging each line item across providers of these services.
- Specifically, the line items incorporated into this rate analysis are: stipend level for the caregiver and an allocation of director/manager salaries, tax and fringe, other direct costs, and administrative allocation. A cost adjustment factor (CAF) of 2.72% was applied. This analysis also applies to the self-directed service rate maximum for these services.
 - The POS rate used for Respite (site-based) (see 101 CMR 414.00: Rates for Family Stabilization Services) was developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care workers, nurses, and an allocation of director/manager salaries, tax and fringe, occupancy, other direct costs, and administrative allocation. A cost adjustment factor (CAF) of 2.72% was applied. This analysis also applies to the self-directed service rate maximum for these services.
 - The POS rates used for Community Based Day Supports (set in accordance with 101 CMR 415.00: Rates for Community- Based Day Support Services) were developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care workers, support staff, and an allocation of director/manager salaries, as well as tax and fringe, office space/program location expenses, consultant/temporary help, direct client expense, supplies, other direct expenses and direct administrative expenses, transportation, and administrative allocation. A cost adjustment factor (CAF) of 2.72% was applied.
 - The POS rates used for Group Supported Employment and Individual Supported Employment (set in accordance with 101 CMR 419: Rates for Supported Employment Services) were developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care staff and an allocation of support staff and director/manager salaries, as well as tax and fringe, office space/program location expense, other direct care and program expenses and administrative allocation. In addition, for Individual Supported Employment alone, an allocation of salaries for clinical/medical/specialized consultants was included. A cost adjustment factor (CAF) of 2.72% was applied. This analysis also applies to the self-directed service rate maximum for these services. The POS rate for Day Habilitation Supplement (set in accordance with 101 CMR 424.00: Rates for Certain Developmental and Support Services) was developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care workers and nurses, and tax and fringe. A cost adjustment factor (CAF) of 2.62% was applied.
 - The POS rates for Individualized Home Supports (set in accordance with 101 CMR 423.00:

State:	
Effective Date	

Rates for Certain In-Home Basic Living Supports) were developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of program staff (including direct care staff, cultural facilitator, support navigator, clinical supervisor, community support worker, and counselor) and an allocation of manager salaries, as well as tax and fringe, staff training and mileage, clinical consultant, program support, office space, and administrative allocation. A cost adjustment factor (CAF) of 2.62% was applied. This analysis also applies to the self-directed service rate maximum for these services.

- The POS rates for respite Stabilization (set in accordance with 101 CMR 412.00: Rates for Family Transitional Support Services) were developed by using data from the most recent available UFR and averaging each line item across providers of these services. Specifically, the line items incorporated into this rate analysis are: salaries of direct care workers and an allocation of director/manager and clinical staff salaries, tax and fringe, consultant services, occupancy, other expenses, direct administrative, and staff training, and administrative allocation. A cost adjustment factor (CAF) of 2.62% was applied.

For waiver services for which there is no comparable Medicaid state plan or EOHHS Purchase of Service (POS) rate, the waiver service rate was established in state regulation after public hearing pursuant to state statutory requirements for the development and promulgation of health care services rate regulations that apply to rates for health care services paid for by state agencies.

See Massachusetts General Laws (MGL) Chapter 118E, Sections 13C Establishment of rates of payment for health care services and 13D Duties of ratemaking authority; criteria for establishing rates. This approach applies to rates for Adult Companion and Chore, which are set in accordance with 101 CMR 359.00: Rates for Home and Community Based Services Waivers, and were established based on data for comparable services provided through the Executive Office of Elder Affairs (EOEA) Home Care Program, which is the largest purchaser of these services. The most current data for SFY 2016 was used, and rates were adjusted to the median rate paid for each of these services under the Home Care Program. In developing the rate for Chore services the rates was adjusted to the median after excluding outliers. Outliers were removed for any pricing in the database for Chore services that was 2 standard deviations away from the mean for that service. The exclusion of outliers in the development of the median for Adult Companion, however, was not utilized, as the exclusion yielded a median slightly lower than the previously established rate for Adult Companion, and therefore the previous Adult Companion rate was maintained. The methodology and data sources used in this 2016 analysis were consistent with the method used previously in past analysis. The calculation of the median and exclusion of outliers were performed using SAS statistical software.

- 12. The State provides Assistive Technology, Home Modifications, Individual Goods and Services, Specialized Medical Equipment and Supplies, Transportation (transit passes only) and Vehicle Modifications at the cost of goods sold. The State does not describe whether there is a negotiation process, a maximum allowable cost, or a minimum bid requirement for any of these services.
- a. How does the State maintain oversight over costs paid for Assistive Technology, Home

State:	
Effective Date	

Modifications, Individual Goods and Services, Specialized Medical Equipment and Supplies, Transportation (transit passes only) and Vehicle Modifications?

The waiver services identified above are participant-directed services and are paid using the State's contracted Financial Management Services (FMS), Public Partnerships Limited (PPL). As indicated in Appendix E-2-b-v, PPL utilizes a web-based electronic information system to track and monitor billing and reimbursements and issue monthly reports to DDS. This system also applies strict budgetary limits. The system allows for individual service rates and authorization caps, limits based on waiver type, and incompatible service listings. Payments that do not conform to program rules will be pended and reviewed by DDS and will not be paid without DDS approval. PPL issues payments to authorized providers and individuals upon receipt of accurate paper and electronic invoices.

Goods and services are not paid in full until the appropriate documentation is received, the expenditures are validated, and confirmation is made that the purchased items have been delivered and have met the specifications identified in the participant's individual service plan.

b. Does the State have a negotiation requirement, maximum allowable cost, or minimum number of bids required prior to purchase?

Items under Assistive Technology, Individual Goods and Services, Specialized Medical Equipment and Supplies, and Transportation (transit passes-only) are not subject to negotiation or bidding. The cost of the services is subject to an area office review, and upon approval is compensated at the current market price.

Individual Goods and Services will be subject to the maximum of \$3,000 per participant per waiver year.

As outlined in the service definition, Home Modifications require a minimum of three bids to be included with the service proposal which is submitted to the Area Director and Regional Director for approval prior to commencement of the service. Vehicle Modifications do not require multiple bids, but are subject to the Area and Regional Director approval prior to commencement of the service. Home Modification and Vehicle Modification are each set at a maximum \$15,000 for a five-year period.

Items under Assistive Technology must meet an identified assessed need, must not be available under the State Plan and are subject to the Area Office approval.

Transportation passes are paid at rates established by the Regional Transit Authority.

13. The State failed to document or insufficiently documented how the Medicaid agency solicits public comments on rate determination methods. The State is required by statute to complete a public process when proposing rate changes. The State issues a notice of the proposed rates with

State:	
Effective Date	

an opportunity for the public to provide written comment, and they are required to hold a public hearing to provide opportunity for the public to provide oral comment. The State references MGL Chapter 118E Section 13D and MGL Chapter 30A Section 2 as the basis for their public comment requirements. The State does not describe how the public is made aware of rate updates following a rate change. Describe how the public is informed of a rate change. Does this only happen when the participant is meeting with the service coordinator to develop / review their service plan? EOHHS establishes rates in regulation pursuant to state statutes that set out requirements for the development and promulgation of health care services rate regulations establishing rates to be paid to providers for health care services by state agencies. MGL Chapter 118E, Section 13D (Duties of ratemaking authority; criteria for establishing rates) requires EOHHS to establish rates by regulation after public hearing. MGL Chapter 30A, Section 2 (Regulations requiring hearings) provides the requirements for regulations after public hearing. The requirements for regulations promulgated after public hearing include that there be public notice of the proposed regulation published in a newspaper and in the Massachusetts Register, that the public hearing be held in a specific timeframe, and that there be a separate method to provide written comment. After public hearing, EOHHS considers all public testimony submitted at the hearing and in writing through the written comment period, and makes a final determination of the rates. The final rates are promulgated as part of the final regulation and published in the Massachusetts Register as well as on the EOHHS website.

Information about payment rates is available on the DDS website and is shared by service coordinators with waiver participants at the time of the service planning meeting.

Appendix A: Waiver Administration and Operation

1. State Line of Authority for Waiver Operation. Specify the state line of authority for the operation of the waiver *(select one)*:

X		The waiver is operated by the state Medicaid agency. Specify the Medicaid agency division/unit that has line authority for the operation of the waiver program (<i>select one</i>):		
	0	The Medical Assistance Unit (specify the unit name) (Do not complete Item A-2)		
	X Another division/unit within the state Medicaid agency that is separate from the M			d agency that is separate from the Medical
		Assistance Unit. Specify the division/unit name. This includes administrations/divisions under the umbrella agency that has been identified as the Single State Medicaid Agency. (Complete item A-2-a)	DI to	partment of Developmental Services; While DS is organized under EOHHS and subject its oversight authority, it is a separate ency established by and subject to its own abling legislation.
0	The waiver is operated by a separate agency of the state that is not a division/unit of the Medicaid agency. Specify the division/unit name:			
	In accordance with 42 CFR §431.10, the Medicaid agency exercises administrative discretion in the administration and supervision of the waiver and issues policies, rules and regulations related to the waiver. The interagency agreement or memorandum of understanding that sets forth the authority and arrangements for this policy is available through the Medicaid agency to CMS upon request. (<i>Complete item A-2-b</i>).			

2. Oversight of Performance.

a. Medicaid Director Oversight of Performance When the Waiver is Operated by another Division/Unit within the State Medicaid Agency. When the waiver is operated by another division/administration within the umbrella agency designated as the Single State Medicaid Agency. Specify (a) the functions performed by that division/administration (i.e., the Developmental Disabilities Administration within the Single State Medicaid Agency), (b) the document utilized to outline the roles and responsibilities related to waiver operation, and (c) the methods that are employed by the designated State Medicaid Director (in some instances, the head of umbrella agency) in the oversight of these activities.

a) MassHealth and DDS have entered into an Interagency Service Agreement which outlines the responsibilities of the parties. DDS performs functions related to operation of the waiver, including case management, clinical eligibility determinations, needs assessments, service plan development, service authorization, and reimbursing waiver service providers with which it contracts. DDS will ensure that waiver providers with which it contracts adhere to the contractual obligations imposed on them, will work with the contractors regarding their performance of waiver functions, and will collect and report information on waiver enrollees' utilization and experience with waiver enrollment. b) DDS has entered into an Interagency Service Agreement with MassHealth to document the responsibility for performing and reporting on these functions. c) MassHealth will

State:	
Effective Date	

meet routinely with DDS staff regarding the performance of these activities as well as collect and report data and other information collected from DDS to CMS.

The most recent interagency agreement between MassHealth and DDS for the operation of these waivers was 5/24/22.

- b. Medicaid Agency Oversight of Operating Agency Performance. When the waiver is not operated by the Medicaid agency, specify the functions that are expressly delegated through a memorandum of understanding (MOU) or other written document, and indicate the frequency of review and update for that document. Specify the methods that the Medicaid agency uses to ensure that the operating agency performs its assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify the frequency of Medicaid agency assessment of operating agency performance:
- **3. Use of Contracted Entities.** Specify whether contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable) (select one):
 - X Yes. Contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or operating agency (if applicable). Specify the types of contracted entities and briefly describe the functions that they perform. Complete Items A-5 and A-6.

For those individuals who participate in self-direction, Financial Management Services are furnished as an administrative activity under a contract between the Department of Developmental Services and its Fiscal Employer Agent/Fiscal Management Service (FEA/FMS), Public Partnerships Limited (PPL). The agreement between PPL and DDS provides for a Financial Management Services fee per member per month as well as transaction fees based upon budget authority services.

PPL maintains individual budgets on a management information system and provides financial reports to DDS. PPL executes individual contracts with each participant for Financial Management Services and with the provider of direct services and supports. Through access to the online PPL portal, participants can review specific line items identifying the disbursements and remaining budget. Service Coordinators can also provide this information to participants as needed.

O No. Contracted entities do not perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable).

State:	
Effective Date	

4. Role of Local/Regional Non-State Entities. Indicate whether local or regional non-state entities perform waiver operational and administrative functions and, if so, specify the type of entity (*Select one*):

X	Not applicable	
0		plicable - Local/regional non-state agencies perform waiver operational and administrative ctions. Check each that applies:
		Local/Regional non-state public agencies conduct waiver operational and administrative functions at the local or regional level. There is an interagency agreement or memorandum of understanding between the Medicaid agency and/or the operating agency (when authorized by the Medicaid agency) and each local/regional non-state agency that sets forth the responsibilities and performance requirements of the local/regional agency. The interagency agreement or memorandum of understanding is available through the Medicaid agency or the operating agency (if applicable). <i>Specify the nature of these agencies and complete items A-5 and A-6:</i>
		Local/Regional non-governmental non-state entities conduct waiver operational and administrative functions at the local or regional level. There is a contract between the Medicaid agency and/or the operating agency (when authorized by the Medicaid agency) and each local/regional non-state entity that sets forth the responsibilities and performance requirements of the local/regional entity. The contract(s) under which private entities conduct waiver operational functions are available to CMS upon request through the Medicaid agency or the operating agency (if applicable). <i>Specify the nature of these entities and complete items A-5 and A-6</i> :

5. Responsibility for Assessment of Performance of Contracted and/or Local/Regional Non-State Entities. Specify the state agency or agencies responsible for assessing the performance of contracted and/or local/regional non-state entities in conducting waiver operational and administrative functions:

DDS is responsible for assessing the performance of the contracted entities.

6. Assessment Methods and Frequency. Describe the methods that are used to assess the performance of contracted and/or local/regional non-state entities to ensure that they perform assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify how frequently the performance of contracted and/or local/regional non-state entities is assessed:

The Department of Developmental Services is responsible under its competitive procurement and negotiated contract to manage the performance of the FEA/FMS. The Department has established performance metrics and requires the FEA/FMS to meet them and has established a process of remediation if they do not achieve them. These benchmarks and required reports are reviewed in regular meetings. Between these meetings there is ongoing contact with the FEA/FMS to address any issues that might arise. Assessment is ongoing.

The FEA/FMS maintains individual budgets on a management information system and provides weekly financial reports to DDS. Invoices contain specific line items identifying the disbursements made on behalf of participants. FEA/FMS reports reconcile expenditures for a participant with that participant's approved budget. Participants can access and monitor their individual budget through the FEA/FMS online portal and from their service coordinator.

State:	
Effective Date	

The FEA/FMS configures data to produce reports of performance measures, and to develop a unified format both for utilization and financial reporting and reporting pursuant to the Real Lives Statute. The Real Lives Statute, Chapter 255 of the Acts of 2014, codified at Massachusetts General Law Chapter 19B, Section 19, was enacted to further enhance participant direction within the Commonwealth of Massachusetts and DDS. The FEA/FMS is responsible for providing data and reports for DDS QA measures and waiver assurances. The Department includes individuals using the FEA/FMS in its National Core Indicator Consumer Sample.

The FEA/FMS executes Provider Agreements on behalf of the Department and only does so for individuals engaged in self-direction. The FEA/FMS maintains an approved provider list which it regularly scans and updates for changes in provider qualifications. DDS reviews providers' credentials as they are onboarded for additional oversight. For additional descriptions please refer to Appendix E.

The Department of Developmental Services (DDS) is responsible for assessing the performance of contracted agencies, such as the FMS. DDS has established performance standards which the FEA/FMS are required to meet. DDS holds monthly monitoring meetings with the FEA/FMS to review these standards and address business process issues. DDS also makes ad hoc contact with the FEA/FMS whenever issues arise outside of these regularly scheduled times.

7. Distribution of Waiver Operational and Administrative Functions. In the following table, specify the entity or entities that have responsibility for conducting each of the waiver operational and administrative functions listed (*check each that applies*):

In accordance with 42 CFR §431.10, when the Medicaid agency does not directly conduct a function, it supervises the performance of the function and establishes and/or approves policies that affect the function. All functions not performed directly by the Medicaid agency must be delegated in writing and monitored by the Medicaid Agency. Note: More than one box may be checked per item. Ensure that Medicaid is checked when the Single State Medicaid Agency (1) conducts the function directly; (2) supervises the delegated function; and/or (3) establishes and/or approves policies related to the function.

Quality Improvement: Administrative Authority of the Single State Medicaid Agency

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Administrative Authority

The Medicaid Agency retains ultimate administrative authority and responsibility for the operation of the waiver program by exercising oversight of the performance of waiver functions by other state and local/regional non-state agencies (if appropriate) and contracted entities..

i Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Performance measures for administrative authority should not duplicate measures found in other appendices of the waiver application. As necessary and applicable, performance measures should focus on:

- Uniformity of development/execution of provider agreements throughout all geographic areas covered by the waiver
- Equitable distribution of waiver openings in all geographic areas covered by the waiver
- Compliance with HCB settings requirements and other new regulatory components (for waiver actions submitted on or after March 17, 2014).

Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

ii	If applicable, in the textbox below provide any necessary additional information on the strategies employed by the state to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the state's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The State Medicaid agency is responsible for ensuring effective oversight of the waiver program, including administrative and operational functions performed by DDS. In the event problems are discovered with the management of the waiver program processes at waiver service providers or DDS Area Offices, DDS and MassHealth are responsible for ensuring that a corrective action plan is created, approved, and implemented within appropriate timelines. Further, MassHealth and DDS are responsible for identifying and analyzing trends related to the operation of the waiver and determining strategies to address quality- related issues.

Appendix B: Participant Access and Eligibility

Appendix B-1: Specification of the Waiver Target Group(s)

a. Target Group(s). Under the waiver of Section 1902(a)(10)(B) of the Act, the state limits waiver services to a group or subgroups of individuals. In accordance with 42 CFR §441.301(b)(6), select one waiver target group, check each subgroup in the selected target group that may receive services under the waiver, and specify the minimum and maximum (if any) age of individuals served in each subgroup:

SELECT				MAXIMU	JM AGE
ONE				MAXIMUM	
WAIVER				AGE LIMIT:	No
TARGET			MINIMUM	THROUGH AGE	Maximum
GROUP		TARGET GROUP/SUBGROUP	AGE	_	AGE LIMIT
	Age	d or Disabled, or Both - General			
		Aged (age 65 and older)			
		Disabled (Physical)			
		Disabled (Other)			
	Age	d or Disabled, or Both - Specific Recog	nized Subgroup	OS	
		Brain Injury			
		HIV/AIDS			
		Medically Fragile			
		Technology Dependent			
X	Intel	llectual Disability or Developmental Di	sability, or Botl	h	
		Autism			
		Developmental Disability			
	X	Intellectual Disability	22		X
	Mental Illness (check each that applies)				
		Mental Illness			
		Serious Emotional Disturbance			

b. Additional Criteria. The state further specifies its target group(s) as follows:

Participants age 22 and older with an intellectual disability as defined by DDS who meet the ICF-ID level of care and who are determined through an assessment process to require Community Living Supports due to a moderate level of assessed need. These individuals live with family or in a setting with assistance, which is less than 24 hours/7 days per week of support and supervision to avoid institutionalization. These individuals are not at serious risk for out of home placement but their need for supervision and support cannot be met by the level of services that are available in the Adult Supports Waiver. Their health and welfare needs can be met in either the family home or in the community through community living supports. Individuals must be able to be safely served within the terms of the Waiver. Individuals who are authorized to receive Behavior Modification interventions classified as Level III interventions (as defined in 115 CMR 5.14) are not enrolled in the waiver. Additionally, individuals enrolled in the waiver may not receive services in provider settings in which the provider is authorized to provide and/or perform Level III interventions. An

Appendix B-3: Number of Individuals Served

a. Unduplicated Number of Participants. The following table specifies the maximum number of unduplicated participants who are served in each year that the waiver is in effect. The state will submit a waiver amendment to CMS to modify the number of participants specified for any year(s), including when a modification is necessary due to legislative appropriation or another reason. The number of unduplicated participants specified in this table is basis for the cost-neutrality calculations in Appendix J:

Table: B-3-a		
Waiver Year	Unduplicated Number of Participants	
Year 1	3,366	
Year 2	3,541	
Year 3	3,716	
Year 4 (only appears if applicable based on Item 1-C)	3,891	
Year 5 (only appears if applicable based on Item 1-C)	4,066	

b. Limitation on the Number of Participants Served at Any Point in Time. Consistent with the unduplicated number of participants specified in Item B-3-a, the state may limit to a lesser number the number of participants who will be served at any point in time during a waiver year. Indicate whether the state limits the number of participants in this way: (select one):

X	The state does not limit the number of participants that it serves at any point in time during a waiver year.
0	The state limits the number of participants that it serves at any point in time during a waiver year.

The limit that applies to each year of the waiver period is specified in the following table:

Table B-3-b

	Purpose (describe):	Purpose (describe):	Purpose (describe):	
	The state reserves capacity for individuals who require waiver supports as determined through an assessment process. Specifically, individuals in emergency situations and those with changing needs. The state will set aside capacity for these individuals who are a priority for enrollment. All participants enrolled in the waiver will have comparable access to all services offered in the waiver.	The reserved capacity is based on the Department's experience of providing services to its Priority 1 individuals In order to estimate the number of waiver slots, the state analyzed the growth of waiver enrollments from Fiscal Years 2019 through 2022 versus the current available slot capacity. Future growth was projected based on that data as well as analysis of the growth of DDS eligible individuals entering adult services and the increase of service rates. The state will continue to closely monitor waiver enrollment and capacity. If it is determined that additional waiver capacity is needed, the state will submit a Request for an Amendment to add additional slots as necessary. There is no waitlist for enrollment in the waiver.	The state reserves capacity for individuals who require waiver supports as determined through an assessment process, specifically, transitioning students from Special Education who are assessed as a high priority for needing Community Living Supports. The state will set aside capacity for these individuals who are priority for enrollment. All participants enrolled in the waiver will have comparable access to all services offered in the waiver.	
	Describe how the amount of reserved capacity was determined:	Describe how the amount of reserved capacity was determined:	Describe how the amount of reserved capacity was determined:	

State:	
Effective Date	

The reserved capacity is based on the Department's experience of managing emergencies and changing needs.

In order to estimate the number of waiver slots, the state analyzed the growth of waiver enrollments from Fiscal Years 2019 through 2022 versus the current available slot capacity. Future growth was projected based on that data as well as analysis of the growth of DDS eligible individuals entering adult services and the increase of service rates. The state will continue to closely monitor waiver enrollment and capacity. If it is determined that additional waiver capacity is needed, the state will submit a Request for an Amendment to add additional slots as necessary.

There is no waitlist for enrollment in the waiver.

The reserved capacity is based on the Department's experience of providing services to its Priority 1 individuals

In order to estimate the number of waiver slots, the state analyzed the growth of waiver enrollments from Fiscal Years 2019 through 2022 versus the current available slot capacity. Future growth was projected based on that data as well as analysis of the growth of DDS eligible individuals entering adult services and the increase of service rates. The state will continue to closely monitor waiver enrollment and capacity. If it is determined that additional waiver capacity is needed, the state will submit a Request for an Amendment to add additional slots as necessary.

There is no waitlist for enrollment in the waiver.

The reserved capacity is based on a legislative appropriation for the T-22 class. The Department has historical information and an assessment and prioritization system which informs the Department about the number of T-22 students who will need the level of service on this waiver.

In order to estimate the number of waiver slots, the state analyzed the growth of waiver enrollments from Fiscal Years 2019 through 2022 versus the current available slot capacity. Future growth was projected based on that data as well as analysis of the growth of DDS eligible individuals entering adult services and the increase of service rates. The state will continue to closely monitor waiver enrollment and capacity. If it is determined that additional waiver capacity is needed, the state will submit a Request for an Amendment to add additional slots as necessary.

There is no waitlist for enrollment in the waiver.

	Year 5 (only if applicable based on Item 1-C)	50	5	15

- **d. Scheduled Phase-In or Phase-Out**. Within a waiver year, the state may make the number of participants who are served subject to a phase-in or phase-out schedule *(select one)*:
 - X The waiver is not subject to a phase-in or a phase-out schedule.
 - The waiver is subject to a phase-in or phase-out schedule that is included in Attachment #1 to Appendix B-3. This schedule constitutes an *intra-year* limitation on the number of participants who are served in the waiver.
- e. Allocation of Waiver Capacity.

Select one:

- X Waiver capacity is allocated/managed on a statewide basis.
- Waiver capacity is allocated to local/regional non-state entities. Specify: (a) the entities to which waiver capacity is allocated; (b) the methodology that is used to allocate capacity and how often the methodology is reevaluated; and, (c) policies for the reallocation of unused capacity among local/regional non-state entities:
- **f. Selection of Entrants to the Waiver.** Specify the policies that apply to the selection of individuals for entrance to the waiver:

When an application for waiver enrollment is made to the Central Waiver Unit, the Waiver Unit confirms that the individual meets the basic requirements for Medicaid eligibility and the level of care for the waiver. The Waiver Unit confirms that the Waiver Choice Assurance Form has been signed. The Central Office Waiver Unit maintains a statewide log of completed waiver applications with the date of application receipt, organized by the DDS regions. Based on the administration of the MASSCAP, the individual is prioritized for services and a determination is made as to which waiver's target group criteria the individual meets. Participants prioritized for services must also be assessed as needing the service within 30 days. The Department requires that all adult individuals seeking waiver services apply for and maintain Medicaid eligibility. The Central Office Waiver Unit confirms that there is available capacity in the waiver and that the individual's needs for health and safety can be met. Based on the individual's priority status, an offer of enrollment is made. Those individuals who cannot be enrolled because of lack of capacity will be denied entry based upon slot capacity and provided with appeal rights. When new resources are allocated by the Legislature for specific target groups there will be reserved capacity set aside for them. Individuals in emergency situations who meet the criteria for enrollment are not subject to the process outlined above. If assigned waiver resources are available, an individual is expected to enroll in the waiver. The state will utilize the total slots estimated in the application.

Appendix B-5: Post-Eligibility Treatment of Income

In accordance with 42 CFR §441.303(e), Appendix B-5 must be completed when the state furnishes waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217, as indicated in Appendix B-4. Post-eligibility applies only to the 42 CFR §435.217 group.

a. Use of Spousal Impoverishment Rules. Indicate whether spousal impoverishment rules are used to determine eligibility for the special home and community-based waiver group under 42 CFR §435.217.

Note: For the five-year period beginning January 1, 2014, the following instructions are mandatory. The following box should be checked for all waivers that furnish waiver services to the 42 CFR §435.217 group effective at any point during this time period.

Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group. In the case of a participant with a community spouse, the state uses *spousal* posteligibility rules under §1924 of the Act. *Complete Items B-5-e (if the selection for B-4-a-i is SSI State or §1634) or B-5-f (if the selection for B-4-a-i is 209b State) and Item B-5-g unless the state indicates that it also uses spousal post-eligibility rules for the time periods before January 1, 2014 or after September 30, 2019 (or other date as required by law).*

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018 (select one).

- X Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group. In the case of a participant with a community spouse, the state elects to (select one):
 X Use spousal post-eligibility rules under §1924 of the Act. Complete ItemsB-5-b-2 (SSI State and §1634) or B-5-c-2 (209b State) and Item B-5-d.
 O Use regular post-eligibility rules under 42 CFR §435.726 (SSI State and §1634) (Complete Item B-5-b-1) or under §435.735 (209b State) (Complete Item B-5-c-1). Do not complete
 - Item B-5-b-1) or under §435.735 (209b State) (Complete Item B-5-c-1). Do not complete Item B-5-d.
- O Spousal impoverishment rules under §1924 of the Act are not used to determine eligibility of individuals with a community spouse for the special home and community-based waiver group. The state uses regular post-eligibility rules for individuals with a community spouse. *Complete Item B-5-c-1 (SSI State and §1634) or Item B-5-d-1 (209b State). Do not complete Item B-5-d.*

NOTE: Items B-5-b-1 and B-5-c-1 are for use by states that do not use spousal eligibility rules or use spousal impoverishment eligibility rules but elect to use regular post-eligibility rules. However, for the five-year period beginning on January 1, 2014, post-eligibility treatment-of-income rules may not be determined in accordance with B-5-b-1 and B-5-c-1, because use of spousal eligibility and post-eligibility rules are mandatory during this time period.

State:	
Effective Date	

NOTE: Items B-5-b-2 and B-5-c-2 are for use by states that use spousal impoverishment eligibility rules <i>and</i> elect to apply the spousal post eligibility rules.

State:	
Effective Date	

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

b-2. Regular Post-Eligibility Treatment of Income: SSI State. The state uses the post-eligibility rules at 42 CFR §435.726 for individuals who do not have a spouse or have a spouse who is not a community spouse as specified in §1924 of the Act. Payment for home and community-based waiver services is reduced by the amount remaining after deducting the following allowances and expenses from the waiver participant's income:

0	Not applicable (see instructions) Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.					
0	The state does not establish reaso	nable limits.				
0	The state establishes the following	g reasonable lin	nits			
	Specify:					

State:	
Effective Date	

State:	
Effective Date	

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

d. Post-Eligibility Treatment of Income Using Spousal Impoverishment Rules

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care if it determines the individual's eligibility under §1924 of the Act. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

i. <u>Al</u>	i. Allowance for the personal needs of the waiver participant					
(se	lect one):					
0	SSI Standard					
0	Optional state supplement standard					
0	Medically needy income standard					
X	The special income level for institutionalized persons					
0	% Specify percentage:					
0	The following dollar amount: \$ If this amount changes, this item will be revised					
0	The following formula is used to determine the needs allowance: Specify formula:					
0	Other Specify:					
	ii. If the allowance for the personal needs of a waiver participant with a community spouse is different from the amount used for the individual's maintenance allowance under 42 CFR §435.726 or 42 CFR §435.735, explain why this amount is reasonable to meet the individual's maintenance needs in the community. Select one:					
X Allowance is the same						
0	O Allowance is different. Explanation of difference:					
iii. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 CFR §435.726:						
a. H	a. Health insurance premiums, deductibles and co-insurance charges					
S e	Recessary medical or remedial care expenses recognized under state law but not covered under the tate's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these xpenses.					
Sele	ct one:					
X	Not applicable (see instructions) <i>Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.</i>					
0	The state does not establish reasonable limits.					

State:	
Effective Date	

The state uses the same reasonable limits as are used for regular (non-spousal) posteligibility.

NOTE: Items B-5-e, B-5-f and B-5-g only apply for the five-year period beginning January 1, 2014. If the waiver is effective during the five-year period beginning January 1, 2014, and if the state indicated in B-5-a that it uses spousal post-eligibility rules under §1924 of the Act before January 1, 2014 or after December 31, 2018, then Items B-5-e, B-5-f and/or B-5-g are not necessary. The state's entries in B-5-b-2, B-5-c-2, and B-5-d, respectively, will apply.

State:	
Effective Date	

Note: The following selections apply for the five-year period beginning January 1, 2014.

e. Regular Post-Eligibility Treatment of Income: SSI State and §1634 State – 2014 through 2018. The state uses the post-eligibility rules at 42 CFR §435.726 for individuals who do not have a spouse or have a spouse who is not a community spouse as specified in §1924 of the Act. Payment for home and community-based waiver services is reduced by the amount remaining after deducting the following allowances and expenses from the waiver participant's income:

i. <u>A</u>	Allowance for the needs of the waiver participant (select one):					
0	The following standard included under the state plan

g. Post-Eligibility Treatment of Income Using Spousal Impoverishment Rules – 2014 through 2018

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

i. Allowance for the personal needs of the waiver participant
(select one):
O SSI Standard
Optional state supplement standard
O Medically needy income standard
○ The special income level for institutionalized persons
O % Specify percentage:
O The following dollar amount: \$ If this amount changes, this item will be revised
The following formula is used to determine the needs allowance: Specify formula:
O Other Specify:
ii. If the allowance for the personal needs of a waiver participant with a community spouse is different from the amount used for the individual's maintenance allowance under 42 CFR §435.726 or 42 CFR §435.735, explain why this amount is reasonable to meet the individual's maintenance needs in the community. Select one:
O Allowance is the same
O Allowance is different. Explanation of difference:
iii. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 CFR §435.726:
a. Health insurance premiums, deductibles and co-insurance charges
b. Necessary medical or remedial care expenses recognized under state law but not covered under the state's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these expenses.
Select one:
Not applicable (see instructions) Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.
O The state does not establish reasonable limits.

State:	
Effective Date	

The state uses the same reasonable limits as are used for regular (non-spousal) posteligibility.

Appendix B-6: Evaluation / Reevaluation of Level of Care

As specified in 42 CFR §441.302(c), the state provides for an evaluation (and periodic reevaluations) of the need for the level(s) of care specified for this waiver, when there is a reasonable indication that an individual may need such services in the near future (one month or less), but for the availability of home and community-based waiver services.

a. Reasonable Indication of Need for Services. In order for an individual to be determined to need waiver services, an individual must require: (a) the provision of at least one waiver service, as documented in the service plan, and (b) the provision of waiver services at least monthly or, if the need for services is less than monthly, the participant requires regular monthly monitoring which must be documented in the service plan. Specify the state's policies concerning the reasonable indication of the need for waiver services:

•	Minimum number of services. The minimum number of waiver services (one or more) that an individual must require in order		
		to be determined to need waiver services is:	
i.	Fre	Frequency of services. The state requires (select one):	
	0	The provision of waiver services at least monthly	
	X	Monthly monitoring of the individual when services are furnished on a less than monthly basis	
		If the state also requires a minimum frequency for the provision of waiver services other than monthly (e.g., quarterly), specify the frequency:	
		Waiver services must be scheduled on at least a monthly basis. The Service Coordinator will be responsible for monitoring on at least a monthly basis when the participant doesn't receive scheduled services for longer than one month (for example when absent from the home due to hospitalization). Monitoring includes in- person, telephone, video-conferencing, text messaging, e-mail contacts, and/or other electronic modalities with the participant, guardian, or other family member designated by the participant as a contact for monitoring purposes. Monitoring may also include collateral contact with service providers or informal supports. Service Coordinators will document guardians and other family members designated by the participant in the participant's electronic record. Every participant has direct in-person contact at least annually. Contact requires a response from the participant, guardian, or other specified family member in order to be considered monitoring.	

b. Responsibility for Performing Evaluations and Reevaluations. Level of care evaluations and reevaluations are performed (*select one*):

X	Directly by the Medicaid agency
0	By the operating agency specified in Appendix A
0	By a government agency under contract with the Medicaid agency. Specify the entity:
	Registered nurses from the level of care entity are responsible for making initial level of care decisions and performing level of care reevaluations.
0	Other
	Specify:

State:	
Effective Date	

c. Qualifications of Individuals Performing Initial Evaluation: Per 42 CFR §441.303(c)(1), specify the educational/professional qualifications of individuals who perform the initial evaluation of level of care for waiver applicants:

Information necessary for making the initial evaluation of level of care (LOC) for waiver applicants is collected by the State's Regional Intake and Waiver Eligibility Teams (see B-6-d). Each team includes state waiver eligibility specialists and licensed doctoral level psychologists who supervise the eligibility team members' administration of the level of care for the waiver applicant. Team members include state social worker(s), and state eligibility specialists. Their qualifications are as follows:

Psychologist IV

Applicants must have at least three years of full-time or equivalent part-time, professional experience as a Licensed Psychologist in the application of psychological principles and techniques in a recognized agency providing psychological services or treatment, of which at least one year must have included supervision over Postdoctoral Psychologists-in-training and/or Psychological Assistants.

Clinical Social Worker

Required work experience: At least two years of full-time or equivalent part-time, professional experience as a clinical social worker after earning a Master's degree in social work. Substitutions:

- A Doctorate in social work, psychology, sociology, counseling, counseling education, or human services may be substituted for the required experience on the basis of two years of education for one year of experience.
- One year of education equals 30 semester hours. Education toward a degree will be prorated on the basis of the proportion of the requirements actually completed. Required education: A Master's or higher degree in social work is required. Licenses:
- Licensure as a Licensed Certified Social Worker by the Massachusetts Board of Registration in Social Work is required

State Eligibility Specialists

State Service Coordinators; State Eligibility Specialists

Applicants must have at least (A) three years of full-time or equivalent part-time, professional experience in human services; (B) of which at least one year must have been spent working with people with disabilities (intellectual disability; developmental disabilities;) or (C) any equivalent combination of the required experience and the substitution below. Substitutions:

- 1. A Bachelor's degree with a major in social work, social casework, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of one year of the required (A) experience.*
- 2. A Master's degree with a concentration in social work, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of two years of the required (A) experience. Applicants who meet all federal requirements for Qualified Intellectual Disability Professional may substitute those requirements for three years of the required combined (A) and (B) experience.

*Education toward such a degree will be prorated on the basis of the proportion of the requirements actually completed.

Service Coordinators

Applicants must have at least (A) three years of full-time or equivalent part-time, professional experience in human services; (B) of which at least one year must have been spent working with

State:	
Effective Date	

people with disabilities (intellectual disability; developmental disabilities; deafness; blindness; multi-handicapped) or (C) any equivalent combination of the required experience and the substitution below.

Substitutions:

- 1. A Bachelor's degree with a major in social work, social casework, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of one year of the required (A) experience.*
- 2. A Master's degree with a concentration in social work, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of two years of the required (A) experience. Applicants who meet all federal requirements for Qualified Intellectual Disability Professional may substitute those requirements for three years of the required combined (A) and (B) experience.
- *Education toward such a degree will be prorated on the basis of the proportion of the requirements actually completed.
- **d.** Level of Care Criteria. Fully specify the level of care criteria that are used to evaluate and reevaluate whether an individual needs services through the waiver and that serve as the basis of the state's level of care instrument/tool. Specify the level of care instrument/tool that is employed. State laws, regulations, and policies concerning level of care criteria and the level of care instrument/tool are available to CMS upon request through the Medicaid agency or the operating agency (if applicable), including the instrument/tool utilized.

The Vineland III (or another valid and reliable measure of adaptive functioning as determined by a DDS licensed Psychologist, such as the Adaptive Behavior Assessment Scale Revised, may be substituted), is administered at the time of eligibility assessment to determine the functional impairments of the individual. The initial evaluation of level of care is based on the MASSCAP process which consists of an assessment of the individual's need for supervision and support and an assessment of the specialized characteristics of the individual and the capacity of the caregiver to provide care. The Inventory for Client and Agency Planning (or another valid and reliable adaptive behavior assessment), the Consumer and Caregiver Assessment (CCA) in conjunction with the Vineland III or the Adaptive Behavior Assessment Scale, Revised, constitute the MASSCAP process. The same instrument is used to assess all individuals in this waiver. The Inventory for Client and Agency Planning is an automated, standardized, and validated tool that assesses an individual's adaptive functioning. The domains assessed by the ICAP include motor skills, social and communication skills, personal living skills, and community living skills. The ICAP also assesses maladaptive behavior. Other reliable information that is evaluated in making this determination includes, but is not limited to, psychological or behavior assessments, additional functional and adaptive assessments, educational, health, mobility, safety, and risk assessments. The CCA process further amplifies the specialized needs of the individual and assesses the caregiver's capacity to provide care. The CCA is designed to more fully articulate the caregiver's strengths and needs to provide care in the home for the waiver participant. Factors such as the age, health status, mental acuity, ability of the caregiver to drive, and the potential impact of these factors on the waiver participant are reviewed.

Annually, as part of the care planning process, a reevaluation of level of care is done using DDS's tool which is a shortened version of the MASSCAP. The MASSCAP and all other available assessments are considered if there is a question about whether the participant continues to meet the level of care for the waiver. If at any time during the year the participant has experienced significant changes in their life, the MASSCAP will be administered to determine if there is a changing need which warrants a change in level of care or services.

State:	
Effective Date	

	X	The same instrument is used in determining the level of care for the waiver and fo
	0	A different instrument is used to determine the level of care for the waiver than for institutional care under the state plan. Describe how and why this instrument differs from the form used to evaluate institutional level of care and explain how the outcome of the determination is reliable, valid, and fully comparable.
for	eva	es for Level of Care Evaluation/Reevaluation. Per 42 CFR §441.303(c)(1), describe the proceduating waiver applicants for their need for the level of care under the waiver. If the reevaluation of differs from the evaluation process, describe the differences:
	The app psycincl	Regional Eligibility Teams (RET) across the state conduct the initial evaluations of all new licants for the Department's services. This team is comprised of a doctoral level licensed chologist, a social worker, eligibility specialists, and a team manager. The eligibility process udes administration of the MASSCAP. The Service Coordinator participates in the initial luation process as part of the team.
	This to we re-e year their	sequent to the initial level of care determination, level of care is reevaluated annually by the icipant's Service Coordinator at each of the participant's annual supports planning meetings. Is reevaluation is conducted using a shortened version of the MASSCAP. If there is a question a whether the participant continues to meet the level of care, the MASSCAP is administered. The valuation process would be identical to the original evaluation process if at any time during the r, it is determined that the participant has changing needs or circumstances that might impact r level of care, and the MASSCAP is administered. The Service Coordinator would also be part that evaluation team/process.
Re	eval	luation Schedule . Per 42 CFR §441.303(c)(4), reevaluations of the level of care required by pant are conducted no less frequently than annually according to the following schedule: one):
	0	Every three months
	0	Every six months
	X	Every twelve months
	0	Other schedule
		Specify the other schedule:
_		ications of Individuals Who Perform Reevaluations. Specify the qualifications of individuer form reevaluations (select one):
***11	X	The qualifications of individuals who perform reevaluations are the same as individuals
		perform initial evaluations.
-	0	The qualifications are different.

Effective Date

i. Procedures to Ensure Timely Reevaluations. Per 42 CFR §441.303(c)(4), specify the procedures that the state employs to ensure timely reevaluations of level of care (*specify*):

The state ensures timely reevaluations of level of care through the use of an automated information system. Within the system, DDS Area Office Directors or their designee document the level of care determination and the date. The system will automatically calculate when the next LOC is due to be completed. An automated dashboard provides weekly reports of LOCs coming due. Users of the system can generate reports on overdue LOCs whenever necessary. Overdue LOC reports are reviewed by both Area Office management and the DDS Waiver Management Unit on at least a monthly basis.

j. Maintenance of Evaluation/Reevaluation Records. Per 42 CFR §441.303(c)(3), the state assures that written and/or electronically retrievable documentation of all evaluations and reevaluations are maintained for a minimum period of 3 years as required in 45 CFR §92.42. Specify the location(s) where records of evaluations and reevaluations of level of care are maintained:

Determinations of level of care are maintained in electronic records as part of the DDSIS Management Information System. Paper records are maintained for each waiver participant at the Departmental Area Office in accordance with 115 CMR 4.00.

Quality Improvement: Level of Care

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Level of Care Assurance/Sub-assurances

The state demonstrates that it implements the processes and instrument(s) specified in its approved waiver for evaluating/reevaluating an applicant's/waiver participant's level of care consistent with level of care provided in a hospital, NF or ICF/IID.

- i. Sub-assurances:
 - a. Sub-assurance: An evaluation for LOC is provided to all applicants for whom there is reasonable indication that services may be needed in the future.
 - i. Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

If applicable, in the textbox below provide any necessary additional information on the strategies employed by the state to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the state's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The State Medicaid agency is responsible for ensuring effective oversight of the waiver program, including administrative and operational functions performed by DDS. In the event problems are discovered with the management of the waiver program processes at waiver service providers or DDS Area Offices, DDS and MassHealth are responsible for ensuring that a corrective action plan is created, approved, and implemented within appropriate timelines. Further, MassHealth and DDS are responsible for identifying and analyzing trends related to the operation of the waiver and determining strategies to address quality- related issues.

c. Timelines

When the state does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Level of Care that are currently non-operational.

X	No
0	Yes

Please provide a detailed strategy for assuring Level of Care, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix B-7: Freedom of Choice

Freedom of Choice. As provided in 42 CFR §441.302(d), when an individual is determined to be likely to require a level of care for this waiver, the individual or his or her legal representative is:

- i. informed of any feasible alternatives under the waiver; and
- ii. given the choice of either institutional or home and community-based services.
- **a. Procedures.** Specify the state's procedures for informing eligible individuals (or their legal representatives) of the feasible alternatives available under the waiver and allowing these individuals to choose either institutional or waiver services. Identify the form(s) that are employed to document freedom of choice. The form or forms are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

As part of the eligibility process, the eligibility team begins the process of determining whether the individual meets clinical eligibility criteria for waiver enrollment. The Team conducts the MASSCAP to assess whether the individual meets the ICF-IDD LOC requirement for entrance into the Waiver. Based on both the individual's clinical eligibility status and the level of care, the Intake and Eligibility Specialist gives the individual a brief oral explanation along with a printed brochure regarding waiver services.

The Area Office to which the newly DDS-eligible individual is assigned meets with the individual, shares information about the waiver program, provides the Waiver Choice Assurance Form, and offers assistance to the individual or legally responsible person in completing the Waiver Choice Assurance Form. Once the Waiver Choice Assurance Form is completed, the individual or legally responsible person submits it to the Area Office. The Area Office forwards the Waiver Choice Assurance Form to the Waiver Management Unit for review and determination of compliance with the first level of criteria for waiver enrollment: choice of community services as a feasible alternative to institutional services. The appropriate Area Office receives notice from the Waiver Management Unit about the status of the waiver application.

b. Maintenance of Forms. Per 45 CFR § 92.42, written copies or electronically retrievable facsimiles of Freedom of Choice forms are maintained for a minimum of three years. Specify the locations where copies of these forms are maintained.

A copy of the "Waiver Choice Assurance Form" is maintained by the Targeted Case Manager (Service Coordinator) in the participant's record for a minimum of three years

Appendix B-8: Access to Services by Limited English Proficient Persons

Access to Services by Limited English Proficient Persons. Specify the methods that the state uses to provide meaningful access to the waiver by Limited English Proficient persons in accordance with the Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons" (68 FR 47311 - August 8, 2003):

The Department has developed multiple approaches to promote and help ensure access to the waiver for Limited English Proficient (LEP) persons. To help ensure access for individuals and families, the waiver application is typically translated based on the predominant languages spoken by DDS-eligible individuals and are representative of regional differences. These languages include Spanish, Haitian Creole, Portuguese, Chinese (Traditional), Russian, Vietnamese, , Korean, and Khmer. Other foreign language translations of the waiver application will be made available upon request. DDS has contracts, through a statewide procurement, for interpretation and translation services that are used to meet the translation and interpretation needs for participants whose primary language is not English. Translation/interpretation is offered at no cost to the participant. The participants' preferred and primary languages are described in the plan of care.

The demographics of the state are routinely reviewed to ensure that translation of documents reflects the current Massachusetts population. Through a state procurement, DDS has selected translation and interpretation services to provide both oral and written translations. The state has also selected a telephonic interpretation service which is available statewide for DDS staff to use. All of the translation and interpretation contractors, as well as the telephonic service, have a roster of translators and interpreters for multiple languages so that DDS can respond to the need of families who speak languages beyond those listed previously, such as Swahili or Amharic. In addition to providing translated information, interpreters are made available when needed to enable individuals and family members to fully participate in planning meetings. These interpreters and translation services can be made available through providers under state contract.

DDS has also developed a Language Access Plan (LAP) to support the Targeted Case Managers (Service Coordinators) and other DDS staff who interact with families. DDS LAP ensures that LEP identified individuals or personas seeking services have access to what they need through a variety of approaches, such as ensuring initial contact with area and regional staff assigned to assist the individuals and/or persons; providing LEP contacts with communication skills and cultural awareness training; providing information in the language that is requested by the LEP Individuals and/or persons; providing access to interpreters proficient in the preferred language; and other technical assistance to LEP Individuals and/or persons seeking agency services at no cost to the individual.

There are a number of key junctures where DDS offers individuals and families the opportunity to request additional supports. Interpretation is available at any time during the individual's or family's interaction with the Department. Additionally, all public documents are available in multiple languages.

Another important method the Department utilizes to promote access to Waiver services is working to build capacity among service coordinators and service providers to become more culturally responsive in their delivery of services. There is a statewide effort to enhance learning of staff, increase cultural awareness and data collection on preferred language. Another central effort involves building in contractual requirements stipulating that providers must be responsive to the specific ethnic, cultural, and linguistic needs of families in the geographic area they serve. It is expected that this is addressed in multiple ways including outreach efforts, hiring of bi-lingual and bi-cultural staff, providing information

State:	
Effective Date	

in the primary languages of the individuals and families receiving services, and developing working
relationships with other multi-cultural community organizations in their communities.
The Department is committed to continue to develop and enhance efforts to provide meaningful access
to services by individuals with Limited English Proficiency.

C-1/C-3: Service Specification

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type: X Statutory Extended State Plan Other				
Service Name: Individualized Home Supports				
☐ Service is included in approved waiver. There is no change in service specifications.				
X Service is included in approved waiver. The service specifications have been modified.				
☐ Service is not included in approved waiver.				
Service Definition (Scope):				

Individualized Home Supports consists of services and supports in a variety of activities provided regularly but that are less than 24 hours per day that are determined necessary to allow a participant to successfully live in the community as opposed to an institutional setting. This service provides the support and supervision necessary for the participant to establish, live in and maintain on an on-going basis a household of their choosing, in a personal home or the family home to meet their habilitative needs. These services assist and support the waiver participant and includes teaching and fostering the acquisition, retention or improvement of skills related to personal finance, health, shopping, use of community resources, community safety, and other social and adaptive skills to live in the community as specified in the Plan of Care. It includes training and education in self- determination, self-advocacy to enable the participant to acquire skills to exercise control and responsibility over the services and supports they receive to become more independent, engaged and productive in their communities. The service includes elements of community habilitation and personal assistance. This service excludes room and board, or the cost of facility upkeep, and maintenance. An assessment is conducted and a Plan of Care is developed based on that assessment. The service is limited to the amount specified in the waiver participant's Plan of Care. The assistance of locating appropriate housing is included as part of this service. No individual provision duplicates services provided under Targeted Case Management. This service may not be provided at the same time as Respite, Group or Individual Supported Employment, Community Based Day Supports, Individualized Day Supports, Individualized Goods and Services, or Adult Companion or when other services that include care and supervision are provided.

This service may be self-directed through either the Fiscal Intermediary or Agency with Choice.

This service may be delivered in a participant's own home, or a family home, or in the community, or via telehealth. This service is primarily delivered in person; telehealth may be used to supplement the scheduled in-person service based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment . When participants are also receiving Remote Supports and Monitoring, providers of both services will share services plans and schedules, so that Remote Supports and Monitoring timing and activities will not overlap with the provision of Individualized Home Supports. This service may not be delivered via telehealth to any participant who is also receiving Remote Supports and Monitoring.

Purchase of devices used for such remote/telehealth delivery is not covered by this service.

Service: Group Supported Employment							
☐ Service is included in approved waiver. There is no change in service specifications.							
X Service is included in approved waiver. The service specifications have been modified.							
☐ Service is not included in approved waiver.							
Service Definition (Scope):							
Group Supported employment services consist of the ongoing supports that enable participants, for whom competitive employment at or above the minimum wage is unlikely absent the provision of supports, and who, because of their disabilities, need support to perform in a regular work setting. The outcome of the service is sustained paid employment and work experience leading to further career development and individual integrated community employment for which the participant is compensated at or above the minimum wage, but not less than the customary wage and level of benefit paid by the employer for the same or similar work performed by							
individuals without disabilities. Small group supported employment are services and training activities provided in regular business, industry and community settings for groups of two (2) to eight (8) workers with disabilities.

Annuality C. Dartisinant Comisso
Appendix C: Participant Services
HCBS Waiver Application Version 3.6
TIODE Walver Application Version 6.0

Examples include mobile work crews, enclaves and other business-based workgroups employing small groups of workers with disabilities in employment in the community. Services must be provided in a manner that promotes engagement in the workplace and interaction between participants and people without disabilities including co-workers, customers, and supervisors. Group supported employment includes any combination of the following services: job-related discovery or assessment, assisting the participants to locate a job or develop a job on behalf of the participants, job analysis, training and systematic instruction, job coaching, negotiation with prospective employers, and benefits support. Typically group supported employment consists of 2-8 participants, working in the community under the supervision of a provider agency. The participants are generally considered employees of the provider agency and are paid and receive benefits from that agency. Group supported employment includes activities needed to sustain paid work by participants including supervision and training and may include transportation if not available through another source. Transportation between the participants' place of residence and the employment site or between the provider site and the group employment site may be provided.

Federal financial participation is not claimed for incentive payments, subsidies or unrelated vocational training expenses such as the following:

- Incentive payments made to an employer to encourage or subsidize the employer's participation in a supported employment program;
- 2. Payments that are passed through to users of supported employment programs; or
- Payments for training that is not directly related to a participant's supported employment program 3. When supported employment services are provided at work sites where persons without disabilities are employed, payment is made only for the adaptations; supervision and training required for participants receiving the waiver service as a result of their disabilities but does not include payment for supervisory activities rendered as a normal part of the business setting. Documentation is maintained in the file of each participant receiving this service that the service is not available under a program funded under Section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.)

Group supported employment does not include volunteer work or vocational services provided in facility based work settings.

This service is primarily delivered in person; telehealth may be used to supplement the scheduled in-person service based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment.

Service Definition (Sco	pe):										
Services needed to maintain the home in a clean, sanitary, and safe environment. This service includes minor home repairs, general housekeeping and heavy household chores such as washing floors, windows, and walls, tacking down loose rugs and tiles, moving heavy furniture in order to provide safe egress and access. These services are only provided when neither the participant nor anyone else in the household is capable of performing or financially providing for them and where no other relative, caregiver, landlord, community/volunteer agency, or third party payer is responsible for their provision. In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement, is examined prior to any authorization of the service. Service is not available in a provider operated setting. Chore service must be paid through a self-directed budget through the Fiscal Intermediary. This service may not be provided at the same time as Adult Companion, or at the same time when other services that include incidental household care are being provided. This service is not eligible for delivery via telehealth.

☐ Service is not included in approved waiver.							
Service Definition (Scope):							

Those physical adaptations to the private residence of the participant, required by the participant's service plan, that are necessary to ensure the health, welfare, and safety of the participant, or that enable the participant to function with greater independence in the home. Service includes the assessment and evaluation of home safety modifications. The assessment and evaluation component of the home and adaptations service may be provided remotely via telehealth based on the professional judgement of the evaluator and the needs, preferences, and goals of the participant as determined during the personcentered planning process and reviewed by the Service Coordinator during each scheduled reassessment . Adaptations can only be provided to the participant's primary residence. Such adaptations include:

- Installation of ramps and grab-bars
- Widening of doorways/hallways
- Modifications of bathroom facilities
- Lifts: porch or stair lifts
- Installation of specialized electric and plumbing systems which are necessary to accommodate the medical equipment and supplies, and which are necessary for the welfare of the participant
- Installation of specialized flooring to improve mobility and sanitation
- Specialized accessibility/safety adaptations/additions
- Automatic door openers/door bells
- Voice activated, light activated, motion activated and electronic devices
- Door and window alarm and lock systems
- Air filtering devices and cooling adaptations and devices
- Specialized non-breakable windows

All services shall be provided in accordance with State or Local Building codes.

Excluded are those adaptations or improvements to the home that are of general utility, and which are not of direct medical or remedial benefit to the participant, such as carpeting, roof repair, central air conditioning. Adaptations that add to the total square footage of the home are excluded from this benefit except when necessary to complete an adaptation. General household repairs are not included in this service.

Any use of Waiver funds for home adaptation requests must be submitted and approved in advance following the process outlined below.

State:	
Effective Date	

The Service Coordinator will explore with the participant and family when relevant, utilization of appropriate modifications that are portable to accommodate changes in residence, size of the participant, and changes in equipment and needs. In addition, all proposals for home adaptations shall plan for the reuse of portable accommodations.

- a) Waiver funding shall only be used for renovations that will allow the participant to remain in their home (primary residence), and must specifically relate to the functional limitation(s) caused by the participant's disability. It is not available to participants who visit home periodically but who otherwise reside elsewhere.
- b) The following steps to request approval for funding must be followed.
- The Service Coordinator must receive for their review and recommendation the following information: a proposal detailing the request for funding, and the completed Vehicle/Home Adaptations Funding Request Form. The participant's Individual Support Plan that clearly defines and explains the need for a home adaptation must be attached to this information.
- If the DDS Service Coordinator recommends the proposal for funding, the request is then forwarded to the Area and then the Regional Director for review and recommendation of funding.
- If a home adaptation request is approved, the participant/family must submit, at a minimum, 3 bids that contain costs and a work agreement, to the Department.
- c) All payments for Home Adaptations must be made through the Fiscal Management Service and purchased through a self-directed budget. This service must be an identified need and documented in the service plan.

Funding for Home Adaptations is not available for use in any state operated or provider residence, or in the home of a home sharing care provider. No permanent adaptations to the structure will be made to property rented or leased by the participant, guardian or legal representative.

Only available to participants who live in the family home or in a home of their own.

Service Name: Individual Supported Employment					
☐ Service is included in approved waiver. There is no change in service specifications.					
X Service is included in approved waiver. The service specifications have been modified.					
☐ Service is not included in approved waiver.					
Service Definition (Scope):					

Individual supported employment services consist of ongoing supports that enable a participant, for whom competitive employment at or above the minimum wage is unlikely absent the provision of supports, and who, because of their disabilities, need support to perform in a regular work setting. Individual supported employment includes assisting the participants to locate a job or develop a job on behalf of the participant. Individual supported employment is conducted in a variety of settings, particularly typical work sites where persons without disabilities are employed. Emphasis is on work in an environment with the opportunity for participants to have contact with co-workers, customers, supervisors and others without disabilities. In individual supported employment the participant has a job based on their identified needs and interests, located in a community business. It also includes selfemployment or a small business, or a homebased self-employment, or temporary services which may assist a participant in securing an individual position within a business. Individual supported employment includes job-related discovery or assessment, person-centered employment planning, job placement, job development, negotiation with prospective employers, job analysis, training and systematic instruction, job coaching in the form or regular or periodic assistance; training and support are provided for the purpose of developing, maintaining and/or improving job skills and fostering career advancement opportunities. Job coaching at the job site is not designed to provide continuous on-going support; it is expected that as the participant develops more skill and independence the level of support will decrease and fade over time as the natural supports in the work place are established. Some ongoing intermittent job related support may be provided to assist the waiver participant to successfully maintain their employment situation. Natural supports are developed by the provider to help increase

State:	
Effective Date	

participation and independence of the participant within the community setting. Participants are paid by the employer. It includes transportation if not available through another source. Transportation assistance between the participants' place of residence and the employment site is included in the rate paid to providers of individual supported employment services. Ongoing transportation for a participant is excluded from the rate. Time-limited transportation for components of discovery, career exploration, job development is provided. Once the participant is hired, transportation ceases. Individual supported employment may be self-directed and paid through the Fiscal Intermediary.

Federal financial participation is not claimed for incentive payments, subsidies or unrelated vocational training expenses such as the following:

- 1. Incentive payments made to an employer to encourage or subsidize the employer's participation in a supported employment program;
- 2. Payments that are passed through to users of supported employment programs; or
- 3. Payments for training that is not directly related to a participant's supported employment program.

When supported employment services are provided at work sites where persons without disabilities are employed, payment is made only for the adaptations; supervision and training required for participants receiving the waiver service as a result of their disabilities but does not include payment for supervisory activities rendered as a normal part of the business setting. Documentation is maintained in the file of each participant receiving this service that the service is not available under a program funded under Section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.) Individual supported employment excludes participants working in mobile crews or in small groups. It excludes volunteer work.

This service may be provided remotely via telehealth based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment. This service may be delivered remotely via telehealth 100% of the time.

Service Definition (Scope):					

Services and supports provided to participants tailored to their specific personal goals and outcomes related to the acquisition, improvement, and/or retention of skills and abilities to prepare and support a participant for work and/or community participation and/or meaningful retirement activities, and could not do so without this direct support.

This service can only be participant-directed. A qualified family member or relative, independent contractor or service agency may provide services. This service originates from the home of the participant and is generally delivered in the community. This service is primarily delivered in person; telehealth may be used to supplement the scheduled in-person service based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment.

Examples

- Develop and implement an individualized plan for day services and supports;
- Assist in developing and maintaining friendships of choice and skills to use in daily interactions:
- Provide support to explore job interests or retirement options;
- Provide opportunities to participate in community activities, including support to attend and participate in post- secondary or adult education classes;
- Provide support to complete work or business activities including supports for participants who own their own business;
- Training and support to increase or maintain self-help, socialization, and adaptive skills to participate in own community;
- Develop, maintain or enhance independent functioning skills in the areas of sensory-motor, cognition, personal grooming, hygiene, toileting, etc.

This service is not provided in or from a facility-based day program. This service is not provided from a provider- operated or state-operated group residence. This service may not be provided at the same time as Group or Individual Supported Employment, Community Based Day Supports, Individual Goods and Services or when other services that include care and supervision are provided. This service is only

service enhances the skills of the participant to function in the community and/or family home. Documentation in the participant's record demonstrates the benefit to the participant. This service may be provided in small groups or as a one-to-one support for the participant. Peer support is available to participants who reside in 24 licensed settings, in the family home, a home of their own or receive less than 24 hours of support per day. This service may be self- directed. This service may be provided remotely via telehealth based on the participant's needs, preferences, and goals as determined during the person-centered planning process and reviewed by the Service Coordinator during each scheduled reassessment. This service may be delivered remotely via telehealth 100% of the time.

Service Name: Remote Supports and Monitoring
☐ Service is included in approved waiver. There is no change in service specifications.
X Service is included in approved waiver. The service specifications have been modified.
☐ Service is not included in approved waiver.
Service Definition (Scope):

Remote Supports and Monitoring (RSM) are designed to provide support using communication and non-invasive monitoring technologies to assist participants to attain and/or maintain independence in their homes and communities while minimizing the need for onsite staff presence and intervention. The use of RSM promotes skill acquisition and maintenance through instruction/guidance with the goal of promoting independence in the least restrictive environment. RSM uses two way "real time" audio/video technology delivered by qualified provider staff at a monitoring center. RSM staff monitor and provide prompts to participants in real time. RSM is delivered on a scheduled and as-needed basis as identified in the participant's Individual Support Plan (ISP). RSM must include an in-person back-up plan, based on the needs of the participant, documented in the ISP. Individual interaction with Remote Supports and Monitoring staff may be scheduled, on-demand, or in response to an alert from a device in the remote support and monitoring equipment system.

The provider of RSM must have a process to assess needs, identify any areas of concern, and identify how these can be addressed with the use of RSM technologies. Additionally, the ISP will detail the supports necessary to ensure participants' health and safety needs are met if the device/system is turned off. In the event the participant no longer wants the service, or the service no longer meets the participant's needs, appropriate changes in service provision will be addressed on a timely basis through the person-centered planning process in the same manner as any other service.

The participant's ISP will outline the schedule of when RSM is to be provided. Initial and ongoing training of the individual receiving RSM on how to use the remote support system will be outlined in the ISP. Training will include how to report technology malfunctions. RSM providers do not provide in-person services. However, RSM providers are required to have back-up capabilities to respond in person in case of an urgent situation that does not require a 911 call or to address technology malfunctions. This does not affect in-person visits by Service Coordinators or providers of other services. As part of the person-centered planning process, if the participant needs hands-on assistance, they will be offered the services necessary to meet their needs; hands-on assistance may be provided through other services in addition to RSM but will not be provided at the same time as RSM. Hands-on assistance is not provided through RSM.

RSM can be used in conjunction with Individualized Home Supports, but only when Individualized Home Supports are being provided in person. RSM and Individualized Home Supports providers will share service plans and schedules so that RSM timing and activities will not overlap with in-home supports.

All participants who are interested in RSM are evaluated and the evaluation considers whether this service could help enhance their ability to engage in meaningful activities, stay connected with others, and be integrated in their communities. RSM may be authorized to complement other in-person services in meeting these goals. RSM can be mobile, where participants may take a tablet or device into the community to help promote or increase independence.

The overall care plan will address the participant's needs including community integration through the use of RSM and other services. The ISP includes documentation of community involvement or measurable objectives regarding a participant's need for support to promote community integration.

Placement of RSM devices will be considered based on assessed need, privacy and right considerations, and informed consent of the participant and others who live in the home. Use of the system may be restricted to

State:	
Effective Date	

certain hours as indicated in the ISP. The system must have visual or other indicators that inform the participant when the RSM system is activated. Use of RSM audio devices that have a continuous feed will not be permitted in bedrooms or bathrooms. However, RSM audio devices may be triggered in the event of an emergency or otherwise activated by the participant. RSM video monitoring devices will not be permitted in bedrooms or bathrooms.

As part of the informed consent process, the participant will be informed and trained as to how to turn off or remove the device. Depending on the type of RSM device and the participant's abilities, they may be able to turn off the RSM device themselves. If they are unable to do so, then they will be informed as to who to contact for assistance with turning off the device.

Participants may not receive RSM and MassHealth State Plan PERS at the same time.

A participant can be enrolled in both Individualized Home Supports and Remote Supports and Monitoring but cannot receive both simultaneously. Participants who receive both services must receive their IHS in person, not via telehealth.

The rate for Remote Supports and Monitoring includes a standard per diem cost for two-way communication equipment rental and call center staffing. If a participant is assessed to require specialized equipment to interface with the standard RSM equipment and call center, that specialized equipment is paid for through the Assistive Technology service.

HCBS Waiver Application Version 3.6 ☐ Service is not included in approved waiver. Service Definition (Scope): This service is designed to provide stabilization and support for waiver participants who due to either behavioral or environmental circumstances cannot remain in their current residence or family home. The service is provided in either a licensed respite facility or in the home of an individual family provider to waiver participants who are unable to care for themselves. The home of an individual family provider is overseen by a qualified stabilization agency. The participant's need for stabilization and support is assessed and is documented in the Individual Plan of Care. The service includes over-night supervision and support. Stabilization services may be available to participants who receive other waiver services on the same day, such as community-based day supports, center-based day supports, group or individual supported employment or individualized day supports. Stabilization services cannot be provided when other services that provide care and supervision are being provided. The length of stay is based on the assessed needs of the waiver participant and is regularly reviewed by the Regional Management Team. This service cannot be self-directed. This service is not eligible for delivery via telehealth. Specify applicable (if any) limits on the amount, frequency, or duration of this service: Stabilization may be provided up to 90 days per year and is reflected in the Individual Service Plan based on assessed need. Service: Transportation
☐ Service is included in approved waiver. There is no change in service specifications.
X Service is included in approved waiver. The service specifications have been modified.
☐ Service is not included in approved waiver.
Service Definition (Scope):
Service offered in order to enable waiver participants to gain access to waiver and other community services, activities and resources, as specified by the service plan. Transportation services under the waiver are offered in accordance with the participants service plan. Whenever possible, family, neighbors, friends, or community agencies which can provide this service without charge are utilized. This service includes travel to and from day programs and travel for accessing community activities and resources. Transportation also includes the purchase of transit and bus passes for public transportation systems and mileage reimbursement for qualified drivers. The provision of transportation is based on a service plan that meets the need in the most cost-effective manner. Transportation that is part of a day or residential program or a contracted transportation provider cannot be self-directed. This service is offered in addition to medical transportation required under 42 CFR 431.53 and transportation services under the State Plan defined at 42 CFR 440.170(a), and does not replace them.
This service is not eligible for delivery via telehealth.
Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Vehicle Adaptations

Adaptations or alterations to an automobile or van that is the waiver participant's primary means of transportation in order to accommodate the special needs of the participant. Vehicle adaptations are specified by the service plan as necessary to enable the participant to engage more fully in the broader community and to ensure the health, welfare and safety of the participant.

Vehicle adaptations include:

- •Van lift
- •Tie downs
- •Ramp
- Specialized seating equipment
- •Seating/safety restraint

The following are specifically excluded vehicle modifications:

- 1. Adaptations or improvements to the vehicle that are of general utility, and are not of direct medical or remedial benefit to the participant.
- 2. Purchase or lease of a vehicle
- 3. Regularly scheduled upkeep and maintenance of a vehicle, except upkeep and maintenance of the adaptations. The participant must be in the family home, vehicle modification is not available to participants who reside in a provider residential setting or in 24 self-directed home sharing supports or in the live-in caregiver model.

Funding for adaptations to a new van or vehicle purchased/leased by family can be made available at the time of purchase/lease to accommodate the special needs of the participant.

This service must be based on an identified need and documented in the service plan. The Vehicle modifications must be purchased through a participant-directed budget and paid through the Fiscal Intermediary

- 1. The Service Coordinator must receive in advance for their review and recommendation the following information: a proposal detailing the request for funding and the completed Vehicle/Home Adaptations Funding Request Form. The participant's Individual Support Plan that clearly defines and explains the need for a vehicle adaptation must be attached to this information.
- 2. If the DDS Service Coordinator recommends the proposal for funding, the request is then forwarded to the Area and then the Regional Director for review and recommendation of funding.
- 3. All payments for Vehicle Adaptations must be made through the Fiscal Management Service and purchased through a self -directed budget.

Available to participants who live in family home. This service is not available to participants using the live-in caregiver model. The live-in caregiver's vehicle is not eligible for vehicle adaptations, adaptations of the caregiver's private property violates state law.

This service is not eligible for delivery via telehealth.

- **a.** Criminal History and/or Background Investigations. Specify the state's policies concerning the conduct of criminal history and/or background investigations of individuals who provide waiver services (select one):
 - Yes. Criminal history and/or background investigations are required. Specify: (a) the types of positions (e.g., personal assistants, attendants) for which such investigations must be conducted; (b) the scope of such investigations (e.g., state, national); and, (c) the process for ensuring that mandatory investigations have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid or the operating agency (if applicable):

DDS and its providers are governed by Executive Office of Health and Human Services (EOHHS) regulations at 101 CMR 15.00: Criminal Offender Record Checks which mandate state criminal offender record information (CORI) checks for candidates in positions with the potential for unsupervised contact with a waiver participant. No individual may begin to provide services and supports to a waiver participant in a position with the potential for unsupervised contact with a waiver participant until the individual has been CORI cleared in accordance with 101 CMR 15.00. Providers access CORI from the Massachusetts Executive Office of Public Safety and Security, Department of Criminal Justice Information Services (DCJIS) via iCORI, a DCJIS service. The DCJIS provides CORI check results to the requesting provider agency/hiring authority. The DDS Investigations Division employs staff who conduct audits of provider agencies to assure compliance with 101 CMR 15.00. Agencies not in 100% compliance with this requirement must submit a corrective action plan. DDS follows up to ensure that the correction action has been completed. CORI checks are conducted through the Financial Management Service (FMS) for self-directed services utilizing the standards at 101 CMR 15.00. The FMS informs the Department in the event the results of CORI check prohibit the candidate from providing supports with the potential for unsupervised contact with a waiver participant

M.G.L. c. 19 B sec- 19 and 20 require fingerprint-based checks to be conducted on applicant for licensure, agencies, and persons with the potential for unsupervised contact with persons with intellectual or developmental disability. The DDS National Criminal Background Check Unit implements 115 CMR 12.00 to obtain and review fingerprint-based checks of the state and national criminal history databases to determine the suitability of all current and prospective employees who have the potential for unsupervised contact with persons with an intellectual or developmental disability in any department-licensed, funded, or approved program. "Employees" is defined broadly to include any apprentice, intern, transportation provider, volunteer or sub-contractor who may have direct and unmonitored contact with a person with an intellectual or developmental disability. 115 CMR 12.00 also requires that any household members, age 15 or older, or persons regularly on the premises subject to licensure, also shall be subject to a fingerprint-based state and federal criminal background check. The FMS submits requests for fingerprint-based checks for participants who are self-directing their supports to the DDS National Criminal Background Check Unit (NCBCU). Fingerprints are forwarded to the Massachusetts State Police Identification Section, the Federal Bureau of Investigation, and DCJIS, the results of such checks are returned to DDS. The NCBCU reviews the results of the fingerprint-based check and issues a determination of suitability or unsuitability to the FMS.

No. Criminal history and/or background investigations are not required.

Abuse Registry Screening. Specify whether the state requires the screening of individuals who provide waiver services through a state-maintained abuse registry (*select one*):

State:	
Effective Date	

Yes. The state maintains an abuse registry and requires the screening of individuals through this registry. Specify: (a) the entity (entities) responsible for maintaining the abuse registry; (b) the types of positions for which abuse registry screenings must be conducted; and, (c) the process for ensuring that mandatory screenings have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):

M.G.L c. 19C established the Disabled Person's Protection Commission (DPPC) to provide for the investigation and remediation of instances of abuse of persons with disabilities in the Commonwealth. M.G.L. c.19C, §2. DPPC maintains a registry of care providers against whom DPPC has made a substantiated finding of registerable abuse. "Care provider" is defined as "a caretaker who is employed by, or contracts with, the department or an employer to provide services or supports to a person with an intellectual or developmental disability." M.G.L. c.19C, §15. The completion of a registry search is required prior to employing, contracting with, or utilizing the services of (employing) a care provider to provide services or supports to a person with an intellectual disability or a developmental disability, regardless of compensation, by DDS or a service provider. DDS and DDS providers must complete a new registry search for a care provider who has had a break of employment of one year or more. DDS and DDS providers are prohibited from employing a potential care provider prior to confirming that person's identity does not appear on the registry. DDS or a DDS provider also may conduct discretionary recurring registry screening for existing care providers. In the event a care provider is found to be on the abuser registry or refuses to authorize a search of the abuser registry, they must be terminated immediately. If DDS or a DDS provider receives notification from DPPC that it is currently employing the services of a care provider identified on the registry, DDS or the DDS provider must immediately terminate the care provider. DPPC may conduct periodic compliance investigations and assess penalties in the event a violation is discovered.

No. The state does not conduct abuse registry screening.

State:	
Effective Date	

- d. Provision of Personal Care or Similar Services by Legally Responsible Individuals. A legally responsible individual is any person who has a duty under state law to care for another person and typically includes: (a) the parent (biological or adoptive) of a minor child or the guardian of a minor child who must provide care to the child or (b) a spouse of a waiver participant. Except at the option of the State and under extraordinary circumstances specified by the state, payment may not be made to a legally responsible individual for the provision of personal care or similar services that the legally responsible individual would ordinarily perform or be responsible to perform on behalf of a waiver participant. Select one:
 - X No. The state does not make payment to legally responsible individuals for furnishing personal care or similar services.
 - Yes. The state makes payment to legally responsible individuals for furnishing personal care or similar services when they are qualified to provide the services. Specify: (a) the legally responsible individuals who may be paid to furnish such services and the services they may provide; (b) state policies that specify the circumstances when payment may be authorized for the provision of *extraordinary care* by a legally responsible individual and how the state ensures that the provision of services by a legally responsible individual is in the best interest of the participant; and, (c) the controls that are employed to ensure that payments are made only for services rendered. Also, specify in Appendix C-3 the personal care or similar services for which payment may be made to legally responsible individuals under the state policies specified here.
- e. Other State Policies Concerning Payment for Waiver Services Furnished by Relatives/Legal Guardians. Specify state policies concerning making payment to relatives/legal guardians for the provision of waiver services over and above the policies addressed in Item C-2-d. Select one:
 - O The state does not make payment to relatives/legal guardians for furnishing waiver services.
 - The state makes payment to relatives/legal guardians under specific circumstances and only when the relative/guardian is qualified to furnish services. Specify the specific circumstances under which payment is made, the types of relatives/legal guardians to whom payment may be made, and the services for which payment may be made. Specify the controls that are employed to ensure that payments are made only for services rendered. Also, specify in Appendix C-1/C-3 each waiver service for which payment may be made to relatives/legal guardians.

The state makes payments to relatives but not to legal guardians, spouses or legal representatives for furnishing waiver services when the relative is qualified and either the relative is employed by a provider agency or the participant is self-directing their services. Relatives employed by qualified provider agencies may provide any waiver service. Provider agencies are responsible for ensuring that every employee meets service-specific qualifications.

When a participant is self-directing their services the circumstances under which a relative may be paid are:

- the lack of a qualified provider in the geographic area;
- the lack of a qualified provider who can furnish services at necessary times and places;
- the unique ability of the relative to meet the needs of the participant;
- there is a cost-benefit to having the relative provide the service, such as transportation
- The delivery of services by a relative must be discussed and reviewed during the development of the service plan. This includes why it is more beneficial for the relative to provide the service including any cost-benefit and why it is in the best interest of the participant.

State:	
Effective Date	

	Payment rates to a relative must be consistent with the rates paid by the state for similar supports. Payment is made only when the service is not a function that a family member normally provides for the participant without charge as a matter of course in the usual relationship among members of a nuclear family. Relatives who would not qualify to be paid caregivers include parents of minor children, spouses or legal guardians. The Targeted Case Manager must review all payments to relatives and ensure that waiver services were delivered. The services included are: individual supported employment, transportation, individualized home supports, individualized day supports, chore, adult companion and respite provided in the home of an individual family provider. Individual providers of home modifications and adaptations and vehicle modifications are not subject to the review process noted above but must meet the individual provider qualifications noted for the relevant service type. Approval of the home or vehicle modification is subject to the service-specific approval process. Relatives may not be employed as participant-directed providers for the following services: live-in caregiver, behavioral supports and consultation, family training, individual goods and services, assistive technology, and, peer support.
:	Relatives/legal guardians may be paid for providing waiver services whenever the relative/legal guardian is qualified to provide services as specified in Appendix C-1/C-3. Specify the controls that are employed to ensure that payments are made only for services rendered.
0	Other policy. Specify:

State:	
Effective Date	

f. Open Enrollment of Providers. Specify the processes that are employed to assure that all willing and qualified providers have the opportunity to enroll as waiver service providers as provided in 42 CFR §431.51:

Any willing and qualified provider has the opportunity to submit a proposal to enroll with the department as a provider of waiver services. The

Commonwealth's Executive Office of Health and Human Services has a prequalification process (808 CMR 1.04) to determine the fiscal health of the provider. All providers must complete this process in order to qualify as a provider of services.

DDS also has standards that ensure that waiver providers possess the requisite skills and competences to meet the needs of the waiver target population. The Department typically reviews qualifications in 30 days or less and then updates the list of qualified providers. Any participant may choose from among qualified providers who meet both the state's prequalification and DDS service standards.

The Department has posted on its website the requirements and procedures for potential providers to qualify to deliver services. The qualifying system is open and continuous to enable potential providers to qualify as they become ready to deliver services to waiver participants.

Out of state providers are permissible for services in circumstances where the provider is in a neighboring state and delivering services in-state. Out of state providers delivering Remote Supports and Monitoring services in-state are permissible.

Quality Improvement: Qualified Providers

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Qualified Providers

The state demonstrates that it has designed and implemented an adequate system for assuring that all waiver services are provided by qualified providers.

- i. Sub-Assurances:
 - a. Sub-Assurance: The state verifies that providers initially and continually meet required licensure and/or certification standards and adhere to other standards prior to their furnishing waiver services.
 - i. Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or

Appendix C-4: Additional Limits on Amount of Waiver Services

Additional Limits on Amount of Waiver Services. Indicate whether the waiver employs any of the following additional limits on the amount of waiver services (check each that applies).

	Not applicable – The state does not impose a limit on the amount of waiver services except as provided in Appendix C-3.
X	Applicable – The state imposes additional limits on the amount of waiver services.

When a limit is employed, specify: (a) the waiver services to which the limit applies; (b) the basis of the limit, including its basis in historical expenditure/utilization patterns and, as applicable, the processes and methodologies that are used to determine the amount of the limit to which a participant's services are subject; (c) how the limit will be adjusted over the course of the waiver period; (d) provisions for adjusting or making exceptions to the limit based on participant health and welfare needs or other factors specified by the state; (e) the safeguards that are in effect when the amount of the limit is insufficient to meet a participant's needs; and, (f) how participants are notified of the amount of the limit.

notifi	notified of the amount of the limit.		
	Limit(s) on Set(s) of Services . There is a limit on the maximum dollar amount of waiver service that is authorized for one or more sets of services offered under the waiver. <i>Furnish the information specified above</i> .		
X	Prospective Individual Budget Amount . There is a limit on the maximum dollar amount of waiver services authorized for each specific participant. <i>Furnish the information specified above</i> .		
	(a) All waiver participants are assessed using the MASSCAP assessment process as part of enrollment into the waiver. In the case of participants residing at home, DDS uses both the Caregiver portion of the MASSCAP which focus in greater detail on the capacity of the caregiver and the interaction of the participant's needs in the family home. There is also a standard assessment for safety issues and a standard approach and process for assessing risk. Participants are assessed annually and when the participant experiences changing needs. The maximum limit for services under the Community Living Waiver is \$100,000. This limit applies to all services available through this waiver.		
	(b) This limit includes the limits for the services listed in Appendix C and is based on DDS current and historical experience in providing these supports in its Adult Support and Community Living Waiver, its state funded Family Support Program, and its Autism Waiver.		
	(c) The limits may be adjusted subject to appropriation.		
	(d) If the participant cannot be safely served on the waiver within the cost limit, the participant will be dis- enrolled from the waiver, and, if appropriate, offered services from the Intensive Waiver		

using reserved capacity. There is reserved capacity on the Intensive Supports Waiver for participants enrolled in the CLS Waiver whose health and safety cannot be adequately addressed within the waiver

The mechanism to effect an exception to the applicable prospective limit is as follows. Should a participant experience a change in circumstances the Targeted Case Manager submits a request to the Area Director or their designee. The MASSCAP Team will conduct a new MASSCAP to assess for those changing needs. The request will detail the type and amount of services requested and the reason

cost limits or the needed supports are continuous in nature.

State:	
Effective Date	

why the participant's needs cannot be met within the waiver cost limits. The request will include a review of alternative non-waiver services including state plan services and other generic resources. The Area Director may authorize additional one-time funding not to exceed an additional \$5000 and cannot exceed 4 months to meet the participant's immediate needs while other alternatives are coordinated or to meet emergency needs that are not expected to be of a long- term nature such as an acute medical condition of the participant or a change in the capacity of the natural supports. If the participant's health and safety needs cannot be met within the waiver over time, they will be given the opportunity to apply for an alternative waiver for which they are eligible that will more adequately respond to their needs. Reserved capacity exists within the Intensive Supports to accommodate Changing Needs and Emergencies. The Department will continue to work with the participant to address health and safety concerns so that the participant can remain in the community. The Central Office Waiver Unit must approve the enrollment into an alternative waiver. Participants in emergency situations are permitted to access these services before other individuals who may be waiting for services from a particular waiver. Participants who are not at the prospective budget limit who need additional services within the Community Living Waiver are addressed by the Targeted Case Manager through the Individual Service Plan process outlined in Appendix D.

- (e) The participants will be offered the right to appeal as described in Appendix F.
- (f) The Quality Assurance System as described in Appendix H outlines the safeguards that are in effect to insure continuous monitoring of the participant by the DDS Targeted Case Manager. The description of services and the amounts of the limits are available on the DDS website. As part of the service planning process the DDS Targeted Case Manager notifies participants of the prospective individual budget limit.
- **Budget Limits by Level of Support**. Based on an assessment process and/or other factors, participants are assigned to funding levels that are limits on the maximum dollar amount of waiver services. *Furnish the information specified above*.
- X **Other Type of Limit.** The state employs another type of limit. *Describe the limit and furnish the information specified above.*
 - a) The aggregate number of day and employment supports cannot exceed the total number of business days per month as expressed in 8 hours per day. Maximum number of hours varies by month but total cannot exceed 184 hours in any month.
 - b) The limit is based on DDS historical experience providing these supports in its current Intensive, Community Living and Adult Supports Waiver.
 - c) The limit will not be adjusted based on appropriation because there are no more available business days.
 - d) The limit for day and employment services cannot be exceeded to meet the health and safety needs of the waiver participant. Additional supervisory services may be needed to meet the participant's health and welfare needs. If the participant has identified emergency needs the waiver has the mechanism in place to assure health and safety of the participant. Service coordinator maintains regular contact with the providers of waiver services across all settings. Both the Risk Management System and the Critical Incident Reporting System continuously alert the Service Coordinator to possible emergency needs. Residential provider programs are subject to licensure and certification. Waiver participants are also observed by a variety of service providers across a variety of settings. DDS also has available a RN or Nurse Practitioner in the Department's Area Offices to

State:	
Effective Date	

provide medical consultation as well as Psychologists to provide behavioral consultation. Medical and Behavioral issues are the most common types of emergencies in the system. All providers have developed Emergency back-up plans. All families have been advised and instructed to create emergency back-up plans. All providers have back up plans for weather related emergencies and actively participate in COOP planning regionally. All are connected to the Massachusetts Emergency Management Agency. Families are also advised to alert local officials of the presence of a participant with a disability in their home.

If the waiver participant cannot be safely served on the waiver the participants will be offered other state plan services to address the participant's health and safety needs.

- e) The participants will be offered the right to appeal as described in Appendix F.
- f) The Quality Assurance System as described in Appendix H outlines the safeguards that are in effect to insure continuous monitoring of the participant by the DDS Service Coordinator. The description of services and the amounts of the limits are available on the DDS website. As part of the service planning process the DDS Service Coordinator notifies participants of the aggregate limits for day and employment services.

Effective Date	

Appendix C-5: Home and Community-Based Settings

Explain how residential and non-residential settings in this waiver comply with federal HCB Settings requirements at 42 CFR 441.301(c)(4)-(5) and associated CMS guidance. Include:

- 1. Description of he settings and how they meet federal HCB Settings requirements, at the time of submission and in the future.
- 2. Description of the means by which the state Medicaid agency ascertains that all waiver settings meet federal HCB Setting requirements, at the time of this submission and ongoing.

Note instructions at Module 1, Attachment #2, <u>HCB Settings Waiver Transition Plan</u> for description of settings that do not meet requirements at the time of submission. Do not duplicate that information here.

The Adult Supports and Community Living waivers support participants who live in their own home or in their family home. The Department of Developmental Services (DDS), an agency within EOHHS that has primary responsibility for day-to-day operation of the Intensive Supports, Adult Supports, and the Community Living waivers, completed systemic and site-specific assessments to ensure compliance of waiver service settings with all applicable HCBS Community Rule requirements as they apply within this waiver.

The DDS systemic assessment process included a thorough review of regulations, policies and procedures, waiver service definitions, provider qualifications, and quality management and oversight systems to determine whether the systemic infrastructure was consistent with the principles of community integration. DDS issued a policy that governs future development of settings to ensure they are compliant with the Community Rule.

Where waiver services are provided to participants living in the community in their own home or their family home, these settings are presumed to be fully compliant with the HCBS Community Rule settings requirements.

The licensure and certification process is the basis for qualifying providers to do business with the Department, and applies to all public and private providers of residential, work/day, site-based respite and individualized home support services. The Department's licensure and certification process measures important indicators relating to health, personal safety, environmental safety, communication, human rights, staff competency, and goal development and implementation for purposes of licensure, as well as specific programmatic outcomes related to community integration, support for developing and maintaining relationships, exercise of choice and control of daily routines and major life decisions, and support for finding and maintaining employment and/or meaningful day activities. These indicators are supportive of and fully in compliance with the HCBS Community Rule settings requirements. The licensure and certification tool was revised (September 2016, March 2019, and March 2022) to clarify expectations and even more closely and strongly align the tool with the critical elements of the HCBS Community Rule settings requirements. DDS survey teams use the licensure and certification tool to review provider performance through on-site reviews on a prescribed cycle. Providers are required to make corrections when indicators are not met, and are subject to follow-up by surveyor staff.

DDS assures providers are reviewed and determined to be in compliance through licensure and certification processes and other monitoring mechanisms, such as site visits and person-centered planning

State:	
Effective Date	

processes and meetings. Indicators not met are reported to providers as part of the licensure and certification process and DDS or provider follow-up is expected. Additionally, there is oversight and monitoring of the regular site visits and of person-centered processes through DDS operations staff. Lastly, a special review by the licensure and certification team can be requested for additional assessment and or monitoring outside the licensure process. These processes will assure continuous and ongoing monitoring of compliance with the Community Rule.

In addition to the licensure and certification review, all settings receive ongoing monitoring for all service requirements as part of the existing waiver case management monitoring practices, to ensure continued compliance with all applicable HCBS Community Rule requirements.

This monitoring occurs as part of the annual person-centered planning process and during regular contacts with the Service Coordinator. The Service Coordinator meets with the participant at least every six months. In addition, the Service Coordinator maintains regular contact with the participant through a variety of means (e.g., in person, telephone, video-conferencing, text messaging, e-mail contacts, and/or other electronic modalities) and in the ways the participant prefers between visits. Every participant has direct in-person contact at least annually. The frequency of contact with a participant is based on the participant's individual needs. Participants with changing needs experience more frequent contact based on their individual needs. Service Coordinators review progress notes from providers and maintain regular contact with providers of waiver services which also serve to inform the frequency of direct in-person contact.

Appendix D: Participant-Centered Planning and Service Delivery

Appendix D-1: Service Plan Development

State Participant-Centered Service Plan Title:	Plan of Care

a. Responsibility for Service Plan Development. Per 42 CFR §441.301(b)(2), specify who is responsible for the development of the service plan and the qualifications of these individuals (check each that applies):

	Registered nurse, licensed to practice in the state
	Licensed practical or vocational nurse, acting within the scope of practice under state law
	Licensed physician (M.D. or D.O)
	Case Manager (qualifications specified in Appendix C-1/C-3)
X	Case Manager (qualifications not specified in Appendix C-1/C-3). <i>Specify qualifications</i> :
	The Department employs Service Coordinators who meet the requirements of the State Plan for Targeted Case Management. Service Coordinators:
	Applicants must have at least (A) three years of full-time or equivalent part-time professional experience in human services; (B) of which at least one year must have been spent working with people with disabilities (intellectual disability; developmental disabilities; deafness; blindness; multi-handicapped) or (C) any equivalent combination of required experience and the substitution below.
	Substitutions: 1. A Bachelor's degree with a major in social work, social casework, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of one year of the required (A) experience* 2. A Master's degree with a concentration in social work, psychology, sociology, counseling, counselor education, rehabilitation counseling may be substituted for a maximum of two years of the required (A) experience. 3. Applicants who meet all federal requirements for Qualified Intellectual Disability Professional may substitute those requirements for three years of the required combined (A) and (B) experience. 4. *Education toward such a degree will be prorated based on the proportion of the requirements actually completed.
	Personnel Qualifications Required at Hire: Knowledge of the principles and theories of human growth and development. Knowledge of the principles and techniques of counseling, especially people with disabilities and their families. Knowledge of the types and symptoms of mental and/or emotional disorder Knowledge of interviewing techniques and of motivation and reinforcement techniques. Knowledge of the types of services and supports available to people with disabilities and their families. Knowledge of group process for counseling.

b. Service Plan Development Safeguards.

Select one:

Entities and/or individuals that have responsibility for service plan development may not provide other direct waiver services to the participant.

Entities and/or individuals that have responsibility for service plan development may provide other direct waiver services to the participant.

The state has established the following safeguards to ensure that service plan development is conducted in the best interests of the participant. *Specify*:

The Department of Developmental Services (DDS) is the only willing and qualified provider of Targeted Case Management for adults with intellectual and developmental disabilities in Massachusetts. Targeted Case Managers (Service Coordinators) are responsible for the development of the person-centered plan and, therefore, do not provide waiver services to participants. Within the organizational structure of DDS, the position and duties of Service Coordinators are separate from the position and duties of the state employees responsible for the delivery of waiver services.

DDS policy provides conflict of interest-free case management and person-centered planning to all waiver participants, as well as a clear and accessible dispute resolution process. Participants are given information on qualified providers throughout the state and informed of their right to choose from any willing and qualified provider. In circumstances where the only appropriate and available service provider is state-operated, participants shall receive a written disclosure, which identifies that the provider is operated by the state and that the participant may access a dispute resolution process to have an independent review of the available providers and any potential for conflict of

State:	
Effective Date	

interest. Oversight of this process includes representatives from the DDS Office of Human Rights, the Bureau of Program Integrity and the Office of the General Counsel.

No employee of the state shall receive a benefit, monetary or otherwise, for referring an individual to receive supports through a state-operated provider. Service Coordinators are trained on how to provide conflict of interest-free case management and informed of the dispute resolution process available to participants.

c. Supporting the Participant in Service Plan Development. Specify: (a) the supports and information that are made available to the participant (and/or family or legal representative, as appropriate) to direct and be actively engaged in the service plan development process and (b) the participant's authority to determine who is included in the process.

The service planning process described in Appendix D produces the Waiver Plan of Care document. The Service Coordinator supports a participant through the entire service planning process, also known as home and community-based Waiver Plan of Care development/individual support planning process, by helping the participant prepare for the meeting and assisting them to voice their wants and needs at the meeting. This meeting may be conducted in-person or via telehealth.

The Service Coordinator has a discussion with the participant or guardian prior to the support plan meeting. If the participant agrees, other team members such as family and staff may also participate in this discussion. The discussion includes:

- The participant's goals and vision for the future
- A review of the past year and the participant's present circumstances
- Issues to discuss or not to discuss at the support plan meeting
- Identification of additional assessments needed for planning
- Explanation of the support plan process to the participant, family, and guardian
- Who to invite to the meeting
- The date, time, and place of the meeting

Other preparation includes talking to individuals who know the participant well such as staff, friends, advocates, and involved family members. The Service Coordinator respects the participant's wishes about who is part of the service planning process. When participants cannot communicate their preferences, Service Coordinators collect information through observation, inference from behavior, and discussions with individuals who know the participant well. All conversations should be respectful of the participant and focus on their strengths and preferences. The Service Coordinator also looks for creative ways to focus the team on the unique characteristics of the participant and their situation. The Service Coordinator does this by helping team members think creatively about how they can better support the participant.

During the service planning consultation, the participant and Service Coordinator identify who will be invited to the meeting. These individuals constitute the team members. In situations where personal and sensitive issues are discussed, certain team members may be invited to only part of the meeting. Any issue about attendance at the service planning meeting is resolved by the participant and the Service Coordinator.

d. Service Plan Development Process In four pages or less, describe the process that is used to develop the participant-centered service plan, including: (a) who develops the plan, who participates in the

State:	
Effective Date	

process, and the timing of the plan; (b) the types of assessments that are conducted to support the service plan development process, including securing information about participant needs, preferences and goals, and health status; (c) how the participant is informed of the services that are available under the waiver; (d) how the plan development process ensures that the service plan addresses participant goals, needs (including health care needs), and preferences; (e) how waiver and other services are coordinated; (f) how the plan development process provides for the assignment of responsibilities to implement and monitor the plan; and, (g) how and when the plan is updated, including when the participant's needs change. State laws, regulations, and policies cited that affect the service plan development process are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):

The service planning process is described at 115 CMR 6.20-6.25: Individual Support Planning.

The state uses a single service/support planning process that is designed to yield two documents: the Individual Support Plan (ISP) and the Plan of Care (POC) which set forth details of the participant's authorized waiver services. The service plan development process occurs annually with a full ISP plan developed once every two years and an ISP update in the interim year; the POC is updated annually. The process each year is similar, requiring a review of assessments ,progress notes, and a meeting of the Team. The service planning process provides guidance for the planning team to follow in supporting the participant to meet their goals.

The ISP articulates the hopes, desires, and needs of the participant, and describes the participant's current circumstances. The ISP describes a point in time emphasizing the present circumstances and future plans. The ISP is designed to balance competing desires and needs and reflects the participant's voice. The Vision Statement emphasizes the importance of the participant's wishes. It describes the participant's preferences, interests, and how the participant wishes to live, work, and use leisure time. The Visioning is focused on the following standard questions: What do they identify as important activities and relationships to continue to be involved in? What other things would they like to explore; What do they think someone needs to know in order to provide effective supports?; What do they think are their strengths and abilities?; What would they like to see happen in their life over the next two years? These questions undergird the service planning process. For some participants, the answers to the questions will evolve over time and always reflect a process which is respectful, participant-centered and keeps the participant in the forefront of all decisions.

Information about waiver services is first provided to potential participants at the time of waiver eligibility. Upon initial enrollment in the waiver, the Service Coordinator will provide the participant with information about supports available under this waiver and potential providers of these supports. Provider information is also available on the DDS website. If waiver participants request additional information, or if their needs change, additional information about waiver services is made available. At the supports planning meeting, the Service Coordinator provides each participant with a brochure describing the Choice of Service Delivery Method, including self-directed options, and a Family Handbook which explains the concepts of Choice, Portability, and Service Options within the waiver structure. The participant is also provided information on how to access a website where all qualified agency providers of services are listed.

Participants are encouraged to ask questions and discuss waiver service options as part of the Individual Service Planning process.

State:	
Effective Date	

There are seven components of the participant-centered support planning process; each area is addressed within the plan:

- 1) Vision statement, which forms the basis of the plan
- 2) Current supports, including services, settings and the people involved
- 3) Safety and Risk
- 4) Legal/Financial/ Benefit Status
- 5) Successes, Challenges, Emerging issue, and Unmet Needs
- 6) Goals
- 7) Objectives and Strategies

To facilitate a participant focused plan, DDS has a standard set of steps which includes premeeting activities, the design of the plan, implementation, updates, and plan modification. The requirements for each step are prescribed by DDS.

In general, the person-centered planning process documents a specific and individualized assessed need. There are four required assessments as part of the planning process for all waiver participants that assist the planning team to identify the participant's capabilities, support needs, and opportunities for skill development. The assessments assist the Team in establishing Goals, Objectives and Support Strategies that are likely to be effective and assist the participant to attain their goals. The four required assessments are: Assessment of Ability, Safety Assessment, Health and Dental Assessment, and the Funds Management Assessment. The Service Coordinator and team members may also identify additional assessments as needed.

In the event an assessed need is identified that may result in a limitation pertaining to lockable doors, privacy, choice of roommates, freedom to decorate one's room, freedom to control schedule and activities, access to food or visitors, DDS adheres to the requirements of 42 CMR 441.301(c)(4)(vi)(A). DDS engages with the participant in the individual support planning process (person centered plan) and, if modification is necessary it must be supported by a specific assessed need, agreed to by the participant and documented in the person-centered plan. Waiver service providers responsible for implementation of the person-centered plan goals are provided a copy of the plan, including a required signature page for provider sign-off.

The DDS Service Coordinator is the principal organizer of the service plan. The Service Coordinator's role is to support the participant to participate as fully as possible, to ensure that support is provided to the participant to take part in the support planning process, and to be the voice of the participant when the participant is not able to fully participate. Other team members include the guardian, family, and other identified formal and informal supports.

The Service Coordinator's responsibilities include developing the ISP and POC with the participant and their guardian, as appropriate, requesting and reviewing assessments, goals, objectives, and strategies, facilitating the meeting, ensuring the plan represents the participant's needs, maintaining the electronic service plans, monitoring the participant's satisfaction with the plan and progress on goals, and scheduling periodic progress or update meetings.

The Service Coordinator is responsible for any reasonable accommodation needed for the participant's or family/guardian's involvement in service planning. Accommodations may

State:	
Effective Date	

include personal assistance, interpreters, physical accessibility, assistive devices, and transportation.

ASSIGNING RESPONSIBILITIES

Following the ISP meeting, the goals and objectives are carried out by the appropriate team member identified. The providers track, document, and review progress for each goal. The review dates for each goal are decided at the ISP meeting and written in the plan. All goals are reviewed at least semi-annually.

The POC details both waiver and non-waiver services the participant will receive. The Service Coordinator has day to day responsibility for POC coordination.

UPDATING AND MODIFYING THE ISP

At the mid-point between meetings, the team members send progress summaries for each goal to the Service Coordinator. These summaries include:

- · Progress toward the goal
- Satisfaction with the ISP
- Effectiveness of the supports
- Quality of the interventions
- Need for modification

The Service Coordinator documents the ISP review in the participant's record, and specifies changes in the ISP and if the changes require a modification, such as types of supports utilized to assist the participant to attain identified goals.

DDS, in both its regulations and manual, identify the procedures to be followed in the event a team member, including the participant, believes a modification to the ISP is needed. A modification may be initiated by the participant, family/guardian, support provider, or service coordinator. 115 CMR 6.25.

Participants have the right to appeal their ISP and POC. The ISP and POC are implemented as written unless DDS receives written notice of appeal within 30 days from the date of their ISP and POC. 115 CMR 6.30 *et seq*. Additional information regarding appeals can be found in Appendix F-1.

PROCEDURE FOR DEVELOPING AN INTERIM, TEMPORARY PLAN OF CARE

To initiate services until a more detailed service plan can be finalized, an interim POC is developed by the Service Coordinator based on the results of the MASSCAP and any of the four required assessments as noted above which are available at the time the interim POC is developed. This information will be used to identify the participant's needs and the type of services to meet those needs.

The interim POC will become effective on the day services begin with a full planning meeting occurring no later than 90 days from that date. The Interim POC includes both the waiver and non-waiver services to be provided, their frequency, and who will provide the service. The duration of an interim POC may not be more than 60 days.

State:	
Effective Date	

6.20 et seq. Individual Support Planning and Appeals

e. Risk Assessment and Mitigation. Specify how potential risks to the participant are assessed during the service plan development process and how strategies to mitigate risk are incorporated into the service plan, subject to participant needs and preferences. In addition, describe how the service plan development process addresses backup plans and the arrangements that are used for backup.

Risk assessment and mitigation are a core part of the service planning process. Health, behavioral, and safety assessments are reviewed during the development of the ISP and potential risks to the participant's health and safety are identified.

Potential risks may also be identified by any member of the ISP Team at any point. The team member notifies the Service Coordinator of a potential risk, and the service coordinator discusses the information with area office supervisory staff. If the participant has a Risk Plan developed through the DDS Risk Management System, relevant components are discussed by the ISP Team and forwarded to the Risk Review Committee to assess changes to the Risk Plan. The ISP Team, including the participant, and relevant risk or clinical staff, develops a set of prevention strategies and responses to mitigate these risks that are sensitive to the participant's preferences. In the event the assessment process and review indicates the participant may require a new Risk Plan, the ISP Team makes a referral for the development of such a plan. The ISP will include reference to the Risk Plan and back-up plans to address contingencies such as emergencies, including the occasions when a support worker does not appear when scheduled to provide necessary services when the absence of the service may present a risk to the participant's health and welfare.

f. Informed Choice of Providers. Describe how participants are assisted in obtaining information about and selecting from among qualified providers of the waiver services in the service plan.

Participants have the right to freely select any willing and qualified provider of waiver services. The Service Coordinator provides each participant with information about supports available under the waiver and potential providers of these supports. This information includes an electronic index of providers available throughout the state and informs the participant regarding the option to obtain written material about DDS services and standards and providers.

As part of the pre-planning activities for the annual ISP meeting, and as requested by the participant, the Service Coordinator also provides information about the range of services and supports offered through this waiver and other sources such as the State Plan.

The Service Coordinator provides information about qualified providers relevant to the participant's expressed needs and concerns and supports the participant to identify and select from among qualified and willing providers. The Service Coordinator also informs the participant of their option to change providers, and the process to do so.

g.	Process for Making Service Plan Subject to the Approval of the Medicaid Agency. Describe the
	process by which the service plan is made subject to the approval of the Medicaid agency in accordance
	with 42 CFR §441.301(b)(1)(i):

State:	
Effective Date	

As outlined in Appendix A-1, The Department of Developmental Services (DDS) is a division/unit within the Executive Office of Health and Services - the single state Medicaid agency. DDS is responsible for day-to-day operations of these waivers. DDS maintains participant files at each Area Office. ISPs developed as described in this appendix, are maintained in the participant file.

Within 45 days following the ISP meeting, all ISPs shall be reviewed by the DDS Area Director or their designee, approved or disapproved in part or in whole, and provided to the individual, guardian (if applicable), and providers responsible for goal implementation. A notice of appeal rights will be included with the ISP.

As part of the quality assurance process, ISPs are reviewed for content, quality, and required components by DDS through use of the "Service Coordinator Supervisor Tool". A computerized formula generates a sample on a quarterly basis and assures that each Service Coordinator Supervisor reviews the same number of Service Plans completed by Service Coordinators whom they supervise.

h. Service Plan Review and Update. The service plan is subject to at least annual periodic review and update to assess the appropriateness and adequacy of the services as participant needs change. Specify the minimum schedule for the review and update of the service plan:

0	Every three months or more frequently when necessary
0	Every six months or more frequently when necessary
X	Every twelve months or more frequently when necessary
0	Other schedule
	Specify the other schedule:

i. Maintenance of Service Plan Forms. Written copies or electronic facsimiles of service plans are maintained for a minimum period of 3 years as required by 45 CFR §92.42. Service plans are maintained by the following (check each that applies):

X	Medicaid agency
	Operating agency
X	Case manager
	Other
	Specify:

State:	
Effective Date	

Appendix D-2: Service Plan Implementation and Monitoring

a. Service Plan Implementation and Monitoring. Specify: (a) the entity (entities) responsible for monitoring the implementation of the service plan and participant health and welfare; (b) the monitoring and follow-up method(s) that are used; and, (c) the frequency with which monitoring is performed.

The Service Coordinator has overall day to day responsibility for monitoring the implementation of the ISP and ensuring the participant is satisfied with waiver services. Services are furnished in accordance with the support plan to meet the participant's needs and achieve their intended outcomes, and for monitoring the health and welfare of the participant.

Other DDS staff and providers conduct several additional quality management processes to ensure individual participants are receiving the services they need, and their health and welfare is protected. These processes are described more fully in other appendices:

- a) incident reporting and management (described in Appendix G)
- b) medication occurrence reporting (described in Appendix G)
- c) restraint reporting, (described in Appendix G)
- d) investigations process (described in Appendix G)
- e) "trigger" reports (described in Appendix G)
- f) bi-monthly site visits
- g) risk assessment and management system
- h) human rights and peer review processes
- i) licensure and certification system
- j) annual standard contract review process
- k) periodic progress and update meetings
- 1) on-going contact with the participant and service providers.

Through HCSIS, Service Coordinators are timely notified of any reportable events, including incidents, medication occurrences, and restraints that occur for participants on their caseload. Service Coordinators review and approve (typically with additional oversight and review by area and regional directors) action steps taken to remediate or resolve reported issues. Incidents are not "closed" until action steps have been approved. In addition, Service Coordinators and area offices receive monthly "trigger" reports, which identify participants who have experienced a threshold number of incidents. Area Offices are required to review all "trigger" reports to assure that appropriate action has been taken to protect the health and welfare of participants.

The Department also has an extensive risk management system. Area based risk management teams identify, assess, and develop risk management plans for participants who require specific supports to mitigate risk to health and safety. Plans are reviewed on a regular basis by the area teams to assure their continued efficacy.

The Service Coordinator meets with the participant at least every six months. In addition, the Service Coordinator maintains regular contact with the participant through a variety of means and in the ways the participant prefers between visits. Every participant has direct in-person contact at least annually. In response to incidents reported through HCSIS, "trigger reports" are generated which provide additional information to the Service Coordinator which may result in increased direct in-person contact.

Participants with changing needs experience more frequent contact based on their individual needs. Service Coordinators review progress notes from providers and maintain regular contact with providers of waiver services which also serve to inform the frequency of direct in-person contact. Participants who have not received at least one waiver service in a month, receive contact in the following month.

State:	
Effective Date	

The frequency of contact with a participant is based on the participant's individual needs. These individual needs are related to a number of possible variables including whether the participant has a risk plan, the number of potential providers who have contact with the participant, the frequency of program monitoring within the provider site, and the frequency and type of family or community monitoring. All contact with participants is noted in DDS's electronic system of record and participant preferences are noted in the ISP.

At a minimum, every participant has direct in-person contact at least annually, and DDS Area office staff conduct bi-monthly site visits of 24-hour Residential Habilitation group home settings and quarterly site visits for Placement Services (Shared Living) - 24 Hour Supports settings and of settings with quarterly site visits of less than 24 hour supports.

In the event a participant or guardian is not in agreement with the level of contact, they can contact their Service Coordinator, the Service Coordinator Supervisor, or the DDS Area Director. DDS will work with participants to ensure their health and safety needs are met.

Monitoring the effectiveness of back-up plans is the responsibility of the Support Planning Team led by the Service Coordinator. As part of the ISP process, the safety assessment is reviewed, and a determination is made about whether there is a need for additional risk assessment. The outcome of the safety and risk assessments assist the team to determine the type of back-up plan required for each participant. Back-up plans are individualized and specific to the participant's circumstances.

The support planning process includes back-up plans to address contingencies which may impact a participant. The ISP team assesses the participant's needs and includes a review of the natural and generic supports available to assist the participant. Monitoring for effectiveness of back-up plans is the responsibility of the Support Planning Team led by the Service Coordinator. As part of the ISP process, the safety assessment is reviewed, and a determination is made about whether there is a need for additional risk assessment. The outcome of the safety and risk assessments assist the team to determine the type of back-up plan required for each participant. Back-up plans are individualized and specific to the participant's circumstances. Secondly, all incidents are reported in HSCIS including participant health and safety. A broad-based on-call system is in place throughout the state including an emergency hotline with 24/7 response.

Individuals and families are provided with information on who to contact in an emergency and how to access the hotline number. The Supervisor Tool is also used to monitor the efficacy of back-up plans. Licensure and certification of providers is the underpinning for addressing health and safety issues and offers an additional perspective about the effectiveness of back-up plans. DDS and providers also develop a Continuity of Operations Plans (COOP) providing guidance to ensure essential functions are available in the event of an emergency. Providers are also connected to the Massachusetts Emergency Management Agency (MEMA).

DDS also uses the Supervisor Tool to monitor the access to non-waiver services on a quarterly basis. Service Coordinator Supervisors routinely review Service Coordinator notes to monitor participant access to non-waiver services identified in the service plan including the types and frequency of access to health services.

Area office staff, also conducts bi-monthly site visits of 24-hour Residential Habilitation group home settings and quarterly site visits for Placement Services (Shared Living) – 24 Hour Support setting and of settings with of less than 24 hour supports. Service coordinators utilize a standardized site visit form that prompts review of such issues as the condition of the homes, interactions, and knowledge of staff of the participant and their individualized needs, and whether the supports address the participant's health and clinical needs. In the event an issue is identified as the result of

State:	
Effective Date	

a site visit, follow up is conducted by the service coordinator, program monitor, or other designated area office staff.

Providers are required to maintain active human rights committees and designate site based human rights officers. Human rights committees assist the provider to affirm, promote and protect the human and civil rights of individual and to monitor and review the activities of the provider. Among other duties, Human rights committees review restrictions on a participant's possessions or funds, emergency restraints, health related protective equipment used to prevent risk harm during self-injurious behavior, and intensive positive behavior support plans containing restrictive procedures.

Peer Review Committee (PRC) review is also required for intensive positive behavior support plans containing restrictive procedures. PRC comments must be addressed by the PBS qualified clinician prior to the implementation of such plans, except in an emergency. Periodic PRC review of behavior plans containing restrictive procedures is required.

Peer consultation also is available and encouraged to assist providers to improve PBS quality and skills and service plan development.

DDS License and Certification review process includes determining provider compliance with required safeguards such as the presence of Positive Behavior Support Plans, if necessary, and incident and restraint reporting, etc.

Licensing and certification of providers also safeguard participants by ensuring providers are achieving foundational safeguards and positive outcomes in the lives of participants they support. This oversight process selects a sample of participants and reviews how the provider is supporting health, safety, choice, control, growth and accomplishments, community integration, and relationships. The Area Office receives a copy of the outcomes for each participant contained in the sample. Follow up is conducted on participants and the provider agency to assure participants are receiving the services identified in their ISP and POC and that their health and safety is protected.

The Annual Standard Contract Review Process is conducted by Area Directors and compiles data from a variety of sources including the licensure and certification reviews, bi-monthly site visits and incident reports. The process allows the area offices and providers to identify how participants are supported to be healthy and safe and to achieve overall quality of life and to recommend improvements to provider activities, as necessary.

Service coordinators conduct semi-annual reviews of each participant's ISP and POC and their continued efficacy in assisting the participant to achieve their goals and objectives. Providers submit progress reviews and modifications are made, if necessary.

As described more fully in the Quality Improvement Section of Appendix D, the DDS Service Coordinator Supervisor Tool, and the ISP checklist further enhance the oversight and monitoring of the service plan.

115 CMR 3.09: Protection of Human Rights/Human Rights Committees, 115 CMR 5.00: Standards to Promote Dignity; 115 CMR 6.20-6.25: (Individual Support Plans); 115 CMR 7.00: Standards for All Services and Supports; 115 CMR 8.00: Licensure and Certification of Providers

b. Monitoring Safeguards. Select one:

State:	
Effective Date	

X	Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may not provide other direct waiver services to the participant.
0	Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may provide other direct waiver services to the participant.
	The state has established the following safeguards to ensure that monitoring is conducted in the best interests of the participant. <i>Specify</i> :

Quality Improvement: Service Plan

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Service Plan Assurance

The state demonstrates it has designed and implemented an effective system for reviewing the adequacy of service plans for waiver participants.

i. Sub-assurances:

a. Sub-assurance: Service plans address all participants' assessed needs (including health and safety risk factors) and personal goals, either by the provision of waiver services or through other means.

i. Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:	SP a1: Percent of service plans that reflect needs identified through the assessment process. (Number of service plans that address needs identified during the assessment process/ Number of service plans reviewed.)

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the state to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the state's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The State Medicaid agency is responsible for ensuring effective oversight of the waiver program, including administrative and operational functions performed by DDS. In the event a problem is discovered pertaining to the management of the waiver program processes at waiver service providers or DDS Area Offices, DDS is responsible for ensuring that a corrective action plan is created, approved, and implemented within appropriate timelines. Further, DDS and MassHealth are responsible for identifying and analyzing trends related to the operation of the waiver and determining strategies to address quality-related issues.

Appendix E: Participant Direction of Services HCBS Waiver Application Version 3.6

Appendix E: Participant Direction of Services

Applicability (from Application Section 3, Components of the Waiver Request):

X	Yes. This waiver provides participant direction opportunities. Complete the remainder of		
	the Appendix.		
0	No. This waiver does not provide participant direction opportunities. Do not complete		
	the remainder of the Appendix.		

CMS urges states to afford all waiver participants the opportunity to direct their services. Participant direction of services includes the participant exercising decision-making authority over workers who provide services, a participant-managed budget or both. CMS will confer the Independence Plus designation when the waiver evidences a strong commitment to participant direction.

Indicate whether Independence Plus designation is requested (select one):

0	Yes. The state requests that this waiver be considered for Independence Plus designation.
X	No. Independence Plus designation is not requested.

Appendix E-1: Overview

a. Description of Participant Direction. In no more than two pages, provide an overview of the opportunities for participant direction in the waiver, including: (a) the nature of the opportunities afforded to participants; (b) how participants may take advantage of these opportunities; (c) the entities that support individuals who direct their services and the supports that they provide; and, (d) other relevant information about the waiver's approach to participant direction.

Participants may choose to self-direct and lead the design of their services through the Department of Developmental Services (DDS) self-directed programs. Self-direction options facilitate the goals of self-determination by promoting independence in service planning for participants who choose to direct selection and management of waiver services. DDS currently provides two self-direction models, the Participant Directed Program (PDP) and the Agency with Choice Program (AWC).

For PDP services, participants are the employer and are responsible for hiring, training, and managing staff, and use the services of the Fiscal Employer Agent/Financial Management Service (FEA/FMS) to perform tasks related to the financial management of the individual budget. With AWC, participants share employment responsibilities with an agency who assists with hiring, training, and managing staff, and the participant acts the managing employer.

PDP model: In the PDP model, participants are the employers and are responsible for verifying qualifications, hiring, training, and managing the staff, and use the services of the FEA/FMS to perform the back-office functions and tasks related to the management of the individual budget (payroll, taxes). Participants also may recruit staff and set staff duties, wages, and benefits within established guidelines. Participants approve time sheets, submit approved provider invoices to the FEA/FMS, evaluate staff, and may terminate staff employment. The individual budget is entered into the FEA/FMS system for implementation of the plan and the individual budget.

In PDP, the participant is able to access and monitor their individual budget through the FEA/FMS online portal and from their service coordinator. The FEA/FMS also executes the agreements with

State:	
Effective Date	

Appendix E: Participant Direction of Services HCBS Waiver Application Version 3.6

providers of services, collects and processes staff timesheets approved by the participant, and pays invoices for approved goods and services in the person-centered plan. The FEA/FMS also assists participants in verifying citizenship status of candidates for employment and confirms staff qualification data, including state and national criminal background checks, and abuser registry checks.

AWC model: In AWC, an agency shares employment responsibilities with self-directed program participants. The AWC agency serves as the employer of record for the employee hired to provide services to the participant, and the participant serves as the day-to-day managing employer. The agency executes the agreements with providers of services, collects and processes staff timesheets approved by the participant, and pays invoices for approved goods and services in the personcentered plan. The agency also assists participants in verifying citizenship status of candidates for employment and confirms staff qualification data, including state and national criminal background checks, and abuser registry checks. Participants may refer prospective employees for employment through AWC and maintain responsibility to select, train, and supervise staff daily. Participants approve time sheets and submit invoices to the agency.

All waiver participants have a Targeted Case Manager (Service Coordinator). As part of the initial and on-going planning process of assessment and enrollment into the waiver, the Service Coordinator provides participants information about the opportunity to self-direct and the models they can utilize. The Service Coordinator may assist participants to monitor and manage their individual budgets, develop an emergency back-up plan, and access self-advocacy training and support. Service Coordinators may also provide support and training on how to hire, manage, train staff, negotiate with service providers, and advocate for new supports, as necessary.

The administrative costs associated with the PDP (FEA/FMS) and AWC models are not included in the individual budget.

b. Participant Direction Opportunities. Specify the participant direction opportunities that are available in the waiver. *Select one*:

0	Participant – Employer Authority . As specified in <i>Appendix E-2, Item a</i> , the participant (or the participant's representative) has decision-making authority over workers who provide waiver services. The participant may function as the common law employer or the coemployer of workers. Supports and protections are available for participants who exercise this authority.
0	Participant – Budget Authority. As specified in <i>Appendix E-2, Item b</i> , the participant (or the participant's representative) has decision-making authority over a budget for waiver services. Supports and protections are available for participants who have authority over a budget.
X	Both Authorities. The waiver provides for both participant direction opportunities as specified in <i>Appendix E-2</i> . Supports and protections are available for participants who exercise these authorities.

State:	
Effective Date	

Appendix E: Participant Direction of Services HCBS Waiver Application Version 3.6

c.	Availability	of Participan	t Direction by	Type of Living	Arrangement.	Check each that	applies:

X	Participant direction opportunities are available to participants who live in their own private residence or the home of a family member.
X	Participant direction opportunities are available to individuals who reside in other living arrangements where services (regardless of funding source) are furnished to fewer than four persons unrelated to the proprietor.
	The participant direction opportunities are available to persons in the following other living arrangements Specify these living arrangements:

d. Election of Participant Direction. Election of participant direction is subject to the following policy (select one):

0	Waiver is designed to support only individuals who want to direct their services.
0	The waiver is designed to afford every participant (or the participant's representative) the opportunity to elect to direct waiver services. Alternate service delivery methods are available for participants who decide not to direct their services.
X	The waiver is designed to offer participants (or their representatives) the opportunity to direct some or all of their services, subject to the following criteria specified by the state. Alternate service delivery methods are available for participants who decide not to direct their services or do not meet the criteria.
	Specify the criteria
	Participation in self-direction is available to all participants enrolled in this waiver. The waiver is designed to offer participants or their chosen representative the opportunity to direct their services. Participants must be able to be safely served with self-directed supports and participants and/or their chosen representative must demonstrate an ability and desire to participate in self-direction. This includes making the choice to self-direct services, participating in the person-centered planning process and development of the ISP, choosing qualified providers, managing a budget, and working collaboratively with DDS and FEA/FMS.
	DDS will make all efforts to support participants who are determined to require significant assistance to self-direct their services.

e. Information Furnished to Participant. Specify: (a) the information about participant direction opportunities (e.g., the benefits of participant direction, participant responsibilities, and potential liabilities) that is provided to the participant (or the participant's representative) to inform decision-making concerning the election of participant direction; (b) the entity or entities responsible for furnishing this information; and, (c) how and when this information is provided on a timely basis.

Participants are informed of the components of both models (PDP and AWC) during the personcentered planning process. Service Coordinators provide materials which detail the different service models available to them (traditional, PDP, and AWC). Individuals and their families are given the opportunity to attend informational sessions which are run by the Regional Self-Direction Managers. In addition, they can access information available on the State's website which has printable guides regarding self-direction and service choice. Area Office staff also provide additional detailed information about the FEA/FMS and/or the selected AWC Agency, as appropriate. Individuals interested in AWC can interview different agencies to learn information specific to the agency's AWC program including payroll, hiring process, and the partnership between them and the individual.

State:	
Effective Date	

Service Coordinators ensure participants are informed about concept and practice of self-directed supports. This information includes not only the potential benefits of self-direction, but also the associated obligations, responsibilities and limitations.

Service Coordinators provide detailed information about both self-direction models (PDP and AWC) at the time of the annual ISP meeting. If a participant chooses to self-direct "off-cycle" from the annual ISP, an ISP modification meeting will be held. In addition, participants are informed of where they can access information available on the state's website and are given the opportunity to attend monthly informational sessions which are run by the Regional Self-Direction Managers.

f. Participant Direction by a Representative. Specify the state's policy concerning the direction of waiver services by a representative (*select one*):

The state does not provide for the direction of waiver services by a representative.	
The state provides for the direction of waiver services by representatives. Specify the representatives who may direct waiver services: (check each that applies):	
X Waiver services may be directed by a legal representative of the participant.	
X	Waiver services may be directed by a non-legal representative freely chosen by an adult participant. Specify the policies that apply regarding the direction of waiver services by participant-appointed representatives, including safeguards to ensure that the representative functions in the best interest of the participant: The state's practice is to allow participants the opportunity to self-direct their waiver services independently, if they are able to do so, or with assistance, if needed from a legal representative of the participant, family members, or a non-legal representative chosen by an adult participant. The representative of the participant may not be paid for directing the services. Participants are also trained on identifying financial abuse and exploitation, how to report it, how to seek help, and how to prevent it from happening. The level of involvement of the non-legal representative is determined by the participant and/or their legal guardian. They can choose to have the non-legal representative participate in planning and decision making as they deem necessary.
	The s

g. Participant-Directed Services. Specify the participant direction opportunity (or opportunities) available for each waiver service that is specified as participant-directed in Appendix C-1/C-3. *(Check the opportunity or opportunities available for each service)*:

h. Financial Management Services. Except in certain circumstances, financial management services are mandatory and integral to participant direction. A governmental entity and/or another third-party entity must perform necessary financial transactions on behalf of the waiver participant. Select one:

X		Yes. Financial Management Services are furnished through a third party entity. (Complete item E-1-i).		
	_	ecify whether governmental and/or private entities furnish these services. Check each that plies:		
		Governmental entities		
	X	Private entities		
0		6. Financial Management Services are not furnished. Standard Medicaid payment echanisms are used. Do not complete Item E-1-i.		

i. Provision of Financial Management Services. Financial management services (FMS) may be furnished as a waiver service or as an administrative activity. Select one:

0	FMS are covered as the waiver service		
	specified in Appendix C-1/C-3		
	The waiver service entitled:		
X	FMS are provided as an administrative activity.		
	Provide the following information		
i.	Types of Entities : Specify the types of entities that furnish FMS and the method of procuring these services:		
	For the PDP model, FMS are provided through a Fiscal Employer Agency (FEA/FMS). The designation of the FEA/FMS is the result of an open, competitive procurement.		
ii.	Payment for FMS . Specify how FMS entities are compensated for the administrative activities that they perform:		
	For the PDP model, FMS are furnished as an administrative activity between DDS and the FEA/FMS. Currently, FMS are provided through Public Partnerships Limited (PPL) as the result of an open and competitive procurement. The contract between DDS and PPL provides for a monthly FMS fee for each participant with ongoing services and a transaction fee for each participant who is purchasing goods, but who is not self-directing ongoing services.		

State:	
Effective Date	

	par	L executes individual provider contracts with each participant for FMS and with the ticipant and the provider of direct supports and services. FMS costs associated with self-ection are not included in the individual budget.		
iii.	·			
	Supports furnished when the participant is the employer of direct support workers:			
	X	Assists participant in verifying support worker citizenship status		
	X	Collects and processes timesheets of support workers		
	X			
	X	Other		
		Specify:		
		Provides information to participants, provides a customer service line, accepts and processes applications from potential providers, and maintains a list of approved providers.		
		FEA/FMS also confirm staff qualification data, including state and national criminal background checks and DPPC abuser registry checks (101 CMR 15.00;115 CMR 12.00; and 118 CMR 15.00).		
	Sup	ports furnished when the participant exercises budget authority:		
	X	Maintains a separate account for each participant's participant-directed budget		
	X	Tracks and reports participant funds, disbursements and the balance-of participant funds		
	X	Processes and pays invoices for goods and services approved in the service plan		
		Provide participant with periodic reports of expenditures and the status of the participant-directed budget		
	X	Other services and supports Specify:		
		Assures that payment is made to only those providers that have qualified to provide supports.		
	Ado	ditional functions/activities:		
		Executes and holds Medicaid provider agreements as authorized under a written agreement with the Medicaid agency		
	X	Receives and disburses funds for the payment of participant-directed services under an agreement with the Medicaid agency or operating agency		
	X	Provides other entities specified by the state with periodic reports of expenditures and the status of the participant-directed budget		
	X	Other Specify:		

State:	
Effective Date	

FEA/FMS provides an enrollment packet to each participant to whom it provides fiscal intermediary services under their state contract. The enrollment packet includes the forms and information (employee application, fact sheet on employer liability and safety, criminal background checks, Individual Provider agreement, employee and Vendor Agreement forms, Individual Provider Training Verification Record and training materials including information on the Disabled Persons Protection Commission (DPPC).

iv. Oversight of FMS Entities. Specify the methods that are employed to: (a) monitor and assess the performance of FMS entities, including ensuring the integrity of the financial transactions that they perform; (b) the entity (or entities) responsible for this monitoring; and, (c) how frequently performance is assessed.

DDS is responsible for managing the performance of the FEA/FMS. DDS requires the FEA/FMS to meet established performance metrics and has established a process of remediation if they are not achieved. The FEA/FMS maintains individual budgets on a management information system and provides weekly financial reports to DDS. Through access to the FEA/FMS portal, participants can review specific line items identifying the disbursements and remaining budget.

The FEA/FMS configures data so as to produce reports of performance measures, and to develop a unified format both for utilization and financial reporting. The FEA/FMS is responsible for providing data and reports for DDS QA measures and waiver assurances.

DDS has regular monitoring meetings with the FEA/FMS to address business process issues that may arise and ad hoc contacts whenever issues occur outside of these regularly scheduled times.

State:
Effective Date

j. Information and Assistance in Support of Participant Direction. In addition to financial management services, participant direction is facilitated when information and assistance are available to support participants in managing their services. These supports may be furnished by one or more entities, provided that there is no duplication. Specify the payment authority (or authorities) under which these supports are furnished and, where required, provide the additional information requested *(check each that applies)*:

X	Case Management Activity. Information and a furnished as an element of Medicaid case manage Specify in detail the information and assistance	
	each participant direction opportunity under the	
	Service Coordinators share information about self- part of the ongoing service planning process, and the participant to be actively involved in the plan to develop and implement a plan that addresses the information about choice of qualified providers a participant, service coordinator and area office of including the identification of participant directed their services are assessed to determine their above required to assist them. Service Coordinators asson by arranging supports and services as described in as needed. Service Coordinators also share information, negotiate provider rates, develop and manage	f-direction at the time of the planning meeting, as I upon request. The Service Coordinator supports upon request along with the other team members he participant's needs and preferences, and shares and self-direction options. State:	
Effective Date	

- Review individual budgets and spending on a quarterly basis with the participant
- Facilitate the development of a person-centered plan of care
- Monitor and assist the participant when revisions are needed
- Review participant responsibilities of PDP annually with the participant

The level and type of support provided by the Service Coordinator is based on a participant's individualized needs. Service Coordinators provide support to all participants who self-direct their services, regardless of whether the participant chooses the PDP model, AWC, or a combination of both types.

k. Independent Advocacy (select one).

X	No. Arrangements have not been made for independent advocacy.
0	Yes. Independent advocacy is available to participants who direct their services.
	Describe the nature of this independent advocacy and how participants may access this advocacy:

l. Voluntary Termination of Participant Direction. Describe how the state accommodates a participant who voluntarily terminates participant direction in order to receive services through an alternate service delivery method, including how the state assures continuity of services and participant health and welfare during the transition from participant direction:

In the event a participant voluntarily chooses to terminate this method of receiving services, DDS would seek to continue supports through a traditional provider to meet the participant's health and welfare needs. When appropriate, the Department would alter the person-centered plan to ensure it meets the needs of the participant and to ensure health and safety during the transition from self-directed services to a traditional provider-based service.

DDS regulations require the Service Coordinator to convene a meeting as soon as possible but at least within 30 days of the service change request.

During the transition period, the Service Coordinator ensures that the participant's health and safety needs are met, assists the participant to choose from among any willing and qualified provider(s), and coordinates the start date of new services to ensure continuity. Self-directed services will not be terminated before new services are in place.

m. Involuntary Termination of Participant Direction. Specify the circumstances when the state will involuntarily terminate the use of participant direction and require the participant to receive provider-managed services instead, including how continuity of services and participant health and welfare is assured during the transition.

In the event a participant cannot fulfill their responsibilities or adhere to self-direction requirements after all efforts have been made to support them, including offering alternative self-direction models, DDS will provide the participant with notice and an opportunity to appeal. Reasons for termination include: a) inability or refusal to participate in the development and implementation of the person centered plan; b) continued inability to manage the individual budget; c) inability to choose, change, and/or substitute qualified providers; d) failure to submit accurate timesheets; e) inability to be safely served within available self-directed programs; f) authorizing payment for

State:	
Effective Date	

services or supports that are not in accordance with the individual plan; and g) fraudulent or unlawful activity associated with the self-direction program.

In the event of termination from a self-directed program, the participant and the planning team, including the Service Coordinator, shall meet to develop a transition plan. A formal written notice of termination will be mailed to the participant and/or legal guardian.

The Service Coordinator ensures that the participant's health and safety needs are met during the transition, coordinates the transition of services, and assists the participant to choose from among any willing and qualified provider(s).

n. Goals for Participant Direction. In the following table, provide the state's goals for each year that the waiver is in effect for the unduplicated number of waiver participants who are expected to elect each applicable participant direction opportunity. Annually, the state will report to CMS the number of participants who elect to direct their waiver services.

Table E-1-n		
	Employer Authority Only	Budget Authority Only or Budget Authority in Combination with Employer Authority

Effective Date	

Appendix E-2: Opportunities for Participant-Direction

- **a. Participant Employer Authority** *Complete when the waiver offers the employer authority opportunity as indicated in Item E-1-b:*
 - **i. Participant Employer Status**. Specify the participant's employer status under the waiver. *Select one or both:*
 - X The participant (or the participant's representative) Participant/Co-Employer. functions as the co-employer (managing employer) of workers who provide waiver services. An agency is the common law employer of participant-selected/recruited staff and performs necessary payroll and human resources functions. Supports are available to assist the participant in conducting employer-related functions. Specify the types of agencies (a.k.a., "agencies with choice") that serve as co-employers of participant-selected staff: In AWC, DDS selects and contracts with qualified providers via a public procurement process. AWC providers share responsibilities for selecting and directing persons to deliver services to the participant. The Agency is responsible for determining the qualifications of persons hired and assists participants in conducting employer related functions, e.g. payroll and taxes. A list of qualified AWC providers is available on the state's website. X Participant/Common Law Employer. The participant (or the participant's representative) is the common law employer of workers who provide waiver services. An IRS-approved Fiscal/Employer Agent functions as the participant's agent in performing payroll and other employer responsibilities that are required by federal and state law. Supports are available to assist the participant in conducting employer-related
 - **ii. Participant Decision Making Authority.** The participant (or the participant's representative) has decision making authority over workers who provide waiver services. *Select one or more decision making authorities that participants exercise*:

X	Recruit staff
X	Refer staff to agency for hiring (co-employer)
X	Select staff from worker registry
X	Hire staff (common law employer)
X	Verify staff qualifications
X	Obtain criminal history and/or background investigation of staff
	Specify how the costs of such investigations are compensated:
	Payment for these investigations does not come from the participant's budget but is made either by the FEA/FMS in PDP or through the agency in AWC.
X	Specify additional staff qualifications based on participant needs and preferences so long as such qualifications are consistent with the qualifications specified in Appendix C-1/C-3. Specify the state's method to conduct background checks if it varies from Appendix C-2-a:
	Criminal background checks are conducted in accordance with processes outlined in Appendix C-2-a
X	Determine staff duties consistent with the service specifications in Appendix C-1/C-3.

State:	
Effective Date	

X	Determine staff wages and benefits subject to applicable state limits
X	Schedule staff
X	Orient and instruct-staff in duties
X	Supervise staff
X	Evaluate staff performance
X	Verify time worked by staff and approve time sheets
X	Discharge staff (common law employer)
X	Discharge staff from providing services (co-employer)
	Other
	Specify:

- **b. Participant Budget Authority** *Complete when the waiver offers the budget authority opportunity as indicated in Item E-1-b:*
 - **i. Participant Decision Making Authority.** When the participant has budget authority, indicate the decision-making authority that the participant may exercise over the budget. *Select one or more*:

X	Reallocate funds among services included in the budget
X	Determine the amount paid for services within the state's established limits
X	Substitute service providers
X	Schedule the provision of services
X	Specify additional service provider qualifications consistent with the qualifications specified in Appendix C-1/C-3
X	Specify how services are provided, consistent with the service specifications contained in Appendix C-1/C-3
X	Identify service providers and refer for provider enrollment
X	Authorize payment for waiver goods and services
X	Review and approve provider invoices for services rendered
О	Other
	Specify:

ii. Participant-Directed Budget. Describe in detail the method(s) that are used to establish the amount of the participant-directed budget for waiver goods and services over which the participant has authority, including how the method makes use of reliable cost estimating information and is applied consistently to each participant. Information about these method(s) must be made publicly available.

Participants' individual budgets for goods and services over which the participant has authority are developed in coordination with the participant's team and established through personcentered planning.

State:	
Effective Date	

DDS shall set individual budgets annually based upon the participants' assessed needs in consultation with the participants' person-centered planning team. In establishingindividual budgets, consideration will be given to the equivalent cost of traditional services each participant has been assessed as needing, established service rates, utilization, and the participant's resources, e.g. recurrent payments, income, scholarships, financial assistance programs, eligibility for government benefits or other entitlements. Participants' budgets will not exceed the equivalent cost of traditional services.

Service Coordinators maintain regular contact with participants, and participants may request an adjustment to their individual budget at any time through either a verbal or written request to their Service Coordinators. Service Coordinators will then work with DDS Area Office management to modify the budget based on assessed needs and prioritization for services.

The individual assessment process determines the services needed to ensure the participant's health and welfare and to prevent the risk of institutionalization. The use of the standard MASSCAP assessment process, Self-Directed Supports Allocation Methodology, or other standardized methodology adopted by DDS ensures that the budget methodology is applied consistently to each participant.

iii. Informing Participant of Budget Amount. Describe how the state informs each participant of the amount of the participant-directed budget and the procedures by which the participant may request an adjustment in the budget amount.

The participant is part of the individual budget planning development and is informed by DDS of the individual budget amount annually. Service Coordinators maintain regular contact with participants who may request an adjustment to their individual budget at any time. DDS provides participants with notice that they have appeal rights and how to initiate an appeal.

(115 CMR 6.33 et seq.).

- iv. Participant Exercise of Budget Flexibility. Select one:
 - O Modifications to the participant directed budget must be preceded by a change in the service plan.
 - X The participant has the authority to modify the services included in the participant-directed budget without prior approval.

Specify how changes in the participant-directed budget are documented, including updating the service plan. When prior review of changes is required in certain circumstances, describe the circumstances and specify the entity that reviews the proposed change:

A participant has the authority to modify the services included in the individual budget within service limits established by DDS. The Service Coordinator will document the modification to the individual budget and assist the participant to facilitate the modification(s). Depending upon the extent of modifications to services, an ISP modification may be appropriate and will be facilitated by the Service Coordinator. See 115 CMR 6.25 and Appendix D [D-1 (d)] of the waiver.

Submissions are reviewed by Service Coordinators and DDS Area Office management, as appropriate.

State:	
Effective Date	

In the event changes are needed related to the increase or decrease of the allocated budget, the Service Coordinator follows the established ISP modification process, including review and approval by the DDS Area Director or designee.

v. Expenditure Safeguards. Describe the safeguards that have been established for the timely prevention of the premature depletion of the participant-directed budget or to address potential service delivery problems that may be associated with budget underutilization and the entity (or entities) responsible for implementing these safeguards:

The FEA/FMS operates a web-based electronic information system that:

Tracks allocations and payment of invoices;

Tracks and monitors billings and reimbursements by participant identification, name, social security number, service type, number of service units, dates of services, service rate, provider identification and participant's support plan;

Tracks and monitors utilization review and issues weekly reports to DDS;

DDS reviews participant specific utilization reports to identify potential over-utilization or under-utilization of the individual budget and/or non-compliance with the individual support plan. If over- or under- utilization becomes apparent, the Service Coordinator will address utilization with the participant. Service Coordinators review expenditure reports on a quarterly basis at minimum and will work to address utilization issues as soon as possible.

The FEA/FMS also has systems in place to prevent payments of invalid payment requests.

Additionally, there is ongoing communication between the Service Coordinator and the FEA/FMS and regular communication between the Service Coordinator and the participant.

Appendix F: Participant Rights

Appendix F-1: Opportunity to Request a Fair Hearing

The state provides an opportunity to request a Fair Hearing under 42 CFR Part 431, Subpart E to individuals: (a) who are not given the choice of home and community-based services as an alternative to the institutional care specified in Item 1-F of the request; (b) are denied the service(s) of their choice or the provider(s) of their choice; or, (c) whose services are denied, suspended, reduced or terminated. The state provides notice of action as required in 42 CFR §431.210.

Procedures for Offering Opportunity to Request a Fair Hearing. Describe how the individual (or his/her legal representative) is informed of the opportunity to request a fair hearing under 42 CFR Part 431, Subpart E. Specify the notice(s) that are used to offer individuals the opportunity to request a Fair Hearing. State laws, regulations, policies and notices referenced in the description are available to CMS upon request through the operating or Medicaid agency.

Individuals are afforded the opportunity to request a Fair Hearing in all instances when they: (a) are not provided the choice of home and community-based services as an alternative to institutional care; (b) are denied the service(s) of their choice or the provider(s) of their choice; and/or their services are denied, suspended, reduced or terminated.

Individuals are informed in writing of the procedures for requesting a Fair Hearing as part of the waiver entrance process by letter from the Waiver Management Unit. If entrance to the waiver is denied, the individual is given formal written notice of the denial and information about how to request a Fair Hearing to appeal the denial of entrance to the waiver. In order to ensure that the individual is fully informed of his right to a Fair Hearing, the written information when necessary will be supplemented with a verbal explanation of the Rights to a Fair Hearing.

Whenever an action is taken that adversely affects a waiver participant post-enrollment (e.g. services are denied, reduced or terminated), the participant is notified in writing by letter from the Area Director or designee on a timely basis in advance of the effective date of the action. The notice includes information about how the participant may appeal the action by requesting a Fair Hearing and provides, as appropriate, for continuation of services while the participant's appeal is under consideration. Copies of the notices are maintained in the individual's record. It is up to the participant to decide whether to request a Fair Hearing.

The notices regarding the right to a Fair Hearing in each instance provides a brief description of the appeals process and instructions regarding how to appeal. The notices refer the individual and/or legal representative to the DDS regulations at 115 CMR 6.33-6.34 which describe the procedure for requesting and receiving a Fair Hearing. Informal conferences and Fair Hearings are conducted in accordance with the Massachusetts Administrative Procedures Act and the Standard Adjudicatory Rules of Practice and Procedure. See 801 CMR 1.00 et seq. Individuals are notified that they may appeal Fair Hearing decisions to the Superior Court pursuant to M.G.L. c. 30 A (the Massachusetts Administrative Procedures Act.) The right to a fair hearing within time frames in Federal regulations is not impeded by any other method of problem resolution. The time frame for any other state problem-resolution activity runs concurrent with a person's right to a fair hearing.

DDS Regional Directors are notified when a participant requests a fair hearing due to a reduction, termination, or change in the type of services.

State:	
Effective Date	

Appendix F: Participant Rights HCBS Waiver Application Version 3.6

The DDS Appeals Unit schedules fair hearings at which a member of the DDS legal department participates. DDS contracts with independent, impartial hearing officers who preside over the fair hearing process.

Notices of denial of entrance to the waiver, termination from the waiver, and the opportunity to request a fair hearing ("appeal rights" notice) are stored electronically by the DDS Waiver Management Unit. Notices of adverse actions and appeal rights due to a reduction, termination, or change in the type of services are stored electronically in the Home and Community Services Information System (HCSIS).

State:	
Effective Date	

Appendix F-2: Additional Dispute Resolution Process

a.	Availability of Additional Dispute Resolution Process.	Indicate whether the state operates another
	dispute resolution process that offers participants the opport	unity to appeal decisions that adversely affect
	their services while preserving their right to a Fair Hearing.	Select one:

X	No. This Appendix does not apply
0	Yes. The state operates an additional dispute resolution process

b.	Description of Additional Dispute Resolution Process . Describe the additional dispute resolution process, including: (a) the state agency that operates the process; (b) the nature of the process (i.e., procedures and timeframes), including the types of disputes addressed through the process; and, (c) how the right to a Medicaid Fair Hearing is preserved when a participant elects to make use of the process: State laws, regulations, and policies referenced in the description are available to CMS upon request
	through the operating or Medicaid agency.

State:	
Effective Date	

Appendix F-3: State Grievance/Complaint System

	X	No. This Appendix does not apply
	0	Yes. The state operates a grievance/complaint system that affords participants the opportunity to register grievances or complaints concerning the provision of services under this waiver
	_	ational Responsibility. Specify the state agency that is responsible for the operation of the
g	grievai	nce/complaint system:

Appendix G: Participant Safeguards

Appendix G-1: Response to Critical Events or Incidents

a.	Critical Event or Incident Reporting and Management Process.	Indicate whether the state operates
	Critical Event or Incident Reporting and Management Process	that enables the state to collect
	information on sentinel events occurring in the waiver program. Se	elect one:

X	Yes. The state operates a Critical Event or Incident Reporting and Management Process (complete Items b through e)	
0	No. This Appendix does not apply (do not complete Items b through e). If the state does not operate a Critical Event or Incident Reporting and Management Process, describe the process that the state uses to elicit information on the health and welfare of individuals served through the program.	

b. State Critical Event or Incident Reporting Requirements. Specify the types of critical events or incidents (including alleged abuse, neglect and exploitation) that the state requires to be reported for review and follow-up action by an appropriate authority, the individuals and/or entities that are required to report such events and incidents, and the timelines for reporting. State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

DDS systems for reporting and follow-up of a critical event or incident are managed as "incidents" and "complaints" of abuse, neglect, exploitation and/or death to the Disabled Persons Protection Commission (DPPC); such events may be subject to management under one or both systems as described below.

DDS utilizes a web based incident reporting system, the Home and Community Services Information System (HCSIS) system. The incident reporting system provides invaluable information regarding participant incidents, immediate and long range actions taken as well as aggregate information that informs analyses of patterns and trends. Providers are required to report incidents when they occur and service coordinators are required to report incidents when they learn about them if they have not already been reported. Incidents are classified as requiring either a minor or major level of review. Deaths, physical and sexual assaults, suicide attempts, certain unplanned hospitalizations, near drowning, missing person, and injuries, are examples of incidents requiring a major level of review. Suspected verbal or emotional abuse, theft, property damage, and behavioral incident in the community are examples of incidents requiring a minor level of review. The HCSIS system is an integrated "event" system and as such medication occurrences and restraint utilization are also reported. These processes are more fully described in this appendix. Incidents classified as minor are recorded in HCSIS within 3 business days and may be reclassified as major incidents, as appropriate. Major incidents are recorded in HCSIS within 1 business day. Providers also are responsible to immediately report major incidents by telephone or e-mail to DDS Area Offices. Immediate and longer term actions steps are delineated in HCSIS and must be reviewed and approved by DDS area office staff for minor incidents and area and regional staff for major incidents. An incident is closed when all action

State:	
Effective Date	

steps are taken and all required approvals have been completed. Standard monthly management reports are provided to area, regional and central office staff for purposes of follow up on provider and systemic levels.

Aggregate data is reported by numbers and rates for each area and region on a quarterly basis.

In addition to the incident reporting system, allegations of abuse, neglect, exploitation and/or death are reported to the Disabled Persons Protection Commission (DPPC) in accordance with M.G.L. c.19C. DPPC is the independent State agency responsible for investigating allegations of abuse, neglect, exploitation and/or death of participants with disabilities between the ages of 18 and 59. By regulation, DDS Investigations Unit investigates allegations of abuse of participants served by DDS who are not within the statutory authority of DPPC, for example, adults with intellectual disability over the age of 59 (115 CMR 9.00). Mandated reporters, participants, families and the general public report suspected cases of abuse, neglect, exploitation and/or death directly to the DPPC. DPPC reviews all complaints and assigns investigation responsibility internally or to DDS or other state agency investigations units. DDS and DPPC developed mandated reporter training required for all staff who work with participants in provider agencies and state operated services.

Complaints of abuse, neglect, exploitation (including financial exploitation), medication errors that result in medical intervention, illness, injury, and death are reported to DPPC. A member of the State Police Detective Unit (SPDU) assigned to the DPPC reviews every report made to the DPPC Hotline.

(115 CMR 5.00: Standards to Promote Dignity, 9.00: Investigations and Reporting Responsibilities, and 13.00: Incident Reporting)

c. Participant Training and Education. Describe how training and/or information is provided to participants (and/or families or legal representatives, as appropriate) concerning protections from abuse, neglect, and exploitation, including how participants (and/or families or legal representatives, as appropriate) can notify appropriate authorities or entities when the participant may have experienced abuse, neglect or exploitation.

Providers are required to inform all participants and families of their right to be free from abuse, neglect, exploitation and/or death and to whom they should report allegations of abuse, neglect, exploitation and/or death. Participants and their families are given the information both in written and verbal formats. Service Coordinators also inform participants about how to report alleged cases of abuse, neglect, exploitation and/or death and, upon request, assist a participant to make a report. Quality Enhancement surveyors who conduct licensure and certification reviews check to ensure participants and guardians received information regarding how to report suspected instances of abuse, neglect, exploitation and/or death and that the information is imparted in a format appropriate to the participant's or family's learning style.

Participants and families are educated annually about how to report incidents of suspected abuse, neglect, and exploitation.

As part of its on-going commitment to preventing and reporting abuse, neglect. exploitation, and/or death, DDS partnered with self- advocacy groups such as Massachusetts Advocates Standing Strong to support "Awareness and Action," a training program taught by and for self-advocates regarding how to prevent and report abuse. DDS also is a partner with a private provider as part of a Robert Wood Johnson grant to train self-advocates in self-defense and to

State:	
Effective Date	

support providers to create a culture of zero tolerance for abuse, neglect, exploitation and/or death.

DDS and the Disabled Persons Protection Committee (DPPC) have developed mandated reporter training required for all staff who work with participants in provider agencies and state operated services.

Provider agencies are required to provide annual mandatory training on DPPC and the reporting of abuse, neglect, serious risk of harm, or an incident, condition, or occurrence that involves a participant to all direct care staff working under their supervision.

d. Responsibility for Review of and Response to Critical Events or Incidents. Specify the entity (or entities) that receives reports of critical events or incidents specified in item G-1-a, the methods that are employed to evaluate such reports, and the processes and time-frames for responding to critical events or incidents, including conducting investigations.

As described in G-1(b), DDS employs two distinct processes for reviewing events, one for incidents (classified as minor or major) and one for reporting of suspected instances of abuse, neglect, exploitation and/or death. A minor or major incident may also be the subject of an investigation, but the processes are different and carried out by different entities. The processes are described below.

Minor and major incidents are reported by the staff person observing or learning of the incident. A major incident is immediately reported verbally to the service coordinator in the DDS area office. The incident is entered into HCSIS. A major incident must be reported in HCSIS within 1 business day; a minor incident within 3 business days. Service coordinators review Initial reports, both major and minor, to ensure immediate actions have been taken to protect the participant, if necessary. A final report containing follow-up action steps is submitted to DDS by the provider. Major incidents are automatically referred to the designated regional office staff for review. The final report must be agreed upon by both the provider and DDS. If DDS does not concur with the action steps, the provider is directed to take different or additional action and to resubmit the report. Incident reports are closed only after there is consensus among DDS and the provider as to the action steps taken and all required reviews and approvals have been completed. A similar process is in place for response to incidents involving medication occurrences and restraint utilization. In the event of a medication occurrence, the review is completed by the regional Medication Administration Program (MAP) coordinator, who is a registered nurse. Restraints are reviewed by service coordinators and regional human rights specialists.

Allegations of abuse, neglect, exploitation and/or death are reported as complaints to the Disabled Persons Protection Commission (DPPC). DPPC receives and reviews all complaints and determines whether a reported event meets the definition of abuse as defined in its enabling statute, M.G.L. c.19C. DPPC investigates such complaints or refers them for investigation to the DDS Investigations Unit. As appropriate, complaints are also reviewed by law enforcement and referred for criminal investigation. DDS also investigates or conducts administrative reviews of allegations of abuse, neglect, exploitation and/or death of participants served by DDS who are not within the statutory authority of DPPC, for example, adults with intellectual disability over the age of 59 in accordance with 115 CMR 9.00. When necessary, immediate protective services are provided to ensure a participant is safe while an investigation is completed. Investigators have 45 days to complete assigned investigations and issue a report to the regional director. Upon request, investigation reports are available in accordance with applicable privacy laws. Completed investigations are referred to area office complaint resolution teams (CRT) comprised of DDS area staff and community members. CRT develop an action plan and ensure the recommended actions are completed.

State:	
Effective Date	

In addition, the Human Rights Committee (HRC) for the provider agency is a party to all complaints regarding that agency that are investigated under 115 CMR 9.00 and assists participants to ensure that their rights are protected.

The results of an investigation are reported to the DDS Regional Director within 45 days of assignment to a DDS investigator. Completed investigations are referred to Area Office complaint resolution teams (CRTs), comprised of DDS area staff and community members, that develop an action plan within 30 days. Within three days of completion of the action plan, the results of the investigation and action plan are sent to the participant, their guardian (if applicable), and other relevant parties (e.g., the provider agency, the alleged abuser(s), DDS Area Director).

e. Responsibility for Oversight of Critical Incidents and Events. Identify the state agency (or agencies) responsible for overseeing the reporting of and response to critical incidents or events that affect waiver participants, how this oversight is conducted, and how frequently.

MassHealth and DDS are parties to an Interagency Service Agreement which provides that DDS will, among other things, perform functions related to operation of the waiver, including ensuring providers comply with contractual obligations and DDS regulations and policies concerning reporting and responding to incident reports and complaints of participant abuse, neglect, exploitation and/or death. DDS has responsibility for oversight of the incident reporting system (HCSIS) and reporting of and responding to reported incidents. DDS and DPPC have responsibility of reporting and responding to complaints of abuse, neglect, exploitation and/or death.

Oversight of the incident management system occurs on three levels- the participant, the provider and the system. Incidents are reported by provider and DDS staff according to clearly defined timelines. HCSIS generates a variety of standard management reports that allow for tracking of timelines for action and follow up and patterns and trends by participant, location, provider, area, region and state. Service coordinators are responsible for assuring that appropriate actions have been taken and followed up on. On a provider level, program monitors in area offices track patterns and trends by location and provider. On a systems level, area directors, regional directors and central office senior managers track patterns and trends in order to make service improvements. Data from the incident management database are incorporated into the annual standard contract review with providers and performance based objectives. Licensure and certification staff review incidents and provider actions when they conduct their surveys.

A central office risk management committee reviews all incident data on a system wide basis. The committee meets as needed and reviews and analyzes systemic reports generated about specific incident types. The Office of Quality Management (OQM) through from the Center for Developmental Disabilities Evaluation and Research (CDDER) disseminates quarterly reports to each area and regional office detailing the numbers and rates of specific incidents and monthly "trigger" reports, based upon 10 threshold criteria. The reports provide an additional safeguard for participants by providing a method for assuring that area offices have taken appropriate action in response to incidents identified in the monthly and trigger reports and follow up on potential patterns and trends.

State:	
Effective Date	

In addition the Office of Quality Management (OQM) conducts a bi-weekly review of "key incidents," i.e., incidents involving the criminal justice system, accidents resulting in death or significant community disruption, and issues a report to Regional Risk Managers and Senior DDS management staff, including the Commissioner.

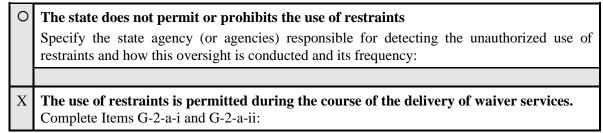

Allegations of abuse, neglect, exploitation and/or death are reported as complaints to the Disabled Persons Protection Commission (DPPC). DPPC receives and reviews all complaints and determines whether a reported event meets the definition of abuse as defined in its enabling statute, M.G.L. c.19C. DPPC investigates such complaints or refers them for investigation to the DDS Investigations Unit. As appropriate, complaints are also reviewed by law enforcement and referred for criminal investigation. DDS also investigates or conducts administrative reviews of allegations of abuse, neglect, exploitation and/or death of participants served by DDS who are not within the statutory authority of DPPC, for example, adults with intellectual disability over the age of 59 in accordance with 115 CMR 9.00. When necessary, immediate protective services are provided to ensure a participant is safe while an investigation is completed. Investigators have 45 days to complete assigned investigations and issue a report to the regional director. Upon request, investigation reports are available in accordance with applicable privacy laws. Completed investigations are referred to area office complaint resolution teams (CRT) comprised of DDS area staff and community members. CRT develop an action plan and ensure the recommended actions are completed.

The DDS Director of Risk Management reviews all major incidents and reviews a sample of DPPC reports. In addition, on a quarterly basis, a random sample of "trigger" reports are selected for quality assurance review by the Central Office Director of Risk Management and the Regional Risk Managers. The sample gets reviewed to determine whether action was taken, whether the actions were consistent with the nature of the incident and whether additional actions are recommended.

State:	
Effective Date	

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions

a. Use of Restraints (select one):(For waiver actions submitted before March 2014, responses in Appendix G-2-a will display information for both restraints and seclusion. For most waiver actions submitted after March 2014, responses regarding seclusion appear in Appendix G-2-c.)

i. Safeguards Concerning the Use of Restraints. Specify the safeguards that the state has established concerning the use of each type of restraint (i.e., personal restraints, drugs used as restraints, mechanical restraints). State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

DDS utilizes positive behavior supports (PBS), a systemic, person centered approach to understanding the reasons for behavior and applying evidence based practices for prevention, proactive intervention, teaching and responding to behavior, with the goal of achieving meaningful social outcomes, increasing learning and enhancing the quality of life across the lifespan. System-wide PBS is utilized to assure the dignity, health, and safety of participants and utilization only of procedures which have been determined to be the least restrictive or least intrusive alternatives.

DDS regulations provide specific parameters around the use of restraints. In the event of non-compliance, reporting is done either as an incident, or to DPPC.

Use of restraint is only permitted in cases of emergency, i.e. the occurrence of serious self-injurious behavior or physical assault or the substantial risk of serious self-injurious behavior or physical assault. Restraint may only be used after the failure of less restrictive alternatives or when a participant is placing him or herself at risk of imminent danger and there is insufficient time to de-escalate the participant and maintain a safe environment. Restraint techniques are limited to those contained in a DDS approved crisis prevention, response and restraint (CPRR) curricula; administered by persons trained in the specific restraint utilized; time limited; subject to staff observation and monitoring, and reviewed by a provider restraint manager for consistency with regulatory requirements. Restraint debriefings with staff and the participant also are required within specified timeframes and a behavior safety plan is required if frequent restraints occur. Reporting of every restraint on a DDS approved restraint form in HCSIS also is required. The Commissioner or designee and provider human rights committees review all restraint forms.

Chemical and mechanical restraints are prohibited.

115 CMR 5.00: Standards to Promote Dignity; 115 CMR 3.09: Protection of Human Rights/Human Rights Committees.

State:	
Effective Date	

ii. State Oversight Responsibility. Specify the state agency (or agencies) responsible for overseeing the use of restraints and ensuring that state safeguards concerning their use are followed and how such oversight is conducted and its frequency:

DDS is responsible for overseeing the use of restraints and ensuring safeguards concerning their use are followed. Such oversight occurs on the participant, provider and systems levels.

DDS regulations provide specific parameters around the use of restraints. In the event of non-compliance, reporting is done either as an incident, or to DPPC.

Use of restraint is only permitted in cases of emergency, i.e. the occurrence of serious self-injurious behavior or physical assault or the substantial risk of serious self-injurious behavior or physical assault. Restraint may only be used after the failure of less restrictive alternatives or when a participant is placing him or herself at risk of imminent danger and there is insufficient time to de-escalate the participant and maintain a safe environment. Restraint techniques are limited to those contained in a DDS approved crisis prevention, response and restraint (CPRR) curricula; administered by persons trained in the specific restraint utilized; time limited; subject to staff observation and monitoring, and reviewed by a provider restraint manager for consistency with regulatory requirements. Restraint debriefings with staff and the participant also are required within specified timeframes and a behavior safety plan is required if frequent restraints occur. Reporting of every restraint on a DDS approved restraint form in HCSIS also is required. The Commissioner or designee and provider human rights committees review all restraint forms. DDS regulations provide specific parameters around the use of restraints and reporting as an incident or to DPPC is required in the event of non-compliance.

The Area Office reviews and provides written comments on restraint reports. The DDS Regional Human Rights Specialist, also reviews the reports and comments on a sample of the reports to confirm restraints are properly reported.

On at least a quarterly basis, the restraint reports are reviewed by the provider's Human Rights Committee (HRC), who monitor the use of restraint by the provider or specific location. The results of the HRC review are documented in the restraint report in the Human Rights Committee Review section.

A PBS qualified clinician will develop a behavior safety plan (BSP) and an intensive PBS plan in the event a participant is subject to frequent restraints and as clinically indicated. A BSP describes the plan for a rapid response to the challenging behavior of a participant, including specifying observable criteria for severe, unsafe behavior (circumstances under which restraints may be used to ensure safety), termination criteria, maximum duration, the type of restraint as approved by the CPRR curriculum, data collection, and additional safeguards.

Restraint debriefings with staff administering a restraint and, a separate debriefing with the participant, are required within three business days or 24 hours, respectively, after the restraint occurred.

Quarterly and Annual restraint management reports are generated by the DDS Office for Human Rights (OHR). The reports detail patterns and trends with respect to numbers of restraints utilized, type of restraint, duration of restraint, and numbers of restraints per

State:	
Effective Date	

person. OHR produces a quarterly report of participants experiencing 10 or more restraints in a 3 month period. The report contains a brief narrative pertaining to each participant describing the circumstances leading to the use of restraints, the measures which are being tried to address the issues and recommendations pertaining to follow-up. DDS Human Rights staff consult with provider Restraint Managers and DDS Service Coordinators regarding each participant identified in the report to ensure it contains current and accurate information, to facilitate regular communication between DDS and providers regarding participants who require restraints and to follow-up regarding recommendations. Information in the reports is utilized by DDS Area and Regional Directors and Regional Risk Managers to work with providers on programmatic and clinical interventions to mitigate the use of restraints.

The Director of the DDS Office of Human Rights produces annual restraint reviews of all data, including longitudinal studies of participants experiencing a high number of restraints, statewide and regional data, and restraint data from DDS service providers to analyze patterns and trends for the purpose of reducing the necessity and/or use of restraints.

Practices of provider agencies with respect to staff training, human rights committee review, and internal safeguards with respect to restraint utilization are reviewed as part of the licensure and certification process. Licensure activities including review and analysis of reports generated by HCSIS to ensure only an approved restraint training curriculum is being utilized and restraint report submissions are timely.

115 CMR 5.00: Standards to Promote Dignity

b. Use of Restrictive Interventions

0	The state does not permit or prohibits the use of restrictive interventions Specify the state agency (or agencies) responsible for detecting the unauthorized use of restrictive interventions and how this oversight is conducted and its frequency:
X	The use of restrictive interventions is permitted during the course of the delivery of waiver services. Complete Items G-2-b-i and G-2-b-ii.

State:	
Effective Date	

i. Safeguards Concerning the Use of Restrictive Interventions. Specify the safeguards that the state has in effect concerning the use of interventions that restrict participant movement, participant access to other individuals, locations or activities, restrict participant rights or employ aversive methods (not including restraints or seclusion) to modify behavior. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency.

DDS utilizes positive behavior supports (PBS), a systemic, person centered approach to understanding the reasons for behavior and applying evidence based practices for prevention, proactive intervention, teaching and responding to behavior, with the goal of achieving meaningful social outcomes, increasing learning and enhancing the quality of life across the lifespan. System-wide PBS is utilized to assure the dignity, health, and safety of participants and utilization only of procedures which have been determined to be the least restrictive or least intrusive alternatives.

To further the goal of promoting the welfare and dignity of participants, the Department established the principles, including, DDS supports are provided in a manner that promotes human dignity, self- determination and freedom of choice to the participant's fullest capacity, the opportunity to live and receive supports in the least restrictive and most typical setting possible and the opportunity to engage in activities and styles of living that encourage and maintain community integration. DDS has stringent regulations, standards and policies pertaining to the use of restrictive interventions. Restrictions of telephone or internet use must be based upon a demonstrable risk, documented in the participant's record, reviewed by the provider's human rights committee and is required subject to a training plan to eliminate the need for the restriction, documented in the participant's ISP, and included in a PBSP if clinically required. Restrictions on visitation require a modification of the participant's ISP, subject to regulatory criteria and appeal, and review at by the provider's human rights committee.

DDS regulations provide specific parameters around the use of restrictive interventions and reporting as an incident or to DPPC is required in the event of non-compliance.

"Restrictive procedures", a restrictive intervention defined in DDS regulations, may be permitted only after positive approaches have been utilized and only in conjunction with an intensive positive behavior support plan (PBSP) and with consent of the participant or guardian, if applicable. Restrictive procedures may include: time out, overcorrection, response cost, and response blocking to prevent a maladaptive behavior from occurring that typically requires a visible motor response; and protective devices used to prevent risk of harm during self-injurious behavior. Restrictive procedures are subject to peer review committee (PRC) and human rights committee (HRC). PRC and HRC comments must be addressed prior to implementation of the plan, except in an emergency.

Participants may not be subject to the use of corporal punishment; noxious, unpleasant, uncomfortable or distasteful stimuli; chemical restraint; forced exercise; seclusion; the locking of exits from buildings, except in accordance with 115 CMR 5.04 and 42 CFR 441.301(c)(4); prone restraint: restraint causing pressure or weight on the lungs, diaphragm or sternum causing chest compression or restricts the airway, or basket hold in a seated position on the floor; removing, withholding, or taking away money; denial of a

State:	
Effective Date	

nutritionally sound diet including withholding of a meal; denial of adequate bedding or clothing, chemical or mechanical restraint.

PBSPs must be designed and written by a PBS qualified clinician and adhere to the principles and requirements identified in DDS regulations and best clinical practice.

Plans containing restrictive procedures may not be implemented until other behavior support strategies have been implanted with integrity and data have shown them to be insufficient to effect meaningful change. A functional behavior assessment is required prior to the development of a plan containing restrictive procedures.

Human Rights Committee (HRC) review and monitoring will occur upon the introduction of restriction of rights or a new restrictive procedure or upon a schedule developed based upon data review.

Health-related protective equipment used to prevent risk of harm during challenging self-injurious behavior; for example, a helmet or arm splints, may only be used when authorized by a PBS qualified clinician as part of an intensive PBSP and is subject to HRC review.

(115 CMR 3:09 (Protection of Human Rights/Human Rights Committees) and 5.00: Standards to Promote Dignity)

ii. State Oversight Responsibility. Specify the state agency (or agencies) responsible for monitoring and overseeing the use of restrictive interventions and how this oversight is conducted and its frequency:

DDS is responsible for monitoring and oversight of restrictive interventions. In addition to the reviews by the ISP team, human rights committees, and peer review committees, the use of restrictive interventions is monitored in the following ways:

- Service coordinators . conduct bi-monthly site visits of 24 hour Residential Habilitation group home settings and quarterly site visits for Placement Services (Shared Living) 24 Hour Supports settings and of settings with less than 24 hour supports. As part of the visit, service coordinators monitor participants, including incident reports.
- Licensure and certification staff conduct extensive review of ISPs and PBSPs and review interventions identified therein in order to ensure that all the necessary reviews have been completed confirming they have been implemented in accordance with DDS regulations, staff is trained, and documentation is properly maintained and periodically reviewed. Licensure staff will cite areas of concern in reports to providers in the event they identify that any of the above requirements have not been met. Follow up will be conducted by licensure and certification staff.
- Aggregate data regarding the review, approval and monitoring of interventions collected during the licensure and certification process is included in quality reports and subject to review by the statewide quality council for the identification of patterns and trends.
- Any instance of serious physical injury or death of a person is immediately reported in HCSIS and to the Commissioner or designee for review and follow up.
- Restrictive interventions are reviewed by a participant's ISP Team, which includes DDS service coordinators. The ISP team reviews the proposed restrictions and ensures they are appropriate. PBSPs containing restrictive procedures provide for ongoing monitoring by a PBS qualified clinician to ensure treatment integrity.

State:	
Effective Date	

- Restrictive interventions reviewed by the Provider's HRC. Minutes from the Human Rights Committee meetings are reviewed by DDS Human Rights Specialists who also attend at least one meeting per year of each provider HRC to ensure that they are run correctly, and to offer feedback regarding any improvements that could be made.
- Any participant, family member, provider or DDS employee may seek guidance from the DDS Office for Human Rights in the event he or she has any concerns regarding the plan or its implementation.
- The DDS Office for Human Rights provides training and educational materials to participants and their families regarding restrictive interventions, their rights to participate in the development of any plan and to withhold consent if they do not agree with the plan.
- **c. Use of Seclusion.** (Select one): (This section will be blank for waivers submitted before Appendix G-2-c was added to WMS in March 2014, and responses for seclusion will display in Appendix G-2-a combined with information on restraints.)

	w	nea win injornation on restraints.)
2	X	The state does not permit or prohibits the use of seclusion

Appendix G-3: Medication Management and Administration

This Appendix must be completed when waiver services are furnished to participants who are served in licensed or unlicensed living arrangements where a provider has round-the-clock responsibility for the health and welfare of residents. The Appendix does not need to be completed when waiver participants are served exclusively in their own personal residences or in the home of a family member.

a. Applicability. Select one:

0	No. This Appendix is not applicable (do not complete the remaining items)
X	Yes. This Appendix applies (complete the remaining items)

b. Medication Management and Follow-Up

i. Responsibility. Specify the entity (or entities) that have ongoing responsibility for monitoring participant medication regimens, the methods for conducting monitoring, and the frequency of monitoring.

The responsibility for monitoring medication regimens is a joint one between providers, DDS staff and the ISP Team.

DDS has an electronic Health Care Record for all participants for whom providers have responsibility for health care that is maintained by providers, reviewed by service coordinators, and updated for purposes of the annual service planning process and development of the POC. Included in the Health Care Record is a list of all medications the participant is taking. This allows for review of medications by the ISP team, as well as facilitating thorough communication of relevant medication information to primary health care providers. Provider agency staff monitor the use of medication and side effects on an on-going basis. DDS area office nurses are available for consultation and support to providers when there are questions or concerns about prescribed medications. Direct support professionals are educated about the purpose of and side effects of the specific medications participants they are supporting are taking and instructed to report any issues to the appropriate supervisory and consultant personnel.

The Medication Administration Program (MAP) is a program under Massachusetts Department of Public Health (DPH) regulation, that provides for MAP certified non-licensed direct care staff to administer medications in DPH registered programs. DDS requires non-licensed staff at MAP registered sites to be trained in medication administration through the MAP. After completion of the training by an approved MAP trainer, Provider staff must pass knowledge and skills tests administered by a third-party tester to evaluate their competency to administer medications. Staff that pass all components of the test are certified and authorized to administer medications in MAP registered sites for 2 years. After 2 years they are reassessed and recertified. Proof of MAP certification for all staff that administer medication is maintained by the Provider.

DDS requires Placement Services (Shared Living) - 24 Hour Supports provider agencies to have a system in place for oversight of medication administration in each home. The provider agency must demonstrate that it has an effective mechanism to monitor and oversee medication administration for Placement Services (Shared Living) - 24 Hour Supports provider homes. Placement Services (Shared Living) - 24 Hour Supports providers must be able to demonstrate that they have a system in their home to assure that there are current health care provider orders, side effect information, labeled pharmacy containers, safe storage of medications, and a process to track and document administration of medications.

State:	
Effective Date	

Placement Services (Shared Living) - 24 Hour Supports provider agencies are required to conduct monthly site visits of homes to monitor compliance with regulatory requirements and review medication administration. As a part of the licensure and certification surveys, DDS licensure and certification staff review both the system that the provider agency has in place to monitor medication administration as well as reviewing Placement Services (Shared Living) - 24 Hour Supports homes to assure that medication is being correctly administered and monitored.

As part of the licensing process, DDS provides ongoing oversight and quality management for each provider that has medication administration responsibility, including the review of medication records and documentation of physician orders, the dispensing of medications and the assessments of the relative independence of each resident in self-administration. DDS oversight includes monitoring of the physical management of medications, including locking and storage of all medications. DDS oversees and tracks the reporting of all medication occurrences for each residential program, aggregates the data and identifies trends by program site on a quarterly basis or more frequently, if needed. If specific issues are identified, staff intervenes to clarify procedures and requires adjustments in operations. If necessary, DDS develops and monitors adherence to corrective action plans on an individual provider and program basis. DDS instituted a provider self-monitoring process and ensures that providers conduct periodic audits utilizing professional/nursing staff from elsewhere within the provider organization, if available, to review their internal operations, methods, and systems of medication administration. DDS Regional MAP Coordinators are also available to assist Providers with compliance issues including program site visits.

Service Coordinators have access to DDS Area Office nurses who are available for consultation and support when there are questions or concerns about prescribed medications.

Service Coordinators maintain regular contact and monitor the well-being of participants they are supporting. They receive a list of medications a participant is prescribed at the time of the ISP. In the event a concern is identified by the Service Coordinator, the provider agency and DDS management are notified and follow up is conducted by a nurse or other area office staff, as appropriate.

If necessitated, DDS Regional MAP Coordinators are available to assist with compliance issues including program site visits.

ii. Methods of State Oversight and Follow-Up. Describe: (a) the method(s) that the state uses to ensure that participant medications are managed appropriately, including: (a) the identification of potentially harmful practices (e.g., the concurrent use of contraindicated medications); (b) the method(s) for following up on potentially harmful practices; and (c) the state agency (or agencies) that is responsible for follow-up and oversight.

Service Coordinators maintain regular contact with participants on their caseload and monitor the health status of participants they are supporting. In addition, through its Health Promotion and Coordination Initiative, DDS implemented several processes that facilitate the exchange of information regarding health status and medication regimens between the DDS provider and the health care provider. DDS licensure and certification staff conduct an extensive review of the health care systems that providers have in place to assure coordination, communication, and follow up with health care providers on key issues. DDS licensure staff also review the level of training and knowledge that direct support professionals have about the health status and medications that the participant is taking.

State:	
Effective Date	

Aggregate data about health and medication use is reported in DDS quality assurance reports and briefs and reviewed by the Statewide Quality Council.

- c. Medication Administration by Waiver Providers
 - i. Provider Administration of Medications. Select one:
 - Not applicable (do not complete the remaining items)
 Waiver providers are responsible for the administration of medications to waiver participants who cannot self-administer and/or have responsibility to oversee participant self-administration of medications. (complete the remaining items)
 - **ii. State Policy.** Summarize the state policies that apply to the administration of medications by waiver providers or waiver provider responsibilities when participants self-administer medications, including (if applicable) policies concerning medication administration by non-medical waiver provider personnel. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

The state Medication Administration Program (MAP) provides for the DPH registration of locations where medication is administered by non-licensed, certified staff, identifies the requirements about storage and security of medications, defines the specific training and certification requirements for non-licensed staff, and specifies documentation and record keeping requirements. MAP is implemented by DDS and overseen by the DPH in accordance with DDS and DPH regulations and MAP Policy Manual.

Community-based residential habilitation (group homes), day programs at which provider non-licensed staff administer medications, and short-term site-based respite services are required to obtain a site registration from DPH for the purpose of permitting medication administration by MAP certified staff.

Direct support professionals, including licensed nurses working in positions that do not require a nursing license, must be MAP certified in order to administer medications. MAP certification is valid for two years. Staff must be re-certified every two years. In order to be certified, staff must be trained by an approved MAP trainer using the approved training curriculum of a duration not less than 16 hours, including classroom/online/hybrid instruction, testing, and practice. Approved MAP trainers must be a registered nurse, nurse practitioner, physician assistant, registered pharmacist, or licensed physician who meets applicable DPH requirements as a trainer. Individuals must pass a test in order to be certified to administer medications. The initial certification is done by an independent contractor.

Re-certifications may be done by an independent contractor or by an Approved MAP trainer. MAP certified staff and providers must maintain proof of current MAP certification at the program. An individual's certification may be revoked for cause, after an informal hearing process. A record of revoked certifications is maintained.

Providers are required to adhere to a strict set of standards with respect to storage of medications, documentation of medication counts at the start and end of each shift, labeling of medications, and documentation of medication administration for each individual.

Oversight of the MAP is conducted by nurses within provider programs as well as DDS Regional MAP Coordinators, and the DPH Clinical Review process.

State:	
Effective Date	

An individual is determined to be self-administering when the medication is under the complete control of the individual with no more than minimal assistance from program staff. The ability to self-administer medication is determined in conjunction with the individual's ISP team as part of an assessment process. If the individual is determined to be capable of learning to self-administer medication, a teaching plan is developed and documented as part of the service planning process. Once an individual is determined to be self-administering, an oversight system is developed with built in review periods of at least every 3 months. An individual's ability to continue to self-administer medication is reviewed in conjunction with the annual service planning process. Self-administration is available to individuals in both 24-hour residential settings as well as Placement Services (Shared Living) - 24 Hour Supports settings.

State:	
Effective Date	

iii. Medication Error Reporting. Select one of the following:

- X Providers that are responsible for medication administration are required to both record and report medication errors to a state agency (or agencies). Complete the following three items:
 - (a) Specify state agency (or agencies) to which errors are reported:

Providers are required to file medication occurrence reports (MOR) to the Department of Developmental Services through the HCSIS web-based event reporting system. MOR's that involve any intervention by a health care provider are also reported to the State Department of Public Health. Pharmacy errors get reported to the Board of Registration in Pharmacy.

(b) Specify the types of medication errors that providers are required to *record*:

Providers are required to record a MOR in all of the following circumstances: anytime a medication is given to the wrong person, anytime the wrong medication is given, anytime a medication is given at the wrong time, anytime a wrong dose is given, anytime a medication is administered through the wrong route, or when the medication is omitted.

Placement Services (Shared Living) - 24 Hour Supports agencies monitor the medication administration procedures of the homes, and take corrective action when necessary.

(c) Specify the types of medication errors that providers must *report* to the state:

MAP Registered providers are required to report in all of the following circumstances: anytime a medication is given to the wrong person, anytime the wrong medication is given, anytime a medication is given at the wrong time, anytime a wrong dose is given, anytime a medication is administered through the wrong route, or when the medication is omitted.

O Providers responsible for medication administration are required to record medication errors but make information about medication errors available only when requested by the state.

Specify the types of medication errors that providers are required to record:

iv. State Oversight Responsibility. Specify the state agency (or agencies) responsible for monitoring the performance of waiver providers in the administration of medications to waiver participants and how monitoring is performed and its frequency.

The DDS has primary responsibility for oversight of the MAP for programs funded, licensed, or supported by DDS. The DPH also participates in the oversight responsibility. Providers are required to report all medication occurrences within 24 hours of discovery through the HCSIS system. The HCSIS MOR report details the person involved, the type of error, the medications involved, the consultant contacted, any medical interventions that were involved, what followed from the intervention and supervisory follow up action taken. Any MOR that involves medical intervention is also reported to the DPH and is defined as a "hot-line" call. All MOR's get reviewed and approved by DDS regional MAP Coordinators who are registered nurses. Follow-up occurs with providers on all hotline MOR's. This may be

State:	
Effective Date	

accomplished through a phone conversation or a direct site visit, utilizing a Technical Assistance Tool.

On an individual level, MOR's are reviewed by service coordinators and are part of an integrated review of all incidents that pertain to the participant. Program monitors and Area Directors review MOR information as part of the standard contract review process. Licensure and certification staff do a thorough review of both the medication storage and administration records as well as the certification of staff and their knowledge of the medications and their side effects.

Finally, on a systems level, all information regarding medication occurrences is aggregated and management reports are generated quarterly. These reports detailing the number of medication occurrences including the type and follow up action are reviewed and analyzed to identify trends and patterns. In addition, the HCSIS medication occurrence data base includes detailed information as to the factors contributing to a medication occurrence. Review of the management reports enable senior staff and the statewide quality council to identify areas and strategies that may lead to a reduction in the number of medication occurrences, a target for service improvement. Information is then shared through training, publication of newsletters and advisories aimed at steps providers can take to reduce the number of medication occurrences. Data is also aggregated and incorporated into DDS Quality Assurance briefs and reports.

Quality Improvement: Health and Welfare

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Health and Welfare

The state demonstrates it has designed and implemented an effective system for assuring waiver participant health and welfare. (For waiver actions submitted before June 1, 2014, this assurance read "The state, on an ongoing basis, identifies, addresses, and seeks to prevent the occurrence of abuse, neglect and exploitation.")

i. Sub-assurances:

a. Sub-assurance: The state demonstrates on an ongoing basis that it identifies, addresses and seeks to prevent instances of abuse, neglect, exploitation and unexplained death. (Performance measures in this sub-assurance include all Appendix G performance measures for waiver actions submitted before June 1, 2014.)

i. Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide

State:	
Effective Date	

information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

d. Sub-assurance: The state establishes overall health care standards and monitors those standards based on the responsibility of the service provider as stated in the approved waiver.

State:	
Effective Date	

For each performance measure the state will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

ii.	If applicable, in the textbox below provide any necessary additional information on the strategies
	employed by the state to discover/identify problems/issues within the waiver program, including
	frequency and parties responsible.

State:	
Effective Date	

b. Methods for Remediation/Fixing Individual Problems

i. Describe the state's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The State Medicaid agency is responsible for ensuring effective oversight of the waiver program, including administrative and operational functions performed by DDS. In the event problems are discovered with the management of the waiver program processes at waiver service providers or DDS Area Offices, DDS is responsible for ensuring that a corrective action plan is created, approved, and implemented within appropriate timelines. Further DDS and MassHealth are responsible for identifying and analyzing trends related to the operation of the waiver and determining strategies to address quality- related issues.

ii. Remediation Data Aggregation

Appendix H: Quality Improvement Strategy

Under §1915(c) of the Social Security Act and 42 CFR §441.302, the approval of an HCBS waiver requires that CMS determine that the state has made satisfactory assurances concerning the protection of participant health and welfare, financial accountability and other elements of waiver operations. Renewal of an existing waiver is contingent upon review by CMS and a finding by CMS that the assurances have been met. By completing the HCBS waiver application, the state specifies how it has designed the waiver's critical processes, structures and operational features in order to meet these assurances.

Quality Improvement is a critical operational feature that an organization employs to continually
determine whether it operates in accordance with the approved design of its program, meets statutory and
regulatory assurances and requirements, achieves desired outcomes, and identifies opportunities for
improvement.

CMS recognizes that a state's waiver Quality Improvement Strategy may vary depending on the nature of the waiver target population, the services offered, and the waiver's relationship to other public programs, and will extend beyond regulatory requirements. However, for the purpose of this application, the state is expected to have, at the minimum, systems in place to measure and improve its own performance in meeting six specific waiver assurances and requirements.

It may be more efficient and effective for a Quality Improvement Strategy to span multiple waivers and other long-term care services. CMS recognizes the value of this approach and will ask the state to identify other waiver programs and long-term care services that are addressed in the Quality Improvement Strategy.

State:	
Effective Date	

Quality Improvement Strategy: Minimum Components

The Quality Improvement Strategy that will be in effect during the period of the approved waiver is described throughout the waiver in the appendices corresponding to the statutory assurances and sub-assurances. Other documents cited must be available to CMS upon request through the Medicaid agency or the operating agency (if appropriate).

In the QIS discovery and remediation sections throughout the application (located in Appendices A, B, C, D, G, and I), a state spells out:

- The evidence based discovery activities that will be conducted for each of the six major waiver assurances; and
- The remediation activities followed to correct individual problems identified in the implementation of each of the assurances.

In Appendix H of the application, a state describes (1) the *system improvement* activities followed in response to aggregated, analyzed discovery and remediation information collected on each of the assurances; (2) the correspondent *roles/responsibilities* of those conducting assessing and prioritizing improving system corrections and improvements; and (3) the processes the state will follow to continuously *assess the effectiveness of the QIS* and revise it as necessary and appropriate.

If the state's Quality Improvement Strategy is not fully developed at the time the waiver application is submitted, the state may provide a work plan to fully develop its Quality Improvement Strategy, including the specific tasks the state plans to undertake during the period the waiver is in effect, the major milestones associated with these tasks, and the entity (or entities) responsible for the completion of these tasks.

When the Quality Improvement Strategy spans more than one waiver and/or other types of long-term care services under the Medicaid state plan, specify the control numbers for the other waiver programs and/or identify the other long-term services that are addressed in the Quality Improvement Strategy. In instances when the QMS spans more than one waiver, the state must be able to stratify information that is related to each approved waiver program. Unless the state has requested and received approval from CMS for the consolidation of multiple waivers for the purpose of reporting, then the state must stratify information that is related to each approved waiver program, i.e., employ a representative sample for each waiver.

State:	
Effective Date	

H.1 Systems Improvement

a. System Improvements

i. Describe the process(es) for trending, prioritizing and implementing system improvements (i.e., design changes) prompted as a result of an analysis of discovery and remediation information.

The Department's quality management and improvement system (QMIS) is robust and involves individuals in all levels of the Department as well as providers, self-advocates, families, and other stakeholders.

The QMIS system is designed to assure that essential safeguards are met with respect to health, safety and quality of life for waiver participants as well as to use data and information to inform systemic quality improvement efforts. While it is a very robust system, the QMIS system continues to evolve and improve.

The Quality Improvement Strategy specified in this waiver is consistent with the QIS for MA.0827 (Intensive Supports Waiver) and MA.0828 (Adult Supports Waiver). The reporting for all three Adult Waivers is consolidated. Please see the explanation at the end of Appendix H.

The quality management and improvement system is designed and implemented based upon the following key principles:

- 1) The system creates a continuous loop of quality including the identification of issues, correction, follow-up, analysis of patterns of trends and service improvement activities.
- 2) Quality is imbedded in all activities of the Department and involves everyone.
- 3) The measurement of quality is based upon a set of outcomes in peoples' lives agreed upon with stakeholders.
- 4) The system involves active participation from individuals, families and other key stakeholders.
- 5) The system rigorously measures health, safety and human rights, and other quality of life domains
- 6) The system integrates data and information from a variety of different sources.
- 7) The system collects, aggregates and analyzes data to identify patterns and trends to inform service improvement activities.
- 8) Service improvement targets are tracked to allow for measurement of progress over time. Quality is approached from three perspectives: the individual, the provider and the system. On each tier, the focus is on discovery of issues, remediation and service improvement. Information gathered on the individual and provider level is used not only to remedy situations on those levels, but also to inform overall system performance efforts.

Systems level improvement efforts are organizationally structured to occur on essentially two levels – the regional level and the statewide level. DDS is divided into 23 separate area offices, each overseen by an Area Director. In turn, there are four Regional Offices overseen by a Regional Director, under whose direct supervision the Area Directors function. It is ultimately the Regional Directors, who report directly to the Deputy Commissioner, who are accountable for assuring that identified service improvement efforts are implemented and reviewed. Area Offices work most closely with the individuals the Department serves and their providers through the service planning and oversight processes.

On a statewide level, the Office of Quality Management maintains overall responsibility for designing and overseeing the Department's QMIS and assuring that appropriate data is collected, disseminated, reviewed and service improvement targets established for both waiver and non-waiver DDS clients. The Assistant Commissioner for Quality Management reports in a direct line to the Commissioner, in order to maintain independence from Field Operations and Administration and Finance. The Waiver Unit

State:	
Effective Date	

functions within Administration and Finance. Its primary function is to oversee the implementation of the various components of the Waiver. In addition, specific staff in the Central Office/DDS function as "subject leaders" and take responsibility for discrete data sets and their analyses. For example, the Director of Health Services is responsible for reviewing and analyzing all data relating to medication occurrences, health care records and deaths, the Director of Human Rights reviews all restraint reports and the Director of Risk Management reviews data regarding risk management plans.

Processes for trending, prioritizing and implementing system improvements:

DDS has a variety of databases that enable it to collect information on important outcomes related to the six assurances under the waiver. These include the Meditech system, which collects data on level of care, plans of care, enrollment, and expenditures for waiver participants.; the Home and Community Services Information System (HCSIS) which collects information regarding the development and oversight of Individual Service Plans, incidents, restraints, medication occurrences, investigations, health status, deaths and risk management plans; and the Survey and Certification database, which collects information on both outcomes for individuals served by the Department as well as provider performance.

In addition to reports previously mentioned in the other appendices, there are a number of additional ways in which data is aggregated, reported, and reviewed that specifically facilitate the analysis of patterns and trends and the development of service improvement targets. As a starting point, the Department has several groups that oversee the standards and quality related to the data the Department collects. The groups are composed of internal and external users of the two primary data systems (Meditech and the Home and Community Services Information System, HCSIS). These groups function to continually review and agree upon the business processes as well as the definitions and interpretations that guide the system in order to ensure data integrity and consistency.

DDS also participates in National Core Indicators which gathers a standard set of performance and outcome measures which is used to track performance over time, compare results across states, and establishes national benchmarks. The data obtained is derived from the entire DDS adult population and helps target and inform system improvement and performance enhancement which then benefits and improves waiver quality and services.

DDS QA Reports focus on specific subject areas, e.g. rights, health, safety. The reports present information in a user-friendly manner, relying on easy to use graphs and arrows delineating both positive and negative change. The report compares outcomes year to year and allows for a clear analysis of patterns and trends over time. Statewide Quality Council has the specific responsibility to review this report and other data and make recommendations to the Commissioner and other DDS staff for service improvement targets. The Quality Council is comprised of DDS staff, self-advocates, family members, and providers, and is supported by staff from the Center for Developmental Disabilities Evaluation and Research (CDDER) from the University of Massachusetts Medical School. The Council's primary function is to review and analyze the different analyses and reports that are generated with respect to systemic performance, to make recommendations for service improvement and to track progress towards achievement of service improvement targets

In addition to the Quality Councils, there is a Systemic Risk Review Committee (SRRC), composed of staff from investigations, human rights, survey and certification, risk management, health services, and operations. The committee reviews the analyses that are generated from HCSIS. With the research support of the University of Massachusetts Medical School/Center for Developmental Disabilities Evaluation and Research, aggregate reports analyzing specific incident types are generated. The reports are reviewed by the committee and form the basis of service improvement targets. Reports generated from the risk management committee are also reviewed by the Quality Council and mutually agreed upon service improvement targets are developed.

State:	
Effective Date	

Area, region and Provider-specific aggregate data on incidents are disseminated quarterly (for frequently occurring incidents) and annually (for less frequently occurring incidents). These reports show data on incidents by both number and rate that enable comparison between an area to a region to the state. Data is reviewed from month to month and significant fluctuations are addressed. Field staff (i.e. Area Office staff) analyze patterns and trends in their respective locations. In addition to individual incident reports, Area Offices receive monthly reports on individuals who have reached a threshold of specifically designated incidents that then trigger a review on an area level. These reports enable areas and regions to identify patterns and trends with respect to particular individuals they support, and to "connect the dots" between different incidents. Areas review the reports and enter follow up notes to assure that individuals who may be at risk have been identified and followed up on. As part of the on-going quality assurance process, Regional Risk Managers do a quarterly review of a random sample of individuals who have reached the "trigger" threshold. The review looks into whether follow up actions were taken and whether the actions were consistent with the issues identified.

The Department also publishes an independently developed Annual Mortality Report by CDDER that details the numbers of deaths, the age, gender, and residential status of individuals, and the causes of death. The report is reviewed by the Quality Council as well as the Regional and Statewide Mortality Review Committees. Data from this report also informs the development of quality improvement activities. In addition to the abovementioned reports, DDS publishes a "Quality is No Accident" (QINA) Brief. The QINA briefs focus in on one particular area per publication and combine data derived from the Incident Management System and other data sources, with practical information regarding risk prevention and mitigation activities. Examples of subjects covered in the past include healthy sexuality, oral health care, preventive health care, Alzheimer's/dementia, aging resources, pressure ulcers, and missing persons.

As mentioned earlier, each "subject leader", e.g., Director of Health Services, Director of Human Rights, is responsible for the detailed review and analysis of data for their specific area of responsibility. Data is typically reviewed on a monthly basis and patterns and trends identified. Subject leaders will then work directly with field staff and others on areas that have been identified for improvement.

b. **System Design Changes**

i. Describe the process for monitoring and analyzing the effectiveness of system design changes. Include a description of the various roles and responsibilities involved in the processes for monitoring & assessing system design changes. If applicable, include the state's targeted standards for systems improvement.

State:	
Effective Date	

The Office of Quality Management and senior management staff of the Department have primary responsibility for monitoring the effectiveness of system design changes. Implementation of strategies to meet service improvement targets can occur on a variety of levels depending upon the nature of the target. As an example, the Quality Council established an increase in competitive employment for individuals in the Department as a statewide service improvement target. This led to the development and publication of the "Blueprint for Success: Employing Individuals with Intellectual Disabilities in Massachusetts". The Blueprint serves as a guide to increase integrated employment opportunities for adults with intellectual disabilities served by DDS. A key benchmark in the upcoming version 2.0 of the Blueprint is to end subminimum wage.

Reviews of the effectiveness of other service improvement targets are also conducted by the Center for Developmental Disabilities Evaluation and Research (CDDER) of the University of Massachusetts Medical School. As an independent research and policy support to the Department, CDDER has conducted several formative and summative evaluations of specific service improvement initiatives. Methods have included focus groups, surveys and evaluation of specific indicators related to the service improvement target. An example of CDDER's role was its evaluation of the Department's Health Promotion and Coordination Initiative.

More targeted service improvement efforts may involve a discrete number of individuals who have specific responsibility in the subject of the effort. For example, the Director of the Office of Human Rights disseminates quarterly reports to Regional Directors regarding the use of restraints. A service improvement target to reduce the number of restraints for "high utilizers" was identified and worked on with the specific areas and providers involved. Change was tracked by the Office of Human Rights and noted.

The Department shares most statewide quality assurance and service improvement data with a host of internal and external stakeholders. Quality Assurance and Mortality Reports, analyses of HCSIS incident data, and provider licensure/certification reports are all posted on the Department's web site and available in hard copy. Individuals, families and providers are also active members of the Statewide Quality Council, area Citizen Advisory Boards, and statewide committees. In this capacity, all quality improvement data and reports are shared, discussed and reviewed with them.

ii. Describe the process to periodically evaluate, as appropriate, the Quality Improvement Strategy.

The effectiveness of the Quality Management system is reviewed through the following mechanisms:

- 1) The Office of Quality Management (OQM) has primary day to day responsibility for assuring that the Department has an effective and robust quality management system in place for both HCBS waiver and non- waiver services. OQM works with internal and external stakeholders and makes recommendations regarding enhancements to the QMIS system on an on-going basis.
- 2) As part of its responsibility, the Statewide Quality Council reviews outcomes and indicators measured and make recommendations to the Department regarding the need to add, change or amend the quality indicators. The council, because of its broad representation from internal and external stakeholders is in a unique position to reflect upon the Department's QMS system.
- 3) The Department works with the Center for Developmental Disabilities Evaluation and Research (CDDER) of the University of Massachusetts Medical School. CDDER has and will continue to assist the Department to evaluate the effectiveness of its QMS system and to make recommendations for improvements.

State:	
Effective Date	

As part of the evaluation of the Quality Improvement Strategy that MassHealth and DDS engaged in during the amendment process, we analyzed reporting across several waivers. As determined by that evaluation process and as noted above, we consolidated the reporting for this waiver together with MA.0827 (Intensive Supports Waiver) and MA.0828 (Adult Supports Waiver). Our ongoing evaluation supports the determination that because these waivers utilize the same quality management and improvement system, that is, they are monitored in the same way and discovery, remediation and improvement activities are the same, these waivers continue to meet the CMS conditions for a consolidated evidence report. Specifically, the following conditions are present:

- 1. The design of these waivers is very similar as determined by the similarity in participant services (very similar), participant safeguards (the same) and quality management (the same);
- 2. The quality management approach is the same across these three waivers including:
- a. methodology for discovering information with the same HCSIS system and sample selection,
- b. remediation methods,
- c. pattern/trend analysis process, and
- d. all of the same performance indicators;
- 3. The provider network is the same; and
- 4. Provider oversight is the same.

For performance measures based on sampling, the sample size will be based on a simple random sample of the combined populations with 95% confidence level, +/-5 margin of error, and a 95/5 response distribution. Use of the 95/5 response distribution is based upon long standing success of performance measures.

This waiver, MA.0827 (Intensive Supports Waiver) and MA.0828 (Adult Supports Waiver) operate on the same waiver cycles and will be reported on with the same frequency.

Based on language approved in the Appendix K amendment associated with this waiver, due to the COVID pandemic, a quality review report has not been finalized for the previous waiver cycle. Additionally, 372 reports due during the emergency have not been submitted. Upon expiration of the Appendix K amendment, Massachusetts will gather and submit any outstanding 372 reports as quickly as the required information can be gathered and analyzed. If necessary, the state will submit waiver amendments based on identified deficiencies in the quality review report and/or 372 report(s) within a timeframe between 90 days and up to 6-months (to be negotiated with the state) of receiving the final quality review report and 372 report acceptance decision.

H.2 Use of a Patient Experience of Care/Quality of Life Survey

- a. Specify whether the state has deployed a patient experience of care or quality of life survey for its HCBS population in the last 12 months (*Select one*):
 - o No
 - Yes (Complete item H.2b)
- b. Specify the type of survey tool the state uses:
 - o HCBS CAHPS Survey;
 - NCI Survey;
 - o NCI AD Survey;
 - Other (*Please provide a description of the survey tool used*):

State:	
Effective Date	

Appendix H: Quality Improvement Strategy HCBS Waiver Application Version 3.6		

State:	
Effective Date	

Appendix I: Financial Accountability

APPENDIX I-1: Financial Integrity and Accountability

Financial Integrity. Describe the methods that are employed to ensure the integrity of payments that have been made for waiver services, including: (a) requirements concerning the independent audit of provider agencies; (b) the financial audit program that the state conducts to ensure the integrity of provider billings for Medicaid payment of waiver services, including the methods, scope and frequency of audits; and, (c) the agency (or agencies) responsible for conducting the financial audit program. State laws, regulations, and policies referenced in the description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

- (a) 808 CMR 1.00 requires organizations entering into a contract with the Commonwealth to perform an independent audit and annually submit a Uniform Financial Statement and Independent Auditor's Report to the Executive Office of Administration and Finance's Operational Services Division. These are reviewed by the DDS contracts office or appropriate EOHHS Department annually (for existing/current providers) New providers must submit financial statements for review by the Department before a contract can be executed.
- (b) The integrity of the provider billing data for Medicaid payment of waiver services is managed by the Department of Developmental Services' (Department) Meditech operating and claims production system, Home and Community Services Information System (HCSIS) and the Massachusetts Medicaid Management Information System (MMIS). Meditech contains waiver service enrollments, demographic information, the level of care (LOC), the Plan of Care approval, the Medicaid category of assistance (CAT), and assigned service coordinator information for each waiver participant. HCSIS contains service delivery information including service name, frequency and duration of service, and provider, which is included in the Plan of Care (POC/ISP). DDS has access to all data within Meditech and HCSIS, and various checks and balances, including system edits, -are in place to ensure appropriate waiver service claims are submitted to MMIS. MMIS validates waiver service rates and MassHealth eligibility for dates of services claimed as a condition of payment.

Providers submit attendance data through a web-based electronic service delivery report system. On a quarterly basis, DDS will review attendance or utilization that is not consistent with typical use. The service delivery information provides the documentation necessary for payment to the provider and for development of a claim for the Medicaid Agency.

Providers also maintain original documentation of service delivery. Once DDS Regional staff has approved all monthly or supplemental invoices, the data are matched with rates and with participant waiver eligibility criteria and are submitted by electronic submissions in accordance with procedures mandated by the Commonwealth's Medicaid Management Information System (MMIS). Claim checks are part of the Department's electronic claims processing system to assure that all waiver assurances are met prior to processing. If an individual's Medicaid status has changed, when a submission is processed through MMIS, any claim for dates of services where the individual was not Medicaid eligible is automatically denied.

(c) The Executive Office of Health and Human Services is responsible for conducting the financial audit program.

State:	
Effective Date	

The MassHealth Program Integrity Unit oversees rigorous post payment review processes that identify claims that are paid improperly due to fraud, waste and abuse. MassHealth maintains an interdepartmental service agreement with the University of Massachusetts Medical School's Center for Health Care Financing to carry out post-payment review and recovery activities through its Provider Compliance Unit (PCU). MassHealth maintains consistent post-payment review methods, scope, and frequency for self-direction and agency providers.

On a regular basis, PCU runs Surveillance Utilization Review System (SURS) reports to identify aberrant billing practices. MassHealth runs SURS reports and algorithms that examine all provider types such that every provider type is generally being reviewed with a SURS report each year. For example, MassHealth and the PCU run a recurring algorithm that identifies any claims paid for members after their date of death as well as a report that identifies outliers in billing growth by provider type and reports that identify excessive activity, e.g., unusually high diagnosis and procedure code frequencies, by provider as well as "spike" reports that identify providers receiving higher than average payments. On average, MassHealth runs between 30 and 40 algorithms per year and 100 to 120 SURS reports of varying scope (e.g. all provider types, specific provider types, or a single provider) per year. These SURS reports and algorithms are run manually and not on a set schedule. There are no set criteria that must be met prior to MassHealth running particular SURS reports and algorithms.

When MassHealth identifies outliers in SURS reports or algorithms, additional SURS reports or algorithms may be run that are focused on that provider type identifying specific providers with unusual patterns or aberrant practices to enable targeting for additional review, including desk review or on-site audit. Desk reviews and audits are not solely initiated following findings in SURS reports and algorithms and may also be initiated due to a member complaint or a concern raised by the MassHealth program staff.

In addition, MassHealth and PCU regularly develop algorithms that identify duplicative or noncompliant claims for recovery. MassHealth regularly reviews algorithm and SURS report results to identify providers with a large number of noncompliant claims, aberrant billing patterns or excessive billings. Upon discovering such providers, MassHealth and PCU will open desk reviews or on-site audits targeting the provider. The scope and sampling methodology of post-payment reviews will vary from case to case. Algorithms and SURS reports typically review 100% of claims received for a given provider type over a specified timeframe. The sampling process for post-payment review (desk review and on-site audits) entails generating a random sample of all members receiving services over the audit review period. For audits and desk reviews, MassHealth and PCU will perform a random sample of members at a 90% confidence level and review all claims and associated medical records for each member over a specified timeframe (typically 4 to 6 months). A margin of error is calculated and determined only for reviews and audits in which MassHealth intends to extrapolate overpayments based on the findings from the review or audit to the provider's full census. Where extrapolation may be performed, MassHealth and PCU typically pull a sample of 25 members and use the lower 90% confidence interval amount as the extrapolated overpayment amount to be recouped. The margin of error for the extrapolated amount can vary depending upon the total number of members the provider has served during the audit period. Where the provider has served fewer than 25 members over the audit period, MassHealth and PCU will review all of the members and associated claims resulting in a margin of error of +/- 0%.

On average, MassHealth and PCU run between 30 and 40 algorithms and SURS reports to identify recoveries as well as target providers for desk reviews and on-site audits. Because SURS reports and algorithms do not always identify providers exhibiting aberrant billing behavior, and because member complaints or program staff concerns are raised on an ad hoc basis, there is no scheduled number of desk reviews or on-site audits to be conducted on a year-to-year basis. When MassHealth

State:	
Effective Date	

identifies findings through SURS reports and algorithms, it is MassHealth practice to conduct a desk review or on-site audit within one month.

As part of its post-payment review activities, MassHealth and PCU regularly carry out desk reviews and on-site audits of providers. When initiating a provider desk review, auditors will request medical records, including individualized plans of care, for a sample of MassHealth members receiving services from the provider and compare them against claims data to ensure all paid claims are supported by accurate and complete documentation. As part of on-site audits, MassHealth and PCU develop an audit scope document that identifies specific regulatory requirements to be reviewed. Based on this scope, PCU will develop an audit tool to record the auditors' findings related to compliance or noncompliance of each regulatory requirement being reviewed. During their on-site visit, auditors will collect medical records for a sample of members to review for completeness and accuracy. Finally, to verify that services were rendered, auditors will visit a random sample of member homes, interview the members, and observe living conditions to ensure services are rendered consistently with each member's plan of care. The sampling process for home visits is to select a random sample of three to five members.

MassHealth and PCU select a smaller sample size for home visits than for desk reviews due to the logistics of conducting on-site audits within a two to three day timeframe.

Upon completion of an on-site audit or desk review, MassHealth will review the findings of noncompliance, if any, with regulatory requirements and determine whether to issue a notice of overpayment or sanction to the provider, depending on whether the provider was found in violation of applicable regulatory requirements. The notice of overpayment or sanction identifies and explains each instance of noncompliance, and notifies the provider of the associated sanctions and identifies the related overpayments. Within the notice, the provider receives the detailed results of the audit review, including lists of each regulatory requirement, the description of the provider's noncompliance, and the associated sanction or overpayment amount. On a case-by-case basis, MassHealth may meet with the provider to review the audit findings and discuss the appropriate corrective actions.

Providers have the opportunity to appeal MassHealth's determination of sanction or overpayment and dispute the related findings. While the appeal is processed, MassHealth will withhold the identified amount of identified overpayments or impose sanctions of administrative fines from future payments to the provider. If the sanctions or overpayment determinations are not appealed, MassHealth will work with the provider to establish a payment plan where a percentage of the overpayment amount is withheld from future payments of the provider's claims until the entire balance of the overpayment or sanction of administrative fines have been recouped.

As a result of a desk review or on-site audit, MassHealth may also require the provider to submit a plan of correction and may identify the provider to be re-audited after a specified period of time (e.g., 6 months) to ensure corrections are made.

Unlike desk reviews and on-site audits where reviewers are manually reviewing claims for a sample of members over a four to six month time period, algorithms and SURS reports generally look back over a longer timeframe up to five years for all claims associated with one or more provider types.

In addition to the activities described above, MassHealth maintains close contact with the Massachusetts Attorney General's Medicaid Fraud Division (MFD) to refer potentially fraudulent providers for MFD review and to ensure MassHealth is not pursuing providers under MFD's review.

The Commonwealth also conducts an annual Single State Audit that includes sampling from the Department's waiver(s) service claims. The Audit reviews contract and Quality Enhancement

State:	
Effective Date	

certification documents; Plans of Care, Choice and Level of Care documents; service delivery data, claims and payment records. As necessary the Department can establish an audit trail including the point of service, date of service, rate development, provider payment status, claim status, and any other waiver related financial information.

Quality Improvement: Financial Accountability

As a distinct component of the state's quality improvement strategy, provide information in the following fields to detail the state's methods for discovery and remediation.

a. Methods for Discovery: Financial Accountability Assurance
The state must demonstrate that it has designed and implemented an adequate system for
ensuring financial accountability of the waiver program. (For waiver actions submitted before
June 1, 2014, this assurance read "State financial oversight exists to assure that claims are
coded and paid for in accordance with the reimbursement methodology specified in the approved
waiver.")

i. Sub-assurances:

a Sub-assurance: The state provides evidence that claims are coded and paid for in accordance with the reimbursement methodology specified in the approved waiver and only for services rendered. (Performance measures in this sub-assurance include all Appendix I performance measures for waiver actions submitted before June 1, 2014.)

Performance Measures

For each performance measure the state will use to assess compliance with the statutory assurance complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure: FA a1. Percent of submitted service claims that were coded and paid for in accordance with the reimbursement methodology specified in the approved waiver. Numerator: The number of service claims that were coded and paid for in accordance with the reimbursement methodology specified in the approved waiver. Denominator: Total service claims submitted.

b. Sub-assurance: The state provides evidence that rates remain consistent with the approved rate methodology throughout the five year waiver cycle.

For each performance measure the state will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the state to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the state to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

State:	
Effective Date	

i. Describe the state's method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The State Medicaid agency is responsible for ensuring effective oversight of the waiver program, including administrative and operational functions performed by DDS. In the event problems are discovered with the management of the waiver program processes at waiver service providers or DDS Area Offices, DDS and MassHealth are responsible for ensuring that a corrective action plan is created, approved, and implemented within appropriate timelines. Further, MassHealth and DDS are responsible for identifying and analyzing trends related to the operation of the waiver and determining strategies to address quality- related issues.

APPENDIX I-2: Rates, Billing and Claims

a. Rate Determination Methods. In two pages or less, describe the methods that are employed to establish provider payment rates for waiver services and the entity or entities that are responsible for rate determination. Indicate any opportunity for public comment in the process. If different methods are employed for various types of services, the description may group services for which the same method is employed. State laws, regulations, and policies referenced in the description are available upon request to CMS through the Medicaid agency or the operating agency (if applicable).

EOHHS is required by state law to develop rates for health services purchased by state governmental units, and which includes rates for waiver services purchased under this waiver. State law further requires that rates established by EOHHS for health services must be "adequate to meet the costs incurred by efficiently and economically operated facilities providing care and services in conformity with applicable state and federal laws and regulations and quality and safety standards and which are within the financial capacity of the commonwealth." See MGL c. 118E s. 13C. This statutory rate adequacy mandate guides the development of all rates described herein.

In establishing rates for health services, EOHHS is required by statute to complete a public process that includes issuance of a notice of the proposed rates with an opportunity for the public to provide written comment, and EOHHS is required to hold public hearing to provide an opportunity for the public to provide oral comment. See MGL c. 118E s. 13D; see also MGL c. 30A s. 2. The purpose of this public process is to ensure that the public (and in particular, providers) are given advance notice of proposed rates and the opportunity to provide feedback, both orally and in writing, to ensure that proposed rates meet the statutory rate adequacy requirements noted above.

All rates established in regulation by EOHHS are required by statute to be reviewed biennially and updated as applicable, to ensure that they continue to meet the statutory rate adequacy requirements. See MGL c. 118E s. 13D. In updating rates to ensure continued compliance with statutory rate adequacy requirements, a cost adjustment factor (CAF) or other updates to the rate models may be applied.

Additional information on rate development for waiver service follows.

1. For waiver services where there is a comparable EOHHS Purchase of Service (POS) rate, the waiver service rate was established in POS regulation after public hearing pursuant to MGL c. 118E, s.13D. All POS rates were established in regulation pursuant to this statutory requirement. POS rates are developed using benchmarks from a variety of data sources. Salary benchmarks are computed from Bureau of Labor Statistics data for median wages paid to relevant staff titles in Massachusetts during the most recent reporting year available. Tax, fringe, and administrative rates are benchmarked to rates established by the Massachusetts Office of the State Comptroller. Other non-salary benchmarks are determined using Uniform Financial Reporting (UFR) data submitted to the Massachusetts Operational Services Division, in accordance with UFR reporting requirements under 808 CMR 1.00: Compliance, Reporting and Auditing for Human and Social Services. EOHHS uses UFR data to calculate rates that meet statutory adequacy requirements described above. No productivity expectations and administrative ceiling calculations were used in establishing these rates. UFR data demonstrates expenses of providers of a particular service for particular line items. Specifically, UFRs include line items such as training, occupancy, supplies and materials, or other expenses specific to each service. EOHHS uses these line items from UFRs submitted by providers as components in the buildup for the

State:	
Effective Date	

rates by determining the average for each line item across all providers. EOHHS uses the most recent complete state fiscal year UFR available to determine the average across providers of that service for each line item, which are then used to build each rate. The waiver service rate is set at the comparable POS rate for the following waiver services:

- -Assistive Technology, evaluation and training component (set in accordance with 101 CMR 423.00: Rates for Certain In-Home Basic Living Supports)
- -Behavioral Supports and Consultation, Family Training, Peer Support and Respite per 15 minutes (set in accordance with 101 CMR 414.00: Rates for Family Stabilization Services)
- -Community Based Day Supports (set in accordance with 101 CMR 415.00: Rates for Community-Based Day Support Services)
- -Group Supported Employment and Individual Supported Employment (set in accordance with 101 CMR 419: Rates for Supported Employment Services)
- -Respite per diem (set in accordance with 101 CMR 420.00: Rates for Adult Long-Term Residential Services)
- -Individualized Home Supports (set in accordance with 101 CMR 423.00: Rates for Certain In-Home Basic Living Supports)
- -Stabilization (set in accordance with 101 CMR 412.00: Rates for Family Transitional Support Services)
- -Remote Supports and Monitoring (set in accordance with 101 CMR 426.00: Rates for Certain Adult Community Mental Health Services) Remote Supports and Monitoring is reimbursed on a two-tiered rate, based on the level of intensity of service that is required by the participant and to prevent duplication of payments. Determination of intensity is based on an individual evaluation and also takes into account factors that include other services the participant receives, natural supports, and level of technology needed. An assessment is conducted to determine whether a participant needs additional equipment to interface with the standard RSM equipment and call center. The state reimburses the higher tier rate for participants who require this additional Assistive Technology equipment, because that extra equipment and its interface with the standard RSM equipment and call center is associated with higher clinical needs and accompanied by additional RSM staff time. The state reimburses the lower tier rate for participants who do not require this additional Assistive Technology equipment. The two rate tiers are informed by model staffing ratios for the remote monitoring center and the costs of monitoring center equipment and infrastructure. The monitoring center costs are fixed between the two tiers, but the staffing ratio and infrastructure assumptions increase in the higher tier to reflect the individual's higher needs.
- 2. Agency-based, per-trip transportation services: Massachusetts has a coordinated statewide Human Service Transportation (HST) brokerage system with Regional Transit Authorities brokering and managing consumer trips throughout the state. Brokers arrange transportation services by subcontracting with local qualified transportation providers. Work volume for transportation providers can be as limited as occasional trips for mid-day medical appointments to long-term, multiple days a week, route-structured program services. For Demand-response trips, contracted providers will be awarded trips on a daily basis based on lowest price, availability and prior performance. Program-Based trips for a specific destination, frequency and time, usually operating on a daily or regularly scheduled basis were procured for a five-year period beginning July 1, 2015. Additional routes are added as needed. Contracts are awarded based on lowest price, availability and prior performance.
- 3. Self-directed services with employer authority are paid through the Fiscal Employer Agent (FEA/FMS) at rates within an established range of payment. Participants may determine staff wages within the established range. The minimum that may be paid is the state's minimum wage, while the maximum is set as the agency provider rate for the service. These limits apply to wages for the following self-directed waiver services:

State:	
Effective Date	

- -Adult Companion (maximum rates set in accordance with 101 CMR 414.00)
- -Chore (maximum rates set in accordance with 101 CMR 359.00)
- -Behavioral Supports and Consultation, Family Training, Peer Support, and Respite (maximum rates set in accordance with 101 CMR 414.00)
- -Individualized Home Supports (maximum rate set in accordance with 101 CMR 423.00)
- -Individual Supported Employment (maximum rate set in accordance with 101 CMR 419.00)
- 4. For waiver services in which there is no comparable Medicaid state plan or EOHHS Purchase of Service (POS) rate, the waiver service rate was established in regulation after public hearing pursuant to MGL c. 118E, s. 13D, and as described below. This approach applies to the following waiver services:
- -Rates for Chore are set in accordance with 101 CMR 359.00: Rates for Home and Community Based Services Waivers and were established based on data for comparable services provided through the Executive Office of Elder Affairs Home Care Program, the largest purchaser of these services. The most current data for SFY 2016 was used, and rates were adjusted to the median rate paid for each of these services under the Home Care Program. The Home Care Program provides Massachusetts elders with long term services and supports that enable them to live in the community. The Home Care Program includes participants in the Frail Elder Waiver and those served at state cost. Services. The median of contracted service prices excluding the outliers was found for each service. Outliers were removed for any pricing that was 2 standard deviations away from the mean. This median is used as the rate for Chore.
- 5. Purchase of goods as waiver services are paid according to the cost of the good. For services that are self-directed, payments for purchase of goods are made through the FEA/FMS and purchased through a self- directed budget. This approach applies to the following waiver services:
- -Assistive Technology devices
- -Home Modifications
- -Individual Goods and Services
- -Specialized Medical Equipment and Supplies
- -Transportation transit passes only
- -Vehicle Modification

For the purchase of goods as waiver services made through a qualified waiver provider, payments for purchase of goods are made directly by the qualified provider and authorized through the waiver plan of care. This approach applies to the following waiver service:

- Assistive Technology devices
- 6. Other self-directed services in which there is no comparable Medicaid state plan or EOHHS Purchase of Service (POS) rate are established as described below, specific to the following waiver services:
- -Rates for Live-In Caregiver are developed and updated annually by DDS based on regional and population-based HUD Fair Market Rent (FMR) and USDA average moderate food cost data, respectively, with a multiplier adjusted to assure individuals are able to obtain fair market value apartments in their chosen town. Additional details can be found in B. Optional.
- -Self-directed, per-mile Transportation is paid in accordance with the IRS standard mileage rate.
- -Individualized Day Supports are paid through the Fiscal Employer Agent (FEA/FMS) at rates determined by the participant. The minimum that may be paid is the state's minimum wage,

State:	
Effective Date	

while the maximum is determined by the participant within their individual self-directed budget limit.

All costs that are not eligible for federal financial participation, such as room and board, are excluded from the rate computation. EOHHS establishes the rates for all waiver services that are the basis for the draw of federal funds and claiming of these expenditures on the CMS-64. The rates are presented at a public meeting scheduled by EOHHS and upon approval are entered into the Meditech system and MMIS.

DDS negotiates contracts with service providers and pays providers at the regulated rates of payment. For services with multiple payment rates, claims for FFP are submitted at a provisional rate equal to the average of the contract rates for each service. At the end of each waiver year a final rate is established for each service based on the total costs for and utilization of each waiver service. Claims are then adjusted to account for any differences between the provisional and final rate.

Information about payment rates is available on the DDS website and is shared by service coordinators with waiver participants at the time of the service planning meeting.

b. Flow of Billings. Describe the flow of billings for waiver services, specifying whether provider billings flow directly from providers to the state's claims payment system or whether billings are routed through other intermediary entities. If billings flow through other intermediary entities, specify the entities:

There are two types of billings for waiver services: Service Provider billings and billings for Self-Directed services through the Fiscal Employer Agent (FEA/FMS).

Provider billings:

Attendance data is submitted by service providers through the Enterprise Invoice Management System (EIM), a web based electronic service delivery documenting and invoicing system. DDS's Regional staff review dates of service information for all individuals. On a quarterly basis, the Area Office samples attendance records to confirm that data is accurate.

The data is matched with rates and participant waiver eligibility criteria and submitted by electronic submission in accordance with procedures mandated by the Commonwealth's Medicaid Management Information System (MMIS).

When a submission is processed through MMIS, any claim for dates of service where the individual was not Medicaid eligible is automatically denied.

Self-Directed Services:

The state's contract with Public Partnerships, Limited (PPL), the FEA/FMS effectuates direct billing for self-directed providers; i.e., when a provider bills through the FEA/FMS, the billing is considered direct to the Medicaid Agency as follows: self-directed providers bill through and are paid by the FEA/FMS, which acts as the agent of the Medicaid agency in making payments directly to the providers. The FEA/FMS is contracted with the state and is the business associate of the state, required to perform certain employer functions that aid the Waiver participant in self-direction such as tax withholding and payroll. As the business associate of the state, the FEA/FMS is also required to adhere to other requirements that relate to data privacy, reporting functions, and others.

State:	
Effective Date	

Public Partnerships, Limited (PPL), the FEA/FMS, submits service data to DDS. Provider billings flow from a provider to the FEA/FMS. The FEA/FMS makes payment of invoices for waiver goods and services that have been requested by the participant and are included in the participant's budget and authorized in the service plan. DDS is able to access service delivery information through the FEA/FMS portal. Individuals are coded as waiver participants in the DDS Meditech database and claims checks assure that the level of Care, Plan of Care, Medicaid eligibility, and Service Coordinator are in place prior to a claim being processed; claims are processed only for waiver eligible individuals for waiver eligible services provided by waiver eligible providers.

Components:

Original source documentation is maintained in hard copy format by service providers, and the FEA/FMS and in electronic form by DDS. Consumer specific information is on file at DDS Area Offices and in the DDS Meditech database. DDS uses the Meditech system to support various operational and policy/planning functions. As outlined in Appendix I-1, the Meditech database contains waiver service delivery information, demographic information, the level of care, plan of care approval, the Medicaid category of assistance and assigned service coordinator information for each waiver participant. Meditech is the case management data system and also includes case management progress notes.

Assessment data is in both Meditech and HCSIS.

Claim checks are part of the DDS electronic claims processing system to assure that all waiver assurances are met prior to processing a claim for FFP.

c. Certifying Public Expenditures (select one):

O No. State or local government agencies do not certify expenditures for waiver services.

X Yes. State or local government agencies directly expend funds for part or all of the cost of waiver services and certify their state government expenditures (CPE) in lieu of billing that amount to Medicaid.

Select at least one:

X | Certified Public Expenditures (CPE) of State Public Agencies.

Specify: (a) the state government agency or agencies that certify public expenditures for waiver services; (b) how it is assured that the CPE is based on the total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-a.)

DDS certifies public expenditures for waiver services. Expenditures are certified annually utilizing cost report data. Staff from the Public Provider Reimbursement Unit at the University of Massachusetts Medical School Center for Health Care Financing review cost reports and identify allowable and unallowable costs (such as room and board). Payments are made to waiver providers contracted through DDS. These providers retain 100% of the payment.

Expenditures for waiver services are funded from annual legislative appropriations to the Department of Developmental Services. Claims for waiver services are adjudicated at approved rates through the state's approved MMIS system. The approved rates are set by the Executive Office of Health and Human Services and are based on the total costs for and utilization of waiver services. Once the claims have adjudicated through the CMS approved MMIS system, which validates that the claims are eligible for Federal Financial participation, the expenditures for waiver services are reported on the CMS 64 report.

Specify: (a) the local government agencies that incur certified public expenditures for
waiver services; (b) how it is assured that the CPE is based on total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-b.)
1

State:	
Effective Date	

d. Billing Validation Process. Describe the process for validating provider billings to produce the claim for federal financial participation, including the mechanism(s) to assure that all claims for payment are made only: (a) when the individual was eligible for Medicaid waiver payment on the date of service; (b) when the service was included in the participant's approved service plan; and, (c) the services were provided:

As described above, DDS's Electronic Service Delivery system, HCSIS and Meditech systems and MMIS provide ample checks and balances to assure that FFP is claimed on the CMS-64 only when an individual is eligible for Medicaid waiver payment on the date of service rendered, the waiver service is included in the participant's approved service plan and the specific services were provided. The service delivery reporting system reconciles provider payment to dates of service reporting, and Meditech edits claims to ensure only service claims that meet all waiver criteria are submitted for payment processing to MMIS. MMIS validates all waiver service claims for dates of services and Medicaid eligibility prior to payment which is then reported as FFP in the CMS-64.

e. Billing and Claims Record Maintenance Requirement. Records documenting the audit trail of adjudicated claims (including supporting documentation) are maintained by the Medicaid agency, the operating agency (if applicable), and providers of waiver services for a minimum period of 3 years as required in 45 CFR § 92.42.

State:	
Effective Date	

APPENDIX I-3: Payment

a.	Method of	payments —	MMIS	(select one):
----	-----------	------------	-------------	---------------

X	Payments for all waiver services are made through an approved Medicaid Management Information System (MMIS).
0	Payments for some, but not all, waiver services are made through an approved MMIS. Specify: (a) the waiver services that are not paid through an approved MMIS; (b) the process for making such payments and the entity that processes payments; (c) how an audit trail is maintained for all state and federal funds expended outside the MMIS; and, (d) the basis for the draw of federal funds and claiming of these expenditures on the CMS-64.
0	Payments for waiver services are not made through an approved MMIS. Specify: (a) the process by which payments are made and the entity that processes payments; (b) how and through which system(s) the payments are processed; (c) how an audit trail is maintained for all state and federal funds expended outside the MMIS; and, (d) the basis for the draw of federal funds and claiming of these expenditures on the CMS-64:
0	Payments for waiver services are made by a managed care entity or entities. The managed care entity is paid a monthly capitated payment per eligible enrollee through an approved MMIS. Describe how payments are made to the managed care entity or entities:

b. Direct payment. In addition to providing that the Medicaid agency makes payments directly to providers of waiver services, payments for waiver services are made utilizing one or more of the following arrangements (*select at least one*):

X	The Medicaid agency makes payments directly and does not use a fiscal agent (comprehensive or limited) or a managed care entity or entities.
	The Medicaid agency pays providers through the same fiscal agent used for the rest of the Medicaid program.
X	The Medicaid agency pays providers of some or all waiver services through the use of a limited fiscal agent.
	Specify the limited fiscal agent, the waiver services for which the limited fiscal agent makes payment, the functions that the limited fiscal agent performs in paying waiver claims, and the methods by which the Medicaid agency oversees the operations of the limited fiscal agent:
	Providers may receive payment directly from the Medicaid agency. Information on how Providers may bill Medicaid directly will be posted on the DDS website and with the procurement materials on the Commonwealth Procurement Access and Solicitation Site (CommBuys).

For Self-Directed Services, billings will flow from a provider to Public Partnerships, Limited (PPL), the FEA/FMS providing financial management services. The FEA/FMS will be

State:	
Effective Date	

responsible for submitting service data through DDS's electronic service delivery reporting system. Individuals are coded as waiver participants in the Department's Meditech database and claims checks assure that the Level of Care, Choice, Plan of Care, Medicaid eligibility and Service Coordinator are in place prior to a claim being processed and that claims are processed only for waiver eligible individuals for appropriate waiver services provided by eligible waiver providers; and that claims are processed only for services that are included in a participant's budget and authorized in the service plan. The above data is matched with rates and individual waiver eligibility criteria and submitted by electronic submission in accordance with procedures mandated by the Commonwealth's Medicaid Management Information System (MMIS). When a submission is processed through MMIS, any claim for dates of service where the individual was not Medicaid eligible is automatically denied.

Components:

Original source documentation is maintained in hard copy format by service providers, the FEA/FMS and in electronic form by the Department. Consumer specific information is on file at the Department's Area Offices and in the Department's database. Service providers submit information through the Enterprise Invoice Management System (EIM), a web based electronic service delivery documenting and invoicing system. Claim checks are part of DDS's electronic claims production system to assure that all waiver assurances are met prior to processing a claim for FFP.

Providers are paid by a managed care entity or entities for services that are included in the state's contract with the entity.

Specify how providers are paid for the services (if any) not included in the state's contract with managed care entities.

c. Supplemental or Enhanced Payments. Section 1902(a)(30) requires that payments for services be consistent with efficiency, economy, and quality of care. Section 1903(a)(1) provides for Federal financial participation to states for expenditures for services under an approved state plan/waiver. Specify whether supplemental or enhanced payments are made. *Select one:*

X	No. The state does not make supplemental or enhanced payments for waiver services.
0	Yes. The state makes supplemental or enhanced payments for waiver services. Describe: (a) the nature of the supplemental or enhanced payments that are made and the waiver services for which these payments are made; (b) the types of providers to which such payments are made; (c) the source of the non-Federal share of the supplemental or enhanced payment; and, (d) whether providers eligible to receive the supplemental or enhanced payment retain 100% of the total computable expenditure claimed by the state to CMS. Upor request, the state will furnish CMS with detailed information about the total amount of supplemental or enhanced payments to each provider type in the waiver.

State:	
Effective Date	

0	No. State or local government providers do not receive payment for waiver services. Do not complete Item 1-3-e.
X	Yes. State or local government providers receive payment for waiver services. Complete item 1-3-e.
	Specify the types of state or local government providers that receive payment for waiver services and the services that the state or local government providers furnish. <i>Complete item I-3-e.</i>
	Department of Developmental Services provides behavioral supports and consultation, individual supported employment, group supported employment, community based day supports, individualized home supports and respite.
Amou	unt of Payment to State or Local Government Providers.
supple and, it	fy whether any state or local government provider receives payments (including regular and any emental payments) that in the aggregate exceed its reasonable costs of providing waiver services so, whether and how the state recoups the excess and returns the Federal share of the excess to on the quarterly expenditure report. <i>Select one</i> :
X	The amount paid to state or local government providers is the same as the amount paid to private providers of the same service.
0	The amount paid to state or local government providers differs from the amount paid to private providers of the same service. No public provider receives payments that in the aggregate exceed its reasonable costs of providing waiver services.
0	The amount paid to state or local government providers differs from the amount paid to private providers of the same service. When a state or local government provider receives payments (including regular and any supplemental payments) that in the aggregate exceed the cost of waiver services, the state recoups the excess and returns the federal share of the excess to CMS on the quarterly expenditure report.
	Describe the recoupment process:
	der Retention of Payments. Section 1903(a)(1) provides that Federal matching funds are only ble for expenditures made by states for services under the approved waiver. <i>Select one:</i>
X	Providers receive and retain 100 percent of the amount claimed to CMS for waiver services.
0	Providers are paid by a managed care entity (or entities) that is paid a monthly capitated payment.
	Specify whether the monthly capitated payment to managed care entities is reduced or returned in part to the state.

State:	
Effective Date	

- No. The state does not provide that providers may voluntarily reassign their right to direct payments to a governmental agency.
 Yes. Providers may voluntarily reassign their right to direct payments to a governmental agency as provided in 42 CFR §447.10(e).
 Specify the governmental agency (or agencies) to which reassignment may be made.
- ii. Organized Health Care Delivery System. Select one:
 - O No. The state does not employ Organized Health Care Delivery System (OHCDS) arrangements under the provisions of 42 CFR §447.10.
 - X Yes. The waiver provides for the use of Organized Health Care Delivery System arrangements under the provisions of 42 CFR §447.10.

Specify the following: (a) the entities that are designated as an OHCDS and how these entities qualify for designation as an OHCDS; (b) the procedures for direct provider enrollment when a provider does not voluntarily agree to contract with a designated OHCDS; (c) the method(s) for assuring that participants have free choice of qualified providers when an OHCDS arrangement is employed, including the selection of providers not affiliated with the OHCDS; (d) the method(s) for assuring that providers that furnish services under contract with an OHCDS meet applicable provider qualifications under the waiver; (e) how it is assured that OHCDS contracts with providers meet applicable requirements; and, (f) how financial accountability is assured when an OHCDS arrangement is used:

- (a) The Department of Developmental Services is designated as the Organized Health Care Delivery System for this home and community based waiver. It provides at least one Medicaid service and arranges for others.
- (b) The FEA/FMS and the Department maintain a list of qualified direct providers available throughout the state. A qualified direct provider may enroll with the FEA/FMS or the Department at any time. Waiver providers may also enroll directly with MassHealth. Providers who do not wish to contract with the OHCDS may enroll directly with MassHealth, and will be subject to all provider qualifications as outlined in Appendix C. MassHealth's Administrative Service Organization (ASO) for the MA.40701, MA40702, MA.1027 and MA.1028 waivers facilitates the waiver provider enrollment process for providers who do not wish to contract with the OHCDS.
- (c) Participants have free choice of qualified providers. Any willing and qualified provider has the opportunity to submit a proposal to contract with the Department as a provider of waiver services. DDS posts on its website the requirements and procedures for potential providers to qualify to deliver services. The qualifying system is open and continuous to allow potential providers to apply as they become ready to deliver services to participants.

Newly qualified direct providers can be added to the list maintained by the FEA/FMS or the Department from time to time. A list of qualified providers for DDS contracted services is also maintained on the DDS website to allow participants ready access to this information. Participants are also assisted in accessing this information through their Service Coordinator.

(d) The FEA/FMS or the Department oversees and monitors the contracts for providers that furnish services under the waiver. The Department or the FEA/FMS will review direct provider qualifications based on the qualifications in Appendix C and Appendix H.

State:	
Effective Date	

- (e) OHCDS contracts with direct care providers will be governed by the provisions of an interagency service agreement between the Department and EOHHS.
- (f) Financial accountability is assured as described in Appendix I-1. The Commonwealth conducts an annual Single State Audit that includes sampling from the Department's waiver(s) service claims. The

Audit reviews contract and Quality Enhancement certification documents; Plans of Care, Choice and Level of Care documents; service delivery data, claims and payment records. As necessary the

Department can establish an audit trail including the point of service, date of service, rate development, provider payment status, claim status, and any other waiver related financial information. KPMG is the contractor that performs the Single State Audit for the Commonwealth of Massachusetts.

iii. Contracts with MCOs, PIHPs or PAHPs. Select one:

- X The state does not contract with MCOs, PIHPs or PAHPs for the provision of waiver services.
- The state contracts with a Managed Care Organization(s) (MCOs) and/or prepaid inpatient health plan(s) (PIHP) or prepaid ambulatory health plan(s) (PAHP) under the provisions of §1915(a)(1) of the Act for the delivery of waiver and other services. Participants may voluntarily elect to receive waiver and other services through such MCOs or prepaid health plans. Contracts with these health plans are on file at the state Medicaid agency.

Describe: (a) the MCOs and/or health plans that furnish services under the provisions of §1915(a)(1); (b) the geographic areas served by these plans; (c) the waiver and other services furnished by these plans; and (d) how payments are made to the health plans.

- This waiver is a part of a concurrent \$1915(b)/\$1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The \$1915(b) waiver specifies the types of health plans that are used and how payments to these plans are made.
- This waiver is a part of a concurrent \$1115/\$1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The \$1115 waiver specifies the types of health plans that are used and how payments to these plans are made.

APPENDIX I-4: Non-Federal Matching Funds

0	App	propriation of State Tax Revenues to the State Medicaid Agency
X	App	propriation of State Tax Revenues to a State Agency other than the Medicaid Agency.
	species used in the function of the control of the	ne source of the non-federal share is appropriations to another state agency (or agencies), brify: (a) the state entity or agency receiving appropriated funds and (b) the mechanism that used to transfer the funds to the Medicaid Agency or Fiscal Agent, such as an argovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if the distance directly expended by state agencies as CPEs, as indicated in Item I-2-c: mual legislative appropriation to the Department of Developmental Services provides the federal share which is expended directly by DDS as CPEs. The Department of relopmental Services directly makes expenditures from its appropriation and Federal ancial Participation (FFP) is returned to the State General Fund. Neither the Medicaid agency DDS retain any FFP. All FFP is returned to the State General Fund.
		er State Level Source(s) of Funds.
	Specific (c) 1	cify: (a) the source and nature of funds; (b) the entity or agency that receives the funds; and the mechanism that is used to transfer the funds to the Medicaid Agency or Fiscal Agent, as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, cate if funds are directly expended by state agencies as CPEs, as indicated in Item I-2-c:

APPENDIX I-5: Exclusion of Medicaid Payment for Room and Board

- a. Services Furnished in Residential Settings. Select one:
 - O No services under this waiver are furnished in residential settings other than the private residence of the individual.
 - X As specified in Appendix C, the state furnishes waiver services in residential settings other than the personal home of the individual.
- **b.** Method for Excluding the Cost of Room and Board Furnished in Residential Settings. The following describes the methodology that the state uses to exclude Medicaid payment for room and board in residential settings:

As specified in Appendix C, the settings in which waiver services are provided other than the personal home of the individual are only those settings licensed as respite providers.

State:	
Effective Date	

APPENDIX I-6: Payment for Rent and Food Expenses of an Unrelated Live-In Caregiver

Reimbursement for the Rent and Food Expenses of an Unrelated Live-In Personal Caregiver. *Select one:*

0	No. The state does not reimburse for the rent and food expenses of an unrelated live-in personal
	caregiver who resides in the same household as the participant.

Yes. Per 42 CFR §441.310(a)(2)(ii), the state will claim FFP for the additional costs of rent and food that can be reasonably attributed to an unrelated live-in personal caregiver who resides in the same household as the waiver participant. The state describes its coverage of live-in caregiver in Appendix C-3 and the costs attributable to rent and food for the live-in caregiver are reflected separately in the computation of factor D (cost of waiver services) in Appendix J. FFP for rent and food for a live-in caregiver will not be claimed when the participant lives in the caregiver's home or in a residence that is owned or leased by the provider of Medicaid services.

The following is an explanation of: (a) the method used to apportion the additional costs of rent and food attributable to the unrelated live-in personal caregiver that are incurred by the individual served on the waiver and (b) the method used to reimburse these costs:

DDS reimburses for both room and board of the unrelated live-in personal caregiver. DDS, as the provider, reimburses the waiver participant for the cost of additional living space and the increased utility costs to afford the live-in caregiver a private bedroom. The reimbursement for the increased rental costs will be based on the DDS Housing Guidelines established by the Department at 150% of the median rental costs per HUD region. Payment will not be made when the participant lives in the caregiver's home or in a residence that is owned or leased by the provider of Medicaid Services. The reimbursement for food costs will be based on the USDA Moderate Food Plan cost averages.

Rates for Live-In Caregiver are developed and updated annually by DDS based on regional and population-based HUD Fair Market Rent (FMR) and USDA average moderate food cost data, respectively, with a multiplier adjusted to assure individuals are able to obtain fair market value apartments in their chosen town. The rate calculation is updated every January based upon the previous year's HUD and USDA data. The formulas for computing the maximum per diem and monthly rates for Live-In Caregiver are as follows:

Maximum Live-In Caregiver Monthly Rate = [(HUD FMR for the municipality in which the individual resides x = 1.5 + 1.5

Maximum Live-In Caregiver Per Diem Rate = (Maximum Live-In Caregiver Monthly Rate x 12) ÷ 365

The HUD Fair Market Rates for a 2 bedroom home in Massachusetts for Fiscal Year 2023: https://www.huduser.gov/portal/datasets/fmr/fmrs/FY2023_code/select_Geography.odn Please note: when using this link, select New State: Massachusetts, select Statewide FMRs, the town to town rates are found on the FY 2023 Massachusetts FMR Local Area Summary table. The Official USDA Food Plans: Cost of Food at Home at Four Levels, U.S. Average, November 2022 moderate food plan costs for an individual (male and female) between the ages of 19 and 71+ for the month of November 2022. https://fns-prod.azureedge.us/sites/default/files/media/file/CostofFoodNov2022LowModLib.pdf

Appendix J-2: Derivation of Estimates

a. Number Of Unduplicated Participants Served. Enter the total number of unduplicated participants from Item B-3-a who will be served each year that the waiver is in operation. When the waiver serves individuals under more than one level of care, specify the number of unduplicated participants for each level of care:

Table J-2-a: Unduplicated Participants							
	Total Unduplicated Number	Distribution of Unduplicated Participants by Level of Care (if applicable)					
Waiver Year	of Participants (from Item B-3-a)	Level of Care: ICF/IID					
Year 1	3,366	3,366					
Year 2	3,541	3,541					
Year 3	3,716	3,716					
Year 4	3,891	3,891					
Year 5	4,066	4,066					

b. Average Length of Stay. Describe the basis of the estimate of the average length of stay on the waiver by participants in Item J-2-a.

The Average Length of Stay (ALOS) of 329.70 for Waiver Years (WY) 1-5 is the ALOS in the Community Living Waiver in WY 2020.

- **c. Derivation of Estimates for Each Factor**. Provide a narrative description for the derivation of the estimates of the following factors.
 - **i. Factor D Derivation**. The estimates of Factor D for each waiver year are located in Item J-2-d. The basis and methodology for these estimates is as follows:

Number of Users:

In the renewal of this waiver effective 7/1/23, the projected number of unduplicated participants each year was based on Department of Developmental Services (DDS) experience with this waiver to date and expected growth. While utilization estimates were based on data reflected in the WY 2018-2021 CMS 372 report, the estimated unduplicated participant count of 2,866 for WY1 represented the planned waiver growth for the Community Living Waiver. The state planned to grow the waiver by 175 slots per year which took into account the reserved capacity outlined in Appendix B-3. The 2024 amendment proposes to add 500 slots to WY1, in addition to the 175 slots per year that were included in the renewal.

Estimates for the number of users were based on the average data reported on the 2018-2021 CMS 372 reports for each service in the Community Living Waiver except as noted below. - For Live-in Caregiver, estimates are based on WY 2021 because there was not consistent utilization across all four years.

State:
Effective Date

- Utilization for Assistive Technology Evaluation and Training was estimated at 2% of the waiver population in WY1, and goes up to 3% in WY2, 4% in WY3, 5% in WY4, and 6% in WY5.
- Utilization for Assistive Technology items (devices) was estimated at 1% of the waiver population in WY1, 2% in WY2, 3% in WY3, 4% in WY4, and 5% in WY5.

These estimates were based on anticipated growth in the use of Assistive Technology, due to the availability of (1) Evaluation and Training as a component, and (2) the devices through traditional service delivery, in addition to self- direction. The state made changes to the service, so we projected some growth, related to these changes.

- For Chore, which saw no utilization in WY 2018-2021, DDS estimated the number of users at 0.01% of the total estimated unduplicated participants.
- For Family Training, estimates are based on WY 2019 because there was not consistent utilization across all four years.
- For Home Modifications and Adaptations estimates are based on WY 2021 because there was not consistent utilization across all four years.
- Remote Supports and Monitoring is a new service, so we estimated growth as staff promote the new service and its benefits become more widely understood. Utilization was estimated at 0.25% of the waiver population in WY1 and expands to 3% of the waiver population in WY5.
- For Specialized Medical Equipment and Supplies and Vehicle Modifications, estimates are based on WY 2020 because there was not consistent utilization across all four years.

Average Units per User:

The average units per user were based on data reported on the WY 2018-2021 CMS 372 for each service in the Community Living Waiver except as noted below.

- Live-In Caregiver estimates for units per user are set equal to the ALOS.
- Assistive technology-item component, Assistive Technology-evaluation and training component, Chore, and Remote Supports and Monitoring units per user estimates were based on estimates from WY 2023. Family Training estimates are based on WY 2019 because there was not consistent utilization across all four years.
- The average unit per user for Home Modifications and Adaptations, Specialized Medical Equipment and Supplies and for Vehicle Modification is 1, reflecting 'Item' as the unit of measure, based on DDS experience.

Average Cost per Unit:

Average costs per unit were based on data reported on the 2021 CMS 372 for each service in the Community Living Waiver, except as noted below.

- Assistive Technology-item, Assistive Technology-evaluation and training, Chore, and Remote Supports and Monitoring, were based on estimates from WY 2023.
- Family Training was based on WY 2019 claims.
- Specialized Medical Equipment and Vehicle Modification were based on WY 2020 claims.

State:	
Effective Date	

Trend:

Average costs per unit described above are trended forward by 3.2% annually, beginning in Waiver Year 1, based on the Medical Consumer Price Index for the first six months of calendar year 2022.

ii. Factor D' Derivation. The estimates of Factor D' for each waiver year are included in Item J-1. The basis of these estimates is as follows:

Factor D' costs are based on WY 2019 claims data for all other Medicaid services (D') by participants in the Community Living Waiver, as reported on the WY 2019 CMS-372. The annualized value of Factor D' is adjusted by the average length of stay used for Factor D to make the period of comparison comparable as follows: the annualized value of Factor D' was multiplied by the average length of stay and divided by 365.

Factor D' costs from the WY 2019 CMS-372 were increased to reflect the addition of Individualized Staffing Supports as a state plan service.

In addition, WY 2019 costs were trended forward annually by the Consumer Price Index – Medical (3.2 %) to estimate Factor D' for WY 2024 (WY 1), as well as for subsequent waiver years. The State's source of the 3.2 % CPI is: BLS CPI-All Urban Consumers, US City Average, Medical care services, Un-adjusted 12 mos. ended June 2022 .

As Factor D' costs are based on WY 2019 data, the cost and utilization of prescription drugs in the base data reflects the full implementation of Medicare Part D. Therefore, no Medicare Part D drug costs or utilization are included in the Factor D' estimate.

iii. Factor G Derivation. The estimates of Factor G for each waiver year are included in Item J-1. The basis of these estimates is as follows:

Factor G costs are derived from the cost per member for MassHealth members who resided in an ICF-IID in WY 2020 as reported on the CMS-372 report for the Community Living Waiver. The annualized value of Factor G is adjusted by the average length of stay used for Factor D to make the period of comparison comparable as follows: the annualized value of Factor G was multiplied by the average length of stay and divided by 365. In addition, WY 2020 costs were trended forward annually by the Consumer Price Index – Medical (3.2%) to estimate Factor G for WY 2024 (WY 1), as well as for subsequent waiver years. The State's source of the 3.2% CPI is: BLS CPI-All Urban Consumers, US City Average, Medical care services, Un-adjusted 12 mos. ended June 2022 .

iv. Factor G' Derivation. The estimates of Factor G' for each waiver year are included in Item J-1. The basis of these estimates is as follows:

Factor G' costs are based on the utilization of all Medicaid services (G') other than ICF-IID services in WY 2020 for MassHealth members residing in an ICF-IID for a long stay as reported on the CMS-372 report for the Community Living Waiver.

State:	
Effective Date	

The annualized value of Factor G' is adjusted by the average length of stay used for Factor D to make the period of comparison comparable as follows: the annualized value of Factor G' was multiplied by the average length of stay and divided by 365. In addition, WY 2020 costs were trended forward annually by Consumer Price Index – Medical (3.2%) to estimate Factor G' for WY 2024(WY 1), as well as for subsequent waiver years. The State's source of the 3.2% CPI is: BLS CPI-All Urban Consumers, US City Average, Medical care services, Unadjusted 12 mos. ended June 2022.

Component management for waiver services. If the service(s) below includes two or more discrete services that are reimbursed separately, or is a bundled service, each component of the service must be listed. Select "manage components" to add these components.
