

Job Aid:

How to Record a Non-Contract or Incidental Purchase Previously Made (RPA)

This Job Aid shows how to:

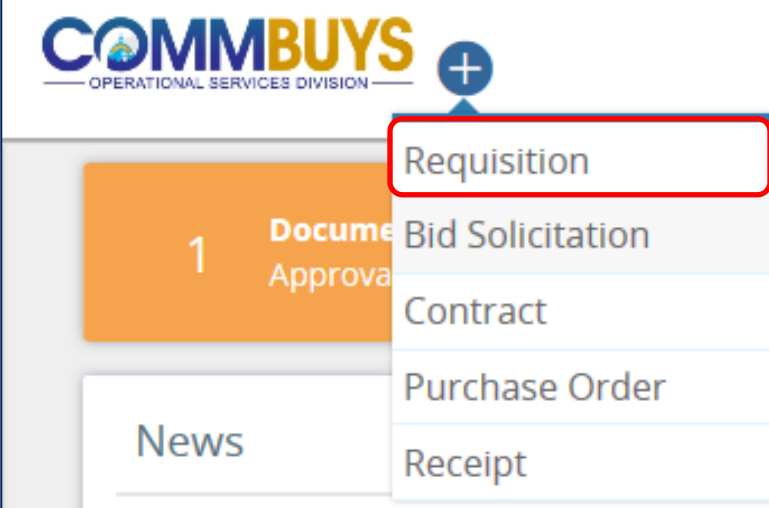

- Create an RPA Requisition in COMMBUYS

Of Special Note:

An RPA is a Request for Payment Authorization to be used after-the-fact for a purchase that has previously been made for goods or services not on an enabled statewide contract (SWC). These purchases are somewhat rare and must be approved by the appropriate authority at your agency prior to purchase. Purchasing through SWCs or a normal procurement is always the standard approach.

RPA Requisitions (as opposed to RPA Release Requisitions) in COMMBUYS record off-contract purchases when the normal procurement process is impractical due to impending need (emergency purchases) and for one-time incidental purchases up to \$10,000.

If your purchase can be found on a SWC, you will want to create an RPA Release in COMMBUYS and you will follow the Job Aid titled: *How to Record a Contract Purchase Previously Made*.
