

# One Care: Implementation Council Meeting

Executive Office of Health & Human Services

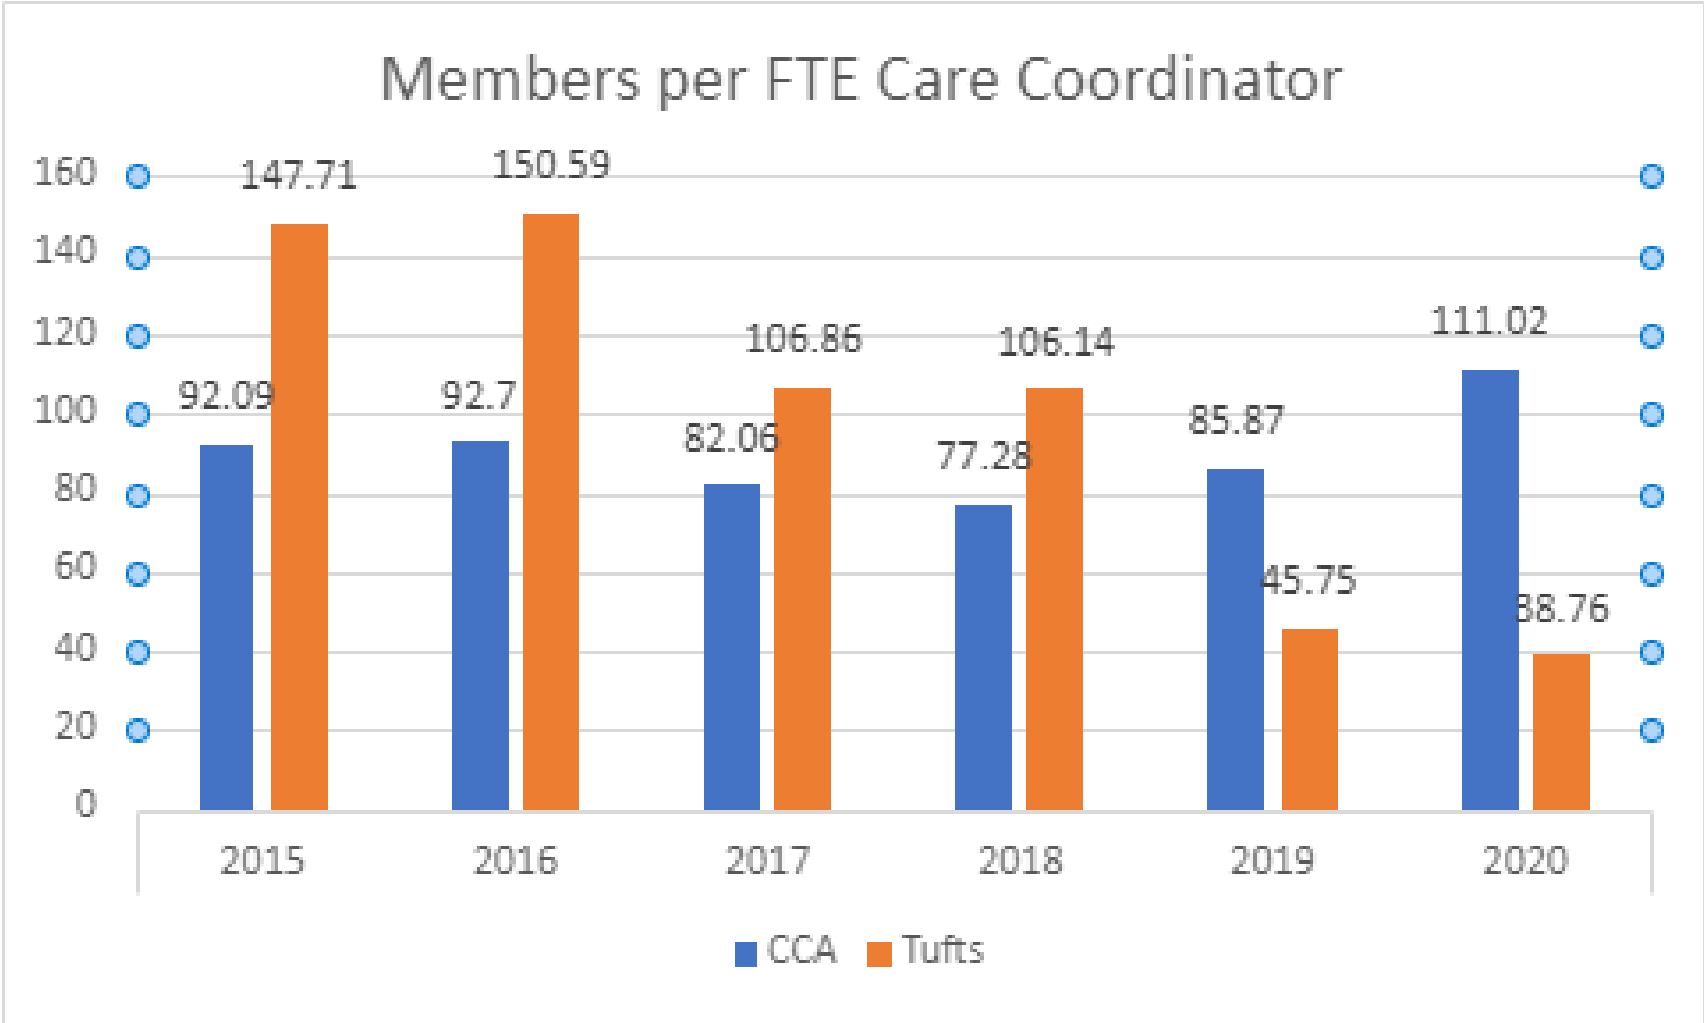

MassHealth Demonstration  
to Integrate Care for Dual Eligibles

May 11, 2021 10:00 AM – 12:00 PM  
Virtual Meeting via Zoom

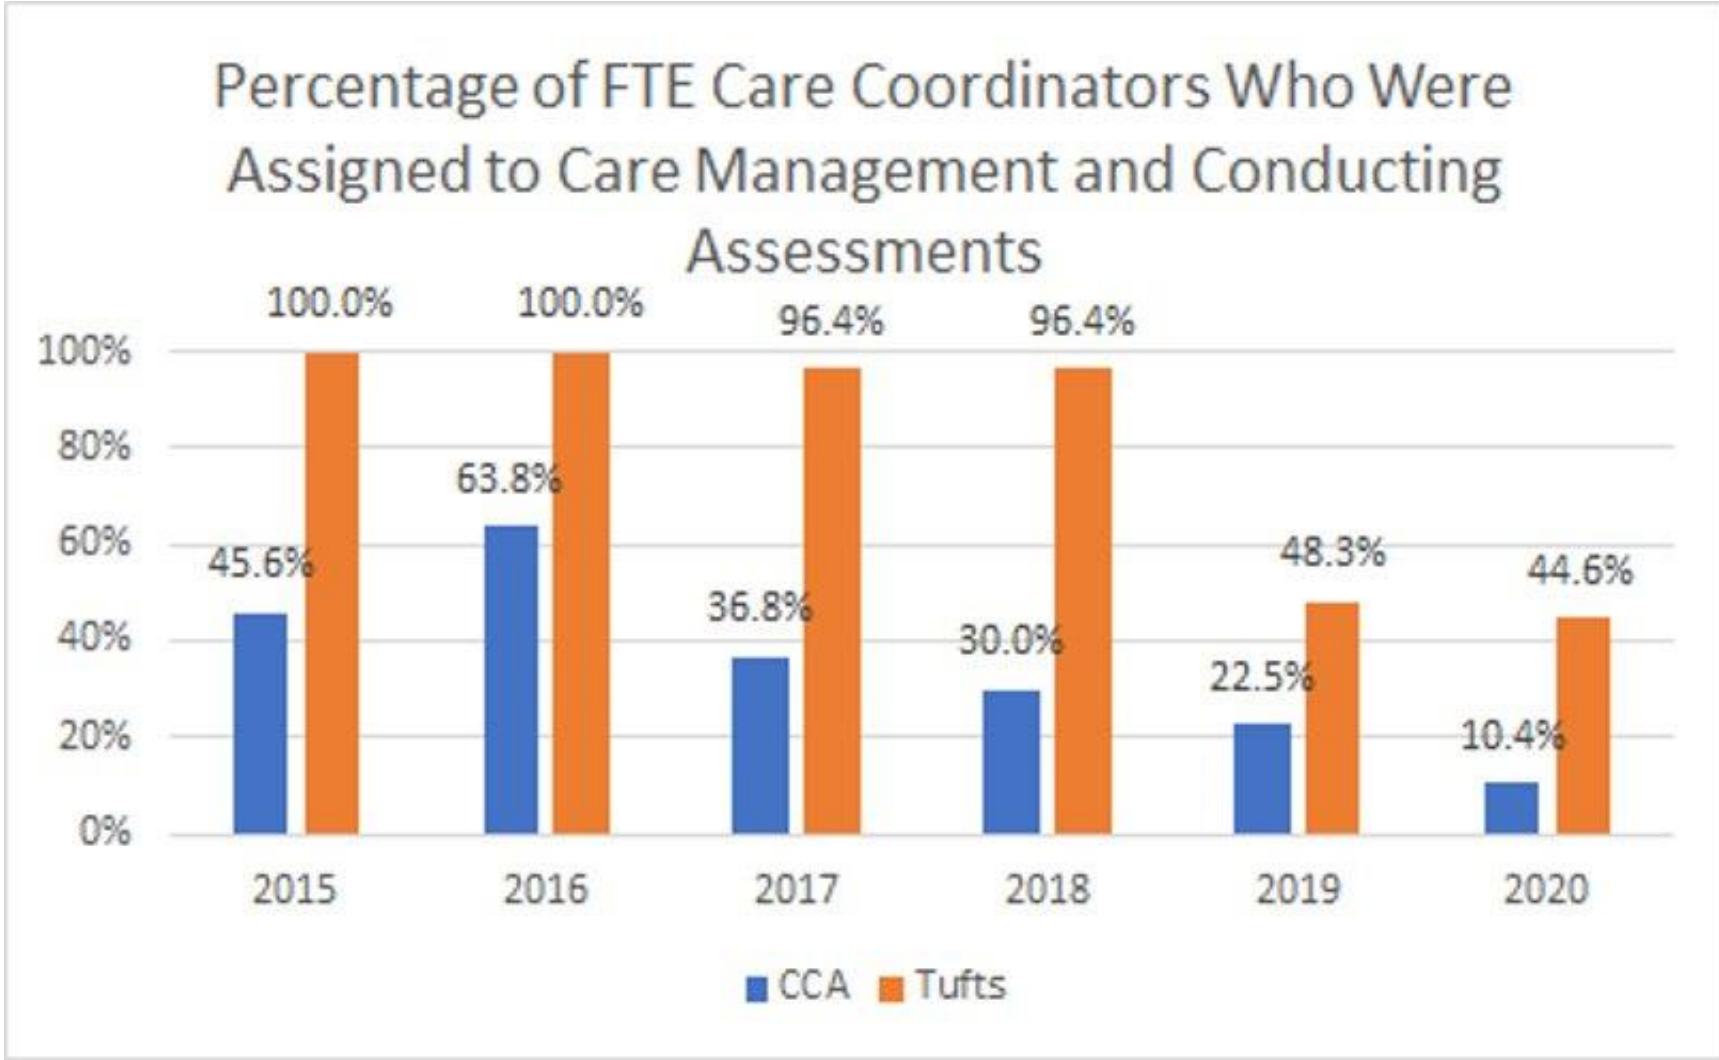

- Change in Care Coordinator to Member Ratios over time
- Update on COVID-19 Morbidity and Mortality in Integrated Care Plans

# Care Coordinator to Member Ratio (NORC Core Measure 5.1)

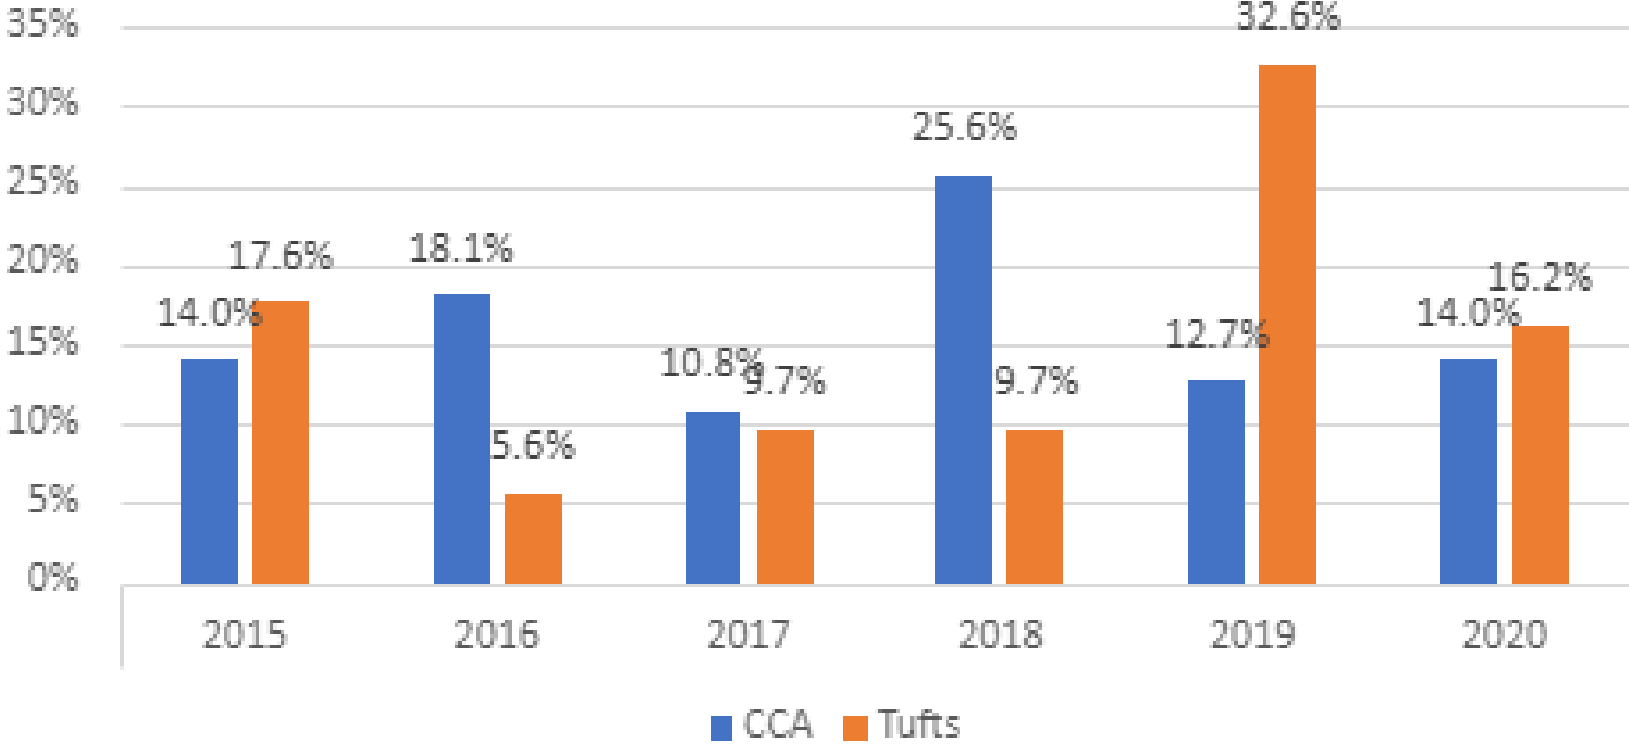

# Care Coordinator to Member Ratio (NORC Core Measure 5.1), cont.

# Care Coordinator to Member Ratio (NORC Core Measure 5.1), cont.

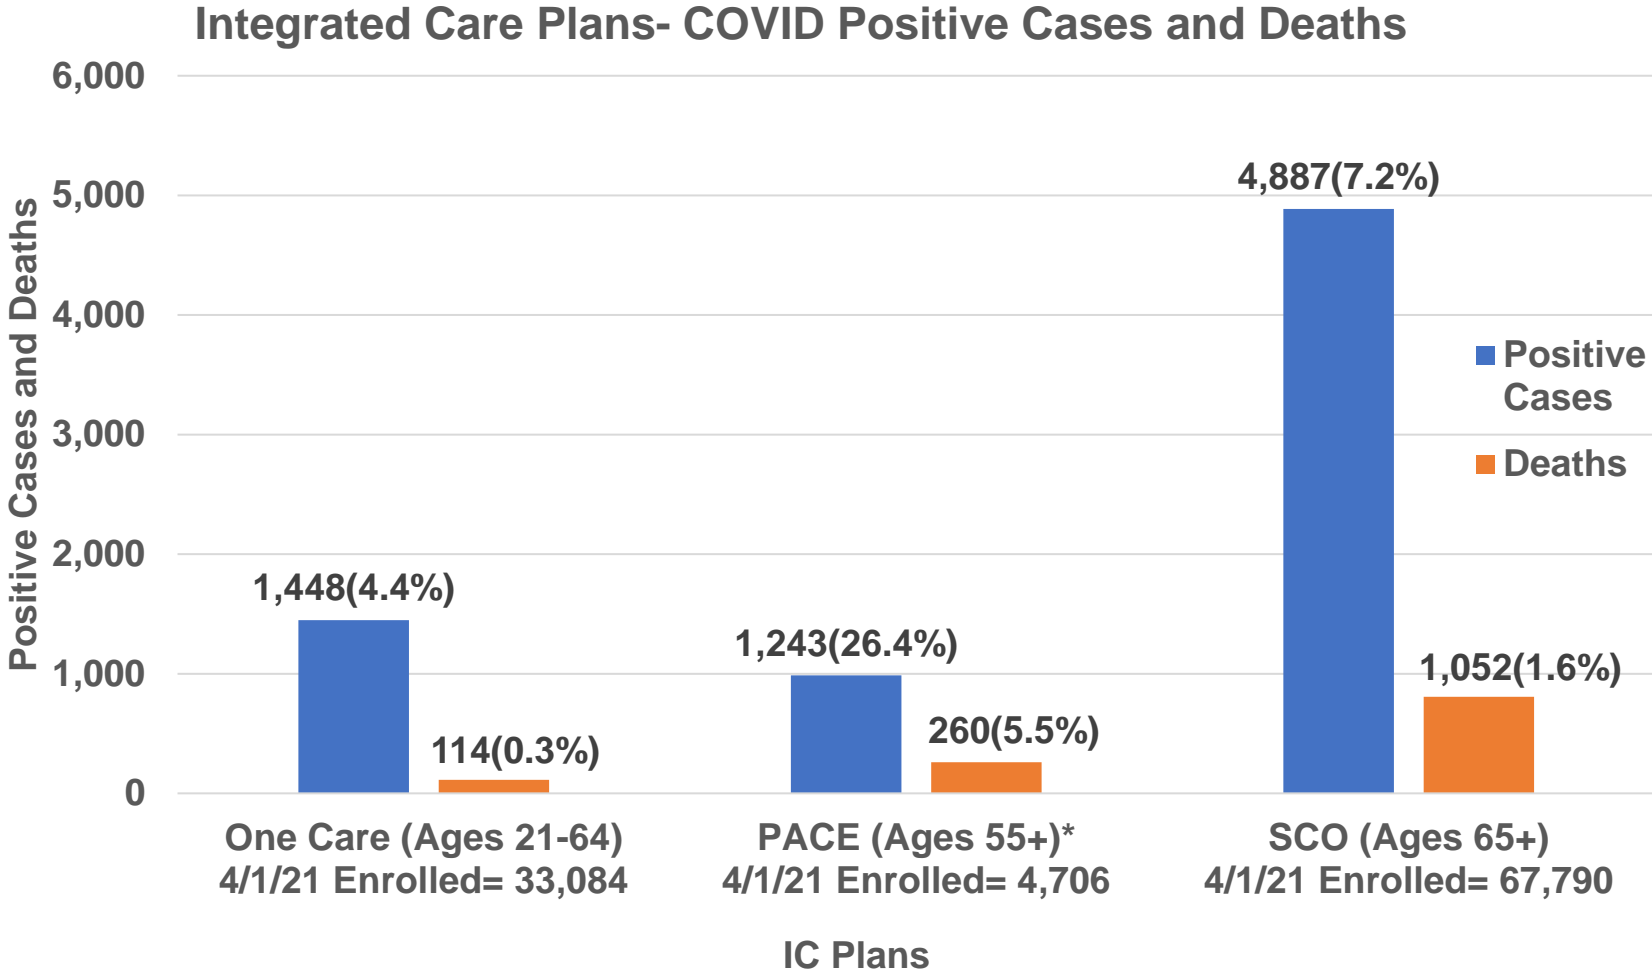

## Percentage of FTS Care Coordinators Who Left the Plan during the Reporting Period

# Integrated Care Plan-reported COVID-Positive Cases and Deaths

For discussion purposes only – this data is self-reported, unofficial, and preliminary

The above graph displays the cumulative number of positive cases and deaths of Enrollees in Integrated Care Plans from March 16, 2020-April 31, 2021. Percentages are cases divided by April 1, 2021 enrollments.

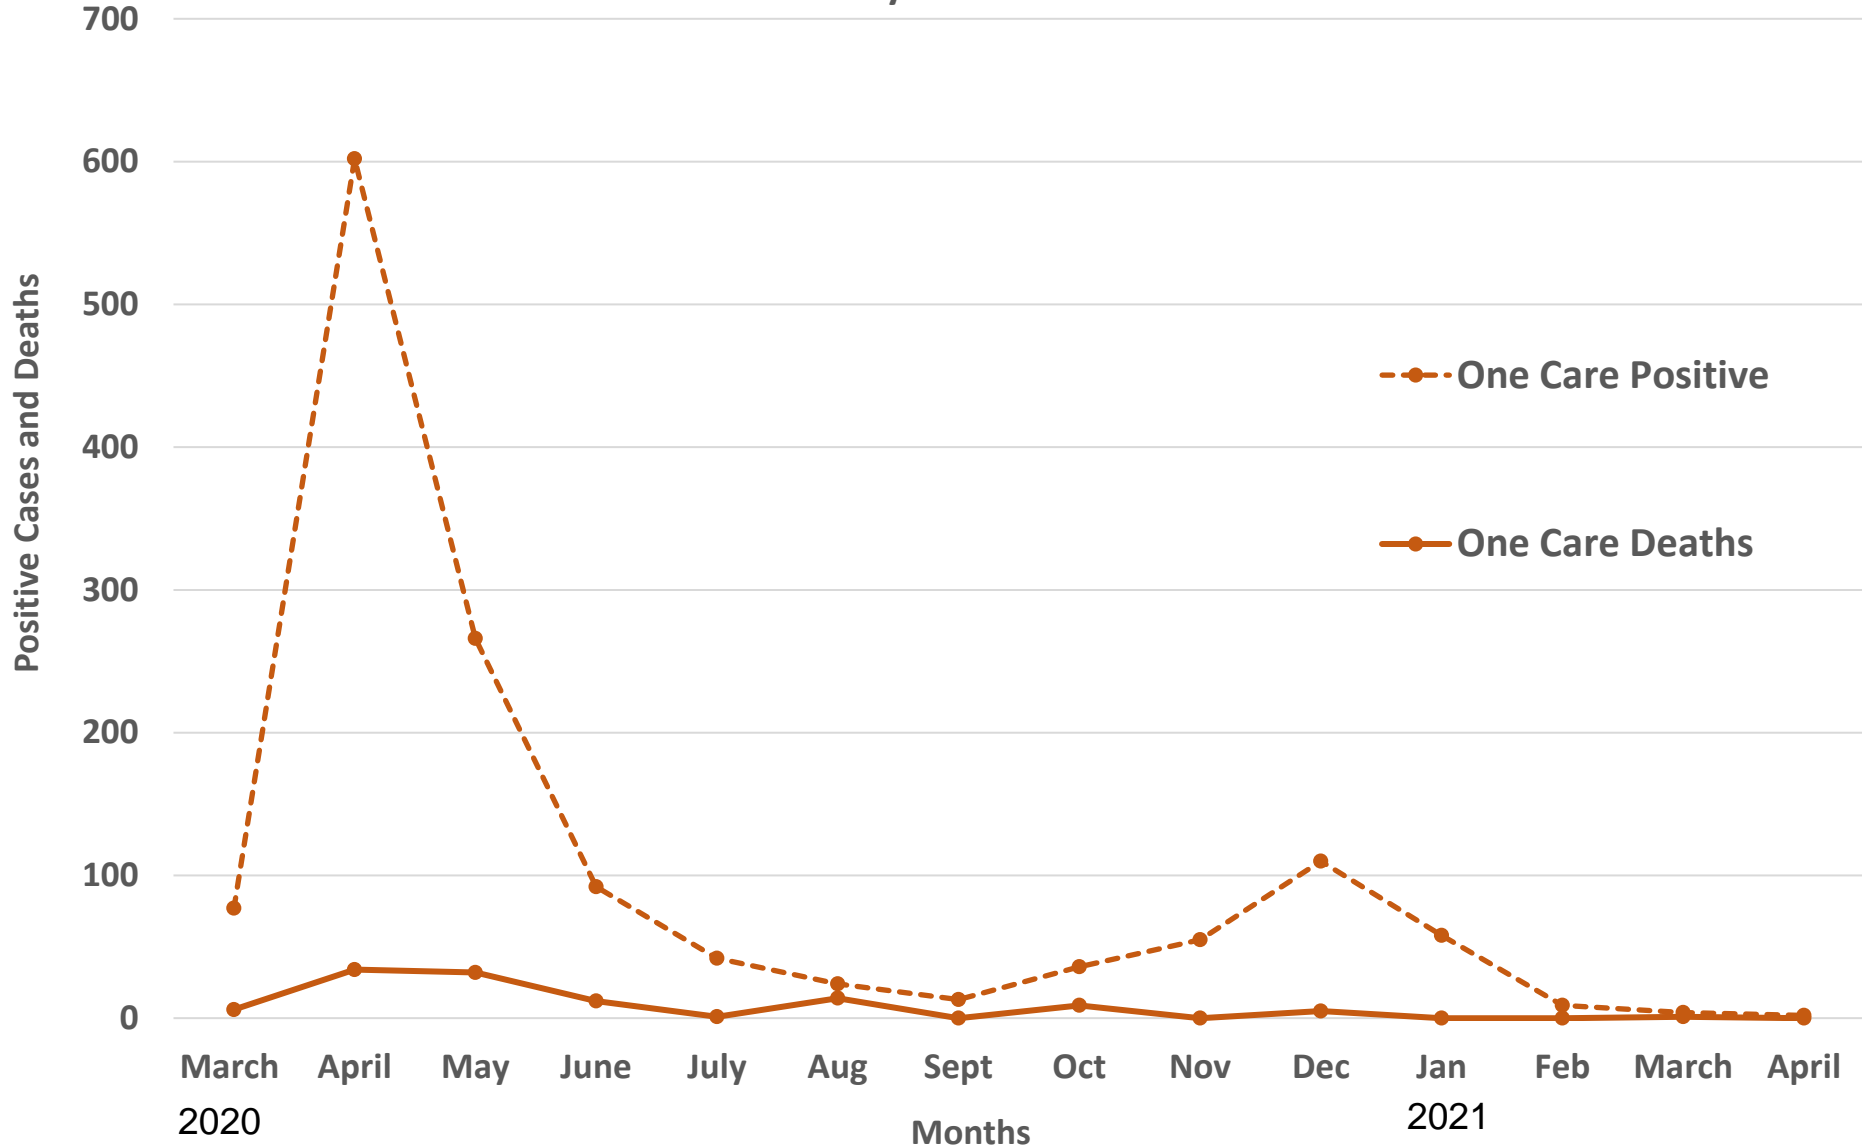

\*All PACE participants are at a Nursing Facility Level of Care

# Integrated Care Plans – Monthly COVID-Positive Cases and Deaths

For discussion purposes only – this data is self-reported, unofficial, and preliminary

### One Care Plans- Monthly COVID Positive Cases and Deaths

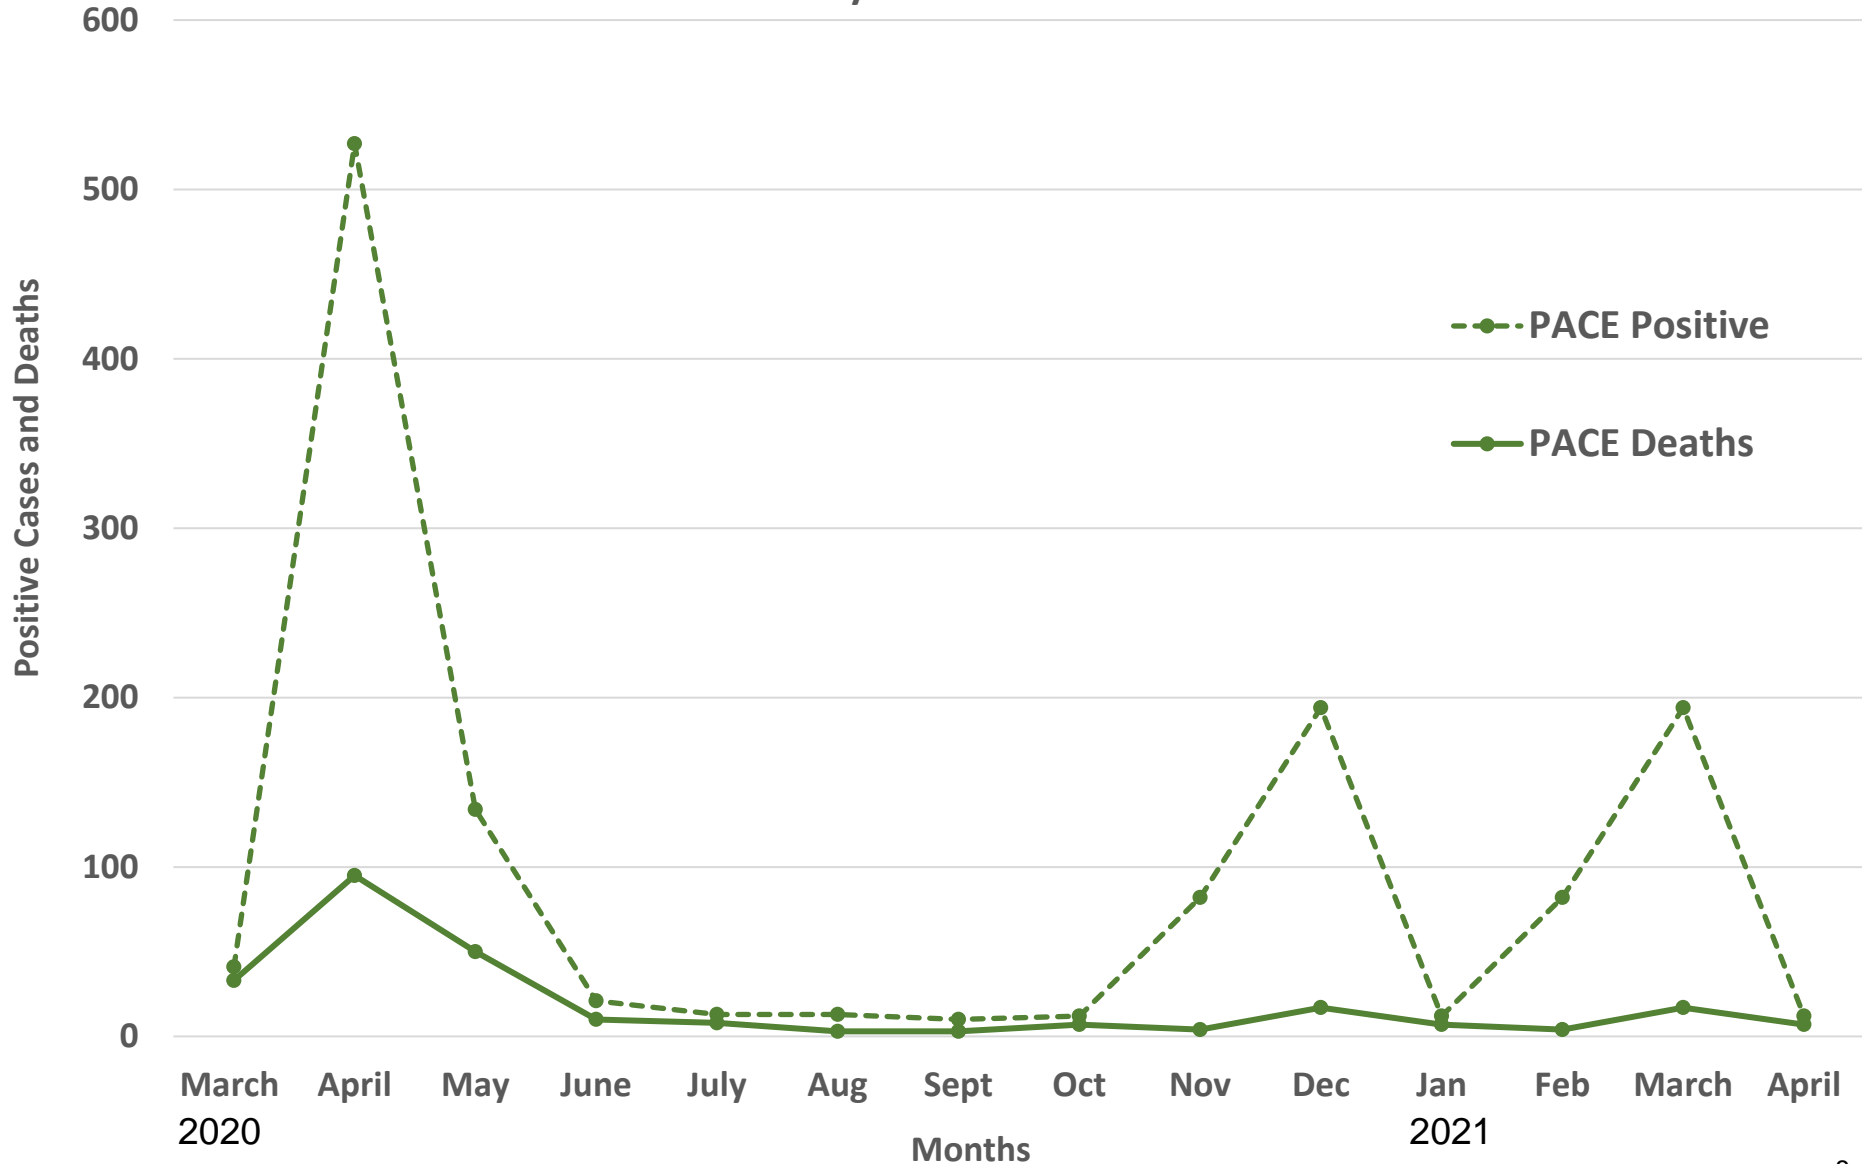

# Integrated Care Plans – Monthly COVID-Positive Cases and Deaths

### PACE Plans- Monthly COVID Positive Cases and Deaths

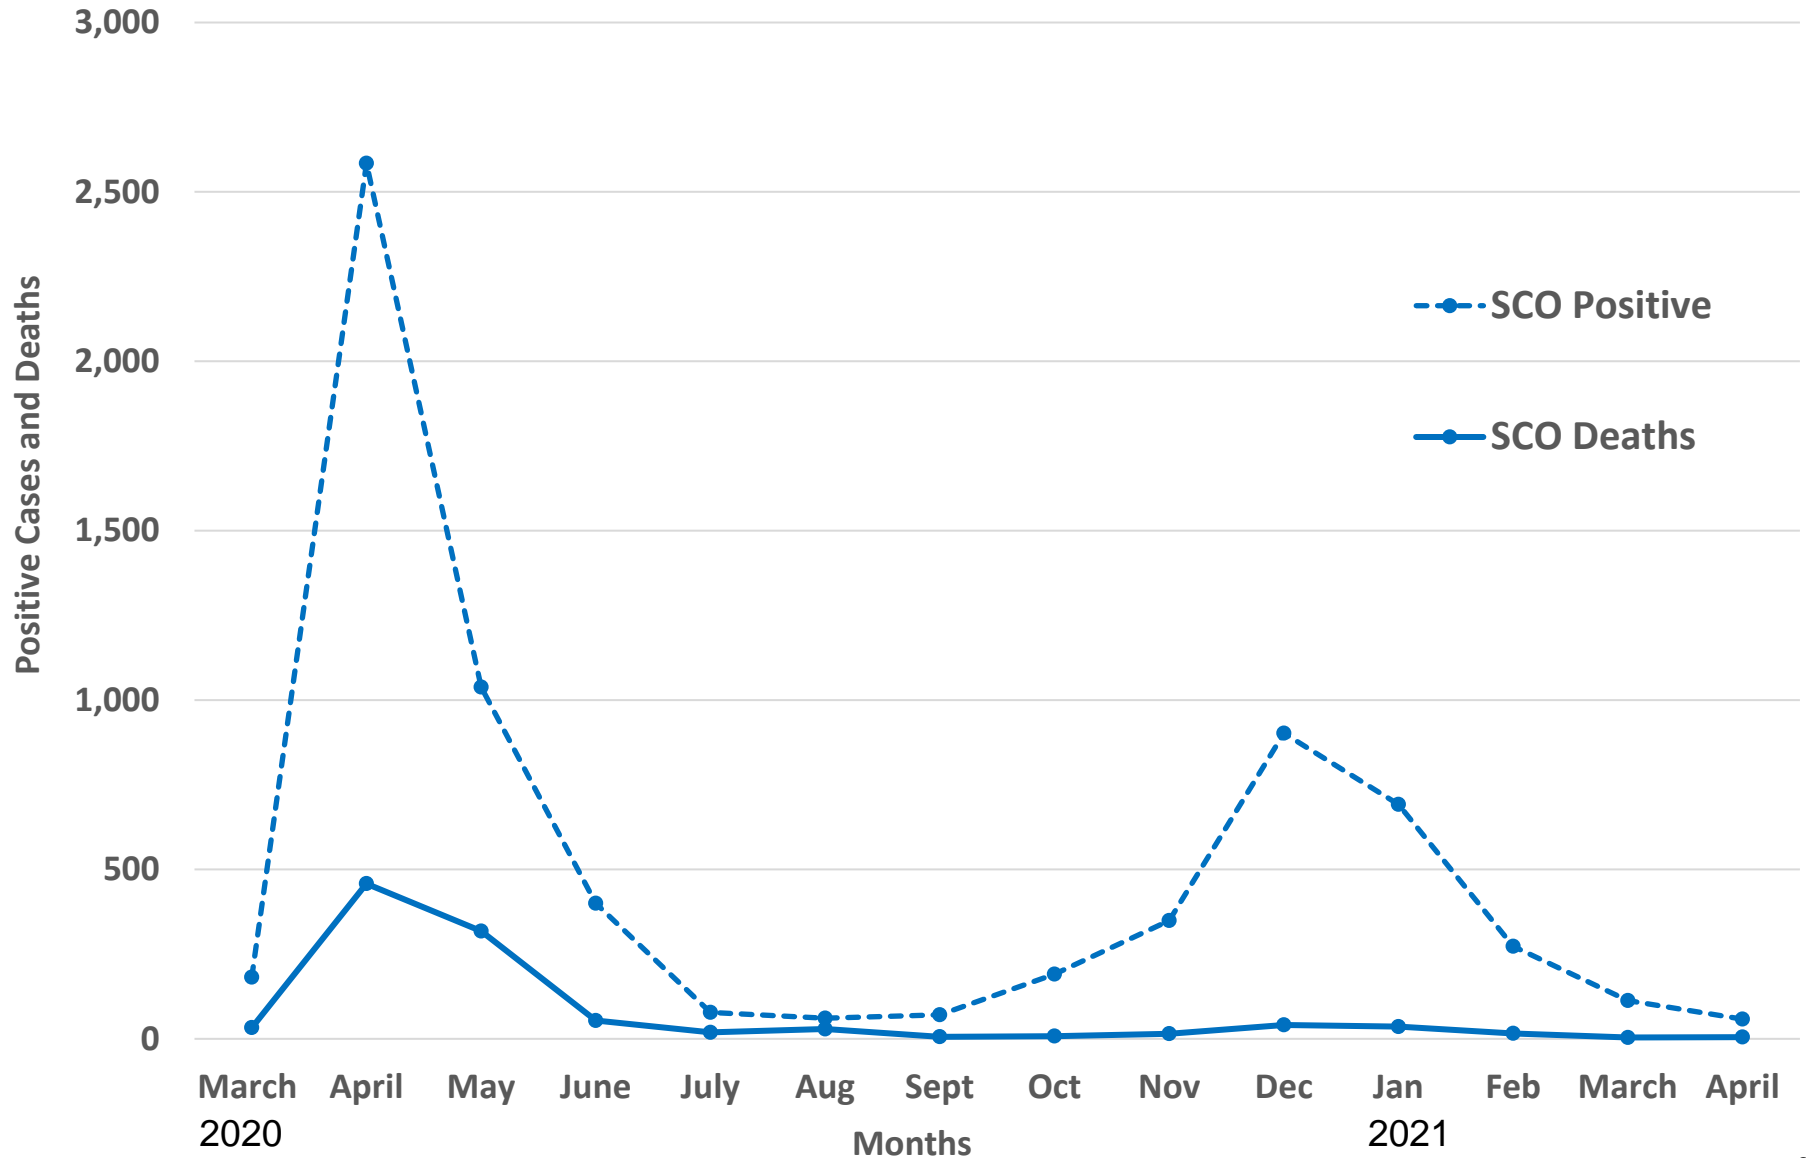

# Integrated Care Plans – Monthly COVID-Positive Cases and Deaths

For discussion purposes only – this data is self-reported, unofficial, and preliminary

## SCO Plans- Monthly COVID Positive Cases and Deaths

## Morbidity and Mortality- What is the difference?

Morbidity is the proportion of a population that has a condition or illness. It can either be calculated at a specific point in time or over a specified period of time. It is often expressed as a percentage. Morbidity rate is often expressed in population units, typically as “per 100,000 people.”

Mortality refers to the number of deaths that have occurred due to a specific illness or condition. Mortality is often expressed in the form of mortality rate. This is the number of deaths due to an illness divided by the total population at that time. As with morbidity, mortality rate is often expressed in population units, typically as “per 100,000 people.”

# Integrated Care Plans – COVID-19 Morbidity and Mortality Rates
