I'll keep this short.

It is urgent that we keep making progress on climate change issues. I urge that the proposed new (regular) stretch code be as aggressive as possible - in fact the proposed opt-in Specialized code might be a good model! For that proposed Specialized code, however, it should be truly all clean and net zero and of course without any installation of fossil fuel powered appliances or systems. Powering with fossil fuels is the very thing that created this impending climate disaster.

Thank you,
Alan Field
