

What we really **pay** for when we pay for **water**.

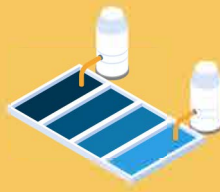

Every time you fill a glass with clean water, you tap into a vast, complex system of **pipes, power, processing** and **people**. When you pay your water bill, you are paying the costs of continuously operating, maintaining and improving this system.

Pipes Water's long journey.

Power Water systems use lots of it.

Operating Pumps

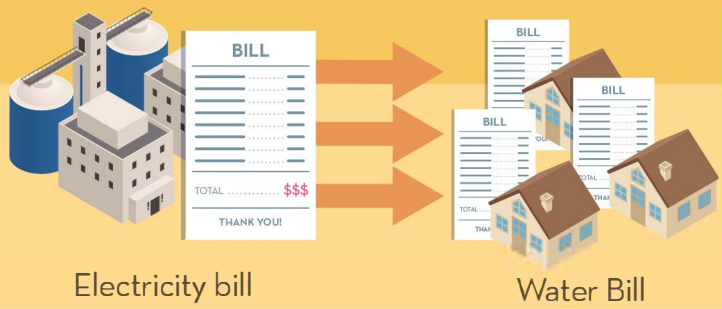

Buildings & Lighting

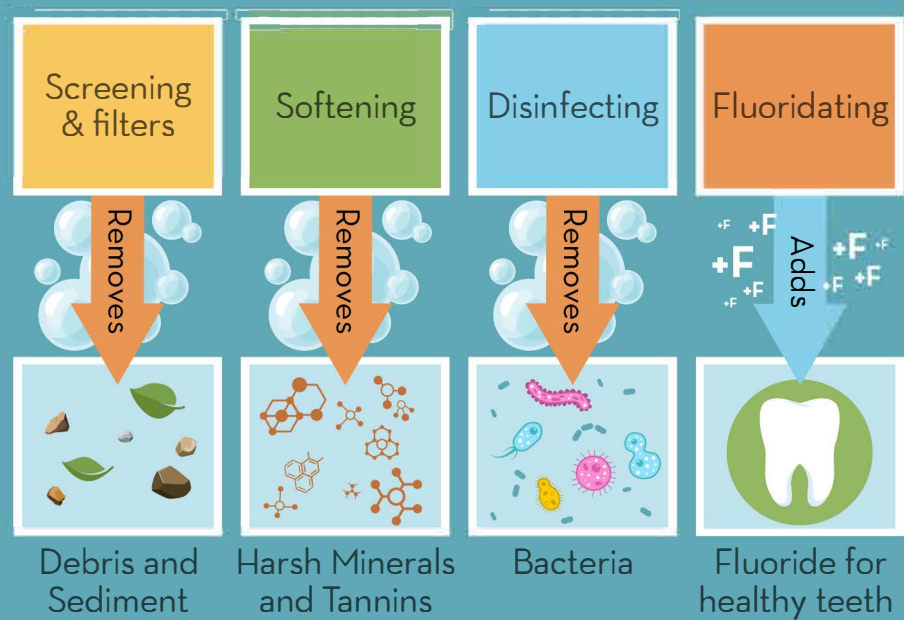

Treatment Processes

Your local water supplier has to pay an electricity bill every month. A small portion of that cost is in your water bill.

Processes Common treatment technologies ensure clean, healthy water.

People Who really brings water to life?

- System Engineers
- Processing Experts
- Plant Personnel
- Administrators
- Field Repair & Maintenance Teams

These team members work night and day to keep your water running!
