

Tool Library/Library of Things Items

Tool Libraries/Library of Things should consists of items that people want and need, but may not have the space to store or the need to use all the time. The key is to strike a balance between items that are common enough that people know what they are but rare enough that they don't already have. **This is not a complete list** but intended to serve as inspiration. We strongly recommend surveying your community to ensure you are stocking appropriate items.

Technology / Equipment
