DSRIP Midpoint Assessment Highlights & Key Findings

Lahey Clinical Performance Network, LLC (Lahey)

Model C ACO

Lahey Clinical Performance Network, LLC (Lahey) is an MCO Administered ACO, a “Model C” ACO.

An MCO Administered ACO is a provider led ACO that contracts with one or more of MassHealth’s MCOs. The MCO receives capitated payments from MassHealth; pays ACO according to MassHealth approved arrangement.

Lahey is the only Model C ACO.

SERVICE AREA

DSRIP ATTRIBUTION AND FUNDING

2017 (Jul to Dec)	13K members	\$1.2M
2018	13K members	\$1.7M
2019	11K members	\$1.4M

POPULATIONS SERVED

- Behavioral health (BH) diagnoses are common in members, particularly depression, anxiety, and substance use disorder (SUD).
- Chronic condition in the population include diabetes, hypertension, obesity, and chronic obstructive pulmonary disease (COPD)
- Roughly one in seven members are asthmatic.

FOCUS AREA

IA FINDINGS

Organizational Structure and Engagement	● On Track	
Integration of Systems and Processes	● On Track	● Limited Recommendations
Workforce Development	● On Track	● Limited Recommendations
Health Information Technology and Exchange	● On Track	
Care Coordination and Care Management	● On Track	● Limited Recommendations
Population Health Management	● On Track	● Limited Recommendations

IMPLEMENTATION HIGHLIGHTS

- Lahey’s Wellness and Prevention program offers programs and activities promoting wellness, disease prevention, and health literacy. The ACO deploys CHWs to provide culturally appropriate health education, information, and outreach in community-based settings, such as homes, clinics, shelters, local businesses, and community centers.
- The ACO has fully implemented a technology investment and is now able to aggregate MassHealth claims data with the ACOs EHR data in a population health analytics platform. This technology supports care managers’ ability to identify and target patients with ambulatory care sensitive conditions driving avoidable ED utilization.
- A majority of ACO practice sites agree or strongly agree that EHR, population health, and case management platforms improve their ability to coordinate care for MassHealth members.

A complete description of the sources can be found on the reverse/following page.

LIST OF SOURCES FOR INFOGRAPHIC

Service area maps	<p>Blue dots represent ACO primary care practice site locations as of 1/1/2019.</p> <p>Shaded area represents service area as of 7/1/2019.</p> <p>Service areas are determined by MassHealth by member addresses, not practice locations.</p> <p>Service area zip codes and practice site locations were provided to the IA by MassHealth.</p>
DSRIP Funding & Attributed Members	<p>Funding and attribution were provided to the IA by MassHealth. DSRIP funding is the allocated non-at risk start-up and ongoing funding for the year; it does not include any rollover, DSTI Glide Path or Flexible Services allocations.</p> <p>The number of members shown for 2017 was used solely for DSRIP funding calculation purposes, as member enrollment in ACOs did not begin until March 1, 2018.</p>
Population Served	Paraphrased from the ACO's Full Participation Plan.
Implementation Highlights	Paraphrased from the required annual and semi-annual progress reports submitted by the ACO to MassHealth.

NOTES

Performance risk is defined as the risk of being unable to treat an illness cost-effectively (unable to control controllable costs). Insurance risk is defined as the risk that a patient will become sick or that a group of patients will have higher than estimated care needs.

INTRODUCTION

Centers for Medicare and Medicaid Services' (CMS') requirements for the MassHealth Section 1115 Demonstration specify that an independent assessment of progress of the Delivery System Reform Incentive Payment (DSRIP) Program must be conducted at the Demonstration midpoint. In satisfaction of this requirement, MassHealth has contracted with the Public Consulting Group to serve as the Independent Assessor (IA) and conduct the Midpoint Assessment (MPA). The IA used participation plans, annual and semi-annual reports, survey responses, and key informant interviews (KIIs) to assess progress of Accountable Care Organizations¹ (ACOs) towards the goals of DSRIP during the time period covered by the MPA, July 1, 2017 through December 31, 2019.

Progress was defined by the ACO actions listed in the detailed MassHealth DSRIP Logic Model (Appendix I), organized into a framework of six focus areas which are outlined below. This model was developed by MassHealth and the Independent Evaluator² (IE) to tie together the implementation steps and the short- and long-term outcomes and goals of the program. It was summarized into a high-level logic model which is described in the CMS approved Massachusetts 1115 MassHealth Demonstration Evaluation Design document (<https://www.mass.gov/doc/ma-independent-evaluation-design-1-31-19-0/download>).

The question addressed by this assessment is:

To what extent has the ACO taken organizational level actions, across six areas of focus, to transform care delivery under an accountable and integrated care model?

This report provides the results of the IA's assessment of the ACO that is the subject of this report. The ACO should carefully consider the recommendations provided by the IA, and MassHealth will encourage ACOs to take steps to implement the recommendations, where appropriate. Any action taken in response to the recommendations must comply with contractual requirements and programmatic guidance.

MPA FRAMEWORK

The ACO MPA findings cover six "focus areas" or aspects of health system transformation. These were derived from the DSRIP logic model (Appendix I), by grouping organizational level actions referenced in the logic model into the following domains:

1. Organizational Structure and Engagement
2. Integration of Systems and Processes
3. Workforce Development
4. Health Information Technology and Exchange
5. Care Coordination and Management
6. Population Health Management

Table 1 shows the ACO actions that correspond to each focus area. The ACO actions are broad enough to be accomplished in a variety of ways by different organizations, and the scope of the IA is to assess progress, not to determine the best approach for an ACO to take.

¹ For the purpose of this report, the term ACO refers to all ACO health plan options: Accountable Care Partnership Plans, Primary Care ACO plans, and the Managed Care Administered ACO plan. See the ACO Background section for a description of the ACO's organizational structure.

² The Independent Evaluator (IE) – a distinct role separate from the Independent Assessor – is responsible for evaluating the outcomes of the Demonstration.

The focus area framework was used to assess each entity's progress. A rating of "On track" indicates that the ACO has made appropriate progress in accomplishing the indicators for the focus area. Where gaps in progress were identified, the entity was rated "On track with limited recommendations" or, in the case of more substantial gaps, "Opportunity for improvement." See Methodology section for an explanation of the threshold setting process for the ratings.

Table 1. Framework for Organizational Assessment of ACOs

Focus Area	ACO Actions
Organizational Structure and Governance	<ul style="list-style-type: none"> • ACOs established with specific governance, scope, scale, & leadership • ACOs engage providers (primary care and specialty) in delivery system change through financial (e.g. shared savings) and non-financial levers (e.g. data reports)
Integration of Systems and Processes	<ul style="list-style-type: none"> • ACOs establish structures and processes to promote improved administrative coordination between organizations (e.g. enrollee assignment, engagement and outreach) • ACOs establish structures and processes to promote improved clinical integration across organizations (e.g. administration of care management/coordination, recommendation for services) • ACOs establish structures and processes for joint management of performance and quality, and conflict resolution • Accountable Care Partnership Plans (Model A) transition more of the care management responsibilities to their ACO Partners over the course of the Demonstration
Workforce Development	<ul style="list-style-type: none"> • ACOs recruit, train, and/or re-train administrative and provider staff by leveraging Statewide Investments (SWIs) and other supports; education includes better understanding and utilization of behavioral health (BH) and long-term services and supports (LTSS)
Health Information Technology and Exchange	<ul style="list-style-type: none"> • ACOs develop Health Information Technology and Exchange (HIT/HIE) infrastructure and interoperability to support provision of population health management (e.g. reporting, data analytics) and data exchange within and outside the ACO (e.g. Community Partners/Community Service Agencies (CPs/CSAs), BH, LTSS, and specialty providers)
Care Coordination and Care Management	<ul style="list-style-type: none"> • ACOs develop systems and structures to coordinate services across the care continuum (i.e. medical, BH, LTSS, and social services), that align (i.e. are complementary) with services provided by other state agencies (e.g., Department of Mental Health (DMH))
Population Health Management	<ul style="list-style-type: none"> • ACOs develop capabilities and strategies for non-CP-related population health management approaches, which include risk stratification, needs screenings and assessments, and addressing the identified needs in the population via range of programs (e.g., disease management programs for chronic conditions, specific programs for co-occurring mental health (MH)/substance use disorder (SUD) conditions) • ACOs develop structures and processes for integration of health-related social needs (HRSN) into their Population Health Management (PHM) strategy, including management of flexible services • ACOs develop strategies to reduce total cost of care (TCOC; e.g. utilization management, referral management, non-CP complex care management programs, administrative cost reduction)

METHODOLOGY

The IA employed a qualitative approach to assess ACO progress towards DSRIP goals, drawing on a variety of data sources to assess organizational performance in each focus area. The IA performed a desk review of participants' submitted reports and of MassHealth supplementary data, covering the period of July 1, 2017 through December 31, 2019. These included Full Participation Plans, annual and semi-annual reports, budgets and budget narratives. In addition, the IA developed an ACO Practice Site Administrator survey ("the survey") to investigate the activities and perceptions of provider practices participating in ACOs. For ACOs with at least 30 practice sites, a random sample of 30 sites was drawn; for smaller ACOs, all sites were surveyed. Survey results were aggregated by ACO for the purpose of assessing each ACO. A supplementary source was the transcripts of KII of ACO leaders conducted jointly by the IA and the IE.

The need for a realistic threshold of expected progress, in the absence of any pre-established benchmark, led the IA to use a semi-empirical approach to define the state that should be considered "On track." As such, the IA's approach was to first investigate the progress of the full ACO cohort in order to calibrate expectations and define thresholds for assessment.

Guided by the focus areas, the IA performed a preliminary review of Full Participation Plans and annual and semi-annual reports. This horizontal review identified a broad range of activities and capabilities that fell within the focus areas, yielding specific operational examples of how ACOs can accomplish the logic model actions for each focus area. Once an inclusive list of specific items was compiled, the IA considered the prevalence of each item and its relevance to the focus area. A descriptive definition of On track performance for each focus area was developed from the items that had been adopted by a plurality of entities. Items that had been accomplished by only a small number of ACOs were considered to be promising practices, not expectations at midpoint. This calibrated the threshold for expected progress to the actual performance of the ACO cohort as a whole.

Qualitative coding of documents was used to aggregate the data for each ACO by focus area, and then coded excerpts and survey data were reviewed to assess whether and how each ACO had met the defined threshold for each focus area. The assessment was holistic and did not require that entities meet every item listed for a focus area. A finding of On track was made where the available evidence demonstrated that the entity had accomplished all or nearly all of the expected items, and no need for remediation was identified. When evidence from coded documents was lacking for a specific action, additional information was sought through a keyword search of KII transcripts. Prior to finalizing the findings for an entity, the team convened to confirm that thresholds had been applied consistently and that the reasoning was clearly articulated and documented.

See Appendix II for a more detailed description of the methodology.

ACO BACKGROUND³

Lahey Clinical Performance Network, LLC (Lahey) is an MCO Administered ACO, a "Model C ACO", and is also known as Lahey MassHealth ACO. An MCO Administered ACO is a provider led ACO that contracts with one or more of MassHealth's MCOs. The MCO receives capitated payments from MassHealth and pays the ACO according to a MassHealth approved arrangement. Lahey is the only MCO Administered ACO.

Lahey's service area covers the northern and western suburbs of Boston up to the North Shore and Merrimack Valley area. Residents in Peabody, Beverly, Salem, and Lynn make up nearly a quarter the

³ Background information is summarized from the organization's Full Participation Plan.

ACOs total membership. Almost a third are attributed to PCPs located in Peabody and Burlington. Other participating practices account for less than 10% of the ACO's member volume at any given site.

Lahey's MassHealth member attribution and allocated non-at risk DSRIP funding are summarized below.

Table 2. Lahey MassHealth Members and DSRIP Funding 2017-2019⁴

Year	Members	DSRIP Funding
2017 (partial year, Jul-Dec)	13,399	\$1,202,436
2018	13,399	\$1,721,944
2019	10,691	\$1,336,388

Roughly two in three members identify as White non-Hispanic, and approximately 10% identify as Asian, Black, Hispanic, Pacific Islander, and/or Native American.

SUMMARY OF FINDINGS

The IA finds that Lahey is On track or On track with limited recommendations in six of six focus areas.

Focus Area	IA Findings
Organizational Structure and Engagement	On track
Integration of Systems and Processes	On track with limited recommendations
Workforce Development	On track with limited recommendations
Health Information Technology and Exchange	On track
Care Coordination and Care Management	On track with limited recommendations
Population Health Management	On track with limited recommendations

FOCUS AREA LEVEL PROGRESS

The following section outlines the ACO's progress across the six focus areas. Each section begins with a description of the established ACO actions associated with an On track assessment. This description is followed by a detailed summary of the ACO's results across all indicators associated with the focus area. This discussion includes specific examples of progress against the ACO's participation plan as well as achievements or promising practices, and recommendations were applicable. The ACO should carefully consider the recommendations provided by the IA, and MassHealth will encourage ACOs to take steps to implement the recommendations, where appropriate. Any action taken in response to the recommendations must be taken in accordance with program guidance and contractual requirements.

⁴ Funding and attribution were provided to the IA by MassHealth. DSRIP funding is the allocated non-at risk funding for the year; it does not include any rollover, DSTI Glide Path or Flexible Services allocations.

1. ORGANIZATIONAL STRUCTURE AND ENGAGEMENT

On Track Description

Characteristics of ACOs considered On track:

✓ **Established governance structures**

- includes representation of providers and members, and a specific consumer advocate, on executive board;
- receives and incorporates, through the executive board, regular input from the population health management team, and the Consumer Advisory Board/Patient Family Advisory Committee;
- has a clear structure for the functions and committees reporting to the board, typically including quality management, performance oversight, and contracts/finance.

✓ **Provider engagement in delivery system change**

- has established processes for joint management of quality and performance, including regular performance reporting to share quality and performance data, on-going performance review meetings where providers and ACO discuss areas for improvement of performance, and education and training for staff where applicable;
- communicates a clearly articulated performance management strategy, including goals and metrics, to practice sites, but also grants sites some autonomy on how to meet those goals, and uses feedback from providers and sites in ACO-wide continuous improvement for quality and performance.

Results

The IA finds that Lahey is **On track with no recommendations** in the Organizational Structure and

Established governance structures

Lahey established appropriate governance structures. The Lahey MassHealth Advisory Council (MHAC), which reports to the Lahey Clinical Performance Network (LCPN) Board of Directors governs Lahey. The LCPN Board delegated authority to the MHAC for overall management of Lahey, including determining terms of arrangements with contracting participants in the ACO and overseeing the organization's PHM strategy.

The MHAC is composed of at least 75% provider representatives including primary care, mental health and SUD providers as well as one patient advocate and Lahey's Executive Director and Medical Director. The MHAC created four subcommittees; Quality, Funds Flow, Patient and Family Advisory Council and Operations. The Medical Director of Lahey is a member of the ACO's PFAC and reports to the board on behalf of the PFAC.

Provider engagement in delivery system change

Lahey pursued a decentralized strategy to manage delivery system change and engaged providers through representation across governing committees. Lahey maintains a Funds Flow Subcommittee, which reports to the MHAC on an overall funds flow model to individual provider sites across the ACO. The Funds Flow Subcommittee developed and maintains Lahey's overall value-based payment strategy. The Funds Flow subcommittee has historically managed all up-side risk payments at the individual provider level, however, Lahey delegated the authority to distribute funds to individual physicians to the leadership of each PCP site. During initial program years, Lahey established

performance pools that included incentive dollars that providers could earn based on increasing their patient panel's number of primary care visits. This broad metric was meant to drive additional primary care visits across a wide swath of Lahey's MassHealth members. In subsequent years, Lahey added more quality metrics such as timely follow-up following an ED visit.

Lahey assists practice site leaders develop local funds flow distribution policies based on outcomes and efficiency targets consistent with network targets. Lahey then gives practice sites flexibility to define how care transformation efforts and quality management strategies are enacted while still maintaining compliance with the demonstration's provider payment requirements.

Lahey distributes monthly consolidated performance reports at an organizational level as well as directly to practice sites and PCPs. Performance levels are typically provided in absolute terms as well as in relative terms comparing practices to the ACO overall. Lahey employs several Population Health Specialists (PHS) responsible for working with participating practices to review quality measures and identify pathways through which care processes can be improved. Additionally, Lahey implemented other EHR-enabled functions designed to enable "best practice alerts" at the point of care. Ultimately, however, practice site medical directors oversee the management and implementation of site-specific quality improvement (QI) efforts.

Recommendations

The IA has no recommendations for the Organizational Structure and Engagement focus area.

Promising practices that ACOs have found useful in this area include:

✓ **Established governance structures**

- engaging Community Partners (CPs) in ACO governance by developing a subcommittee with ACO and CP representatives focused on increasing CP integration and collaboration.
- creating a centralized PFAC to synthesize information from practice site specific PFACs and disseminate promising practices to other provider groups and practice sites within the ACO's network.
- seeking feedback from consumer representatives or PFACs related to member experience prior to adoption of new care protocols or other changes.
- including a patient representative in each of an ACO's subcommittees in addition to having a patient representative on the governing board.

✓ **Provider engagement in delivery system change**

- protecting dedicated provider time for population health level activities or individual quality improvement projects.
- engaging frontline providers in continuous feedback loops to identify areas where member experience could be improved.
- hosting regular meetings between providers or provider groups and senior management to collect provider feedback on care management operations and quality improvement initiatives.
- developing provider-accessible performance dashboards with practice-site level data.

- employing individuals in roles dedicated to QI, who assist providers and practice sites to review quality measures and identify pathways to improve care processes and provider performance.

2. INTEGRATION OF SYSTEMS AND PROCESSES

On Track Description

Characteristics of ACOs considered On track:

- ✓ **Administrative coordination among ACO member organizations and with CPs**
 - circulates frequently updated lists including enrollee contact information and flags members who are appropriate for receiving CP supports;
 - shares reports including risk stratification, care management, quality, and utilization data with practice sites;
 - practice sites report that when members are receiving care coordination and management services from more than one program or person, these resources typically operate together efficiently.
- ✓ **Clinical integration among ACO member organizations and with CPs**
 - deploys shared team models for care management, locating ACO staff at practice sites, and providing both role-specific and process-oriented training for staff at practice sites;
 - enables PCP access to all member clinical information through an EHR; and sites are able to access results of screenings performed by the ACO;
 - co-locates BH resources and primary care where appropriate.
- ✓ **Joint management of performance and quality**
 - articulates a clear and reasoned plan for quality management that jointly engages practice sites and ACO staff, and explicitly incorporates specific quality metrics;
 - dedicates a clinician leadership role and ACO staff to reviewing performance data, identifying performance opportunities, and implementing associated change initiatives in cooperation with providers.
- ✓ **ACO/MCO coordination** (at Accountable Care Partnership Plans)
 - shares administrative and clinical data between ACO and MCO entities, and circulates regular reports including population health and cost-of-care analysis;
 - is coordinated by a Joint Operating Committee for alignment of MCO and ACO activities, which manages clinical integration and is planning transitions of functions from MCO to ACO over time.

Results

The IA finds that Lahey is **On track with limited recommendations** in the Integration of Systems and Processes focus area.

Administrative coordination among ACO member organizations and with CPs

Providers access member contact information, clinical information and member engagement status with the CP program through the EHR.

Lahey's Population Health Informatics team stratifies members into risk categories. That information is then included on member registries, which helps care managers assign members to appropriate care teams. The registry also contains quality performance data. Lahey engages a vendor to produce utilization and financial performance reports for the ACO.

Results from the ACO Practice Site Administrator Survey indicate that the majority of Lahey practice sites felt that members receiving care coordination and management services from multiple programs felt that these resources "usually or always" operated together efficiently.

Clinical integration among ACO member organizations and with CPs

The Lahey ACO and MCO entities collaborate to provide care management. The ACO provides transitional care management and direct clinical services, addresses social needs and monitors member utilization. The MCO provides care management for members who opt in or for members from special populations like high-risk obstetrics. Lahey uses an interdisciplinary team model to manage their complex care population. The team consists of RNs, LICSWs, pharmacists, CHWs, BH clinicians and additional support staff. The care management team is centrally located. The team has daily and weekly huddles to review cases, organize responsibilities and promote efficiency. Lahey care managers meet with CP staff regularly to coordinate services for members enrolled in the CP program. To avoid duplication for CP enrolled members, the CP takes primary responsibility for care management including outreach and engagement, comprehensive assessments for BH programs, person-centered care planning, wellness coaching, care transitions, and connections to social services. Lahey supports CP enrolled member care management by performing comprehensive assessments for LTSS programs. CP programs engage a member's PCP to participate in the member's care team. Lahey's care management team makes referrals to a BH or LTSS CP based on a combination of factors, including clinical appropriateness, diagnosis, and risk assessment results. Practice site providers access member clinical information through an EHR.

Joint management of performance and quality

Lahey has a quality committee led by a Quality Director with additional provider members. The Quality Director leads QI initiatives for the ACO. The Quality Director also co-leads another group with the Director of Network Care Management to focus on monitoring MassHealth contract performance measures. Lahey management staff are also constantly monitoring the total cost of care metrics for the program. Lahey's informatics and quality staff run myriad reports on key performance metrics reported back to practice sites with site level performance. A team of population health specialists educate providers on the specifications of the program's quality metrics.

Recommendations

The IA encourages Lahey to review its practices in the following aspects of the Integration of Systems and Processes focus area, for which the IA did not identify sufficient documentation to assess progress:

- sharing reports including risk stratification, care management, quality, and utilization data with practice sites;
- providing role specific and process-oriented training for staff;
- co-locating behavioral health services at primary care locations; and

- including CPs in quality reporting and quality committee meetings.

Promising practices that ACOs have found useful in this area include:

✓ **Administrative coordination among ACO member organizations and with CPs**

- establishing weekly meetings to discuss newly engaged members.
- establishing monthly meetings with practices sites and CPs to discuss member care plans.
- creating a case review process including care coordination, service gaps and service duplication.
- sharing member risk stratification reports including results of predictive modeling.

✓ **Clinical Integration among ACO member organizations and with CPs**

- designating a practice site champion responsible for integrating Care Coordination and Care Management (CCCM) and clinical care plans.
- embedding CCCM staff at practice sites to participate in shared model for care management.
- providing resiliency training to CCCM staff to improve team cohesion and offer emotional support.
- developing a centralized care management office to support member care teams in conducting needs assessment, follow-up, disease management and transitions of care.
- following members for at least 30 days post-discharge from the hospital.
- providing laptops or other devices that enable EHR access by off-site providers during visits with members.
- holding monthly meetings of CCCM teams to share best practices, develop solutions to recent challenges and provide collegial support.

✓ **Joint management of performance and quality**

- developing practice site specific quality scorecards and reviewing them at monthly or quarterly meetings.
- having the Joint Operating Committee (JOC) review scorecards of clinical, quality, and financial measures.
- sharing individual performance reports containing benchmarks or practice wide comparisons with providers.

✓ **ACO/MCO coordination** (at Accountable Care Partnership Plans)

- reviewing performance and quality outcomes at regular governance meetings.
- developing coordinated goals related to operations, budget decisions and clinical quality outcomes

3. WORKFORCE DEVELOPMENT

On Track Description

Characteristics of ACOs considered On track:

✓ **Recruitment and retention**

- successfully hired staff for care coordination and population health, leaving no persistent vacancies;
- uses a variety of mechanisms to attract and retain a diverse team, such as opportunities for career development, educational assistance, ongoing licensing and credentialing, loan forgiveness and leadership training.

✓ **Training**

- offers training to staff, including role-specific topics such as integrating primary care, behavioral health, health-related social needs screening and management, motivational interviewing, and trauma-informed care;
- has established policies and procedures to ensure that staff meet the contractual training requirements, and holds ongoing, regularly scheduled, training to ensure that staff are kept up to date on best practices and advances in the field as well as refreshing their existing knowledge.

✓ **Teams and staff roles designed to support person-centered care delivery and population health**

- hires nonclinical staff such as CHWs, navigators, and recovery peers, and deploy them as part of interdisciplinary care delivery teams including CCCM staff, medical providers, social workers and BH clinicians;
- deploys clinical staff in population health roles and nontraditional settings and trains a variety of staff to provide services in homes or other nonclinical settings.

Results

The IA finds that Lahey is **On track with limited recommendations** in the Workforce Development focus area.

Recruitment and retention

Lahey pursued a recruitment and retention strategy that appears to have mitigated major or persistent gaps in staffing. Lahey continues to use the centralized human resources department at Lahey Hospital & Medical Center for the majority of its positional hiring. Lahey encountered substantial difficulties at the onset of the program recruiting peer recovery coaches, a position the ACO saw as vital in supporting members requiring substance use disorder (SUD) care. Lahey indicated that competition within the service market may have added to scarcity in applicants across several staffing areas during the program's initial start-up period. Programs formerly funded by the Health Policy Commissions CHART program were expiring at two ACO hospitals however, which were then able to provide qualified individuals capable of quickly shifting into similar roles at Lahey. Lahey also relies upon its staff to actively recruit for open positions.

To reduce turnover and ease onboarding, Lahey created a mentorship program for its CHW staff which pairs each new CHW with a licensed clinical social worker (LCSW) as a staff preceptor for each individual's first six-month period. This enables new CHWs to shadow more senior staff through

daily huddles and weekly team case learnings and participate in staff meetings as they integrate into care teams.

Lahey continues to identify additional professional development opportunities for ACO staff, in particular for CHWs, which is a new role inside the Lahey system. The intended goal of these development opportunities is to assist Lahey define career ladders for newly created positions inside the ACO. So far, Lahey developed opportunities such as educational workshops, peer learning networks and chapter membership with the state Association of CHWs and CHEC (Community Health Education Center) programs. Lahey also sponsors additional certification opportunities in chronic care management for RNs and LICSWs.

Training

Lahey trains all staff on the ACO primary operations as well as underlying technology infrastructure. Lahey also explored training options made available through the Statewide Investments (SWI) programs as well as existing resources like the Lowell Community Health Education Center's Comprehensive Outreach Education Certificate Program, Holyoke Community College CHW Certificate Program, the Boston Community Health Education Center.

Teams and staff roles designed to support person-centered care delivery and population health

Lahey supports person-centered care delivery and population health models using multi-disciplinary care teams for members with complex care needs. Lahey expanded these teams to include CHWs and licensed BH clinicians. Teams are led by nurse care managers and LICSWs who typically perform assessments and place referrals to other care management team members. CHWs, pharmacists and additional non-licensed support staff manage any additional member needs.

Lahey initially used peer recovery coaches to support care management teams when addressing members requiring SUD services, but stopped employing coaches after those services became billable and thus no longer eligible for DSRIP spending. CHWs have instead fulfilled these roles across various teams.

Recommendations

The IA encourages Lahey to review its practices in the following aspects of the Workforce Development focus area, for which the IA did not identify sufficient documentation to assess progress:

- exploring additional opportunities for staff career development, educational assistance, or loan forgiveness; and
- providing specific role-based training opportunities for all ACO staff, not just CHWs.

Promising practices that ACOs have found useful in this area include:

✓ Promoting diversity in the workplace

- compensating staff with bilingual capabilities at a higher rate.
- establishing a Diversity and Inclusion Committee to assist HR with recruiting diverse candidates.
- advertising in publications tailored to non-English speaking populations.
- attending minority focused career fairs.
- recruiting from diversity-driven college career organizations.

- tracking the demographic, cultural, and epidemiological profile of the service population to inform hiring objectives.
- implementing an employee referral incentive program to leverage existing bilingual and POC CP staff's professional networks for recruiting.
- advertising positions with local professional and civic associations such as the National Association of Social Work, Spanish Nurses Association, Health Care Administrators, National Association of Puerto Rican and the Hispanic Social Workers.
- recruiting in other geographic areas with high concentrations of Spanish speakers or other needed language skills, and then helping qualified recruits with relocation expenses.

✓ **Recruitment and retention**

- contracting with a local social services agency capable of providing the ACO with short term CHWs, enabling the ACO to rapidly increase staff on an as-needed basis.
- onboarding cohorts of new CCCM staff with common start dates, enabling shared learning.
- implementing mentorship programs that pair newly onboarded staff with senior members to expedite training, especially amongst CCCM teams with complex labor divisions.
- providing opportunities for a staff voice in governance through regularly scheduled leadership town halls at individual practice sites.
- recruiting staff from professional associations, such as the Case Management Society of America, and from targeted colleges and universities.
- offering staff tuition reimbursement for advanced degrees and programs.
- using employee referral bonuses to boost recruitment.

✓ **Training**

- offering staff reimbursement for training from third party vendors.
- tracking staff engagement with training modules and proactively identifying staff who have not completed required trainings.
- providing additional training opportunities through on-line training programs from third party vendors.
- offering Medical Interpreter Training to eligible staff.
- sponsoring staff visits to out of state health systems to learn best practices and bring these back to the team through peer-to-peer trainings.

✓ **Teams and staff roles designed to support person-centered care delivery and population health**

- protecting provider time for pre-visit planning.
- pairing RN care managers or social workers with CHWs to provide care coordination.
- including pharmacists/pharmacy technicians and dieticians on care teams.
- developing trainings and protocols for staff providing home visits.

- developing trainings and protocols for staff using telemedicine.
- leveraging CHWs who specialize in overcoming barriers to engagement, including issues of distrust of the medical community, to build relationships with hard-to-engage members.

4. HEALTH INFORMATION TECHNOLOGY AND EXCHANGE

On Track Description

Characteristics of ACOs considered On track:

- ✓ **Infrastructure for care coordination and population health**
 - uses an EHR to aggregate and share information among providers across the ACO
 - has a care management platform in place to facilitate collaborative patient care across disciplines and providers;
 - uses a population health platform that integrates claims, administrative, and clinical data, generates registries by condition or risk factors, predictive models, utilization patterns, and financial metrics, and identifies members eligible for programs or in need of additional care coordination.
- ✓ **Systems for collaboration across organizations**
 - has taken steps to improve the interoperability of their EHR;
 - shares real-time data including event notifications, and uses dashboards to share real time program eligibility and performance data;
 - creates processes to enable two-way exchange of member information with CPs and develops workarounds to solve interoperability challenges.

Results

The IA finds that Lahey is **On track with no recommendations** in the Health Information Technology and Exchange focus area.

Infrastructure for care coordination and population health

Lahey uses a universal EHR to aggregate and share information among providers across the ACO.

A vendor managed care management platform maps data from the EHR and merges social risk factors. This enables care managers to identify and engage high-risk members to prevent avoidable ED utilization.

Lahey's population health platform creates social risk scores that identifies the top two to five percent of members utilizing services, produces an EHR flag and creates a member registry. This registry offers the population health specialist a focused list of members who may have additional considerations impacting how the clinical team develops the member's care plan.

Lahey and all participating PCP sites have full access to ADT feeds and real-time event notification and Lahey can fully incorporate this data into their population health analytics technology.

Results from the ACO Practice Site Administrator Survey indicate that a majority of Lahey practice sites agree or strongly agree that EHR, population health, and care management platforms improve their ability to coordinate care for MassHealth members (Figure 1).

Figure 1. Perceptions of HIT Platforms for Care Coordination

Number of Practices Reporting in the State, N = 225

Number of Practices Reporting in Lahey, N = 8

Figure displays responses to Q13_EHR, Q13_CMP, Q13_PHP. *To what extent do you agree that the Electronic Health Record/ Care Management Platform/Population Health Platform improves your ability to coordinate care for your MassHealth members?*

Statistical significance testing was not done due to small sample size.

Systems for collaboration across organizations

Lahey's universal EHR and use of EHR-based platforms ensure system interoperability. The CPs utilize a HIPAA⁵ compliant commercial data transfer software to provide two-way exchange of member information with Lahey.

Lahey utilizes an EHR-based event notification system to share real-time data with providers.

Lahey shares and receives electronic member contact information, comprehensive needs assessments and care plans through secure and compliant means with all or the majority of their participating PCP sites, participating specialists, CPs, non-affiliated providers and managed care plan.

Recommendations

The IA has no recommendations for the Health Information Technology and Exchange focus area.

⁵ Health Insurance Portability and Accountability Act

Promising practices that ACOs have found useful in this area include:

- ✓ **Infrastructure for care coordination and population health**
 - leveraging EHR integrated care management and population health platforms.
 - automating risk stratification to identify high-risk, high-need members.
 - developing HIT training for all providers as part of an on-boarding plan.
 - incorporating meta-data tagging into care management platforms to allow supervisors to monitor workflow progress.
 - conducting ongoing review and evaluation of risk stratification algorithms to improve algorithms and refine the ACO's approach to identifying members at risk who could benefit from PHM programs.
- ✓ **Systems for collaboration across organizations**
 - establishing EHR portals that allow members to engage with their chart and their care teams.
 - providing EHR access through a web portal for affiliated providers, CPs or other entities whose EHR platforms are not integrated with the ACOs EHR.
 - developing methods to aggregate data from practice sites across the ACO; particularly if sites use different EHRs.
 - pushing ADT feeds to care managers in real time to mitigate avoidable ED visits and/or admissions.
 - developing continuously refreshing dashboards to share real-time program eligibility and performance data.

5. CARE COORDINATION AND CARE MANAGEMENT

On Track Description

Characteristics of ACOs considered On track:

- ✓ **Full continuum collaboration**
 - collaborates with state agencies such as DMH;
 - has established processes for identifying members eligible for BH or LTSS services and collaborating with CPs, including exchanging member information, and collaborating for care coordination when CP has primary care management responsibility;
 - designates a point of contact for CPs to facilitate communication;
 - incorporates social workers into care management teams and integrates BH services, including Office-Based Addiction Treatment (OBAT), into primary care.
- ✓ **Member outreach and engagement**
 - uses both IT solutions and manual outreach to improve accuracy of member contact information;

- uses a variety of methods to contact assigned members who cannot be reached telephonically by going to members' homes or to community locations where they might locate the individual (e.g. a congregate meal site);
- addresses language barriers through steps such as translating member-facing materials, providing translators for appointments, and recruiting CCCM staff who speak members' languages;
- supports members who lack reliable transportation by providing rides or vouchers⁶, and/or providing services in homes or other convenient community settings;
- ✓ **Connection with navigation and care management services**
 - locates CCCM staff in or near EDs;
 - enables staff to build 1:1 relationships with high-need members, and uses telemedicine, secure messaging, and regular telephone calls for ongoing follow-up with members;
 - provides members with 24/7 access to health education and nurse coaching, through a hotline or live chat;
 - implements best practices for transitions of care, including warm handoffs between transition of care teams and ACO team;
 - implements processes to direct members to the most appropriate care setting, including processes to re-direct members to primary care to reduce avoidable emergency department visits;
- ✓ **Referrals and follow-up**
 - standardizes processes for referrals for BH, LTSS, and health-related social needs (HRSN), and ability to systematically track referrals, enabling PCPs and care coordinators to confirm that a member received a service, incorporate results into the EHR and care plan;
 - conducts regular case conferences to coordinate services when a member has been referred.

Results

The IA finds that Lahey is **On track with limited recommendations** in the Care Coordination and Care Management focus area.

Full continuum collaboration

Lahey's established relationships with state agencies, including DMH, assist collaboration and coordination of member services. Lahey identifies potential enrollees for BH and LTSS CP programs and collaborates with CPs to transfer member information through its EHR data exchange, a platform separate from the EHR, to facilitate care coordination.

Lahey designated a point of contact for CPs to facilitate communication. The care management team, including social workers, support enrolled members throughout their care.

⁶ ACOs should utilize MassHealth Transportation (PT-1) for member needs first as appropriate.

Member outreach and engagement

Lahey utilizes IT solutions in addition to manual outreach to improve member contact information. When looking for hard-to-reach members, Lahey uses a variety of outreach methods including telephone, mailings and community-based visits.

Connection with navigation and care management services

Lahey enables staff to build 1:1 relationships with high-need members and utilizes CHWs to support members throughout the implementation of their care plan. CHWs ensure members receive referral services and serve as a care team's point person to follow-up with members as they transition between facilities.

Lahey analyzes claims data, visit histories and other predictive information to identify patterns of avoidable emergency department visits and connect members with care coordination services in an effort to direct members to the most appropriate care setting.

Referrals and follow-up

Lahey standardized processes for referrals for LTSS, HRSN and BH services.

Lahey's care teams conduct regular case conferences to coordinate referral services which minimizes a member receiving duplication of services or having a service gap.

Recommendations

The IA encourages Lahey to review its practices in the following aspects of the Care Coordination and Care Management focus area, for which the IA did not identify sufficient documentation to assess progress:

- integrating BH services, including OBAT, into primary care;
- addressing language barriers through steps such as translating member-facing materials, providing translators for appointments, and recruiting CCCM staff who speak members' languages;
- supporting members who lack reliable transportation by providing rides or vouchers, and/or providing services in homes or other convenient community settings;
- locating CCCM staff in or near the ED;
- providing members with 24/7 access to health education and nurse coaching, through a hotline or live chat; and
- developing a process to systematically track referrals, enabling PCPs and care coordinators to confirm members receive services, and incorporate the results into the EHR and care plan.

Promising practices that ACOs have found useful in this area include:

✓ Full continuum collaboration

- establishing a systematic documentation process to track members receiving care coordination from CPs.
- matching members based on their needs to interdisciplinary care coordination teams that include representatives from primary care, nursing, social work, pharmacy, community health workers and behavioral health.

- expanding BH integration through multiple strategies, including embedding staff in primary care sites, reverse integration of physical health care at BH sites, and telehealth.
- increasing two-way sharing of information between ACOs and CPs.
- leveraging EHR-integrated tools to flag members requiring a higher level of care coordination.
- coordinating with government agencies and community organizations to enhance care coordination and avoid duplication for members receiving other services.
- supporting families of pediatric members by offering to have care managers work with school-based personnel to address health or disability related needs identified in the Individualized Education Program.

✓ **Member outreach and engagement**

- developing a high-intensity program for extremely high-need, high-risk members with strategically low case load.
- establishing trust between members and CCCM staff by building and maintaining a 1:1 consistent relationship.
- creating a mobile phone lending program for hard-to-reach members, particularly those experiencing housing instability.⁷
- embedding CCCM staff in EDs.
- creating a “Navigation Center” to manage referrals outside the ACO, handle appointment scheduling, and coordinate testing, follow-up, and documentation transfers.
- developing an assistance fund to support transportation vouchers⁸ and low-cost cell phones.⁹

✓ **Connection with navigation and care management services**

- utilizing EHR-based documentation transfer during warm handoffs.
- establishing daily or weekly care management huddles that connect PCPs and CCCM teams and streamline care transitions.

✓ **Referrals and follow-up**

- utilizing EHR messaging tools to better describe the purpose of specialty consults and a plan for follow-up communication.
- automating referral tracking and management, using flags to prompt referrals, linked directories to suggest appropriate providers and services, notifications to care managers when referral results are available, and databases allowing care teams to easily identify follow-up needs.

⁷ ACOs should first utilize Lifeline program for members as appropriate

⁸ ACOs should utilize MassHealth Transportation (PT-1) for member needs first as appropriate.

⁹ ACOs should first utilize Lifeline program for members as appropriate.

6. POPULATION HEALTH MANAGEMENT

On Track Description

Characteristics of ACOs considered On track:

- ✓ **Integration of health-related social needs**
 - standardizes screening for health-related social needs (HRSN) that includes housing, food, and transportation;
 - incorporates HRSN with other factors to target members for more intensive services;
 - Builds mature partnerships with community-based organizations to whom they can refer members for services
 - has a plan approved for provision of flexible services;
- ✓ **Population health analysis**
 - articulates a coherent strategy for stratifying members to service intensity and use of a population health analysis platform to combine varied data sources, develop registries of high-risk members, and stratify members at the ACO level.
 - integrates cost data into reports given regularly to providers to facilitate cost-of-care management.
- ✓ **Program development informed by population health analysis**
 - offers PHM programs that target all eligible members (not just facility-specific), and target members by medical diagnosis, BH needs (including non-CP eligible), HRSNs, care transitions;
 - offer interactive wellness programs such as smoking cessation, diet/weight management.

Results

The IA finds that Lahey is **On track with limited recommendations** in the Population Health Management focus area.

Integration of health-related social needs:

A majority of Lahey practice sites indicate screening for tobacco use, opioid use, substance use, polypharmacy, depression, and interpersonal violence. Half of the practice sites report they also screen for low health literacy and Medicaid eligibility (Figure 2). Lahey or CPs also screen for HRSNs as part of comprehensive assessments for BH and LTSS CP enrollees, for members with special health care needs, and for members identified by an automatic flag generated from administrative data that identifies members with risk factors such as multiple recent addresses.

Lahey has an approved plan for provision of flexible services.

Figure 2. Prevalence of Screening for Social and Other Needs at Practice Sites

Number of Practices Reporting in the State, N = 225

Number of Practices Reporting in Lahey, N = 8

Figure displays responses to Q14. *For which of the following are MassHealth members in your practice systematically screened? Select if screening takes place at any level (Managed Care Organization, Accountable Care Organization, Practice, CP)*

Statistical significance testing was not done due to small sample size.

Population health analysis

Lahey stratifies members into three levels based on claims data, clinical data extracted from EHRs, and Admit/Discharge/Transfer (ADT) data. For members identified as having complex needs and experiencing transitions of care, Lahey provides a higher level of care management. For the middle stratum, which includes members with moderate or rising needs, Lahey offers supportive care management services.

Lahey maintains registries of members with specific needs, such as those recently discharged from an inpatient stay or ED visit, members with unmet social needs, members who have not been engaged with their primary care provider, members utilizing the ED for ambulatory care sensitive conditions, members who present to the ED with drug or alcohol poisoning, and members identified as at risk for an admission. Lahey deploys a care management team, population health specialists, and a pharmacist to engage these members and address their unmet needs.

A majority of Lahey practice sites report that data on cost and quality are provided to physicians, though the IA did not identify sufficient documentation to determine whether this is done systematically through regular reports or dashboards.

Program development informed by population health analysis

Lahey offers care management to members who are referred by a physician, identified as high risk through analytics, or experiencing a transition of care. The MCO oversees care management for the most complex stratum, and for high-risk pediatric and obstetric members. Lahey's care management team engages members with chronic medical and BH conditions, unmet HRSNs, and transitions of care. The care management program includes care coordination, person-centered care planning, and tailored services such as disease management education, medication reconciliation, and transportation¹⁰ to appointments.

Lahey's Wellness and Prevention program offers programs and activities promoting wellness, disease prevention, and health literacy. Lahey deploys CHWs to provide culturally appropriate health education, information, and outreach in community-based settings, such as homes, clinics, shelters, local businesses, and community centers.

Recommendations

The IA encourages Lahey to review its practices in the following aspects of the Population Health Management focus area, for which the IA did not identify sufficient documentation to assess progress:

- improving systematic screening for HRSNs that includes housing instability and food security;
- building mature partnerships with community-based organizations to whom they can refer members for services; and
- integrating cost data into reports given regularly to providers to facilitate cost-of-care management.

Promising practices that ACOs have found useful in this area include:

✓ Integration of health-related social needs

- implementing universal HRSN screening in all primary care sites and behavioral health outpatient sites.
- using screening tools designed to identify members with high BH and LTSS needs.
- using root-cause analysis to identify underlying HRSNs or unmet BH needs that may be driving frequent ED utilization or readmissions.
- partnering with local fresh produce vendors, mobile grocery markets, and food banks to provide members with access to healthy meals.
- providing a meal delivery service, including medically tailored meals, for members who are not able to shop for or prepare meals.
- organizing a cross-functional committee to understand and address the impact of homelessness on members' health care needs and utilization.
- enabling members and CCCM field staff to document HRSN screenings in the EHR using tablet devices with a secure web-based electronic platform.
- automating referrals to community agencies in the EHR/care management platform.

¹⁰ ACOs should utilize PT-1 for member needs first as appropriate.

✓ **Population health analysis**

- developing and utilizing condition-specific dashboard reports for performance monitoring that include ED and hospital utilization and total medical expense.
- developing key performance indicator (KPI) dashboards, viewable by providers, that track financial and operational metrics and provide insights into member demographics and how the population utilizes services.
- developing a registry or roster that includes cost and utilization information from primary care and specialty services for primary care teams and ACO leadership to better serve MassHealth ACO members.
- implementing single sign-on and query capability into the online Prescription Monitoring Program, so that providers can quickly access and monitor past opioid prescriptions to promote safe opioid prescribing.

✓ **Program development informed by population health analysis**

- engaging top level ACO leadership in design and oversight of PHM strategy.
- developing methods to assess members' impactability as well as their risk, so that programs can be tailored for and targeted to the members most likely to benefit.
- developing services that increase access to real-time BH care, such as an SUD urgent care center.
- developing programs that address BH needs and housing instability concurrently.
- offering SUD programs tailored to subgroups such as pregnant members, LGBT members, and members involved with the criminal justice system allowing the care team to specialize in helping these vulnerable populations.
- providing education at practice sites or community locations such as:
 - medication workshops that cover over-the-counter and prescription medication side effects, how to take medications, knowing what a medication is for, and identifying concerns to share with the doctor.
 - expectant parenting classes that cover preparation for childbirth, breastfeeding, siblings, newborn care, and child safety.
 - cooking classes that offer recipes for healthy and cost-effective meals.
- offering items that support family health such as:
 - free diapers for members who have delivered a baby as an incentive to keep a postpartum appointment within 1-12 weeks after delivery.
 - car seats, booster seats, and bike helmets.
 - dental kits.

OVERALL FINDINGS AND RECOMMENDATIONS

The IA finds that Lahey is On track or On track with limited recommendations across all six focus areas of progress under assessment at the midpoint of the DSRIP Demonstration. No recommendations are provided in the following focus areas:

- Organizational Structure and Engagement
- Health Information Technology and Exchange

The IA encourages Lahey to review its practices in the following aspects of the focus areas, for which the IA did not identify sufficient documentation to assess or confirm progress:

Integration of Systems and Processes

- sharing reports including risk stratification, care management, quality, and utilization data with practice sites;
- providing role specific and process-oriented training for staff;
- co-locating behavioral health services at primary care locations; and
- including CPs in quality reporting and quality committee meetings.

Workforce Development

- exploring additional opportunities for staff career development, educational assistance, or loan forgiveness.

Care Coordination and Care Management

- integrating BH services, including OBAT, into primary care;
- addressing language barriers through steps such as translating member-facing materials, providing translators for appointments, and recruiting CCCM staff who speak members' languages;
- supporting members who lack reliable transportation by providing rides or vouchers, and/or providing services in homes or other convenient community settings;
- locating CCCM staff in or near the ED;
- providing members with 24/7 access to health education and nurse coaching, through a hotline or live chat; and
- developing a process to systematically track referrals, enabling PCPs and care coordinators to confirm members receive services, and incorporate the results into the EHR and care plan.

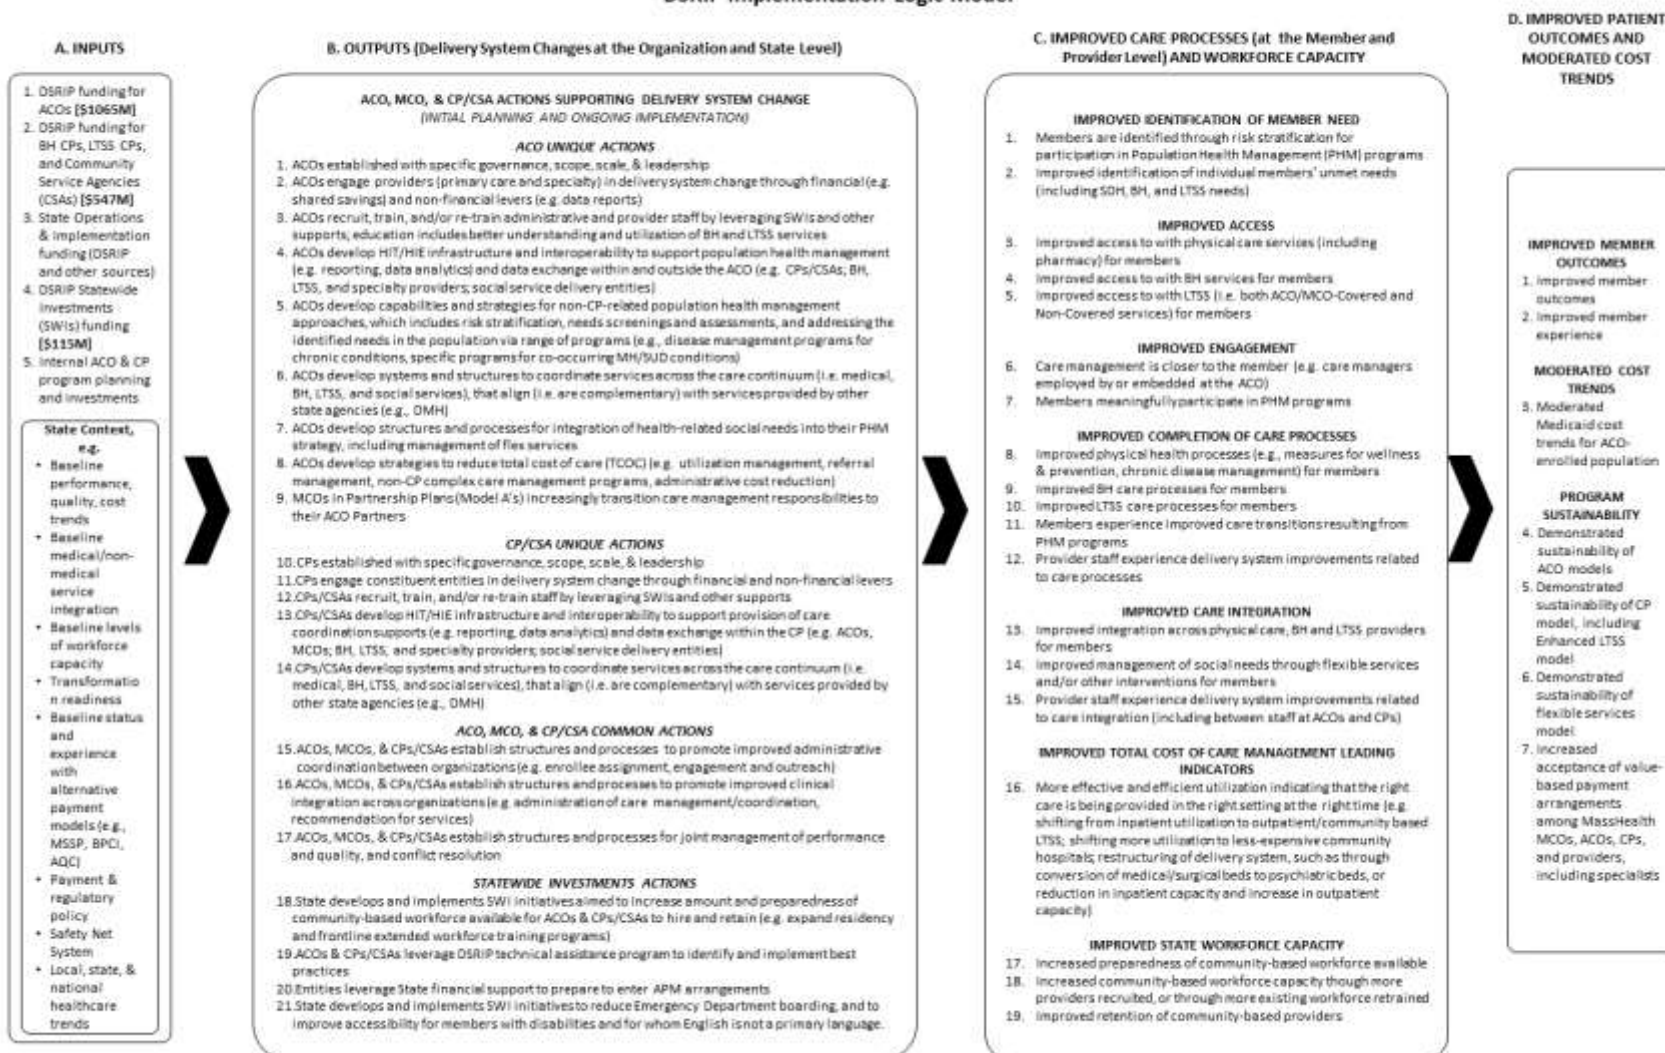

Population Health Management

- improving systematic screening for HRSNs that includes housing instability and food security;
- building mature partnerships with community-based organizations to whom they can refer members for services; and
- integrating cost data into reports given regularly to providers to facilitate cost-of-care management.

Lahey should carefully self-assess the areas noted above, and consider the corresponding promising practices identified by the IA for each focus area. Any action taken in response to the recommendations must comply with contractual requirements and programmatic guidance.

APPENDIX I: MASSHEALTH DSRIP LOGIC MODEL

DSRIP Implementation Logic Model

APPENDIX II: METHODOLOGY

The Independent Assessor (IA) used participation plans, annual and semi-annual reports, survey responses, and key informant interviews (KIIs) to assess progress of Accountable Care Organizations¹¹ (ACOs) towards the goals of DSRIP during the time period covered by the MPA, July 1, 2017 through December 31, 2019.

Progress was defined by the ACO actions listed in the detailed MassHealth DSRIP Logic Model (Appendix I), organized into a framework of six focus areas which are outlined below. This model was developed by MassHealth and the Independent Evaluator¹² (IE) to tie together the implementation steps and the short- and long-term outcomes and goals of the program. It was summarized into a high-level logic model which is described in the CMS approved Massachusetts 1115 MassHealth Demonstration Evaluation Design document (<https://www.mass.gov/doc/ma-independent-evaluation-design-1-31-19-0/download>).

The question addressed by this assessment is:

To what extent has the ACO taken organizational level actions, across six areas of focus, to transform care delivery under an accountable and integrated care model?

DATA SOURCES

The MPA drew on multiple data sources to assess organizational performance in each focus area, including both historical data contained in the documents that ACOs were required to submit to MassHealth, and newly collected data gathered by the IA and/or IE. The IA performed a desk review of documents that ACOs were required to submit to MassHealth, including participation plans, annual and semi-annual reports. In addition, the IA developed and conducted an ACO Practice Site Administrator survey to investigate the practices and perceptions of participating primary care practices. The IE developed a protocol for ACO Administrator KIIs, which were conducted jointly by the IA and the IE.

List of MPA data sources:

Documents submitted by ACOs to MassHealth covering the reporting period of July 1, 2017 through December 31, 2019:

- Full Participation Plans (FPPs)
- Semi-annual and Annual Progress Reports (SPRs, APRs)
- Budgets and Budget Narratives (BBNs)

Newly Collected Data

- ACO Administrator KIIs
- ACO Practice Site Administrator Survey

¹¹ See the ACO Background section for a description of the organization. In the case of a Model A ACO, an Accountable Care Partnership Plan, the assessment encompasses the partner managed care organization (MCO).

¹² The Independent Evaluator (IE) – a distinct role separate from the Independent Assessor – is responsible for evaluating the outcomes of the Demonstration.

FOCUS AREA FRAMEWORK

The ACO MPA assessment findings cover six “focus areas” or aspects of health system transformation. These were derived from the DSRIP logic model, by grouping organizational level actions referenced in the logic model into the following domains:

1. Organizational Structure and Engagement
2. Integration of Systems and Processes
3. Workforce Development
4. Health Information Technology and Exchange
5. Care Coordination and Management
6. Population Health Management

Table 1 shows the ACO actions that correspond to each focus area. This framework was used to assess each ACO’s progress. A rating of On track indicates that the ACO has made appropriate progress in accomplishing each of the actions for the focus area. Where gaps in progress were identified, the ACO was rated “On track with limited recommendations” or, in the case of more substantial gaps, “Opportunity for improvement.”

Table 1. Framework for Organizational Assessment of ACOs

Focus Area	ACO Actions
Organizational Structure and Governance	<ul style="list-style-type: none"> • ACOs established with specific governance, scope, scale, & leadership • ACOs engage providers (primary care and specialty) in delivery system change through financial (e.g. shared savings) and non-financial levers (e.g. data reports)
Integration of Systems and Processes	<ul style="list-style-type: none"> • ACOs establish structures and processes to promote improved administrative coordination between organizations (e.g. enrollee assignment, engagement and outreach) • ACOs establish structures and processes to promote improved clinical integration across organizations (e.g. administration of care management/coordination, recommendation for services) • ACOs establish structures and processes for joint management of performance and quality, and conflict resolution • Accountable Care Partnership Plans (Model A) transition more of the care management responsibilities to their ACO Partners over the course of the Demonstration
Workforce Development	<ul style="list-style-type: none"> • ACOs recruit, train, and/or re-train administrative and provider staff by leveraging Statewide Investments (SWIs) and other supports; education includes better understanding and utilization of behavioral health (BH) and long-term services and supports (LTSS)
Health Information Technology and Exchange	<ul style="list-style-type: none"> • ACOs develop Health Information Technology and Exchange (HIT/HIE) infrastructure and interoperability to support provision of population health management (e.g. reporting, data analytics) and data exchange within and outside the ACO (e.g. Community Partners/Community Service Agencies (CPs/CSAs), BH, LTSS, and specialty providers)
Care Coordination and Care Management	<ul style="list-style-type: none"> • ACOs develop systems and structures to coordinate services across the care continuum (i.e. medical, BH, LTSS, and social services), that align (i.e. are complementary) with services provided by other state agencies (e.g., Department of Mental Health (DMH))

Population Health Management

- ACOs develop capabilities and strategies for non-CP-related population health management approaches, which include risk stratification, needs screenings and assessments, and addressing the identified needs in the population via range of programs (e.g., disease management programs for chronic conditions, specific programs for co-occurring mental health (MH)/substance use disorder (SUD) conditions)
- ACOs develop structures and processes for integration of health-related social needs (HRSN) into their Population Health Management (PHM) strategy, including management of flexible services
- ACOs develop strategies to reduce total cost of care (TCOC; e.g. utilization management, referral management, non-CP complex care management programs, administrative cost reduction)

ANALYTIC APPROACH

The ACO actions are broad enough to be accomplished in a variety of ways by different ACOs, and the scope of the IA is to assess progress, not to prescribe the best approach for an ACO. Moreover, no pre-established benchmark is available to determine what represents adequate progress at the midpoint. The need for a realistic threshold of expected progress led the IA to use a semi-empirical approach to define the state that should be considered On track. Guided by the focus areas, the IA performed a preliminary review of Full Participation Plans, which identified a broad range of activities and capabilities that fell within the logic model actions. This provided specific operational examples of how ACOs can accomplish the logic model actions for each focus area. Once an inclusive list of specific items was compiled, the IA considered the prevalence of each item, and relevance to the focus area. A descriptive definition of On track performance for each focus area was developed from the items that had been adopted by a plurality of ACOs. Items that had been accomplished by only a small number of ACOs were considered to be emerging practices, and were not included in the expectations for On track performance. This calibrated the threshold for expected progress to the actual performance of the cohort as a whole.

Qualitative coding of documents to focus areas, and analysis of survey results relevant to each focus area, were used to assess whether and how each ACO had accomplished the actions for each focus area. The assessment was holistic, and as such did not require that ACOs meet every item on a list. A finding of On track was made where the available evidence demonstrated that the entity had accomplished all or nearly all of the expected items, and there are no recommendations for improvement. Where evidence was lacking in the results of desk review and survey, keyword searches of KII interview transcripts were used to seek additional information. Prior to finalizing the findings for an entity, the multiple reviewers convened to confirm that thresholds were applied consistently, and that the reasoning was clearly articulated and documented.

A rating of On track indicates that the ACO has made appropriate progress in accomplishing the indicators for the focus area. Where gaps in progress were identified, the entity was rated On track with limited recommendations or, in the case of more substantial gaps, Opportunity for improvement.

DATA COLLECTION

ACO Practice Site Administrator Survey Methodology

The aim of the ACO Practice Site Administrator Survey was to systematically measure ACO implementation and related organizational factors from the perspective of the ACOs' participating primary care practice sites. For the purpose of this report, "practice site" refers to an adult or pediatric primary care practice location.

The results of the survey were used in combination with other data sources to assess ACO cohort-wide performance in the MPA focus areas. The survey did not seek to evaluate the success of the DSRIP

program. Rather, the survey focused on illuminating the connections between structural components and implementation progress across various ACO types and / or cohorts for the purpose of midpoint assessment.

Survey Development: The survey tool was structured around the MPA focus areas described previously, with questions pertaining to each of the six areas. Following a literature review of existing validated survey instruments, questions were drawn from the National Survey of ACOs, National Survey of Healthcare Organizations and Systems, and the Health System Integration Manager Survey to develop measures relevant to the State and appropriate for the target group. Cognitive testing (field testing) of the survey was conducted at 4 ACO practice sites. Following the cognitive testing and collaboration with the State, survey questions were added or modified to better align with the purpose of the MPA and the target respondents.

Sampling: A sampling methodology was developed to yield a sample of practice sites that is reasonably representative of the ACO universe of practice sites. First, practice sites serving fewer than 50 attributed members were excluded. Next, a random sample of 30 sites was selected within each ACO; if an ACO had fewer than 30 total sites, all sites were included. A stratified approach was applied in order to draw a proportional distribution of sites across Group Practices and Health Centers (Health Centers include both Community Health Centers and Hospital-Licensed Health Centers). A 64% survey response rate was achieved; 225 practice sites completed the survey, out of 353 sampled sites. The responses were well-balanced across practice site type (Table 2) and across geographical region (Table 3).

Table 2. Distribution of Practice Site Types

Distribution of Sites by Practice Site Type		
	Group Practices	Health Centers
Percentage of Practice Site Types in Survey Sample (N=353)	80%	20%
Percentage of Practice Site Types in Surveys Completed (N=225)	78%	22%

Table 3. Distribution of Practices Across Geography

Regional Distribution of Practice Sites					
	Central	Greater Boston	Northern	Southern	Western
Distribution of Practice Sites in Sample (N=353)	16%	22%	25%	24%	13%
Distribution of Practice Sites Responses (N = 225)	16%	19%	25%	25%	14%

Administration: The primary contact for each ACO was asked to assist in identifying the best individual to respond to the survey for each of the sites sampled. The survey was administered using an online platform; the survey opened July 18, 2019 and closed October 2, 2019. Survey recipients were e-mailed an introduction to the survey, instructions for completing it, a link to the survey itself, and information on where to direct questions. Multiple reminders were sent to non-responders, followed by phone calls reminding them to complete the survey.

Analysis: Results were analyzed using descriptive statistics at both the individual ACO level (aggregating all practice site responses for a given ACO) and the statewide ACO cohort level (aggregating all responses). Given the relatively small number of sites for each ACO, raw differences among ACOs, or between an ACO and the statewide aggregate results, should be viewed with caution. The sample was not developed to support tests of statistical significance at the ACO level.

Key Informant Interviews

Key Informant Interviews (KII) of ACO Administrators were conducted in order to understand the degree to which participating entities are adopting core ACO competencies, the barriers to transformation, and the organization's experience with state support for transformation.¹³ Keyword searches of the KII transcripts were used to fill gaps identified through the desk review process.

¹³ KII were developed by the IE and conducted jointly by the IE and the IA. The IA utilized the KII transcripts as a secondary data source; the IA did not perform a full qualitative analysis of the KII.

APPENDIX III: LAHEY PRACTICE SITE ADMINISTRATOR SURVEY RESULTS

The ACOs survey results, in their entirety, are provided in this appendix. The MassHealth DSRIP Midpoint Assessment Report provides statewide aggregate results.

- 15 practice sites were sampled; 8 responded (53% response rate)
- Survey questions are organized by focus area.
- The table provides the survey question, answer choices, and percent of respondents that selected each available answer. Some questions included a list of items, each of which the respondent rated. For these questions (i.e., Q# 12), the items rated appear in the answer choices column.
- NA indicates an answer choice that is not applicable to the survey question.

FOCUS AREA: ORGANIZATIONAL STRUCTURE AND ENGAGEMENT

Q#	Question	Question Components or Answer Choices	1	2	3	4	5	6	7	Don't Know
12	In the past year, to what degree have the following practices in your clinic become more standardized, less standardized or not changed? <i>A lot less, a little less, no change, a little more, a lot more standardized (1-5), I Don't Know</i>	a. Physician compensation	0%	0%	0%	50%	25%	NA	NA	25%
		b. Performance management of physicians	0%	0%	13%	38%	38%	NA	NA	13%
		c. Care processes and team structure	0%	0%	13%	38%	50%	NA	NA	0%
		d. Hospital discharge planning and follow-up	0%	0%	13%	13%	63%	NA	NA	13%
		e. Recruiting and performance review	0%	0%	25%	0%	50%	NA	NA	25%
		f. Data elements in the electronic health record	0%	0%	0%	25%	63%	NA	NA	13%
21	To the best of your knowledge, in the past, has your practice participated in payment contract(s) together with the other clinical providers and practices that are now participating in the [ACO Name]? Select one.	a. Yes, with most of the clinical providers and practices that now compose this ACO (1) b. Yes, with some of the clinical providers and practices that now compose this ACO (2) c. No, this is our first time participating in a payment contract with the clinical providers and practices that compose this ACO (3) d. Don't know	0%	13%	0%	NA	NA	NA	NA	88%
22	Has your practice received any financial distributions (DSRIP dollars) as part of its engagement with the MassHealth Accountable Care Organization?	Yes (1) No (2) Don't know	25%	0%	NA	NA	NA	NA	NA	75%
23	Is a representative from your practice site engaged in ACO governance?	Yes (1) No (2) Don't know	25%	25%	NA	NA	NA	NA	NA	50%
24	To what extent do you feel your practice has had a say in important aspects of planning and decision making within the MassHealth Accountable Care Organization that affect your practice site?	Almost never had a say (1) Rarely had a say (2) Sometimes had a say (3) Usually had a say (4) Almost always had a say (5) Don't Know/Not Applicable	25%	0%	25%	0%	0%	NA	NA	50%
25	Please indicate the extent to which you agree or disagree with the following statement: ACO leaders have communicated to this practice site a vision for the MassHealth ACO and the care it delivers.	Strongly disagree (1) Disagree (2) Neither agree nor disagree (3) Agree (4) Strongly agree (5) Don't know/ Not applicable	0%	13%	0%	50%	38%	NA	NA	0%

26	To what extent do you agree or disagree with each of the following statements? <i>Strongly Disagree, Disagree, Neither agree nor disagree, Agree, Strongly agree (1-5) Don't Know/Not Applicable</i>	a. The MassHealth ACO is a resource and partner in problem-solving for our practice.	0%	13%	0%	63%	25%	NA	NA	0%
		b. When problems arise with other clinical providers in the MassHealth ACO, we are able to work jointly to find solutions.	0%	13%	13%	38%	13%	NA	NA	25%
		c. All entities in this MassHealth ACO work together to solve problems when needed.	0%	13%	13%	38%	13%	NA	NA	25%
28	Overall, how satisfied are you with your practice's experience as part of this MassHealth ACO?	Highly dissatisfied (1) Somewhat dissatisfied (2) Neither satisfied nor dissatisfied (3) Somewhat satisfied (4) Highly satisfied (5)	13%	0%	63%	13%	13%	NA	NA	NA
34	In the past year, to what extent has your practice changed its processes and approaches to caring for MassHealth members?	a. Massive change - completely redesigned their care (1) b. A lot of change (2) c. Some change (3) d. Very little change (4) e. No change (5)	0%	13%	50%	38%	0%	NA	NA	NA
35	In the past year, to what extent has your practice's ability to deliver high quality care to MassHealth members gotten better, gotten worse, or stayed the same?	Gotten a lot harder (1) Gotten a little harder (2) No change (3) Gotten a little easier (4) Gotten a lot easier (5)	13%	0%	38%	38%	13%	NA	NA	NA
37	Which of the following approaches are used to manage the performance of individual physicians who practice at your site? Select all that apply.	a. Performance measures on quality are reported and shared with physicians (1) b. Performance measures on cost are reported and shared with physicians (2) c. One-on-one review and feedback is used (3) d. Individual financial incentives are used (4) e. Individual non-financial awards or recognition is used (5)	100%	88%	63%	25%	13%	NA	NA	NA
38	To the best of your knowledge, has your practice ever participated in any of the following, either directly or through participation in a physician group or other organization authorized to enter into such an agreement on behalf of the practice? Select all that apply.	a. Bundled or episode-based payments (1) b. Primary care improvement and support programs (e.g. Comprehensive Primary Care Initiative, Patient Centered Medical Home, Primary Care Payment Reform etc.) (2) c. Pay for performance programs in which part of payment is contingent on quality measure performance (3) d. Capitated contracts with commercial health plans (e.g. Blue Cross Blue Shield Alternative Quality Contract), etc.) (4) e. Medicare ACO upside-only risk bearing contracts (Medicare Shared Savings Program tracks one and two) (5) f. Medicare ACO risk bearing contracts (Pioneer ACO, Next Generation ACO, Medicare Shared Savings Program track three) (6) g. Commercial ACO contracts (7)	50%	25%	100%	50%	50%	25%	100%	NA

FOCUS AREA: INTEGRATION OF SYSTEMS AND PROCESSES

Q#	Question	Question Components or Answer Choices	1	2	3	4	5	6	7	Don't Know
1b	For the care coordination and management resources used by your practice, how many of these resources are MANAGED by people at the following organizations (e.g., overseen, supervised)? <i>None, Some, Most, or All of the Resources (1-4)</i>	a. An ACO/MCO	0%	75%	13%	13%	NA	NA	NA	NA
		b. The physical location and department where you work	13%	63%	25%	0%	NA	NA	NA	NA
		c. A community-based organization	50%	38%	13%	0%	NA	NA	NA	NA
		d. A different practice site, department, or location in your organization	13%	75%	13%	0%	NA	NA	NA	NA

		e. Other organization, entity, or location	63%	25%	13%	0%	NA	NA	NA	NA
1c	For the care coordination and management resources used by your practice, how many of these resources are HOUSED at the following locations (by housed we mean the place where these resources primarily provide patient services)? <i>None, Some, Most, or All of the Resources (1-4)</i>	a. An ACO/MCO	38%	38%	25%	0%	NA	NA	NA	NA
		b. The physical location and department where you work	0%	38%	63%	0%	NA	NA	NA	NA
		c. A community-based organization	38%	38%	25%	0%	NA	NA	NA	NA
		d. A different practice site, department, or location in your organization	0%	88%	13%	0%	NA	NA	NA	NA
		e. Other organization, entity, or location	25%	63%	13%	0%	NA	NA	NA	NA
3	For your MassHealth members who receive care coordination and management services from more than one program or person, how often do these resources operate together efficiently?	Never (1) Rarely (2) Sometimes (3) Usually (4) Always (5) Don't Know/Not Applicable	0%	0%	25%	50%	13%	NA	NA	13%
8b	In the last 12 months, how often were your MassHealth members with behavioral health conditions referred to the following entities when needed? <i>Almost Never, Rarely, Sometimes, Often, Almost Always (1-5), I Don't Know</i>	a. prescribing clinicians, including psycho-pharmacologists and psychiatrists (MDs)	88%	0%	0%	0%	0%	NA	NA	13%
		b. counseling therapists, including clinical social workers	50%	0%	13%	0%	25%	NA	NA	13%
		c. any type of care coordinator/manager to address behavioral health treatment, including addiction services	50%	0%	13%	13%	13%	NA	NA	13%
		d. any type of care coordinator/manager to address health-related social needs (housing, support, etc.)	63%	0%	0%	13%	13%	NA	NA	13%
10	How difficult is it for your practice to obtain treatment for your MassHealth members with opioid use disorders?	Nearly impossible (1) Very difficult (2) Somewhat difficult (3) A little difficult (4) Not at all difficult (5) Don't Know/Not Applicable	13%	25%	0%	13%	13%	NA	NA	38%
15	If screening for the needs in the previous question is performed at a level other than the practice (e.g., by an accountable care organization), how often does your practice have access to the results?	Almost Never, Rarely, Sometimes, Usually, Almost Always (1-5) Not Applicable	0%	0%	29%	29%	43%	NA	NA	0%
31	Currently which of the following best describes how many MassHealth members in your practice are receiving care coordination services from a MassHealth designated Community Partner?	Very few (1) More than very few, but not many (2) About half (3) A majority (4) Nearly all (5) I don't know/I'm not aware)	13%	25%	0%	0%	0%	NA	NA	63%
32	How frequently have clinicians, staff and/or administrators interacted with Community Partner organization staff in coordinating these patients' care?	Almost Never (1) Rarely (2) Sometimes (3) Often (4) Almost Always (5) Don't know	0%	33%	33%	33%	0%	NA	NA	0%
33	To the best of your knowledge, how has the existence of Community Partners impacted your ability to provide high quality care, for your MassHealth members?	Has made it harder almost all of the time (1) Has made it harder some of the time (2) Has made little or no change (3) Has made it easier some of the time (4) Has made it easier almost all of the time (5) Don't know	33%	0%	33%	0%	0%	NA	NA	33%

FOCUS AREA: CARE COORDINATION AND CARE MANAGEMENT

Q#	Question	Question Components or Answer Choices	1	2	3	4	5	6	7	Don't Know
1a	Which of the following care coordination and management resources has your practice used in the past 12 months for your MassHealth members? Select all.	Community Health Workers (1) Patient Navigators/Referral Navigators (2) Nurse Manager/Care Coordinator (3) Any other (non-nurse) Care Coordinator/Manager (4) Social Worker (5) Other title (6)	38%	63%	75%	50%	75%	13%	NA	NA
2	In the past 12 months to what extent have these coordination and management resources helped your practice's efforts to deliver high quality care to your MassHealth members?	<i>Not at all, A little, Somewhat, Mostly, A great deal (1-5)</i>	0%	0%	38%	38%	25%	NA	NA	NA
4	In the past 12 months, how often was it difficult for staff in your practice site to do each of the following for your MassHealth members? <i>Always, Usually, Sometimes, Rarely, Never Difficult (1-5)</i> <i>Don't Know</i>	a. Learn the result of a test your practice site ordered	0%	0%	13%	50%	38%	NA	NA	0%
		b. Know that a patient referred by your practice site was seen by the consulting clinician	0%	13%	13%	63%	13%	NA	NA	0%
		c. Learn what the consulting clinician recommends for your practice site's patient	0%	13%	25%	50%	13%	NA	NA	0%

		d. Transmit relevant information about a patient who your practice site refers to a consulting clinician	0%	0%	50%	25%	25%	NA	NA	0%
		e. Reach the consulting clinician caring for a patient when your staff need to	0%	13%	25%	25%	25%	NA	NA	13%
5	To what extent do you agree or disagree that providers and/or staff follow a clear, established process for each of the following? <i>There is no process in place, Strongly Disagree, Disagree, Neither agree nor disagree, Agree, Strongly Agree (1-6); Don't Know/Not Applicable</i>	a. Arranging eye care from an ophthalmologist or optometrist	0%	0%	0%	0%	38%	63%	NA	0%
		b. Confirming that a diabetic eye exam was performed	0%	0%	0%	0%	50%	50%	NA	0%
		c. Ensuring that [Practice Name] receives the ophthalmologist or optometrist consult note	0%	0%	0%	0%	63%	38%	NA	0%
6	For your complex high-need MassHealth patients, how often is any type of care coordination or management resource involved in helping the patient adhere to the care plan? <i>Almost Never, Rarely, Sometimes, Often, Almost Always (1-5)</i>	a. Any type of care coordinator/manager	0%	0%	63%	38%	0%	NA	NA	NA
		b. Any type of non-clinician (e.g., community health worker)	0%	25%	50%	25%	0%	NA	NA	NA
		c. Targeted interventions for patients who have been risk stratified into a high need sub-group	0%	0%	50%	38%	13%	NA	NA	NA
		d. Home visits	25%	13%	38%	25%	0%	NA	NA	NA
7	For complex, high-need MassHealth members, how often does your practice use each of the following resources to help the patient adhere to the care plan? <i>Almost Never, Rarely, Sometimes, Often, Almost Always (1-5)</i>	a. Referral to community-based services for health-related social needs	0%	13%	75%	0%	13%	NA	NA	NA
		b. Communication with the patient within 72 hours of discharge	0%	0%	0%	38%	63%	NA	NA	NA
		c. Home visit after discharge	38%	13%	38%	13%	0%	NA	NA	NA
		d. Discharge summaries sent to primary care clinician within 72 hours of discharge	0%	0%	25%	38%	38%	NA	NA	NA
		e. Standardized process to reconcile multiple medications	0%	0%	38%	38%	25%	NA	NA	NA
8a	In the last 12 months, how often were your MassHealth members with behavioral health conditions referred to the following entities when needed? <i>Almost Never, Rarely, Sometimes, Usually, Almost Always within the practice site (1-5), Don't Know/Not Applicable</i>	a. prescribing clinicians, including psycho-pharmacologists and psychiatrists (MDs)	0%	13%	13%	13%	38%	NA	NA	25%
		b. counseling therapists, including clinical social workers	0%	0%	25%	13%	38%	NA	NA	25%

		l. need for financial assistance with medical bills	38%	NA	NA	NA	NA	NA	NA	NA
		m. Medicaid eligibility	50%	NA	NA	NA	NA	NA	NA	NA
		n. none of the above	13%	NA	NA	NA	NA	NA	NA	NA
16	How often are MassHealth members referred from your practice to social service organizations to address health-related social needs (e.g., housing, food security)?	Almost Never, Rarely, Sometimes, Usually, Almost Always (1-5) Not Applicable	0%	0%	75%	13%	0%	NA	NA	13%

19	What is the main source of information that your practice uses to identify which of your MassHealth members are complex, high need patients? Select one.	a. We perform an ad hoc review of information from our own practice's system(s) (e.g., EHR) when we think it is relevant (1) b. We regularly apply systematic risk stratification algorithms in our practice using our patient data (2) c. We receive risk stratification information from a managed care organization or accountable care organization (3) d. We do not have a way of knowing which patients are complex/high need (4) e. Don't know	13%	0%	75%	0%	NA	NA	NA	13%
29	Please select the option below that best describes the change in the past year in your practice site's ability to tailor delivery of care to meet the needs of patients affected by health inequities (e.g., by using culturally and linguistically appropriate services):	Gotten a lot harder (1) Gotten a little harder (2) No change (3) Gotten a little easier (4) Gotten a lot easier (5)	13%	0%	63%	25%	0%	NA	NA	NA
30	How often does your practice site use site-specific data to identify health inequities within its served population? For example, data might include EHR charts or ACO reports.	Annually (1) Bi-annually (2) Quarterly (3) Monthly (4) On an ad hoc basis (5) We do not have access to this type of data. (6) We have access to this type of data but do not analyze it for health inequities. (7)	0%	0%	0%	75%	13%	13%	0%	NA

GENERAL QUESTIONS

Q#	Question	Question Components or Answer Choices	1	2	3	4	5	6	7	Don't Know
20	Our records show that your practice is participating in the [ACO name] for some or all of its MassHealth Medicaid patients. Is that correct?	Yes (1) I am not aware of this (2)	100%	0%	NA	NA	NA	NA	NA	NA
20_O	Were you able to find a colleague who can help you answer questions about [ACO Name]?	Yes (1) No (2)	NA	NA	NA	NA	NA	NA	NA	NA
20a	Currently, which of the following best describes how many of your practice's patients are covered by [ACO Name]?	Very few (1) A minority (2) About half (3) A clear majority (4) Nearly all (5)	0%	86%	14%	0%	0%	NA	NA	NA
36	Who owns your practice? (select one)	a. Independently owned (1) b. A larger physician group (2) c. A hospital (3) d. A healthcare system (may include a hospital) (4) e. Other (please specify) (5)	0%	0%	0%	100%	0%	NA	NA	NA
39	Which of the following best describes your practice site?	Adult (1) Pediatric (2) Both (3)	88%	0%	13%	NA	NA	NA	NA	NA
40	Currently which of the following best describes how many of your practice's patients are covered by any contracts with cost of care accountability?	Very few (1) A minority (2) About half (3) A majority (4) Nearly all (5)	0%	33%	50%	17%	0%	NA	NA	NA
41	To what extent do providers and staff at your practice site seem to agree that "total cost of care" contracts will become a major and sustained model of payment at your practice in the near-term (i.e., within five years)?	Strongly disagree (1) Disagree (2) Neither agree nor disagree (3) Agree (4) Strongly agree (5)	0%	14%	86%	0%	0%	NA	NA	NA

42	What is your professional discipline? (select one)	a. Primary care physician (1) b. Physician assistant/nurse practitioner (2) c. Registered nurse/nurse care manager/ LVN/LPN (3) d. Professional administrator (e.g., practice manager) (4) e. Other-please specify: (5)	0%	0%	0%	100%	0%	NA	NA	NA
43	How long have you worked at this practice site? (select one)	a. Less than 6 months (1) b. 6-12 months (2) c. 1-2 years (3) d. 3-5 years (4) e. More than 5 years (5)	25%	0%	13%	25%	38%	NA	NA	NA
44	Did you ask a colleague for help in answering questions on the survey?	Yes (1) No (2)	38%	63%	NA	NA	NA	NA	NA	NA

APPENDIX IV: ACRONYM GLOSSARY

ACPP	Accountable Care Partnership Plan
ACO	Accountable Care Organization
ADT	Admission, Discharge, Transfer
BH CP	Behavioral Health Community Partner
CCCM	Care Coordination & Care Management
CCM	Complex Care Management
CHA	Community Health Advocate
CHW	Community Health Worker
CMS	Centers for Medicare and Medicaid Services
CP	Community Partner
CWA	Community Wellness Advocate
DMH	Department of Mental Health
DSRIP	Delivery System Reform Incentive Payment
ED	Emergency Department
EHR	Electronic Health Record
ENS	Event Notification Service
EOHHS	Executive Office of Health and Human Services
FPL	Federal Poverty Level
FPP	Full Participation Plan
FQHC	Federally Qualified Health Center
HIE	Health Information Exchange
HIT	Health Information Technology
HRSN	Health-Related Social Need
IA	Independent Assessor
IE	Independent Evaluator
JOC	Joint Operating Committee
KII	Key Informant Interview
LGBTQ	lesbian, gay, bisexual, transgender, queer, questioning
LCSW	Licensed Independent Clinical Social Worker
LPN	Licensed Practical Nurse
LTSS CP	Long Term Services and Supports Community Partner
MAeHC	Massachusetts eHealth Collaborative
MAT	Medication for Addiction Treatment
MCO	Managed Care Organization
MPA	Midpoint Assessment
OBAT	Office-Based Addiction Treatment
PCP	Primary Care Provider
PFAC	Patient and Family Advisory Committee
PHM	Population Health Management
QI	Quality Improvement
QMC	Quality Management Committee

RN	Registered Nurse
SFTP	Secure File Transfer Protocol
SMI	Serious Mental Illness
SUD	Substance Use Disorder
SVP	Senior Vice President
SWI	Statewide Investments
TCOC	Total Cost of Care
VNA	Visiting Nurse Association

APPENDIX V: ACO COMMENT

Each ACO was provided with the opportunity to review their individual MPA report. The ACO had a two week comment period, during which it had the option of making a statement about the report. ACOs were provided with a form and instructions for submitting requests for correction (e.g., typos) and a comment of 1,000 word or less. ACOs were instructed that the comment may be attached as an appendix to the public-facing report, at the discretion of MassHealth and the IA.

Comments and requests for correction were reviewed by the IA and by MassHealth. If the ACO submitted a comment, it is provided below. If the ACO requested a minor clarification in the narrative that added useful detail or context but had no bearing on the findings, the IA made the requested change. If a request for correction or change had the potential to impact the findings, the IA reviewed the MPA data sources again and attempted to identify documentation in support of the requested change. If documentation was identified, the change was made. If documentation was not identified, no change was made to the report but the information provided by the ACO in the request for correction is shown below.

ACO Comment

There are gaps in this analysis, as it only considers as sources the DSRIP deliverables and practice surveys. These are valuable inputs but don't tell the full story. A few additional thoughts below:

- The Lahey ACO has embedded LICSWs in all of its participating primary care sites to support access to BH
- The Lahey BH CP's CMO sits on the Lahey ACO Quality Subcommittee as well as the MassHealth Advisory Committee
- The Lahey ACO provided the opportunity to all staff to participate in the Southern New Hampshire University Healthcare Management Certificate course – several staff of various disciplines enrolled
- Lahey provides translators at all appointments, and all Lahey ACO staff have access and utilize language translation lines when speaking for patients
- Lahey ACO's CHWs assist with obtaining PT-1 requests for all patients needing assistance with transportation
- The Lahey ACO has integrated the HRSN tool into EPIC (the ACO's EMR) with an anticipated rollout for use in 2021
