

## Office of Vehicle Management Leased Vehicle Inventory

### Electric Vehicles Available for Immediate Delivery

The Operational Services Division's Office of Vehicle Management (OVM) has an inventory of Electric Vehicles (EVs) available for immediate transfer to Executive Department Fleets. These vehicles have been acquired as part of the Leased Electric Vehicle Inventory (LEVI) Program.

This effort is designed to streamline Executive Department vehicle replacement and the adoption of EVs. The Program also helps alleviate the stress of acquiring vehicles via the traditional route when delivery delays and order cancellations are commonplace.

To learn more about the LEVI program and how your organization may acquire an EV through the LEVI Program, contact Karen Rasnick at [karen.rasnick@mass.gov](mailto:karen.rasnick@mass.gov).
