This Renewal License is subject to the terms and conditions contained in Chapter 166A of the laws of Massachusetts, as amended; the regulations of the FCC; the 1984 Cable Act; the 1992 Cable Act; and all lawful Town, State and federal statutes and by-laws of general application.

Subject to the terms and conditions herein, the Issuing Authority hereby grants to the Licensee the right to lawfully operate and maintain a Cable Television System in, under, over, along, across or upon the Streets, lanes, avenues, alleys, sidewalks, bridges, highways and other public places under the jurisdiction of the Town of Lexington within the municipal boundaries and subsequent additions thereto, including property over, under or on which the Town has an easement or right-of-way, for the purpose of reception, transmission, collection, amplification, origination, distribution, and/or redistribution of Signals in accordance with the laws of the United States of America, the Commonwealth of Massachusetts and the Town of Lexington. In exercising rights pursuant to this Renewal License, the Licensee shall not endanger or interfere with the lives of Persons, interfere with any installations of the Town, any public utility serving the Town or any other Persons permitted to use Public Ways and places.

Grant of this Renewal License does not establish priority for use over other present or future permit holders or the Town's own use of Public Ways and places. Disputes between the Licensee and other parties regarding use of Public Ways and places shall be resolved in accordance with any applicable regulations of the Department of Public Works ("DPW") and any special laws or Town ordinances enacted hereafter.

#### Section 2.2---TERM OF RENEWAL LICENSE

The term of this Renewal License shall be a ten (10) year term, commencing on July 1, 2019 and expiring on June 30, 2029, unless sooner terminated as provided herein or surrendered.

**Section 2.3---NON-EXCLUSIVITY OF RENEWAL LICENSE**

This Renewal License shall not affect the right of the Issuing Authority to grant to any other Person a license or right to occupy or use the streets, or portions thereof, for the construction, upgrade, installation, operation or maintenance of a cable television system within the Town of Lexington; or the right of the Issuing Authority to permit the use of the Public Ways and places of the Town for any purpose whatsoever. The Licensee hereby acknowledges the Issuing Authority's right to make such grants and permit such uses. The issuance of additional license(s) shall be subject to applicable federal law(s), M.G.L. Chapter 166A and applicable regulations promulgated thereunder.

**Section 2.4---POLICE AND REGULATORY POWERS**

By executing this Renewal License, the Licensee acknowledges that its rights are subject to the powers of the Town to adopt and enforce general by-laws necessary to the safety and welfare of the public. The Licensee shall comply with all DPW regulations and any by-laws enacted by the Town. Any conflict between the terms of this Renewal License and any present or future lawful exercise of the Town's police and regulatory powers shall be resolved in favor of the latter; provided, however, that in the event of a dispute hereto, the parties agree to meet and negotiate in order to resolve such dispute in good faith. If reasonable negotiations to resolve such dispute are not successful, the parties agree to submit such dispute to a forum of appropriate jurisdiction.

(a) Pursuant to M.G.L. c. 166A, Section 7, neither this Renewal License, nor control thereof, shall be transferred, assigned or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any Person, company and/or other entity holding such Renewal License to any other Person, company and/or other entity, without the prior written consent of the Issuing Authority, which consent shall not be arbitrarily or unreasonably withheld. Such consent shall be given only after a hearing upon a written application therefor on forms as may be prescribed by the FCC and/or the Competition Division. An application for consent to a transfer or assignment, if required, shall be signed by the Licensee and by the proposed

transferee or assignee or by their representatives, evidence of whose authority shall be submitted with the application.

(b) In considering a request to transfer control of this Renewal License, the Issuing Authority may consider such factors as the transferee's management experience, technical expertise, financial capability, and legal ability to operate a cable system under the existing license, and any other criteria allowable under law.

---

(c) The consent or approval of the Issuing Authority to any assignment or transfer of this Renewal License granted to the Licensee shall not constitute a waiver or release of the rights of the Town in and to the streets and Public Ways or any other rights of the Town under this Renewal License, and any such transfer shall, by its terms, be expressly subordinate to the terms and conditions of this Renewal License.

(d) The Licensee shall promptly notify the Issuing Authority of any action requiring the consent of the Issuing Authority pursuant to this Section 2.6.

(e) Unless otherwise allowed by applicable law(s), the Issuing Authority shall make a decision on said written application for transfer within one hundred twenty (120) days of receipt of said application for transfer. After 120 days, the application shall be deemed approved, unless said 120-day period is extended by mutual consent of the parties.

(f) The Licensee shall submit to the Issuing Authority an original and five (5) copies, unless otherwise directed, of the application and FCC Form 394 requesting such transfer or assignment consent.

(g) The consent of the Issuing Authority shall be given only after a public hearing to consider the written application for transfer.

(h) Any proposed controlling or owning Person or transferee approved by the Issuing Authority shall be subject to all of the terms and conditions contained in this Renewal License.

#### **Section 2.7---EFFECT OF UNAUTHORIZED TRANSFER ACTION**

(a) Any transfer of the Cable System without complying with Section 2.6 above shall be null and void, and shall be deemed a material breach of this Renewal License.

(b) If the Issuing Authority denies its consent to any such action and a transfer has nevertheless occurred, the Issuing Authority may revoke and terminate this Renewal License in accordance with the provisions of Section 11.1 *infra*.

(c) The grant or waiver of any one or more of such consents shall not render unnecessary any subsequent consent or consents, nor shall the grant of any such consent constitute a waiver of any other rights of the Town.

At the time of entering into an agreement to provide any Cable Service or other Service to a Subscriber, and annually thereafter to all Cable System Subscribers, the Licensee shall provide Subscribers with written notice, as required by Section 631(a)(1) of the Cable Act, which, at a minimum, clearly and conspicuously explains the Licensee's practices regarding the collection, retention, uses, and dissemination of

personal subscriber information, and describing the Licensee's policy for the protection of subscriber privacy.

**Section 12.13---MONITORING**

(a) Neither the Licensee nor its agents nor the Town nor its agents shall tap, monitor, arrange for the tapping or monitoring, or permit any other Person to tap or monitor, any cable, line, Signal, input device, or subscriber Outlet or receiver for any purpose, without the prior written authorization of the affected Subscriber provided, however, that the Licensee may conduct system-wide or individually addressed "sweeps" solely for the purpose of verifying System integrity, checking for illegal taps, connections or Converters, controlling return-path transmission, billing for pay Services or monitoring channel usage in a manner not inconsistent with the Cable Act. The Licensee shall report to the affected parties and the Issuing Authority any instances of monitoring or tapping of the Cable Television System, or any part thereof, of which it has knowledge, whether or not such activity has been authorized by the Licensee, other than as permitted herein.

(b) The Licensee shall not record or retain any information transmitted between a Subscriber and any third party, except as required for lawful business purposes. Pursuant to Section 631(e) of the Cable Act, the Licensee shall destroy personally identifiable information if the information is no longer necessary for the purpose for which it was collected and there are no pending requests or orders for access to such information pursuant to a request from a Subscriber or pursuant to a court order.

**Section 12.14---DISTRIBUTION OF SUBSCRIBER INFORMATION**

(a) The Licensee shall not disclose personally identifiable information concerning any Subscriber without the prior written or electronic consent of the Subscriber concerned.

(b) The Licensee may disclose such information if the disclosure is:

(i) necessary to render, or conduct a legitimate business activity related to, a Cable Service or other service provided by the Licensee to the Subscriber; and/or

(ii) made pursuant to a court order authorizing such disclosure, if the Subscriber is notified of such order by the person to whom the order is directed

(iii) a disclosure of the names and addresses of Subscribers to any Cable Service or other service, if a) the Licensee has provided the Subscriber the opportunity to prohibit or limit such disclosure, and b) the disclosure does not reveal, directly or indirectly, the (i) extent of any viewing or other use by the Subscriber of a Cable Service or other service provided by the Licensee, or (ii) the nature of the transaction made by the Subscriber over the Cable System.

**Section 12.15---INFORMATION WITH RESPECT TO VIEWING HABITS  
AND SUBSCRIPTION DECISIONS**

Except as permitted by Section 631 of the Cable Act, neither the Licensee nor its agents nor its employees shall make available to any third party, including the Town, information concerning the viewing habits or subscription package decisions of any individual Subscriber. If a court authorizes or orders such disclosure, the Licensee shall notify the Subscriber as soon as practicable, unless applicable law or the court otherwise prohibits such notification.

**Section 12.16---SUBSCRIBER'S RIGHT TO INSPECT AND VERIFY  
INFORMATION**

(a) The Licensee shall make available for inspection by a Subscriber at a reasonable time and place all personal subscriber information that the Licensee maintains regarding said Subscriber.

(b) A Subscriber may obtain from the Licensee a copy of any or all of the personal subscriber information regarding him or her maintained by the Licensee. The Licensee may require a reasonable fee for making said copy.

(c) A Subscriber may challenge the accuracy, completeness, retention, use or dissemination of any item of personal subscriber information. Such challenges and related inquiries about the handling of subscriber information shall be directed to the Licensee. The Licensee shall change any such information upon a reasonable showing by any Subscriber that such information is inaccurate.

**Section 12.17---PRIVACY STANDARDS REVIEW**

The Issuing Authority and the Licensee shall periodically review this Article 12 to determine that it effectively addresses appropriate concerns about privacy. This Article may be amended periodically by agreement of the Issuing Authority and the Licensee.

### FCC TECHNICAL SPECIFICATIONS

#### TITLE 47—TELECOMMUNICATION

---

#### CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION

#### PART 76--MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

##### § 76.605 Technical standards.

(a) As of December 30, 1992, unless otherwise noted, the following requirements apply to the performance of a cable television system as measured at any subscriber terminal with a matched impedance at the termination point or at the output of the modulating or processing equipment (generally the headend) of the cable television system or otherwise as noted. The requirements are applicable to each NTSC or similar video downstream cable television channel in the system:

(1)(i) The cable television channels delivered to the subscriber's terminal shall be capable of being received and displayed by TV broadcast receivers used for off-the-air reception of TV broadcast signals, as authorized under part 73 of this chapter; and

(ii) Cable television systems shall transmit signals to subscriber premises equipment on frequencies in accordance with the channel allocation plan set forth in the Electronics Industries Association's "Cable Television Channel Identification Plan, EIA IS-132, May 1994" (EIA IS-132). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Cable systems are required to use this channel allocation plan for signals transmitted in the frequency range 54 MHz to 1002 MHz. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Copies of EIA IS-132 may be obtained from: Global Engineering Documents, 2805 McGraw Ave., Irvine CA 92714. Copies of EIA IS-132 may be inspected during normal business hours at the following locations: Federal Communications Commission, 1919 M Street, NW, Dockets Branch (Room 239), Washington, DC, or the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. This requirement is applicable on May 31, 1995, for new and re-built cable systems, and on June 30, 1997, for all cable systems.

(2) The aural center frequency of the aural carrier must be  $4.5 \text{ MHz} \pm 5 \text{ kHz}$  above the frequency of the visual carrier at the output of the modulating or processing equipment of a cable television system, and at the subscriber terminal.

(3) The visual signal level, across a terminating impedance which correctly matches the internal impedance of the cable system as viewed from the subscriber terminal, shall not be less than 1 millivolt across an internal impedance of 75 ohms (0 dBmV). Additionally, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, it shall not be less than 1.41 millivolts across an internal impedance of 75 ohms (+3 dBmV). (At other impedance values, the minimum visual signal level, as viewed from the subscriber terminal, shall be the square root of  $0.0133 (Z)$  millivolts and, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, shall be 2 times the square root of  $0.00662(Z)$  millivolts, where  $Z$  is the appropriate impedance value.)

(4) The visual signal level on each channel, as measured at the end of a 30 meter cable drop that is connected to the subscriber tap, shall not vary more than 8 decibels within any six-month interval, which must include four tests performed in six-hour increments during a 24-hour period in July or August and during a 24-hour period in January or February, and shall be maintained within:

(i) 3 decibels (dB) of the visual signal level of any visual carrier within a 6 MHz nominal frequency separation;

(ii) 10 dB of the visual signal level on any other channel on a cable television system of up to 300 MHz of cable distribution system upper frequency limit, with a 1 dB increase for each additional 100 MHz of cable distribution system upper frequency limit (*e.g.*, 11 dB for a system at 301-400 MHz; 12 dB for a system at 401-500 MHz, *etc.*); and

Lexington Cable Television Renewal License  
RCN Telecom Services of Massachusetts, LLC

- (iii) A maximum level such that signal degradation due to overload in the subscriber's receiver or terminal does not occur.
- (5) The rms voltage of the aural signal shall be maintained between 10 and 17 decibels below the associated visual signal level. This requirement must be met both at the subscriber terminal and at the output of the modulating and processing equipment (generally the headend). For subscriber terminals that use equipment which modulate and remodulate the signal (e.g., baseband converters), the rms voltage of the aural signal shall be maintained between 6.5 and 17 decibels below the associated visual signal level at the subscriber terminal.
- (6) The amplitude characteristic shall be within a range of  $\pm 2$  decibels from 0.75 MHz to 5.0 MHz above the lower boundary frequency of the cable television channel, referenced to the average of the highest and lowest amplitudes within these frequency boundaries.
- (i) Prior to December 30, 1999, the amplitude characteristic may be measured after a subscriber tap and before a converter that is provided and maintained by the cable operator.
- (ii) As of December 30, 1999, the amplitude characteristic shall be measured at the subscriber terminal.
- (7) The ratio of RF visual signal level to system noise shall be as follows:
- (i) From June 30, 1992, to June 30, 1993, shall not be less than 36 decibels.
- (ii) From June 30, 1993 to June 30, 1995, shall not be less than 40 decibels.
- (iii) As of June 30, 1995, shall not be less than 43 decibels.
- (iv) For class I cable television channels, the requirements of paragraphs (a)(7)(i), (a)(7)(ii) and (a)(7)(iii) of this section are applicable only to:
- (A) Each signal which is delivered by a cable television system to subscribers within the predicted Grade B contour for that signal;
- (B) Each signal which is first picked up within its predicted Grade B contour;
- (C) Each signal that is first received by the cable television system by direct video feed from a TV broadcast station, a low power TV station, or a TV translator station.
- (8) The ratio of visual signal level to the rms amplitude of any coherent disturbances such as intermodulation products, second and third order distortions or discrete-frequency interfering signals not operating on proper offset assignments shall be as follows:
- (i) The ratio of visual signal level to coherent disturbances shall not be less than 51 decibels for noncoherent channel cable television systems, when measured with modulated carriers and time averaged; and
- (ii) The ratio of visual signal level to coherent disturbances which are frequency-coincident with the visual carrier shall not be less than 47 decibels for coherent channel cable systems, when measured with modulated carriers and time averaged.
- (9) The terminal isolation provided to each subscriber terminal:
- (i) Shall not be less than 18 decibels. In lieu of periodic testing, the cable operator may use specifications provided by the manufacturer for the terminal isolation equipment to meet this standard; and
- (ii) Shall be sufficient to prevent reflections caused by open-circuited or short-circuited subscriber terminals from producing visible picture impairments at any other subscriber terminal.
- (10) The peak-to-peak variation in visual signal level caused by undesired low frequency disturbances (hum or repetitive transients) generated within the system, or by inadequate low frequency response, shall not exceed 3 percent of the visual signal level. Measurements made on a single channel using a single unmodulated carrier may be used to demonstrate compliance with this parameter at each test location.
- (11) As of June 30, 1995, the following requirements apply to the performance of the cable television system as measured at the output of the modulating or processing equipment (generally the headend) of the system:
- (i) The chrominance-luminance delay inequality (or chroma delay), which is the change in delay time of the chrominance component of the signal relative to the luminance component, shall be within 170 nanoseconds.
- (ii) The differential gain for the color subcarrier of the television signal, which is measured as the difference in amplitude between the largest and smallest segments of the chrominance signal (divided by the largest and expressed in percent), shall not exceed  $\pm 20\%$ .
- (iii) The differential phase for the color subcarrier of the television signal which is measured as the largest phase difference in degrees between each segment of the chrominance signal and reference segment (the segment at the blanking level of 0 IRE), shall not exceed  $\pm 10$  degrees.
- (12) As an exception to the general provision requiring measurements to be made at subscriber terminals, and without regard to the type of signals carried by the cable television system, signal leakage from a cable television system shall be measured in accordance with the procedures outlined in § 76.609(h) and shall be limited as follows:

---

Signal

Lexington Cable Television Renewal License  
RCN Telecom Services of Massachusetts, LLC

Frequencies	limit (micro-volt/ meter)	leakage Distance in meters (m) meter)
Less than and including 54 MHz, and over 216 MHz	15	30
Over 54 up to and including 216 MHz	20	3

(b) Cable television systems distributing signals by using methods such as nonconventional coaxial cable techniques, noncoaxial copper cable techniques, specialized coaxial cable and fiber optical cable hybridization techniques or specialized compression techniques or specialized receiving devices, and which, because of their basic design, cannot comply with one or more of the technical standards set forth in paragraph (a) of this section, may be permitted to operate: Provided, That an adequate showing is made pursuant to § 76.7 which establishes that the public interest is benefited. In such instances, the Commission may prescribe special technical requirements to ensure that subscribers to such systems are provided with an equivalent level of good quality service.

**Note 1:** Local franchising authorities of systems serving fewer than 1000 subscribers may adopt standards less stringent than those in § 76.605(a). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

**Note 2:** For systems serving rural areas as defined in § 76.5, the system may negotiate with its local franchising authority for standards less stringent than those in §§ 76.605(a)(3), 76.605(a)(7), 76.605(a)(8), 76.605(a)(10) and 76.605(a)(11). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

**Note 3:** The requirements of this section shall not apply to devices subject to the provisions of §§ 15.601 through 15.626.

**Note 4:** Should subscriber complaints arise from a system failing to meet § 76.605(a)(6) prior to December 30, 1999, the cable operator will be required to provide a converter that will allow the system to meet the standard immediately at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order all converters on the system be changed to meet the standard.

**Note 5:** Should subscriber complaints arise from a system failing to meet § 76.605(a)(10), the cable operator will be required to remedy the complaint and perform test measurements on § 76.605(a)(10) containing the full number of channels as indicated in § 76.601(b)(2) at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order that the full number of channels as indicated in § 76.601(b)(2) be tested at all required locations for future proof-of-performance tests.

**Note 6:** No State or franchising authority may prohibit, condition, or restrict a cable system's use of any type of subscriber equipment or any transmission technology.

## **EXHIBIT 2**

### **GENERAL DESCRIPTION OF THE LEXINGTON INSTITUTIONAL NETWORK**

---

RCN provides the fiber optic cable strands that establish the institutional network ("I-NET") for the Town of Lexington (the "Town"). Two single mode fiber optic strands connect each building specified by the Town to the RCN hub using a star network topology. One fiber is used for upstream transmission from the I-NET location to the hub. The second fiber is used for downstream transmission. This second fiber can be optically split, and therefore shared, with other locations on the I-NET. The fibers are used exclusively for the I-NET.

In normal use, the I-Net operates as a Gigabit Ethernet system, with both fibers at a location attached to the local Ethernet in that building. A complete Ethernet connection between two buildings is provided by the main switch located at the Hadley Public Services Building. Ethernet packets sent from one I-Net location travel over the local Ethernet carrying addressing information allowing them to flow onto the upstream I-Net strand at that location, then to the main switch, where the address portion determines the I-Net location for which the packets are bound. A temporary connection is made through the switch from the incoming upstream fiber to the outgoing downstream fiber, and the packets are thus sent to the destination I-Net location and onto its local Ethernet. Internet access is also provided at the main switch location: The switch makes a connection from one I-Net location to the Internet access point instead of to a destination I-Net location.

For a pair of I-Net locations (or one I-Net location to the Internet) in frequent communication, the switch connection can be maintained for a long time, or even permanently. This saves time in connection setup, but does tie up scarce resources, i.e., the switch connections. Normally, the switch connection is broken down once the communication is terminated.

### **207 CMR 10.00 BILLING AND TERMINATION OF SERVICE**

---

#### **10.01: Billing Practices Notice**

Every cable television operator shall give written notice of its billing practices to potential subscribers before a subscription agreement is reached. Such notice shall include practices relating to the frequency and timing of bills, payment requirements necessary to avoid account delinquency, billing dispute resolution procedures and late payment penalties.

A copy of the cable television operator's billing practices notice, work order and sample subscriber bill shall be filed by March 15th of each year with the Commission, the issuing authority, and the company's local office, where they shall be available for public inspection. If an operator amends its billing practices notice, work order or subscriber bill after submitting the annual filing, it shall file copies of the amendments with the Commission, the issuing authority and the company's local office.

At least 30 days prior to implementing a change of one of its billing practices, the cable television operator shall notify in writing the Commission, the issuing authority and all affected subscribers of the change and include a description of the changed practice.

Statements about billing practices in work orders, marketing, materials and other documents shall be consistent with the billing practices notice.

#### **10.02: Services, Rates and Charges Notice**

The cable television operator shall give notice of its services, rates and charges to potential subscribers before a subscription agreement is reached.

At least 30 days prior to implementing an increase in one of its rates or charges or a substantial change in the number or type of programming services, the operator shall notify, in writing, the Commission, the issuing authority and all affected subscribers of the change and include a description of the increased rate or charge. The notice shall list the old and new rate or charge and, if applicable, the old and new programming services provided.

Every cable television operator shall fully disclose in writing all of its programming services and rates, upon request from a subscriber.

Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.

Every cable television operator shall provide written notice of the charge, if any, for service visits and under what circumstances such charge will be imposed, upon request from a subscriber.

A copy of the cable operator's programming services, rates and charges shall be filed by March 15th of each year with the Commission, the issuing authority and the company's local office where it shall be made available for public inspection. If an operator amends its notice after the annual filing, it shall file a copy of the amendment with the Commission, the issuing authority and the company's local office.

A cable operator shall not charge a subscriber for any service or equipment that the subscriber has not affirmatively requested by name. This provision, however, shall not preclude the addition or deletion of a specific program from a service offering, the addition or deletion of specific channels from an existing tier of service, or the restructuring or division of existing tiers of service that do not result in a fundamental change in the nature of an existing service or tier of service.

### **10.03: Form of Bill**

The bill shall contain the following information in clear, concise and understandable language and format:

The name, local address and telephone number of the cable television operator. The telephone number shall be displayed in a conspicuous location on the bill and shall be accompanied by a statement that the subscriber may call this number with any questions or complaints about the bill or to obtain a description of the subscriber's rights under 207 CMR 10.07 in the event of a billing dispute;

the period of time over which each chargeable service is billed including prorated periods as a result of establishment and termination of service;

the dates on which individually chargeable services were rendered or any applicable credits were applied;

separate itemization of each rate or charge levied or credit applied, including, but not be limited to, basic, premium service and equipment charges, as well as any unit, pay-per-view or per item charges;

the amount of the bill for the current billing period, separate from any prior balance due;

The date on which payment is due from the subscriber.

Cable operators may identify as a separate line item of each regular subscriber bill the following:

The amount of the total bill assessed as a franchise fee and the identity of the franchising authority to whom the fee is paid;

The amount of the total bill assessed to satisfy any requirements imposed on the cable operator by the franchise agreement to support public, educational, or governmental channels or the use of such channels;

The amount of any other fee, tax, assessment, or charge of any kind imposed by any governmental authority on the transaction between the operator and the subscriber. In order for a governmental fee or assessment to be separately identified under 207 CMR 10.03, it must be directly imposed by a governmental body on a transaction between a subscriber and an operator.

All itemized costs shall be direct and verifiable. Each cable operator shall maintain a document in its public file which shall be available upon request, that provides the accounting justification for all itemized costs appearing on the bill.

#### **10.04: Advance Billing and Issuance of Bill**

In the absence of a license provision further limiting the period of advance billing, a cable operator may, under uniform nondiscriminatory terms and conditions, require payment not more than two months prior to the last day of a service period.

A cable subscriber may voluntarily offer and a cable operator may accept advance payments for periods greater than two months.

Upon request, a cable television operator shall provide subscribers with a written statement of account for each billing period and a final bill at the time of disconnection.

#### **10.05: Billing Due Dates, Delinquency, Late Charges and Termination of Service**

Subscriber payment is due on the due date marked on the bill, which shall be a date certain and in no case a statement that the bill is due upon receipt. The due date shall not be less than five business days following the mailing date of the bill.

A subscriber account shall not be considered delinquent unless payment has not been received by the company at least 30 days after the bill due date.

The following provisions shall apply to the imposition of late charges on subscribers:

A cable television operator shall not impose a late charge on a subscriber unless a subscriber is delinquent, the operator has given the subscriber a written late charge notice in a clear and conspicuous manner, and the subscriber has been given at least eight business days from the date of delinquency to pay the balance due.

A charge of not more than 5 percent of the balance due may be imposed as a one-time late charge.

No late charge may be assessed on the amount of a bill in dispute.

A cable television operator shall not terminate a subscriber's service unless the subscriber is delinquent, the cable operator has given the subscriber a separate written notice of termination in a clear and conspicuous manner, and the subscriber has been given at least eight business days from the mailing of the notice of termination to pay the balance due.

A notice of termination shall not be mailed to subscribers until after the date of delinquency.

A cable television operator shall not assess a late charge on a bill or discontinue a subscriber's cable television service solely because of the nonpayment of the disputed portion of a bill during the period established by 207 CMR 10.07 for registration of a complaint with the operator or during the process of a dispute resolution mechanism recognized under 207 CMR 10.07.

Any charge for returned checks shall be reasonably related to the costs incurred by the cable company in processing such checks.

#### **10.06: Charges for Disconnection or Downgrading of Service**

A cable television operator may impose a charge reasonably related to the cost incurred for a downgrade of service, except that no such charge may be imposed when:

A subscriber requests total disconnection from cable service; or

A subscriber requests the downgrade within the 30 day period following the notice of a rate increase or a substantial change in the number or type of programming services relative to the service (s) in question.

If a subscriber requests disconnection from cable television service prior to the effective date of an increase in rates, the subscriber shall not be charged the increased rate if the cable television operator fails to disconnect service prior to the effective date. Any subscriber who has paid in advance for the next billing period and who requests disconnection from service shall receive a prorated refund of any amounts paid in advance.

#### **10.07: Billing Disputes**

Every cable television operator shall establish procedures for prompt investigation of any billing dispute registered by a subscriber. The procedure shall provide at least 30 days from the due date of the bill for the subscriber to register a complaint. The cable television operator shall notify the subscriber of the result of its investigation and give an explanation for its decision within 30 working days of receipt of the complaint.

The subscriber shall forfeit any rights under 207 CMR 10.07 if he or she fails to pay the undisputed balance within 30 days.

Any subscriber in disagreement with the results of the cable television operator's investigation shall promptly inquire about and take advantage of any complaint resolution mechanism, formal or informal, available under the license or through the issuing authority before the Commission may accept a petition filed under 207 CMR 10.07(4).

The subscriber or the cable television operator may petition the Commission to resolve disputed matters within 30 days of any final action. Final action under 207 CMR 10.07(3) shall be deemed to have occurred 30 days after the filing of a complaint.

Upon receipt of a petition, the Commission may proceed to resolve the dispute if all parties agree to submit the dispute to the Commission and be bound by the Commission's decision and the Commission obtains a statement signed by the parties indicating that agreement. In resolving the dispute, the Commission may receive either written or oral statements from the parties, and may conduct its own investigation. The Commission shall then issue a decision based on the record and the parties shall receive written notification of the decision and a statement of reasons therefor.

#### **10.08: Security Deposits**

A cable operator shall not require from any cable subscriber a security deposit for converters or other equipment in excess of the cost of the equipment.

The cable operator shall pay interest to the cable subscriber at a rate of 7% per year for any deposit held for six months or more, and such interest shall accrue from the date the deposit is made by the cable subscriber. Interest shall be paid annually by the cable operator to the cable subscriber, either as a direct payment or as a credit to the cable subscriber's account.

Within 30 days after the return of the converter or other equipment, the cable operator shall return the security deposit plus any accrued interest to the cable subscriber, either as a direct payment or as a credit to the cable subscriber's account.

### FCC CUSTOMER SERVICE OBLIGATIONS

#### TITLE 47--TELECOMMUNICATION

---

#### CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION

#### PART 76--CABLE TELEVISION SERVICE

#### Subpart H--General Operating Requirements

#### Sec. 76.309 Customer Service Obligations

(a) A cable franchise authority may enforce the customer service standards set forth in paragraph (c) of this section against cable operators. The franchise authority must provide affected cable operators ninety (90) days written notice of its intent to enforce the standards.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability--

(i) The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week.

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering

Machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety (90) percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety-five (95) percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. "Standard" installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than 24 hours after the interruption becomes Known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

(iii) The "appointment window" alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four-hour time block during normal business hours. (The operator may schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.)

(iv) An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

(v) If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time that is convenient for the customer.

(3) Communications between cable operators and cable subscribers--

(i) Notifications to subscribers--

(A) The cable operator shall provide written information on each of

the following areas at the time of installation of service, at least annually to all subscribers, and at any time upon request:

- (1) Products and services offered;
- (2) Prices and options for programming services and conditions of subscription to programming and other services;
- (3) Installation and service maintenance policies;
- (4) Instructions on how to use the cable service;
- (5) Channel positions programming carried on the system; and,
- (6) Billing and complaint procedures, including the address and telephone number of the local franchise authority's cable office.

(B) Customers will be notified of any changes in rates, programming services or channel positions as soon as possible in writing. Notice must be given to subscribers a minimum of thirty (30) days in advance of such changes if the change is within the control of the cable operator. In addition, the cable operator shall notify subscribers thirty (30) days in advance of any significant changes in the other information required by paragraph (c)(3)(i)(A) of this section. Notwithstanding any other provision of Part 76, a cable operator shall not be required to provide prior notice of any rate change that is the result of a regulatory fee, franchise fee, or any other fee, tax, assessment, or charge of any kind imposed by any Federal agency, State, or franchising authority on the transaction between the operator and the subscriber.

(ii) Billing--

(A) Bills will be clear, concise and understandable. Bills must be fully itemized, with itemizations including, but not limited to, basic and premium service charges and equipment charges. Bills will also clearly delineate all activity during the billing period, including optional charges, rebates and credits.

(B) In case of a billing dispute, the cable operator must respond to a written complaint from a subscriber within 30 days.

(iii) Refunds--Refund checks will be issued promptly, but no later than either--

(A) The customer's next billing cycle following resolution of the request or thirty (30) days, whichever is earlier, or

(B) The return of the equipment supplied by the cable operator if service is terminated.

(iv) Credits--Credits for service will be issued no later than the customer's next billing cycle following the determination that a credit is warranted.

(4) Definitions--

(i) Normal business hours--The term "normal business hours" means those hours during which most similar businesses in the community are open to serve customers. In all cases, "normal business hours" must include some evening hours at least one night per week and/or some weekend hours.

Those conditions which are ordinarily within the control of the cable operator include, but are not limited to, special promotions, pay-per-view events, rate increases, regular peak or seasonal demand periods, and maintenance or upgrade of the cable system.

(iii) Service interruption--The term "service interruption" means the loss of picture or sound on one or more cable channels.
