

To whom it may concern,

I have spent my childhood On the Cape and live now in Cambridge, MA because I LOVE the cape. Please don't put a wind farm in the middle of the sound. I worry about the birds' migration patterns, the unnatural sound and the hideous visual effects.

Also, if "they" build it, lose money (despite the taxpayers subsidy), then abandon it will they remove it? or is that on the taxpayer too?

I am environmentally concerned but not completely against this wind farm because of it's location. Please, there must be a better spot.

Janet Lloyd
Cambridge, MA
