Fields(s) of Expertise for this position:

Answer the following questions in the spaces provided:

a. Explain your duties and responsibilities in this Position. Describe how these duties and responsibilities involved work related to site assessments, risk characterizations, and/or remediation activities at contaminated sites. Describe the level of your duties and responsibilities within this Position at your company or organization.

b. Demonstrate how you were personally responsible for the evaluation and selection of scientific or technical methods for conducting site assessments, risk characterizations, and/or remediation activities at contaminated sites. Describe your role, the types of methods you selected, and the bases for your selections.

c. Describe the types and levels of responsibilities of the scientific and/or technical professionals you coordinated or supervised while conducting assessment, risk characterization, and/or remediation activities. What level of authority and degree of control did you assume over their work during this Position? What was the average size of teams you coordinated or supervised?

d. Describe the level of responsibility and independent judgment you exercised in this Position. Describe the types of conclusions you reached and the extent to which you used those conclusions in making recommendations to your supervisors or clients regarding response actions at contaminated sites. Describe the extent of involvement of your supervisor(s) in your conclusions and recommendations. How were your decision-making responsibilities differentiated from those of your supervisor(s)?
