COVID-19 Vaccine Safety

- Vaccine will not be distributed in Massachusetts until the FDA determines the vaccine is safe
- Vaccines go through more testing than any other pharmaceuticals, including extensive testing in clinical trials
- The FDA and the CDC’s Advisory Committee on Immunization Practices (ACIP) ensure any vaccine is both safe and effective
- Infectious disease leads in Massachusetts’ academic medical centers plan to review the EUA data and provide an independent opinion about their safety and efficacy
- COVID-19 Vaccination Provider Agreement requires reporting moderate and severe adverse event to the Vaccine Adverse Event Reporting System (VAERS)
Equitable Distribution of COVID-19 Vaccine

The Advisory Group took a strong stance on equity:

• Prioritizes all COVID-facing individuals in healthcare settings, including food service and environmental (not just doctors and nurses) as well as home health workers

• 20% additional vaccine allocated to communities that have experienced disproportionate COVID burden and high social vulnerability
