HAMP Eligibility Criteria

Criteria	Guideline	HAMP Tier 1	HAMP Tier 2
Servicer, Investor, Insurer	Guidance applies to MHA-participating servicers of mortgages not owned, guaranteed, or insured by Fannie Mae, Freddie Mac, FHA, VA, or USDA.	✓	✓
Origination	The mortgage loan is a first lien originated on or before January 1, 2009.	✓	✓
Unpaid Principal Balance Limits	The unpaid principal balance, prior to capitalization, must be less than or equal to: <ul style="list-style-type: none">■ \$729,750 for a one-unit property■ \$934,200 for a two-unit property■ \$1,129,250 for a three-unit property■ \$1,403,400 for a four-unit property	✓	✓
Property Condition	The property securing the mortgage loan has not been condemned.	✓	✓
Financial Hardship	The borrower must be able to document a financial hardship.	✓	✓

HAMP Eligibility Criteria

Criteria	Guideline	HAMP Tier 1	HAMP Tier 2
"Natural" Persons	The borrower is a "natural" person. Mortgage loans made to business entities are not eligible for assistance under HAMP.	✓	✓
Occupancy	The mortgage loan is secured by a single family property that is occupied by the borrower as his or her principal residence.	✓	✓
Occupancy	The mortgage loan is secured by a single-family property that is used by the borrower for rental purposes only and not occupied by the borrower, whether as a principal residence, second home, or vacation home. Borrower may not own more than five single-family properties in addition to the principal residence.	---	✓

HAMP Eligibility Criteria

Criteria	Guideline	HAMP Tier 1	HAMP Tier 2
Delinquency	The mortgage loan securing the principal residence is not delinquent, but default is reasonably foreseeable.	✓	✓
Delinquency	The mortgage loan securing the principal residence is delinquent.	✓	✓
Delinquency	The mortgage loan securing the rental property is delinquent.	---	✓

HAMP Eligibility Criteria

Criteria	Guideline	HAMP Tier 1*	HAMP Tier 2
Minimum Payment Ratio	The borrower's monthly mortgage payment, PITIA, (including principal, interest, taxes, insurance, and when applicable, association fees, existing escrow shortages) is greater than 31 % of the borrower's verified monthly gross income.	✓	✓
Minimum Payment Ratio	The borrower's monthly mortgage payment, PITIA is less than or equal to 31% of the borrower's verified monthly gross income.	---	✓

*Only single family properties occupied by borrowers as **principal residences** qualify for HAMP Tier 1.

HAMP Eligibility Criteria

Criteria	Guideline	HAMP Tier 1*	HAMP Tier 2
Previous HAMP Trial or Modification	The mortgage loan has never received a Trial Period Plan, or TPP, or been modified under HAMP.	✓	✓
Previous HAMP Tier 1 Trial	The mortgage loan received a HAMP Tier 1 TPP on which the borrower defaulted. (Tier 2 TPP must be at least 10% less than failed Tier 1 TPP.)	---	✓
Previous HAMP Tier 1 Modification	The mortgage loan received a HAMP Tier 1 permanent modification on which the borrower defaulted. (Additional eligibility criteria include: demonstrable change in circumstances or 12 or more months since effective date of HAMP Tier 1 modification.)	---	✓
Previous HAMP Tier 2 Trial or Modification	The mortgage loan received a HAMP Tier 2 TPP or permanent modification on which the borrower defaulted.	---	---

*Only single family properties occupied by borrowers as **principal residences** qualify for HAMP Tier 1.

HAMP Eligibility Criteria

Modification Limitations

- An individual, as a borrower or co-borrower, may receive only one modification under HAMP Tier 1.
- An individual, as a borrower or co-borrower, may receive up to a total of three permanent modifications, of three different mortgages under HAMP Tier 2.

Base NPV Model Overview

Three Key Purposes

1. Providing consistency in NPV calculation for HAMP.
2. Helping the industry move toward a more standard process for evaluating the NPV of mortgages for the purpose of making modifications.
3. Specifying a precise method for determining NPV with the goal of providing a base that any servicer can use or customize into a proprietary NPV model that satisfies all of the MHA program's methodological requirements.

Base NPV Model Overview

Functionality

Determines the expected economic value of the loan for both modification and no-modification scenarios.

The Base NPV Model

NPV Positive = Value Mod is greater than Value No Mod.

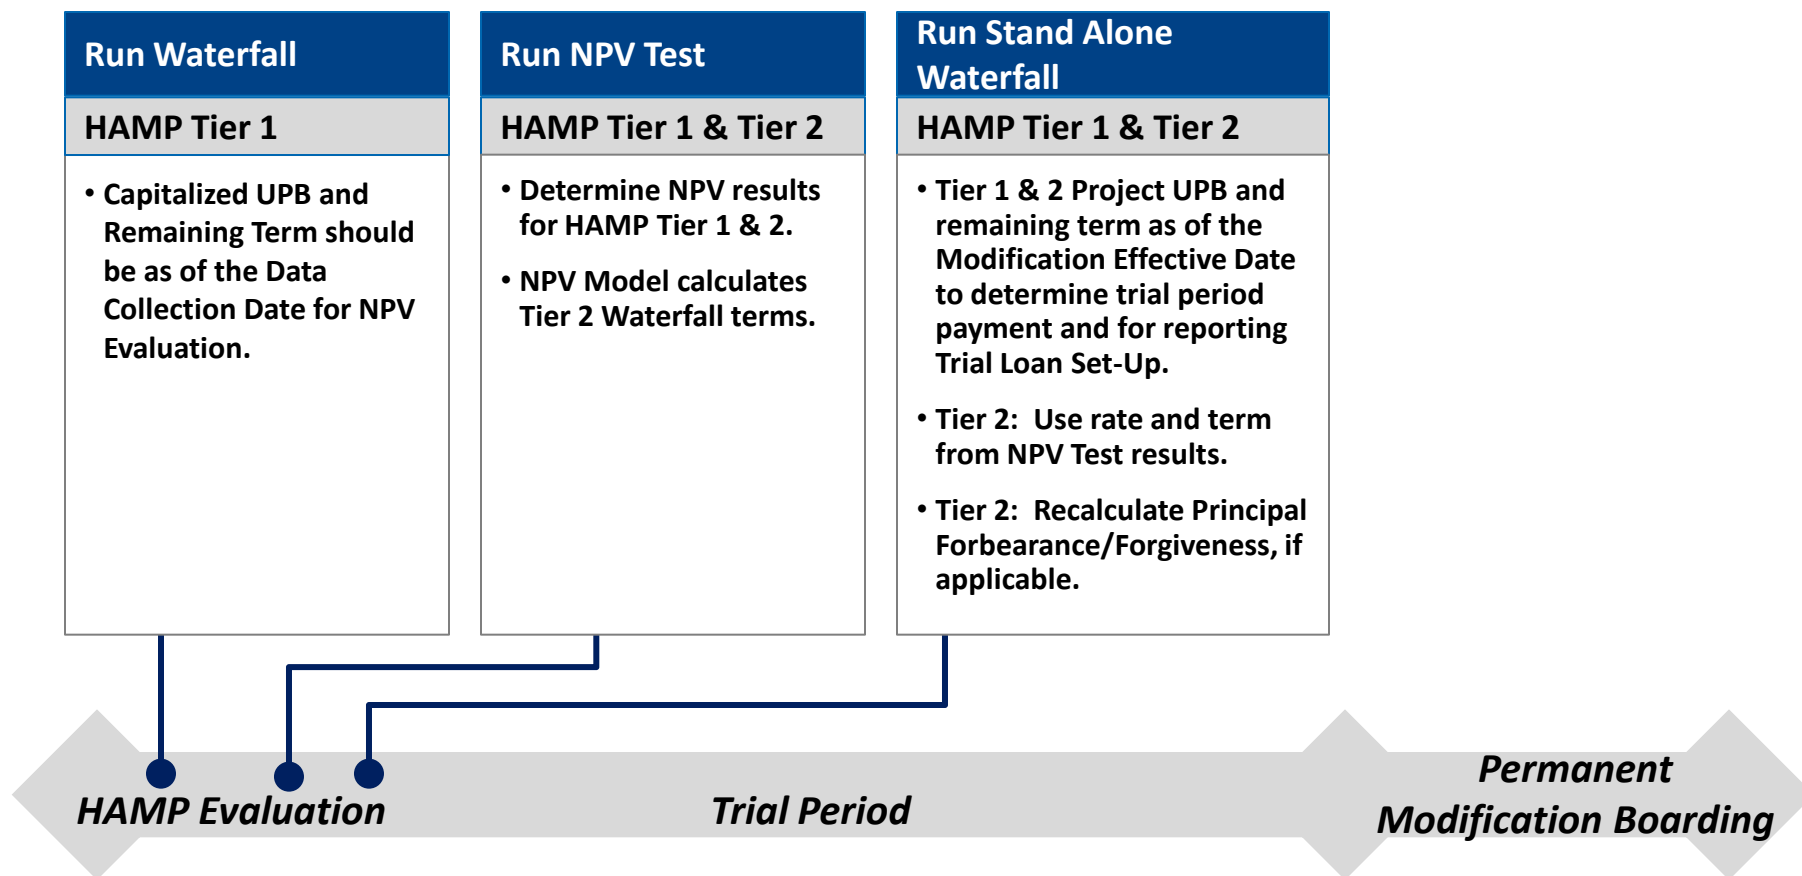

NPV Negative = Value No Mod is greater than Value Mod.

The Base NPV Model 5.0 automatically evaluates borrowers for both HAMP Tier 1 and Tier 2, providing results for both.

- **For HAMP Tier 1**, the model calculates the NPV results using the servicer-provided terms of the Standard and Alternative Modification Waterfalls.
- **For HAMP Tier 2**, the model generates the Standard and Alternative Modification Waterfall terms AND calculates the NPV results.

Base NPV Model Overview

Timeline

NPV evaluation is not permitted after the borrower is approved for trial modification

Standard and Alternative Modification Waterfalls

HAMP Tier 1

Standard Modification Waterfall – HAMP Tier 1

Goal is to reach target monthly mortgage payment ratio of 31%!

Step 1 Capitalize

Capitalize accrued interest, out-of-pocket servicing expenses.

Step 2 Reduce the Rate

Reduce the borrower's current rate to as low as two percent.

Step 3 Extend the Term

Extend the term without exceeding 480 months.

Step 4 Principal Forbearance

If necessary, forbear principal.

Alternative Modification Waterfall – HAMP Tier 1

Includes Principal Reduction Alternative (PRA) for loans with a MTMLTV ratio of 115% or higher!

Step 1 Capitalize

Step 2 PRA

Step 3 Reduce the Rate

Step 4 Extend the Term

Step 5 Principal Forbearance

Standard and Alternative Modification Waterfalls

HAMP Tier 2

Capitalization	Outstanding UPB + Accrued Interest + Out-of-pocket Servicing Expenses.	
Interest Rate Adjustment	PMMS Rate + Risk Adjustment (expressed in basis points).	
Term Extension	480 months and re-amortize from the Data Collection Date.	
Principal Forbearance/ Forgiveness	<p>If pre-modification MTMLTV ratio is greater than 115%. Forbear or forgive an amount equal to the lesser of:</p> <ul style="list-style-type: none">• A post-modification MTMLTV ratio of 115%• 30% of the post-modification UPB.	Steps performed by NPV Model
Affordability Requirements	<ol style="list-style-type: none">1) Modified principal and interest (P&I) payment must be reduced by at least the pre-modification P&I payment.2) Post-modification DTI falls in an Acceptable DTI Range (25% – 42%).	Calculated by NPV Model
Alternative Modification Waterfall	Principal Forbearance is replaced with PRA.	

NPV Model Inputs

Required	Conditional	Optional
Investor Code	GSE Loan Number	Amortization Term at Origination
Servicer Loan Number	Next ARM Reset Rate	Interest Rate at Origination
HAMP Servicer Number	ARM Reset Date	LTV at Origination (1 st lien only)
Data Collection Date	Current Co-borrower Credit Score	MTMLTV
Property – Number of Units	Modification Fees	Advances/Escrow
First Payment Date at Origination	PRA – Unpaid Principal Balance After Modification	Borrower's Total Monthly Obligations
Current Borrower Credit Score	PRA - Interest Rate After Modification	
Product before Modification	PRA – Amortization Term After Modification	
Remaining Term (# of Payment Months Remaining)	PRA – Principal and Interest Payment After Modification	
Unpaid Principal Balance Before Modification	PRA – Principal Forbearance Amount	
Interest Rate Before Modification	PRA – Principal Write-Down (Forgiveness)	
Principal and Interest Payment Before Modification	Maximum Months Past Due in past 12 Months	

NPV Model Inputs

HAMP Tier 1 Specific

Required Fields for HAMP Tier 1 Evaluation (Standard Modification Waterfall)

Unpaid Principal Balance After Modification (Net of Forbearance and Principal Reduction)

Interest Rate After Modification

Amortization Term After Modification

P & I Payment after Modification

Principal Forbearance Amount

Principal Forgiveness Amount

Required Field for HAMP Tier 1 Evaluation (Alternative Modification Waterfall) (Post-arrearage MTMLTV > 115%)

PRA Waterfall – UPB After Modification (Net Forbearance & PRA Principal Reduction)

PRA Waterfall – Interest Rate After Modification

PRA Waterfall – Amortization Term after Modification

PRA Waterfall – P&I Payment after Modification

PRA Waterfall – Principal Forbearance Amount

PRA Waterfall – Principal Forgiveness Amount

NPV Model Inputs

New Input Fields

Required	Conditional	Optional
Occupancy Eligibility	Primary Residence Total Housing Expense	Tier 2 Non-PRA Forgiveness Amount
Capitalized UPB Amount	Property Monthly Gross Rental Income	Tier 2 Mod Interest Rate Override
Tier 2 Investor Override Flag		Tier 2 Mod Term Override
		Tier 2 Mod Forbearance Amount Override
		Tier 2 PRA Principal Forgiveness Override

Performing the NPV Test

Base NPV Model Spreadsheet

The Net Present Value button allows you to navigate through the spreadsheet.

Remember: Macros must be enabled in order for the Base NPV Model Spreadsheet to function!

Performing the NPV Test

Entering data into the Base NPV Model Spreadsheet Tool

The screenshot displays the Base NPV Model Spreadsheet Tool interface. A red rounded rectangle highlights the top navigation area containing four buttons: **Validate** (green), **Clear** (red), **Home** (blue), and **Backup** (blue). Below these buttons, a table lists the spreadsheet columns with their corresponding header colors. A legend box in the bottom right corner explains the color coding: grey for Required, blue for Conditional, and orange for Optional.

	A	B	C	D	E	F	G	H	I	J	K	L	M
	Investor Code	Servicer Loan Number	GSE Loan Number	HAMP Servicer Number	Data Collection Date	Property - Number of Units	First Payment Date at Origination	Unpaid Principal Balance at Origination	Amortization Term at Origination	Interest Rate at Origination	LTV at Origination (1st Lien only)	Product before Modification	Next Rese

	Validate	Clear	Home	Backup
	Verifies all required fields are entered and formatted correctly, then prepares the data file for upload.	Erases all data from spreadsheet screen. Use only AFTER data submission.	Sends you back to the main navigation screen.	Creates a copy of your data in a new file, which can be saved.

Column Header Color	Instructions
Grey	= Required
Blue	= Conditional
Orange	= Optional

Performing the NPV Test

Validating the Spreadsheet

The screenshot shows the NPV Model tool interface. On the left, there is a table with columns: 'Investment', 'Servicer Loan Number', and 'GSE Loan Number'. A red arrow points to the 'Validate' button in the top left corner. To the right of the table are buttons for 'Home' and 'Backup'. A dialog box titled 'NPV Model' is open, displaying a 'Validation Successful' message. The message states: 'Your data has validated and is ready for submission to the Home Affordable Modification Program. To ensure security of your data, you will need to upload your submission through the NPV Transaction Portal. Shown below is the location and file name of the file you need to submit. You can copy this and paste it into the upload screen on the NPV Transaction portal:'. Below this text, the file path 'C:\Documents and Settings\Data\2009\05\HMP_NPV_2009-05-29_12-26-23_BB74B36B.xml' is highlighted with a red box. Below the file path, it says '(To copy this information, highlight it and press Control-C.)'. At the bottom of the dialog box, there are 'Cancel' and 'OK' buttons, with the 'OK' button highlighted by a red box.

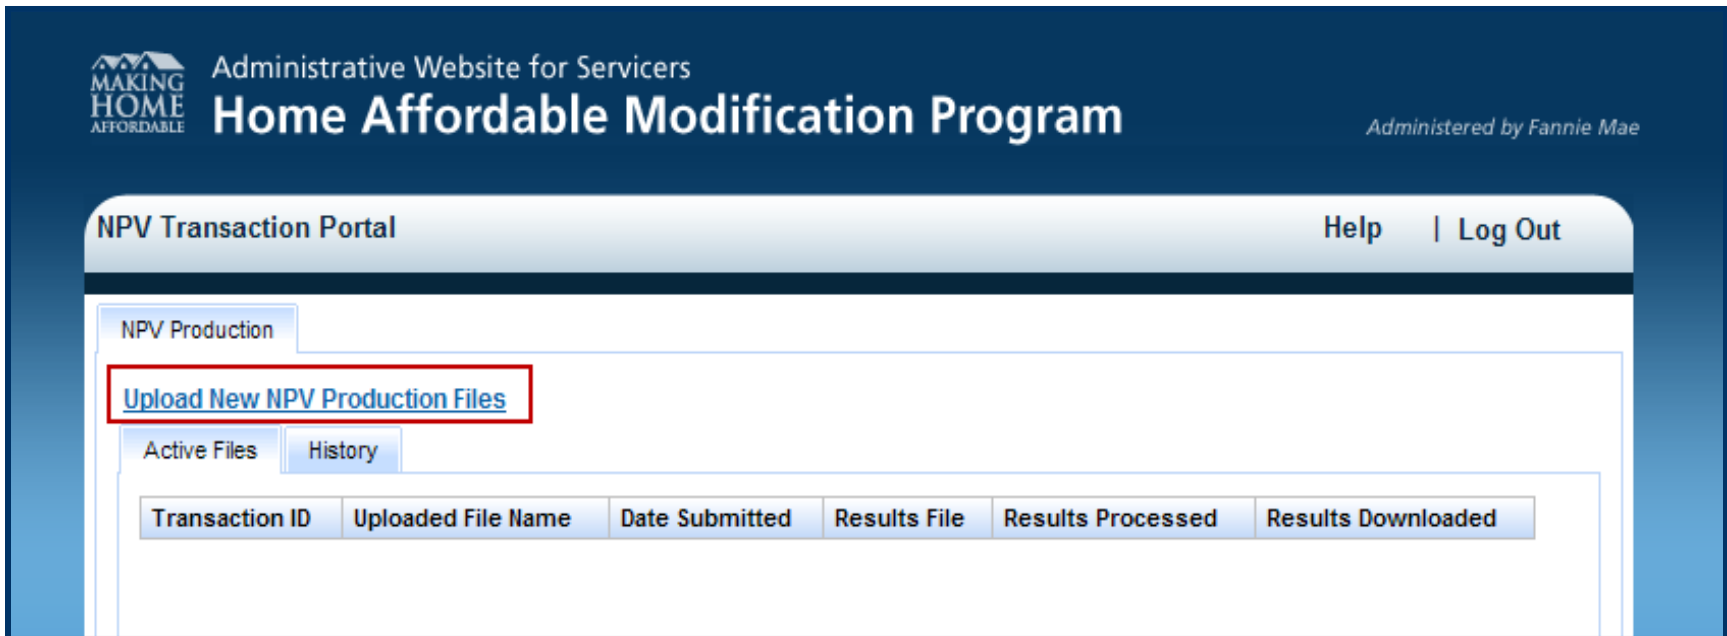

Click **Validate** to prepare the file for submission into the NPV Transaction portal

If any required fields are incomplete, the Base NPV Model tool generates an error message and highlights the incomplete row. If you receive a validation error message, complete the required data field(s) and click **VALIDATE** again.

Performing the NPV Test

Submitting the Validated File to the NPV Transaction Portal

The screenshot shows the 'Administrative Website for Servicers' for the 'Home Affordable Modification Program', administered by Fannie Mae. The page features a 'NPV Transaction Portal' header with 'Help' and 'Log Out' links. Below the header, the 'NPV Production' tab is selected. A red box highlights the 'Upload New NPV Production Files' link. Below this link are 'Active Files' and 'History' tabs. A table with the following columns is visible: Transaction ID, Uploaded File Name, Date Submitted, Results File, Results Processed, and Results Downloaded.

Transaction ID	Uploaded File Name	Date Submitted	Results File	Results Processed	Results Downloaded
----------------	--------------------	----------------	--------------	-------------------	--------------------

To submit your file for processing, select the “NPV Production” tab and click the “Upload New NPV Production Files” link.

NPV Model Outputs

HAMP Tier 2 Modification Terms

Tier 2 Principal Forbearance Amount

The principal forbearance amount under the HAMP Tier 2 Standard Modification Waterfall.

Tier 2 Non-PRA Principal Forgiveness Amount

The Non-PRA principal forgiveness amount under HAMP Tier 2.

Tier 2 Mod Rate

The interest rate after modification.

Tier 2 Mod Term

The term after modification (480 months).

Tier 2 Mod Payment

The modified principal and interest payment.

Tier 2 Mod UPB

The unpaid principal balance that is net of any forgiveness or forbearance under the HAMP Tier 2 Standard Modification Waterfall.

TIER2 Forbearance Amount	TIER2 Non-PRA Forgiveness Amount	TIER2 Mod Rate	TIER2 Mod Term	TIER2 Mod Payment	TIER2 Mod UPB

NPV Model Outputs

HAMP Tier 2 Modification Results

Tier 2 Value No Mod

NPV value of not modifying the loan.

Tier 2 Value Mod

NPV value of modifying the loan.

Tier 2 – NPV Test

1. Positive: Value for the modification is greater than the value without a modification.
2. Negative: Value for the modification is not greater than the value with a modification.
3. Ineligible – DTI: The post modification DTI is outside of Acceptable Range of 25-42%.
4. Ineligible – Payment: The post modification P&I payment does not represent at least a 10% reduction compared to the pre modification P&I payment.
5. Ineligible – DTI & Payment: The modification did not satisfy neither of the affordability requirements (Acceptable DTI Range & 10% P&I reduction).

Error Codes

New

Code	Description	HAMP Tier 1	HAMP Tier 2
72	Tier 2 Interest Rate Override is outside the range of 0. 25%		✓
73	Missing Tier 2 Override Flag		✓
74	Tier 2 Forbearance amount override is less than \$0 or greater the capitalized UPB amount		✓
75	Tier 2 PRA Forgiveness amount override is less than \$0 or greater than the capitalized UPB amount		✓
76	Tier 2 Modification Term Override is less than the remaining term or greater than 600 months		✓
77	Missing or negative Primary Residence Total Housing Expense		✓
78	Missing or negative Property Monthly Gross Rental Income or less than \$0		✓
79	Tier 2 Non-PRA Forgiveness amount is less than \$0 or greater than capitalized UPB		✓
80	Missing Occupancy Eligibility	✓	✓
m	Ineligible– Loans that are 0 or 1 month past due but not in imminent default	✓	✓
n	Ineligible – Non-owner-occupied modifications that are less than 2 months past due are not eligible		✓
o	Capitalized UPB provided is inconsistent with the amount calculated from the sum of UPB After Modification, Principal Forbearance and Forgiveness amount	✓	
P	Tier 2 Investor Override Flag is Y and is missing at least one Investor Override fields is populated		✓
q	Missing Capitalized UPB or Capitalized UPB provided is less than the pre-modification UPB	✓	✓
r	Ineligible for Tier 2 modification – GSE loans with Occupancy Eligibility		✓
S	Tier 2 NPV evaluation cannot be run with and NPV date prior to 6/1/2012		✓

Error Codes

Inconsistent P&I

Error Code N:j

Inconsistent P&I calculation

- Under the Standard Modification Waterfall, the P&I After Modification provided is **inconsistent** with the P&I After Modification calculated from the provided UPB After Modification, Interest Rate After Modification, Amortization Term After Modification.

Sample Output

G	H	I	J	K	L
Value Mod	NPV Test	NPV Run Successful?	Run Date	Code Version	Freddie PMN
.		 N: j	12/12/2011	Base_NPV_V4.03	0.0455

Source: For a complete list of error codes, refer to the User Guide – Home Affordable Modification Program Base Net Present Value Model Spreadsheet Tool v.5.0 found on secured site on HMPadmin.com

Error Codes

Resolution – Inconsistent P&I

Re-calculate the P&I using Inputs provided

- Servicer provided UPB after Modification = \$143,750.72
- Interest Rate after Modification = 2.00%
- Amortization Term After Modification = 480 months
- P&I After Modification should equal \$435.31 not \$500.00

Correction

\$129,000.00
Correct value for
(PRA) Forbearance

\$320,019.31
Total Debt
for PRA

Error Codes

Inaccurate Amortization Term

Error Code 54

Inaccurate Amortization Term After Modification

- Amortization term after modification is greater than the maximum of (480 months or the remaining term) or
- Amortization term after modification is less than the remaining term.

Sample Output

Waterfall Test	De minimis Test	Forbearance Flag	HAMP Value No Mod	HAMP Value Mod	HAMP NPV Test	NPV Run Successful?	Run Date	Code Version	Freddie PMMS Rate
10000004		-	-			N: 54	6/3/2012	Base NPV V5.0	0.0449
10000005							2/29/2012	Base NPV V5.0	0.0449

Error Codes

Resolution - Inaccurate Amortization Term

O	P	Q	R	S	T	U	V
Remaini ng Term (# Payment Months Remaini ng)	Unpaid Principal Balance Before Modificat ion	Interest Rate Before Modificat ion	Principal and Interest Payment Before Modificat ion	Current Borrower Credit Score	Cu C bor Cr Se		
296	173350	0.06089	1132.85	566			

AK	AL	AM	AN	AO	AP	AQ	AR
Unpaid Principal Balance After Modificat ion (Net of Forbeara nce & Principal Reductio n)	Interest Rate After Modifica tion	Amortiza tion Term After Modificat ion	Principal and Interest Payment After Modificat ion	Principal Forbeara nce Amount	Principal Forgiven ess Amount	Property Valuatio n Type	NPV Date
74756.72	6.02	293	226.38	190871.6	0	2	6/1/2012

Note: A red arrow points from the value 293 in the AM column of the second table to the value 296 in the O column of the first table, indicating a discrepancy where the amortization term is less than the remaining term.

- This example illustrates that Error 54 was triggered because the amortization term after modification is less than the remaining term.
- To resolve this error, check to make sure that all the modification terms were calculated as of the Data Collection Date, not the Modification Effective Date.

Error Codes

Inconsistent Capitalized UPB

Error Code

0

Inconsistent Capitalized UPB

- Capitalization UPB provided is inconsistent with the amount calculated from the sum UPB After Modification (Net of Forbearance & Principal Reduction), Principal Forbearance Amount and Principal Forgiveness Amount.

Sample Output

HAMP Servicer ID	Servicer Loan Number	Waterfall Test	De minimis Test	Forbearance Flag	HAMP Value No Mod	HAMP Value Mod	HAMP NPV Test	NPV Run Successful?	Run Date	Code Version	Freddie PMMS Rate
1.23E+08	10000003			-				N: o	6/3/2012	Base NPV V5.0	0.0449
1.23E+08	10000005							N: o	2/20/2012	Base NPV V5.0	0.0449

Source: For a complete list of error codes, refer to the User Guide – Home Affordable Modification Program Base Net Present Value Model Spreadsheet Tool v.5.0 found on secured site on HMPadmin.com

Error Codes

Resolution - Inconsistent Capitalized UPB

AK	AL	AM	AN	AO	AP	AQ	AR	AS	AT	AU	AV	AW	AX	AY	AZ	BA
Unpaid Principal Balance After Modification (Net of Forbearance & Principal Reduction)	Interest Rate After Modification	Amortization Term After Modification	Principal and Interest Payment After Modification	Principal Forbearance Amount	Principal Forgiveness Amount	Property Valuation Type	NPV Date	PRA Waterfall - Unpaid Principal Balance After Modification (Net of PRA Forbearance & PRA Principal Reduction)	PRA Waterfall - Interest Rate After Modification	PRA Waterfall - Amortization Term After Modification	PRA Waterfall - Principal and Interest Payment After Modification	PRA Waterfall - Principal Forbearance Amount	PRA Waterfall - Principal Forgiveness Amount	Max Months Past Due in Past 12 Months	Occupancy Eligibility	Capitalized UPB Amount
426072.07	0.02	480	1290.26	106100	0	2	6/1/2012	411700	0.02	455	1291.589	0	120472.1	22	1	532171.06

$$\boxed{\text{AK}} + \boxed{\text{AO}} + \boxed{\text{AP}} = \boxed{\text{BA}}$$

Re-calculate the Capitalized UPB

- Capitalized UPB should equal the sum of fields AK, AO, AP (ie, UPB after mod+ forbearance + forgiveness)
- Sum of fields AK, AO, and AP = \$532,172.07
- Capitalized UPB = \$532,171.06 (Difference is \$1.01)
- Resolve:** Check and/or correct all four fields AK–AO–AP–BA

Interpreting NPV Results

NPV – Single Evaluation Process

NPV will be run as a **single evaluation process**. The NPV model will return NPV results for both HAMP Tier 1 and HAMP Tier 2, as well as calculate the results for both Waterfalls, if applicable, for HAMP Tier 2.

Occupancy Eligibility	Tier 1 Result	Tier 2 Result	Offer
Owner-Occupied, HAMP Tier 1 Eligible	Positive	Positive	Tier 1
	Positive	Negative	Tier 1
	Negative	Positive	Tier 2 Tier 1 (optional)
	Negative	Negative	Tier 1 or Tier 2 (optional)
Rental Property or other HAMP Tier 1 Ineligible	N/A	Positive	Tier 2
	N/A	Negative	Tier 2 (optional)

Interpreting NPV Results

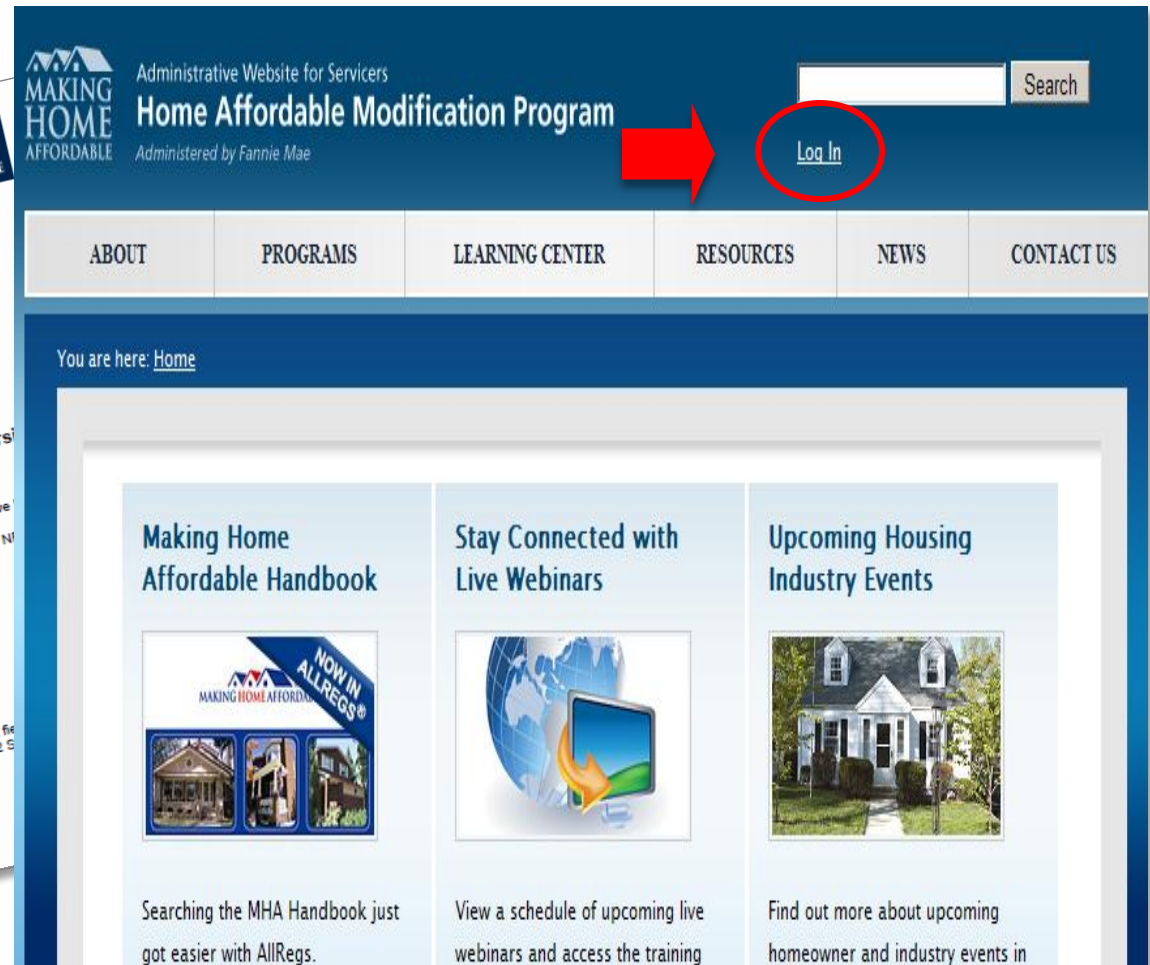

Evaluating Waterfall Results

Waterfall Type	NPV Result		Servicer Action
Standard Alternative	Positive Positive	➡	<ul style="list-style-type: none">• MUST modify the borrower's loan to the terms of the Standard Modification Waterfall, or• MAY to modify the borrower's loan to the terms of the Alternative Modification Waterfall.
Standard Alternative	Positive Negative	➡	<ul style="list-style-type: none">• MUST modify the borrower's loan to the terms of the Standard Modification Waterfall, or• MAY modify the loan to the terms of the Alternative Modification Waterfall.
Standard Alternative	Negative Positive	➡	<ul style="list-style-type: none">• ENCOURAGED to modify the borrower's loan to the terms of the Alternative Modification Waterfall.
Standard Alternative	Negative Negative	➡	<ul style="list-style-type: none">• MAY modify the borrower's loan to the terms of the Standard or Alternative Modification Waterfall.
