

Gentlemen,

As a frequent boater in the Nantucket Sound and as a thinking and interested citizen, I would like to add my voice to those supporting the Alliance to Protect Nantucket Sound. The Alliance has requested Governor Romney and the Ocean Management Task Force to request the Army Corps suspend its review of the Cape Wind project until the Ocean Management Act is in effect. This seems reasonable in light of the poor results experienced by wind farms around the world and the extraordinary cost to the beauty and economic value of these very special waters.

Thank you.

Julius Marcus
