Know Your Audience As Best You Can

WEATHER

WHAT YOU GET

CONDITIONS OF THE
ATMOSPHERE OVER A SHORT
PERIOD OF TIME

CAN CHANGE WITHIN
MINUTES OR HOURS

Saturday

Sunday

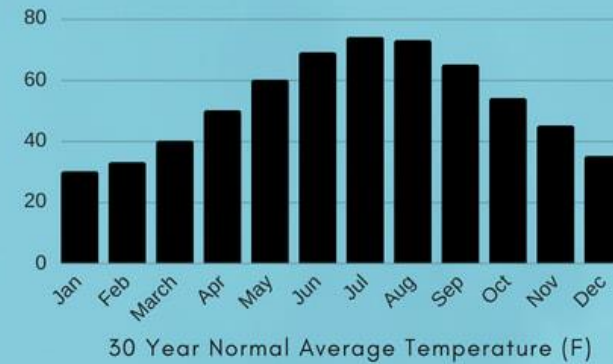

vs

CLIMATE

WHAT YOU EXPECT

HOW THE ATMOSPHERE BEHAVES
OVER A LONG PERIOD OF TIME
AND SPACE

AVERAGE REGIONAL WEATHER
PATTERN OVER DECADES

Core Concept: Weather vs. Climate

How Does Climate Change Work?

The heat-trapping blanket metaphor

- The atmosphere is like a blanket that surrounds the earth.
- When we burn fossil fuels like coal and oil for energy, we add too much carbon dioxide to the atmosphere, which is like making the blanket thicker.
- The blanket has become too thick. It's trapping in too much heat, and the planet is warming up too fast.

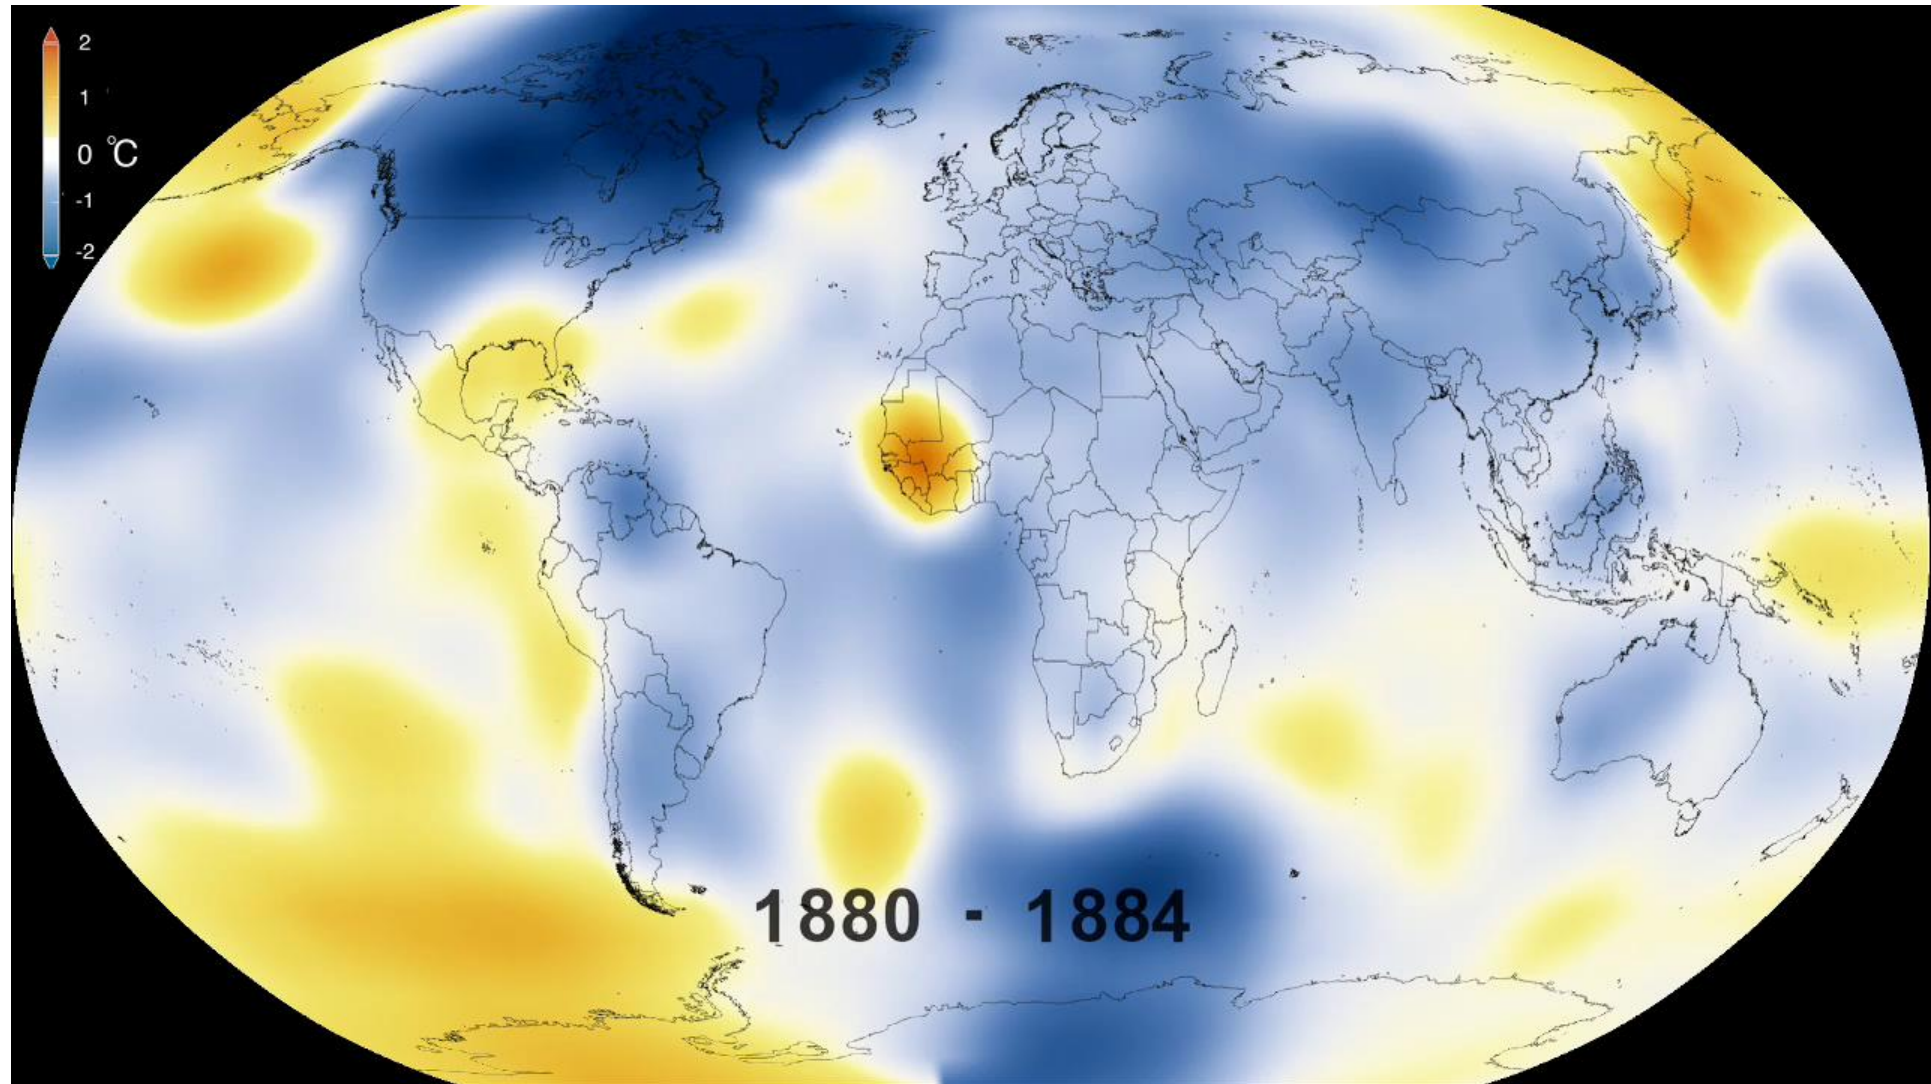

Isn't Carbon Dioxide Normal?

A metaphor for anthropogenic carbon dioxide

- Plants grow by using the regular carbon dioxide that animals exhale, and so some CO₂ is part of normal life processes.
- But we are also adding carbon dioxide to the air when we burn oil, coal, and natural gas.
- We can call this “**Rampant CO₂**” because there’s **too much** of it.
- Rampant carbon dioxide builds up in the atmosphere and ocean where it **causes problems** for the **earth’s climate and ecosystems**.

Observed Change: Temperature

Visualizing Climate Change

Place-Based, Clear Data, Local Impacts

- *Example 1:*
March 2018 Nor'Easters

- *Example 2:*
Flooding Summer 2010

- *Example 3:*
Drought Summer 2016

Framing Climate Change

Framing for Values

- Protection Value
- Responsible Management Value
 - Why does it matter?
 - What is at stake?
- **The story:** We must protect people and places from being harmed by the challenges facing our environment

Framing for Solutions

- Fosters hope and instils a sense of agency & efficacy
- **The story:** Concern for our climate is normal and action on climate change is happening all around us.
- We can come together as citizens to address climate change impacts in our community & create meaningful change.

Framing Climate Change

- ***Protect*** our natural resources for *future generations* and *public health*.
- ***Responsibly manage*** our natural and fiscal resources.
- ***Sense of place*** encourages people to invest locally and overcome challenges.

Preparing for climate change through nature-based solutions satisfies each of those values.

Best Practices for a General Audience

1. Find common ground and **meet people where they are** on climate change
2. Emphasize how climate change affects us **here and now**, in our everyday lives
3. Focus on how building resilience to climate change ultimately makes their **lives and livelihoods better**
4. Find **common ground** on climate change through **shared values**
5. Keep discussions **place-based** and as **local** as possible
