As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Re: Testimony: Mass General Brigham Incorporated – Multisite - 21012113-AS

Dear Ms. Szent-Gyorgyi,

I would like to share my concerns with the Department of Public Health (DPH) about Mass General Brigham's (MGB) community expansion plans and intent to establish outpatient centers in Woburn, Westwood and Westborough (DoN application: 21012113-AS). As a member of the local community, I strongly oppose MGB's proposal.

Woburn, Westwood and Westborough are well-served by low-cost, high quality healthcare providers. The introduction of MGB's ambulatory services without demonstrated need will empower MGB to cherry-pick commercially insured patients away from local healthcare providers that residents rely on, threatening the financial viability of existing local practitioners and the safety net services they provide that are essential to MassHealth patients, people living in poverty and patients affected by health inequities. MGB is also the most expensive healthcare system in the Commonwealth. Its expansion will only make it more difficult for insurers to negotiate the costs of healthcare services, passing along higher rates to employers and patients within our community who are already struggling to make ends meet.

I respectfully request that DPH schedule additional public hearings after the independent cost analysis has been conducted and strongly urge DPH to seriously consider denying MGB's application.

Sincerely,
Susan Burgwinkle

Re: Testimony: Mass General Brigham Incorporated – Multisite - 21012113-AS

Dear Ms. Szent-Gyorgyi,

As a member of the community and employee at UMass Memorial Medical Health, I am opposing Mass General Brigham's proposal to build outpatient facilities in Woburn, Westborough and Westwood. We have serious concerns that, if approved, Mass General Brigham's outpatient centers will threaten the financial viability of critical local healthcare providers; exacerbate healthcare inequities; increase the cost of care; and jeopardize essential local jobs.

Mass General Brigham Incorporated is already a strong group on the medical field serving an enormous area in Boston and surroundings.

Sincerely,

Andreia DeDeus

History has shown us Bigger is not always Better. Healthcare has gone to profit making as opposed to what's best for the patient. While Mass General has done some great things, the pressure of the bottom line has grown exponentially without fair consideration of what is the best for employees and patients. Restrict the profit based spread and let Mass General focus on medicine not solely bottom line profits.

Sincerely,

Cheryl Szolomayer

As a member of the local community, I strongly oppose MGB's proposal.

Woburn, Westwood and Westborough are well-served by low-cost, high quality healthcare providers. The introduction of MGB's ambulatory services without demonstrated need will empower MGB to cherry-pick commercially insured patients away from local healthcare providers that residents rely on, threatening the financial viability of existing local practitioners and the safety net services they provide that are essential to MassHealth patients, people living in poverty and patients affected by health inequities. MGB is also the most expensive healthcare system in the Commonwealth. Its expansion will only make it more difficult for insurers to negotiate the costs of healthcare services, passing along higher rates to employers and patients within our community who are already struggling to make ends meet.

I respectfully request that DPH schedule additional public hearings after the independent cost analysis has been conducted and strongly urge DPH to seriously consider denying MGB's application.

Sincerely,
Megha Joshi

Re: Testimony: Mass General Brigham Incorporated – Multisite - 21012113-AS

Dear Ms. Szent-Gyorgyi,

I am really concerned and disgusted by the business decision MGB is making under the guise of "this is for patients". This is a Trojan Horse money grab masquerading as something the community will benefit from. PLEASE stop this. I want my local doctor and hospital to remain local. Healthcare should be community focused.

I would like to share my concerns with the Department of Public Health (DPH) about Mass General Brigham's (MGB) community expansion plans and intent to establish outpatient centers in Woburn, Westwood and Westborough (DoN application: 21012113-AS). The Retired State, County and Municipal Employees Association of Massachusetts would like to be recorded in support of Mass General Brigham's project to provide quality healthcare services within the communities in which our members live. Representing some 53,000 public retirees across the Commonwealth, it is important that our members have the ability to access care within their local communities - without the need to travel into Boston.

Representing an aging population, we frequently hear from our members regarding concerns and difficulty in accessing healthcare close to home. This is particularly true in the area of behavioral health. Mass General Brigham's project helps to address these concerns and is a true value for the thousands of retirees living in the Woburn, Westwood and Westborough areas.

In addition, the project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic. This is good for Massachusetts families, local economies and state tax revenues.

We support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Thank you.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

As a parent of three children, I am very excited at the thought of having primary and specialty care available to them closer to home. Access is limited in this area without traveling to NWH and/or NSMC. I would welcome a one stop shop for me and my family to receive care and diagnostic testing in one place!

I hope you provide specialty care at this new facility. As an employee of MGB and having Allways Health Partners, I find it very difficult to find Tier 1 providers of specialties in the area. Myself and my have had to drive long distances for dermatology, orthopedics, and physical therapy. I find there are not a lot of options in this area.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.
