As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

I hope there will be specialists such as GI, rheumatology, obgyn, infectious disease, neurology, etc. not only behavioral health. We need more specialists in this area.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

This facility would also open up more jobs to MGH Brigham employees that live in the Metrowest or central mass area.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Westborough and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a resident of Northborough, my family welcomes a MGB facility in Westborough. We currently drive into Boston for care, having care close to home would allow more flexibility to schedule appointments for my children, eliminating time missed from school.

As a healthcare provider I understand the importance of high quality healthcare, close to home. I personally travel to Boston for my own healthcare, and would love to have MGB care that is easier to access. My parents often drive over an hour into Boston to get basic radiology or lab work done as they already chose to receive care through MGB. Having access to their services in a community setting would lessen their stress that comes with having to drive to the city. So many people in the Metrowest area already have chosen MGB, why can't we make it more accessible?

I would be thrilled to have MGB care in Westborough for myself, my family, and my patients.

Hello,

I am both a local resident to Westboro (reside in Shrewsbury MA) as well as an employee of Mass General Hospital.

I truly believe that increasing access to the MGB network for the residents of Metro West is a win. In my current position in Cardiology at MGH, I have interfaced with hundreds of people who reside in or near Westboro whom have all expressed a desire for easier access to their MGH MDs and the MGB health system. The presence of MGB in the area would enhance and enrich the available health care options- not replace them which is a concern I have seen expressed about this facility. Additionally, one of MGB's greatest strengths is its commitment to diverse - from both the standpoint of ethnicity as well as socioeconomic - patient populations hence I disagree with the opinions expressed that this new facility would cater to pts with private insurance.

The Westboro MGB Health Care Facility would be a boon to the health of the community- literally and economically.

I wholeheartedly support this proposal.

Thank you.

As a resident of Westborough and a Mass General Brigham employee, I believe the Westborough MGB site will bring many services to our community that, at this time, are under served. I would love to bring my years of experience with MGB to my local community and give the excellent patient care they deserve. The healthcare experience our patients receive is above and beyond any other offered in the area. The community deserves better health care and this is a way to provide it.

Many people living in the Westborough area already drive to Boston to receive their care at MGB. Often times, patients will go to a more local healthcare system simply out of convenience. This makes their care very fragmented and complicated. Having to transport and deliver notes and results between systems is a huge headache for patients and caregivers alike. It also causes errors in patient care due to lack of communication between caregivers. Having MGB services in our neighborhood will unify the care we receive and make patients more likely to follow up on important healthcare issues. Many people put off their healthcare due to the travel into Boston. Having MGB in Westborough will help patients save money by keeping their care in network and saving time traveling.

I support this project in its entirety. I am looking forward to working with Westborough and our surrounding communities to ensure that Mass General Brigham meets the needs of our patients and community. The standards and quality we offer is what our neighbors deserve.

Thank you for your time.

Sincerely,

Danielle Jordan RT(R)(MR)

As a Westborough resident and Mass General Brigham employee, I would like to affirm the need to have this facility in our area to access care (routine and emergency) within minutes. The burden imposed to us by having to commute to Boston for medical care is not only an inconvenience but a limitation that imposes equity and quality access to high quality medical care.

Emergency care is even worse as any facility is at least 20 minutes away to 45 minutes or more to MGH. I am planning to keep MGB as my healthcare provider as long as I am allowed and having a facility close to home is crucial to maintaining a lifelong relationship to make healthcare less complicated, less fragmented, and less costly.

I support this project because it is a critical need for my family as patients, residents of Westborough and myself a Mass General Brigham employee.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

On a personal note, I recently went to the MGB facility in Brookline for an imaging appointment. While the process was fairly efficient, I had to drive almost two hours round-trip to get there and back again. It would be great if people in the Worcester-metro west area had access to such services closer to home, and without the traffic hassles.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to a variety of high quality medical providers in our area. At this point we in the far western MetroWest suburbs to Central Massachusetts have only one major healthcare system to choose from with the UMass Medical system. In my professional capacity as an insurance nurse case manager based in Worcester for the final 15 years of my 40+ year RN career, I can say without any hesitation that I dealt with hundreds of coworkers and patients in this region who desperately wanted to seek other medical opinions or treatment after dissatisfaction with quality of local care but who were unwilling to travel further east than route 495 (never mind Rte 9 or 128/95!) because of tolls, parking costs, time off from work to go to Boston for care, and concern about going to the city because of unfamiliarity with area. If there was access to other tertiary specialists in the 495 belt, I can tell you without hesitation that there is interest and willingness of residents in this area to utilize the tertiary world class services offered. Furthermore, many of us would love to have access to the medical team at MGH BRIGHAM given the national and worldwide excellence they bring to the commonwealth of Massachusetts. Full disclosure, my family are patients at Newton Wellesley and MGH. We've also used the Waltham MGH offices for our Boston based MGH cardiologist who has hours there once per month for office visits, echocardiogram, and MRI so we've seen what it's like to have MGH care outside of Boston. It's a godsend to not have to trek into Boston for everything.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic. I understand the concern that my city of Marlborough mayor has voiced about protecting what we have here for hospital and outpatient care in this city, but I respectfully state he does not speak for all the city residents with this opinion. An informal poll with local neighbors and friends disputes his opinion that this expansion of MGH BRIGHAM to Westborough would be difficult for UMass Medical HC. Most people I've spoken to state they'd still use UMass Medical healthcare services but would also welcome the opportunity to seek care at new MGH Brigham site. Basically large majority off of those I spoke to thought having two systems in the region was positive. Finally some of my medical/nursing colleagues would be interested in job opportunities with the new location.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a voter and home owner of Westborough, I strongly favor MGB providing health services in Westborough.

The reasons are somewhat obvious:

- 1) Closer physical services save time and money to clients.
- 2) Provides competition to allow providers to sharpen their services benefiting both MGB and clients.
- 3) As our population ages these services are required to lessen the burden on existing resources like U.Mass Marlborough.
- 4) It will create more jobs for all. The needs will only grow due to an improving economy.

It is a false logic to say it will hurt the poorer people of our society. In fact the opposite will be true because it will

improve the operating efficiency of all services.

It is a no brainer to favor this facility and I see nothing but pluses for all people rich or poor.

Respectfully

Stephen Faris

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

Not only for me -- my aging dad is moving back to MA after spending 12 years in Florida. One of his main reasons for returning back to MA is because of health care, and specifically his doctors at Mass General. He continued to see them while he lived down south, and now feels he'd rather be permanently located close to them, and so is giving up the sun and coming back home. Mass General doctors have twice saved his life, once with surgery for prostate cancer, and once with discovering a blockage in his heart arteries using state of the art 3-D technology that no hospitals in Florida near him had at the time. Having a Mass General campus near my home with greatly enhance quality of life for me, not having to travel all the way into Boston for care.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident of Hopkinton and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Westborough and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

My wife and I retired a couple of years ago and moved from MetroWest to Shrewsbury in order to be close to our children and grandchildren. We have had all of our healthcare through Newton Wellesley Hospital for many years now have a much longer drive to get there. Being able to access some of our healthcare needs in Westborough would be very helpful to us.

There is NO access to MGB in the area. This is a huge detriment to the people who need care closer to home. The Commute into Boston keeps people from getting the care and follow ups that they need.

Selfishly I myself would Like a location closer to home also.

There are patients who I care for who will let their symptoms go because they cannot tolerate the drive.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.
