As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.
