As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

Please build a comprehensive Breast Center in Westwood. There are currently no such services in this part of the state. I would be happy to help staff it as a nurse practitioner. Thank you

I am not only a local resident, but a BWH (also a former MGH) employee. I support expanding healthcare into our local community. I fully support this decision.

thank you, Katie

I am also a patient @ the Westwood facility. It is so much easier to go there than to go downtown, I have used the Internal Medicine, Lab & Radiology services there and couldn't be happier. I am getting the same great care as I would if I had to go downtown. It is so easy to get there, park, be seen & be done so quickly.

I support this expansion completely

I have already used the Westwood location for Urology Specialty care and would certainly enjoy having more access to additional care in more specialty and surgical practices. I live in Dedham MA and have received my healthcare from Mass General Brigham for the past 25 years.
