As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide. This component is especially important during the pandemic!

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Does the urgent care treat pediatric patients? If not, it would be great to have a pediatric component available on site.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees. It has been my passion to develop safe, equitable, high quality care for our community as a member of the Brigham Health staff.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly. I am a 30 year employee of the Brigham Faulkner campus and live in Medfield. As my family has grown, I welcomed the opportunity to find Brigham primary and specialty care at the convenient Westwood site. The ease of access, range of services and free parking has been invaluable in this location. We typically try to pair medical appointments with errands and meals as the Westwood site supports easy access to a variety of great stores and restaurants. The area is now thriving. I am very excited that additional access to high quality, safe, equitable medical care could be available so close to home for my family and my friends.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this expansion, and I am looking forward to working with Westwood and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a resident of Westwood, I strongly support Mass General Brigham's project to provide healthcare in our community. We need this type of access to healthcare especially one in such a convenient location for both residents and employees, being sited in our University Station mixed-use and transit-oriented development and adjacent to both highways and the MBTA/AMTRAK railroad station.

This project has been fully vetted and approved by the Town of Westwood and carefully integrated into the University Station development to complement the existing retail, commercial, and residential components.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

Re: Please Support Mass General Brigham!

Dear Department of Health,

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much-needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Sincerely,
