Re: Testimony: Mass General Brigham Incorporated – Multisite - 21012113-AS

Dear Ms. Szent-Gyorgyi,

I would like to share my concerns with the Department of Public Health (DPH) about Mass General Brigham's (MGB) community expansion plans and intent to establish outpatient centers in Woburn, Westwood and Westborough (DoN application: 21012113-AS). As a member of the local community, I strongly oppose MGB's proposal.

Woburn, Westwood and Westborough are well-served by low-cost, high quality healthcare providers. The introduction of MGB's ambulatory services without demonstrated need will empower MGB to cherry-pick commercially insured patients away from local healthcare providers that residents rely on, threatening the financial viability of existing local practitioners and the safety net services they provide that are essential to MassHealth patients, people living in poverty and patients affected by health inequities. MGB is also the most expensive healthcare system in the Commonwealth. Its expansion will only make it more difficult for insurers to negotiate the costs of healthcare services, passing along higher rates to employers and patients within our community who are already struggling to make ends meet.

I respectfully request that DPH schedule additional public hearings after the independent cost analysis has been conducted and strongly urge DPH to seriously consider denying MGB's application.

Sincerely,

Dr. Glenn Ruhl

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.
