As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and an employee of MGB, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

My parents live in Winchester near the proposed site in Woburn. They have both been diagnosed with Cancer in the last 24 months. MGB is their provider of choice for care and making the trip into Boston several times a week for care has been difficult. It is stressful driving into Boston, city parking is terrible (and expensive!) all while their health declines due to diagnosis. I will always advocate for MGB care closer to home for my parents so they can focus on the more important things - recovery and peace of mind.

Cancer is just one example of many high quality services MGB provides - for anyone who lives near Woburn - this site is a game changer!

While I am respectful of the other healthcare institutions nearby, we have had mixed results with other providers. World class care in Woburn provided by MGB is my choice.... our choice.

In addition to all of the above, this project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Sincerely,
Jay Higgins

As a long time health care executive (Mass. Hospital Association, South Shore Hospital, Hallmark Health System) now retired, I support Mass General Brigham's project to provide the same advanced healthcare patients receive in Boston closer to their homes and in this case, in the greater Woburn area. People need more access to advanced medical care in our communities – especially behavioral health, which the Woburn site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic. While I have been very pleased with the care I have received from my pcp and other clinicians at Lahey Hospital and Medical Center in Burlington, adding another advanced level of care that is proposed for Woburn will only enhance the choices available to people seeking the highest level of care closer to home.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide. It will allow patients to receive the top notch care from MGH Brigham without having to stress about driving into Boston every time or worry about where to park or who can get them there. Offering these locations for patients will streamline their care, cut down on the congestion in the Longwood Medical area and Fenway Park area and improve the quality of life for employees who can work closer to home.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.
