As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application. We need another option to the Lahey network that has direct ties to Boston hospitals. I personally would change my primary care provider if a MASS GENERAL BRIGHAM practitioner were available nearby.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees. I currently receive my medical care at Winchester Hospital, but would prefer to be affiliated with Mass General and with this new site in Woburn I would be able to do so.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

Now more than ever we need equity and improved access to behavioral health services. Many providers have wait lists of six months or more. The mental health crisis post pandemic will take a toll on all of us. More care equals a more fair, just and healthy community for all.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees. I believe having more choices closer to home makes health care better for everyone-whether they chose MGB's top quality and world renowned expertise or chose to go elsewhere.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly. Having previously practiced at an inner city community health center, having a similar ambulatory care center with the ability to provide an extensive array of services all in one place in a suburb of Boston, I believe, is important for care coordination. I do believe patients are more satisfied when they can complete their health care needs in one place located close to home .

Our response to COVID-19 is an example of how a coordinated approach can result in better access. The MGB response to COVID, often in coordination with other providers in certain parts of the state, has been exemplary. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham uses our people, research, and technology to meet the needs of our patients.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. It is really inconvenient and time consuming for me and my family to travel an hour, sometimes more because of traffic so we can have routine check ups and urgent appointments at MGB in Boston.

My child is also a patient at MGB and will be better if his doctor's office is close to home in cause he needs to be seen urgently.

The projected MGB facility in Woburn will have ambulatory primary care, specialty services and behavioral health which is greatly needed in this area.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Sincerely,  
Iliyan Stoyadinov

As a patient of Brigham and Women's Hospital I would truly appreciate the ability to see my physician or have testing performed closer to home. Going into Boston requires not only time off of work, but an entire day of inconvenience starting with the commute in and ending with the commute out of town. This leads to an exhausting day for a patient who is already dealing with a big enough issue. Having the ability to be closer to home and not need the hassle of a Boston commute would make things so much easier for patients.

To:

DPH-DL - DoN Program;

CAUTION: This email originated from a sender outside of the Commonwealth of Massachusetts mail system. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

My name is Galya Kamenova, BSN RN currently working at MGB, and living in Stoneham, MA. I appreciate the opportunity of sharing my thoughts regarding the MGB expansion into Woburn.

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

As a Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees. Patients in the Woburn area will benefit from one convenient location close to their home that provides exceptional medical services for the whole family.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.

MGB is well known for providing outstanding care to patients and families. MGB is serving communities of color within Boston and currently many patients living in the Woburn area need to travel to Boston to obtain affordable and quality health care. The MGB project will benefit all existing patients who live in the Woburn area, and as well provide many additional job opportunities. The project will provide 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic. I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Sincerely,

Galya Kamenova, BSN RN

Currently I have to pay high out of pocket co-payments to not travel 30+ minutes for any kind of healthcare. A closer location for in-network providers would save my family money, and time, would provide continuity of care, and would encourage my husband to get preventative medicine.

I am writing in support of Mass General Brigham's project.

As a local resident, who cares for their 87 year old mother at multiple MG/B locations, with multiple physicians, I can attest to the added stress and anxiety that comes from having to drive into Boston, to congested and large hospital settings for my elderly mother - unnecessary angst on top of sometimes challenging medical situations.

Very, often the actions of driving in traffic, parking at a distance, having to walk distances (in often inclement weather) before even reaching an appointment, lead to exhaustion and agitation.

If we were able to secure the same services for my mother - with a peaceful drive to Woburn, simple parking and smaller distances to walk for services, it would change the entire tenor of our visits and put her in such a better state of mind and physicality to receive the actual medical services that she requires.

I do hope that these smaller centers become a reality for her and so many other patients who deserve the best care - in as accessible way as possible.

I strongly recommend that the Department of Public Health consider the overall health and well being of our communities and approve this application.

Most sincerely,

Anne-Marie Fitzgerald

I'm writing to let you know that I would be in full support of the opening of an MGH health care center in Woburn. I think it would be a wonderful location. Woburn is centrally located with access to Rtes. 128 and 93. For people coming from NH and North of Boston, it would reduce their commute time drastically. As a patient of MGH/Brigham and a cancer survivor who treated at MGH in Boston, if I could have traveled locally from my home to treatments and appointments, I would have been thrilled. Nevertheless, I would have traveled miles to treat at MGH/Brigham. I received wonderful care. They saved my life!

Thank you

As a local resident and someone who is concerned with large hospital conglomerates infringing on our beautiful neighborhood, I would not like this facility to be built.

Our current facilities, Winchester Hospital, Lahey Clinic, Melrose Wakefield have a number of competent, well educated and devoted employees that would be blindsided if this facility was built. We have enough care facilities that there is no benefit to building another Mass General Brigham building in the area.

Please think about how building this facility would affect the community and the people in it.

Please register my overwhelming support for the proposed Mass General Brigham site proposed for Woburn.

Over the past 2 1/2 years I've been diagnosed twice with cancer and have chosen to be treated at Mass General. I will require follow-ups for many years to come. It would be wonderful to have a convenient location for these visits.

Since my diagnoses I realize how underserved the Woburn area is, I beg you to please approve the MGB site, not only for convenience but also for choice.

Respectfully,  
Debra Turner

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a local resident and Mass General Brigham employee, I believe our relationship with our patients is at the heart of the healthcare experience – for patients, their communities, care team members, and employees.

Understanding our patients' personal stories and building a lifelong relationship is crucial to making healthcare less complicated, less fragmented, and less costly.

Our response to COVID-19 is an example of how a coordinated approach can result in better access. I support this project, and I am looking forward to working with Woburn and the surrounding communities to ensure that Mass General Brigham that uses our people, research, and technology to meet the needs of our patients.
