Re: Please Support Mass General Brigham!

Dear Department of Health,

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. We need more access to care in our community – especially behavioral health, which this site will provide.

The project will also provide much-needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

Sincerely,

patricia lebeau

As a local resident, I support Mass General Brigham's project to provide the same healthcare I receive today in Boston closer to my home. I have used Mass General for my health care for several decades and the traffic into Boston has grown exponentially in that time. As a senior citizen I need access to MGB near my home.

The project will also provide much needed jobs, including 300 union construction jobs and 200 permanent jobs, that will help our local economy emerge from the pandemic.

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

I support this project on so many levels.

First, As a healthcare provider who has worked in Boston and Revere, I understand the difficulty of some to travel to Boston for appointments. Working in Revere, I saw firsthand how having a clinic so close to home made it easier for those who do not have family members to make it to their appointments. The elderly population especially, need to rely on family members, for transportation and that is not always easy to come by.

Secondly, as someone who took care of elderly parents, sometimes it was easier to take them to a local clinic, rather than Boston. Even though they were driven in, going into Boston was taxing on them and time consuming for those of us who had to take a day off from work to get them there.

Third, again as a healthcare provider, it would be wonderful to have a clinic closer to my home to work at.

To have a facility that is accessible to patients who live outside of the Boston area would be extremely beneficial.

Having a facility

I support the Mass General Brigham project and ask the Department of Public Health to approve this application.

As a employee of MGH and a local resident of Reading- creating a more local facility would be Benedict to so many. The challenges that a commute into Boston causes frustration for many in these local communities. Things I often hear are- 'you have to drive into Boston?!'- 'how do you deal with the parking?'- 'I would rather just go to somewhere closer than head into the city.'

In creating a facility that provides easier access to members of our community, it allows for an overall improved experience for patients and providers. Just today I was speaking with a colleague, who also happens to be nurse, about their own diagnosis and management of Rheumatoid Arthritis. She was describing her commute into the city as a "pain in the butt" and how she wishes that she could be better with her follow up appointments, but getting into the city poses a lot of challenges, especially on her "days off." In opening a facility in the Woburn area, it improves situations such as these by giving patients of MGB easier access to providers.

As a resident of Winchester, I am extremely happy with the integrated, professional, and cost effective care that I am able to get via Winchester Hospital. Your attempt to establish an unneeded health care center in Woburn is simply an attempt to take market share away from our excellent and valued health care providers that have given us and our community longterm continuity and excellent medical care. No Thanks. There is no need for you to extend your reach here.

The previous, closest center was located in Burlington but the emphasis was on Urgent Care; The need is to "routine care for new or ongoing conditions that now require a family member ( or 2!) to accompany the "patient" into their appointments in Boston. This new location would be an enormous savings of time,, and, mental and physical energy to attend to one or multiple medical appointments on the same day.

Please allow this health care benefit to proceed to the Western suburbs!

I was a patient at Brigham and Womens Hospital, and go to their Chestnut Hill locations for my primary doctor and , mammogram, .

They have been my hospital of choice , ever since they saved my life , diagnosing a brain tumor, for which they removed successfully in 1983.

I was at a local hospital, and had been transfered to the Brigham, once a doctor from Boston came and diagnosed my condition. They made me feel so secure and confident , and safe , at such a traumatic time in my life. The nurses, the doctors , and all the staff from emergency to inpatient care is just so compassionate . It would be wonderful to have such a respected Boston hospital in our area.!!

Though their are other local hospitals , I would choose to go to Boston at Brigham and Womens Hospital for care, and second opinions.

I trust their care, diagnosis, and any tests that need to be done.

My husband's care was always at their hospital, until the location became hard to get to.

Please consider the highly respected health care they give, and have their hospital near us.

Thank you for reading my letter.

As a local resident, I vehemently object to the MGH/Brigham's proposed expansion into Woburn. Winchester Hospital, which is less than 1 mile away from the site, already offers access to quality care at a fraction of the cost of the MGH/Brigham system. Winchester also runs an excellent outpatient surgical and oncology center within the same 1 mile radius. Winchester has a long track record of proudly serving this community. This brazen move by MGH/Brigham is an attempt to put Winchester out of business. If approved, the expansion would drive up healthcare costs and offer little value to the community. Once Winchester is forced to close, where will people go for emergency care? Either to Melrose Wakefield Hospital, Lahey, or to some downtown hospital. This is not good for folks in the area. I live across the highway from the proposed site. While MGH/Brigham suggest that the site would bring needed services, I personally do not believe this. Certainly behavioral health is a sore area of need everywhere in Massachusetts, but this is not the motivation for building this center, as it is not a profit driver. The motive must be purely that of dominating the healthcare market in the north shore. Lahey and Winchester provide similar quality services for half the cost of the former Partners system, and already employ a large number of local community residents, who would be negatively affected by this project. If there was ever a time for the government to block a monopoly power move, this is it. Let MGH/Brigham put in a behavioral health site in Woburn, but not this huge satellite that will suck the life out of an already high functioning, cost-effective local, community hospital.

As a local resident, I do not support Mass General Brigham's project to adversely disrupt local care medical services close to my home. We do not need more access to care in our community as there are already many excellent established high quality lower cost medical services in our area. MGH Brigham will adversely affect these excellent existing local care services and businesses

I do not support the Mass General Brigham project and ask the Department of Public Health not to approve this application.

As a local resident, I DO NOT SUPPORT Mass General Brigham's project.

The project will endanger local hospitals and physicians that already serve the area with excellent high quality care.

We not need these outpatient services - they duplicate what we already have.

Winchester Hospital and Melrose Wakefield Hospital have acute care hospitals as well as outpatient services. Don't threaten these hospitals.

The direct to household advertisement that MGB is sending out is FALSE. They do not provide lower cost care. Their reimbursement rates are higher, even for services provided in the community.

I DO NOT support the Mass General Brigham project and ask the Department of Public Health to DENY this application.
