SAFETY OR SECURITY CONCERNS

Policies and procedures for collecting, transporting and disposing of Unwanted Drugs, as established in the Plan, were followed in the reporting period. There are no safety or security concerns for the reporting period.

PUBLIC EDUCATION AND OUTREACH

I. Website and Toll-Free Number

Inmar continued to operate a branded, mobile-optimized website and toll-free phone number. The URL for the Inmar website is www.SafeMedicineDrop.com. The purpose of the website is to provide Residents with information pertaining to Inmar's disposal options and outreach material. Residents can visit the website to view a map and listing of drug disposal locations including Drop-off Sites and Mail-Back Distribution Locations in Massachusetts. Residents can also request through the website that a mailer envelope be sent directly to their residence with instructions on how to return Unwanted Drugs. Examples of the Program's Website are included in Appendix A, Figure 3 - 4.

II. Signage and Educational Materials

Inmar continued to utilize consumer-facing signage on kiosks at collection sites that outlines what can be accepted and not accepted in the kiosk. The signage uses explanatory graphics and is displayed in English and includes the Program's website.

Inmar provided educational printed materials that are available to residents at participating collection sites and through the Inmar website. Educational materials outline how to locate disposal sites in the state of Massachusetts and how to properly dispose of Unwanted Drugs. Samples of the educational material are included in Appendix A, Figure - 1 - 2.

III. Digital Media

Additional outreach activities were conducted during the reporting period. Programmatic media provides targeted display ads on browser sites on internet capable devices (smart phones, computers, tablets, etc.). Inmar ran ads across a prequalified list of over 200,000 domains including a variety of retail websites, Google, and Facebook. The programmatic targeted ads ran for six weeks leading up to the DEA's National Prescription Take Back Days in April and October 2024.

Influencer marketing is a content creation tactic used to drive awareness and education to a targeted audience through blogs and social media outlets. Influencers create authentic content around their everyday lives and interests while weaving the story of prescription drug take-back into their content. Influencer content is converted into paid ad units across social platforms and then targeted to community members across the state of Massachusetts.

Paid advertisements for influencer content were run on a variety of platforms including Google, Instagram and Facebook. Inmar ran social media influencer campaigns concurrently with other digital media campaigns. Inmar posted two social media posts per month per platform (Instagram, Twitter, and Facebook). Collectively, Inmar solidified over 5,898,817 impressions with the various marketing initiatives throughout the reporting period. See Appendix A, Figure 5 - 7 for sample images of the digital media campaigns.
