

MASSACHUSETTS NATIVE PLANTS AND POLLINATORS

Partners in Nature

EASTERN BLACK SWALLOWTAIL
Papilio polyxenes

GOLDENROD SOLDIER BEETLE
Chauliognathus pensylvanicus

HONEY BEE
Apis mellifera

MONARCH BUTTERFLY
Danaus plexippus

PECK'S SKIPPER
Polites peckius

MONARCH CATERPILLAR
Danaus plexippus

FLOWER LONGHORN BEETLE
Judolia cordifera

GREAT SPANGLED FRITILLARY
Speyeria cybele

88% of the world's flowering plants require an insect pollinator for pollination

HUMMINGBIRD CLEARWING
Hemaris thysbe

NORTH AMERICAN CRANBERRY
Vaccinium macrocarpon

PURPLE JOE-PYE WEED
Eutrochium purpureum

GOLDENROD
Solidago spp.

SHORT-TOOTHED MOUNTAIN MINT
Pycnanthemum muticum

COMMON MILKWEED
Asclepias syriaca

TWO-SPOTTED BUMBLE BEE
Bombus bimaculatus

MA has a rich diversity of native insect pollinators, including an estimated 380 species of bees and 120 species of butterflies

Insect pollinators increase the fruit or seed set in 75% of crop plants, and are responsible for 35% of global food production

BLAZING STAR
Liatris scariosa
