## **Observations and Recommendations**

1. The inmate population was 555 at the time of inspection.
2. Throughout the facility, bathrooms and shower areas were observed to be poorly maintained resulting in unsanitary conditions. The Department is concerned with the increased risk of disease transmission with the high number of inmates being exposed to such unsanitary conditions. We recommend ensuring all bathroom and shower areas are finished with smooth and easily cleanable surfaces as well as developing a higher frequency shower cleaning policy.
3. The Modular Unit bathrooms appear to have little to no air flow, which appears to be contributing greatly to the unsanitary conditions of those areas. The Department recommends having the ventilation system inspected to ensure there is proper air flow and it is in compliance.
4. Several inmates complained about uncomfortable conditions due to poor ventilation in the C1, D1, and D2 Units. The facility stated that the ventilation system was undergoing repairs in these units at the time of inspection.
5. At the time of inspection, 2 of the 4 showers in the C1 Unit were undergoing repairs. Inmates in that unit stated that these showers had been closed for approximately 3 weeks. The Department requests a plan explaining the measures that will be taken to maintain shower to inmate ratios while the showers are being repaired in the C1 Unit.

This facility does not comply with the Department's Regulations cited above. In accordance with 105 CMR 451.404, please submit a plan of correction within 10 working days of receipt of this notice, indicating the specific corrective steps to be taken, a timetable for such steps, and the date by which correction will be achieved. The plan should be signed by the Superintendent or Administrator and submitted to my attention, at the address listed above.
