

Massachusetts Vehicle Census (MVC):

- **First in the nation** dataset that combines datasets reflecting how much vehicles are driven, with information about those vehicles
- Allows deep knowledge and analysis of **local trends in vehicle ownership and use**
- Responds to increasingly important policy questions, including
 - Are electric vehicles driven more or less than gas powered vehicles?
 - How many vehicles were added or subtracted from <my town> over time?
 - What are the key changes in municipal and commercial vehicle fleets?
- Makes frequently requested data from **municipalities, MPOs, other state agencies, and the media** publicly available

| Total Daily Vehicle Count | Daily Vehicle Miles Traveled | Average Mileage Per Day | % of Total Count Zero-Emission or Hybrid | % Daily Vehicle Miles Traveled Zero-Emission or Hybrid | Average Mileage Per Day Zero-Emission or Hybrid | 3-year Change % Daily VMT by Zero-Emission or Hybrid |
