Subject: Algonquin Addendum questions

Barry,

Based on my review to date, I am requesting the following clarifications:

1. In document "ADDENDUM TO NON-MAJOR COMPREHENSIVE PLAN APPROVAL APPLICATION" page 4-17 states "Indirect annual costs of property taxes, insurance and the administration costs associated with the operation of each option do not vary significantly between the options, so these costs were not included in the economic evaluation." Please substantiate the assumption that there is not significant variability in costs.
2. Department form "BWP AQ BACT," which was included as Appendix E in the Addendum only identifies the proposed emission limit (i.e. BACT) for NOx. Please update Table 1 such that it identifies the proposed BACT limit for all pollutants.

I may request additional documentation or clarifications as necessary as my review of your submittal progresses.
