

Virtual Design Public Hearing Bridge Superstructure Replacement Adams, MA

What is happening?

The purpose of this Virtual Design Public Hearing is to provide the public with the opportunity to become fully acquainted with bridge superstructure replacement of Cook Street over Hoosic River project in Adams, MA. The bridge superstructure replacement will provide new beams, deck, and asphalt wearing surface, as well as compliant traffic safety features, improved pedestrian accessibility and connectivity to existing facilities, and safer bicycle accommodations with dedicated bicycle lanes.

How will this affect you?

The project intends to replace the aging bridge superstructure with a new structure that better accommodates and protects all roadway users. The new bridge superstructure will include two travel lanes with bike lanes and two sidewalks. There will be temporary vehicular and pedestrian detours during construction.
