

Design Public Hearing – Braintree – Washington St Bridge Replacement

What is happening?

This is a live virtual design public hearing to introduce the current design for this important bridge replacement project and to allow an opportunity for public input. The proposed project consists of replacing the Washington Street (State Route 37) bridge over the MBTA and CSX railroad in Braintree. The project includes pavement reconstruction on the approach roadway from Peach Street to Braxton Street along with related work such as curb, drainage, slope stabilization, sidewalk, bike lanes, curb ramps, utility relocations, and guardrail. The project also includes the reconstruction of the intersection of Washington Street and Peach Street, including the installation of a traffic signal at this location to improve safety and traffic operations. Signal modifications to the existing traffic signal at the intersection of Washington Street and Braxton Street are also included.

How will this affect you?

This project will impact those travelling through this area as it may require disruptions to regular traffic patterns, noise, and visual impacts during construction. These impacts are necessary to demolish the existing bridge and construct the replacement bridge. Additionally there will be some limited impacts to abutting properties and affected property owners will be contacted by representatives of the state Right of Way bureau.

When?

Tuesday, November 17th, 2026
6:30-7:30 p.m. EST

Attend:
