

Design Public Hearing: Upper Road over Deerfield River (Stillwater Bridge) in Deerfield, MA

What is happening?

A Design Public Hearing will be held virtually to present the design for the proposed Upper Road Bridge over Deerfield River (Stillwater Bridge) replacement project. The Hearing will be live but conducted virtually/on-line only. Access to the Hearing can be found using the links provided below.

How will this affect you?

The existing bridge will be replaced with a new bridge in a similar location. The proposed bridge will be widened to provide an 11' lane and 5' shoulder in each direction and have two concrete wall piers within the limits of the Deerfield River. Roadway improvements to the Stillwater Road and Lower Road intersections will also be included, as well as utility and drainage improvements. During construction there will be a one lane alternating condition over the bridge to maintain traffic with a 15' wide temporary lane.
