

Vulnerable Road User Missing Crosswalks at State Signals at Multiple Locations in MassDOT District 5

Virtual Design Public Hearing

What is happening?

A virtual design public hearing is being held to share information regarding upgrades to existing pedestrian signal features and installation of additional crosswalks to facilitate safe pedestrian crossings at two locations in MassDOT District 5. These sites include Route 27 at the Boston Medical Center South Driveway in Brockton, and Route 6 from Brandt Avenue to Summit Avenue in Dartmouth.

How will this affect you?

These upgrades will make it safer to cross the street at the locations included in this project. This is particularly helpful for people using the bus system. A disproportionate number of crashes involving pedestrians have historically occurred near bus stops.

When
