

Design Public Hearing

Route 79/Davol Street Corridor, Fall River

What is happening?

The purpose of this hearing is to provide the public with the opportunity to become fully acquainted with proposed Corridor Improvements on Route 79/Davol Street Design Build project. All views and comments submitted in response to the hearing will be reviewed and considered to the maximum extent possible.

How will this affect you?

The proposed project includes both design and construction of the Route 79/Davol Street corridor. The existing Route 79 is being relocated approximately onto the current alignments of northbound and southbound Davol Street, which will allow creation of development parcels along the existing Route 79 alignment. The work also includes, but is not limited to, the design and construction of local street connections to the corridor, including Brightman Street, President Avenue, Hathaway Street, and Turner Street. The project also includes the design and construction of a network of shared use paths and sidewalks, and new traffic signals.
