

Bridge Replacement Project on Jacksonville Stage Road (SR 8A) over the West Branch Brook in Heath, MA

What is happening?

The existing bridge carrying Jacksonville Stage Road (SR 8A) over the West Branch Brook in Heath will be replaced with a new bridge structure. The purpose of this Live Virtual Design Public Hearing is to provide the public with the opportunity to become fully acquainted with the project and the proposed work involved. All views and comments made at the hearing will be reviewed and considered to the maximum extent possible.

How will this affect you?

To maintain vehicular traffic during construction, phased construction will be implemented with a single travel lane utilizing temporary traffic control signals. The limit of work is approximately 250 feet on each side of the bridge and 70 feet down Sumner Stetson Road from the intersection with Jacksonville Stage Road (SR 8A).
