

DESIGN PUBLIC HEARING

Project Title

Lanesborough, MA

What is happening?

A Live Virtual Design Public Hearing will be hosted on the MassDOT website below to present the design for the Bridge Street over Town Brook project in Lanesborough, MA.

How will this affect you?

The proposed project consists of the complete replacement of Bridge No. L-03-010 over the Town Brook in Lanesborough, Massachusetts. The bridge, located on Bridge Street, spans the Town Brook with a three-span rolled steel beam superstructure and is located approximately 400 feet west of the intersection of Bridge Street and North Main Street (Route 7). The existing 3-span bridge will be replaced with a single span pre-stressed concrete box beam bridge on new abutments. A new sidewalk on one side of the bridge is proposed along with a share use vehicle/bicycle lane in both directions of travel.
