

LIVE VIRTUAL DESIGN PUBLIC HEARING
Deck Replacement, State Route 119 Over I-495
Littleton, MA

What is happening?

This design public hearing will outline the scope of the proposed bridge preservation project and invite public feedback. The presentation will cover the proposed modifications and the traffic management plan for the construction period.

How will this affect you?

The goal of this project is to extend the service life of the Route 119 bridge over I-495 in Littleton, MA, through comprehensive rehabilitation. Improvements will feature a full deck replacement, structural beam repairs, and the addition of new bridge barriers, a sidewalk, and buffered bike lanes on both sides. The current three-lane traffic configuration will be maintained throughout these upgrades. Additionally, a staged construction plan will be implemented to ensure traffic continues to flow in both directions for the duration of the work.
