

# Design Public Hearing

## Natick – Route 27 over Route 9 Interchange

### What is happening?

The purpose of this hearing is to provide the public with the opportunity to become fully acquainted with the proposed bridge replacement project and interchange improvements. All views and comments submitted in response to the hearing will be reviewed and considered to the maximum extent possible.

### How will this affect you?

The proposed project consists of replacing the structurally deficient Bridge No. N-03-020 which carries North Main Street (Route 27) over Worcester Street (Route 9) and includes the reconfiguration of the interchange to a modified Diverging Diamond Interchange (DDI) configuration. The reconfiguration will provide safety improvements, reduced traffic congestion through the interchange and improved bicycle and pedestrian facilities using separated shared use paths and sidewalks. The project length is approximately 3,850 feet along Route 9 and 2,120 feet along Route 27. The work will also include proposed transit stops along Route 27 and Route 9 along with reconstructed sidewalks, drainage improvements, traffic signals, retaining walls, utility relocations, signing, roadway lighting and landscaping.

### When

**Thursday, June 15<sup>th</sup>, 2023**  
**7:00 PM**
