

Virtual Design Public Hearing

Beachmont Connector Project - Revere, MA

What is happening?

The proposed project is intended to provide multimodal accommodations along the northbound and southbound sides of State Road between Donnelly Square and the intersection of State Road/Ocean Avenue/ Eliot Circle, in Revere, MA. The proposed scope will reduce both northbound and southbound travel ways on State Road from two lanes to a single lane to provide separated bicycle facilities: a two-way separated bike lane along the west side of the southbound lanes and a one-way parking-protected bike lane along the east side of the northbound lanes. The proposed design will improve the sidewalk along both sides of State Road providing a direct, safe and accessible connection for pedestrians and cyclists to the Beachmont MBTA station, Revere Beach and businesses along Ocean Avenue. Crosswalks with accessible ramps are proposed across all side streets and signalized intersections to support pedestrian activity within the project area.

How will this affect you?

The purpose of this hearing is to provide the public with the opportunity to become fully acquainted with the proposed State Road Beachmont Connector Project. All views and comments submitted in response to the hearing will be reviewed and considered to the maximum extent possible.
