

Virtual Design Public Hearing

Salem - Bridge Street (Route 107)

Reconstruction

What is happening?

The purpose of this meeting is to provide the public with the opportunity to become fully acquainted with the proposed Bridge Street Reconstruction project that extends from its intersection with Flint Street to approximately 150 feet west of the Washington Street intersection. All views and comments submitted in response to the meeting will be reviewed and considered to the maximum extent possible.

How will this affect you?

The proposed project consists of a Complete Street design that is context-sensitive and compatible with local planning initiatives. A separated shared-use-path is proposed on both the northerly and southerly sides of Bridge Street, providing a valuable multimodal connection within the community, including to the MBTA garage.

The project will improve resiliency to flooding and enhance traffic safety and operations while implementing traffic calming along the corridor. Other work such as street lighting, landscaping, and streetscape elements that complement the area's historic character will be added.
