

Virtual Design Public Hearing

North Street Bridge over I-495

Bridge No. T-03-013

What is happening?

The purpose of this Design Public Hearing is to provide the public with the opportunity to become fully acquainted with the roadway improvements associated with the replacement of the bridge carrying North Street Bridge over I-495 in Tewksbury.

How will this affect you?

While safe for travel, the bridge carrying North Street over I-495 is deficient and in need of replacement. This project includes the complete replacement of the existing bridge T-03-013 (2L5), carrying North Street over Interstate 495 (I-495) in Tewksbury. The existing structure, a five-span, 273-foot steel stringer bridge, will be replaced with a two-span, 241-foot steel girder bridge. The proposed bridge will be wider than existing to accommodate an additional sidewalk along North Street. North Street will be shifted slightly north to facilitate a phased construction approach that allows North Street to remain open to two-way traffic during construction. The project also includes approach roadway work, multiple utility relocations (underground and overhead), and regrading on the center median of I-495. The Consultant, TEC, Inc., has submitted 25% Plans to MassDOT and is actively working towards 75% Plans.

When

**Thursday, November 12,
2026, 6:00 PM – 7:30 PM**

Attend
