

Virtual Design Public Hearing Bridge Replacement - Long Hill Road Over Quaboag River, West Brookfield, MA

What is happening?

The purpose of this hearing is to provide the public with the opportunity to become fully acquainted with the proposed project. All views and comments submitted in response to the hearing will be reviewed and considered to the maximum extent possible.

How will this affect you?

The project involves a full replacement of the existing structure, increasing the span length from approximately 95 feet to 140 feet. The roadway and the shoulders will be widened in both directions. Shoulder widening has been designed in accordance with applicable standards to better accommodate both bicycle and pedestrian use. The existing sidewalk on the south side will be replaced. New sidewalk ramps will be installed at the bridge approaches as well. Long Hill Road will be repaved for approximately 300 feet on either side to tie in the new bridge to the existing roadway. This work also includes new guardrails, curbing, and drainage structures.
