

Public Information Meeting (PIM) – Cambridge – Memorial Drive Bridge Replacement (Design-Build)

What is happening?

This is a live virtual public information meeting (PIM) to introduce the current design for this important bridge replacement project and to allow an opportunity for public input. The project proposes replacing the bridges carrying First Street and Land Boulevard (Memorial Drive) over the Broad Canal in Cambridge. It also includes bridge preservation on Memorial Drive over a portion of the Charles River and over the ramp to the Longfellow Bridge. Additionally, the project includes related work such as pavement reconstruction on the approach roadways, curb, drainage, sidewalks/shared-use paths, curb ramps, guardrail, utility relocations, and roadway lighting.

How will this affect you?

This project will impact those travelling through this area as it may require disruptions to regular traffic patterns, noise, and visual impacts during construction. These impacts are necessary to demolish the existing bridge and construct the replacement bridge.

When

Tuesday, December 8th, 2026
6:30-8:00 p.m. EST

Attend
