

# Bowker Overpass Bridge Superstructure Replacement and New Bridge Construction Public information Meeting

## What is happening?

MassDOT is replacing and widening the bridge superstructure of the structurally deficient Bowker Overpass over I-90 to better manage traffic patterns, maximize parkland, and re-establish the connection between the Emerald Necklace and the neighborhood.

## How will this affect you?

A Live Virtual Public Information Meeting will be hosted on the MassDOT website below to present the design for the proposed bridge superstructure replacement and widening. This meeting will provide the public with the opportunity to become fully acquainted with the proposed project. Meeting attendees will have the opportunity to ask questions and offer comments.
