

Virtual Project Information Meeting Resurfacing and Related Work on Route 110

What is happening?

The purpose of this meeting is to provide the public with the opportunity to become fully acquainted with the proposed Lowell – Dracut – Methuen – Resurfacing and Related Work on Route 110 project. All views and comments submitted in response to the meeting will be reviewed and considered to the maximum extent possible.

How will this affect you?

The proposed work includes resurfacing 6.3-miles of Route 110 in Lowell, Dracut, and Methuen, from the Merrimack River bike path in Lowell to Riverside Drive in Methuen. The work includes a new shared use path, improved sidewalks, and upgraded pedestrian curb ramps where required and possible. Based on feedback from the Design Public Hearing, the typical width of the shoulder is proposed to be 4 feet on the North side, and a 4-ft buffer on the south side with guardrail or flex posts. Breaks in the guardrail are proposed for driveways and at pedestrian crossings/access points. Flex posts are proposed, in place of guardrail, in areas where there are frequent driveways, and in constrained areas where the shoulder narrows.

When
